(b) By deleting in redesignated paragraphs (g)(1), (h), and (i) the words "metric ton" wherever they appear and inserting in their place "Mg;"

(c) By deleting "(a)" in redesignated paragraph (e) and inserting in its place "(c);"

(d) By deleting the word "tons" in redesignated paragraph (g)(3) and inserting in its place "Mg;"

(e) By deleting "§ 60.195(d)" in redesignated paragraph (h) and inserting in its place "§ 60.195(f);"

(f) Be deleting "§ 60.195(e)" in redesignated paragraph (i) and inserting in its place "§ 60.195(g);"

(g) By adding new paragraphs (a) and (b), and by revising redesignated paragraph (f) as follows:

§ 60.195 Test methods and procedures.

(a) Following the initial performance test as required under §60.8(a), an owner or operator shall conduct a performance test at least once each month during the life of the affected facility, except when malfunction prevent representative sampling, as provided under § 60.8(c). The owner or operator shall give the Administrator at least 7 days advance notice of each test. The Administrator may require additional testing under section 114 of the Clean Air Act.

(b) An owner or operator may petition the Administrator to establish an alternative testing requirement that requires testing less frequently than once each month for a primary control system or an anode bake plant. If the owner or operator shows that emissions from the primary control system or the anode bake plant have low variability during day-to-day operations, the Administrator may establish such an alternative testing requirement. The alternative testing requirement shall include a testing schedule and, in the case of a primary control system, the method to be used to determine primary control system emissions for the purpose of performance tests. The Administrator shall publish the alternative testing requirement in the FEDERAL REGISTER.

* * * * * *

(f) The rate of aluminum production is determined by dividing 720 hours into the weight of aluminum tapped from the affected facility during a period of 30 days prior to and including the final run of a performance test.

* * * * * *

(Sec. 111, 114, 301(a) of the Clean Air Act as amended (42 U.S.C. 7411, 7414, 7601(a)).)

Appendix A—Reference Methods

5. Method 14 is revised to read as follows:

14—Determination of Fluoride Emissions From Potroom Roof Monitors of Primary Aluminum Plants

1. *Principle and applicability.*

1.1 *Principle*—Gaseous and particulate fluoride roof monitor emissions are drawn into a permanent sampling manifold

through several large nozzles. The sample is transported from the sampling manifold to ground level through a duct. The gas in the

above) between output signal and shaft rpm; also, each anemometer must be equipped with a suitable readout system.

For the purpose of recording velocity, "continuous" shall mean one readout per 15-minute or shorter time interval. A constant

through several large nozzles. The sample is transported from the sampling manifold to ground level through a duct. The gas in the duct is sampled using Method 13A or 13B—Determination of Total Fluoride Emissions from Stationary Sources. Effluent velocity and volumetric flow rate are determined with anemometers permanently located in the roof monitor.

1.2 *Applicability*—This method is applicable for the determination of fluoride emissions from stationary sources only when specified by the test procedures for determining compliance with new source performance standards.

2. *Apparatus.*

2.1 *Velocity measurement apparatus.*

2.1.1 *Anemometers*—Propeller anemometers, or equivalent. Each anemometer shall meet the following specifications: (1) Its propeller shall be made of polystyrene, or similar material of uniform density. To insure uniformity of performance among propellers, it is desirable that all propellers be made from the same mold; (2) the propeller shall be properly balanced, to optimize performance; (3) when the anemometer is mounted horizontally, its threshold velocity shall not exceed 15 m/min (50 fpm); (4) the measurement range of the anemometer shall extend to at least 600 m/min (2,000 fpm); (5) the anemometer shall be able to withstand prolonged exposure to dusty and corrosive environments; one way of achieving this is to continuously purge the bearings of the anemometer with filtered air during operation; (6) all anemometer components shall be properly shielded or encased, such that the performance of the anemometer is uninfluenced by potroom magnetic field effects; (7) a known relationship shall exist between the electrical output signal from the anemometer generator and the propeller shaft rpm, at minimum of three rpm settings between 60 and 1800 rpm; note that one of the three rpm settings shall be within 25 percent of 60 rpm. Anemometers having other types of output signals (e.g., optical) may be used, subject to the appoval of the Administrator. If other types of anemometers are used, there must still be a known relationship (as described above) between output signal and shaft rpm; also, each anemometer must be equipped with a suitable readout system.

2.1.2 *Installation of anemometers*—2.1.2.1 If the affected facility consists of a single, isolated potroom (or potroom segment), install at least one anemometer for every 85 meters of roof monitor length. If the length of the roof monitor divided by 85 meters is not a whole number, round the fraction to the nearest whole number to determine the number of anemometers needed. For monitors that are less than 130 m in length, use at least two anemometers. Divide the monitor cross-section into as many equal areas as anemometers and locate an anemometer at the centroid of each equal area.

2.1.2.2 If the affected facility consists of two or more potrooms (or potroom segments) ducted to a common control device, install anemometers in each potroom (or segment) that contains a sampling manifold. Install at least one anemometer for every 85 meters of roof monitor length of the potroom (or segment). If the potroom (or segment) length divided by 85 is not a whole number, round the fraction to the nearest whole number to determine the number of anemometers needed. If the potroom (or segment) length is less than 130 m, use at least two anemometers. Divide the potroom (or segment) monitor cross-section into as many equal areas as anemometers and locate an anemometer at the centroid of each equal area.

2.1.2.3 At least one anemometer shall be installed in the immediate vicinity (i.e., within 10 m) of the center of the manifold (see § 2.2.1). Make a velocity traverse of the width of the roof monitor where an anemometer is to be placed. This traverse may be made with any suitable low velocity measuring device, and shall be made during normal process operating conditions. Install the anemometer at a point of average velocity along this traverse.

2.1.3 *Recorders*—Recorders, equipped with suitable auxiliary equipment (e.g. transducers) for converting the output signal from each anemometer to a continuous recording of air flow velocity, or to an integrated measure of volumetric flowrate. For the purpose of recording velocity, "continuous" shall mean one readout per 15-minute or shorter time interval. A constant amount of time shall elapse between readings. Volumetric flow rate may be determined by an electrical count of anemometer revolutions. The recorders or counters shall permit identification of the velocities or flowrate measured by each individual anemometer.

2.1.4 *Pitot tube*—Standard-type pitot tube, as described in § 2.7 of Method 2, and having a coefficient of 0.99 ± 0.01.

2.1.5 *Pitot tube (optional)*—Isolated, Type S pitot tube, as described in § 2.1 of Method 2. The pitot tube shall have a known coefficient, determined as outlined in § 4.1 of Method 2.

2.1.6 *Differential pressure gauge.*—Inclined manometer or equivalent, as described in § 2.2 of Method 2.

2.2 *Roof monitor air sampling system.*

2.2.1 *Sampling ductwork*—A minimum of one manifold system shall be installed for each 'potroom group' (as defined in Subpart S, § 60.191). The manifold system and connecting duct shall be permanently installed to draw an air sample from the roof monitor to ground level. A typical installation of duct for drawing a sample from a roof monitor to ground level is shown in figure 14-1. A plan of a manifold system that is located in a roof monitor is shown in figure 14-2. These drawings represent a typical installation for a generalized roof monitor. The dimensions on these figures may be altered slightly to make the manifold system fit into a particular roof monitor, but the general configuration shall be followed. There shall be eight nozzles, each having a diameter of 0.40 to 0.50 meters. Unless otherwise specified by the Administrator, the length of the manifold system from the first nozzle to the eighth shall be 35 meters or eight percent of the length of the potroom (or potroom segment) roof monitor, whichever is greater. The duct leading from the roof monitor manifold shall be round with a diameter of 0.30 to 0.40 meters. As shown in figure 14-2, each of the sample legs of the manifold shall have a device, such as a blast gate or valve, to enable adjustment of flow into each sample nozzle.

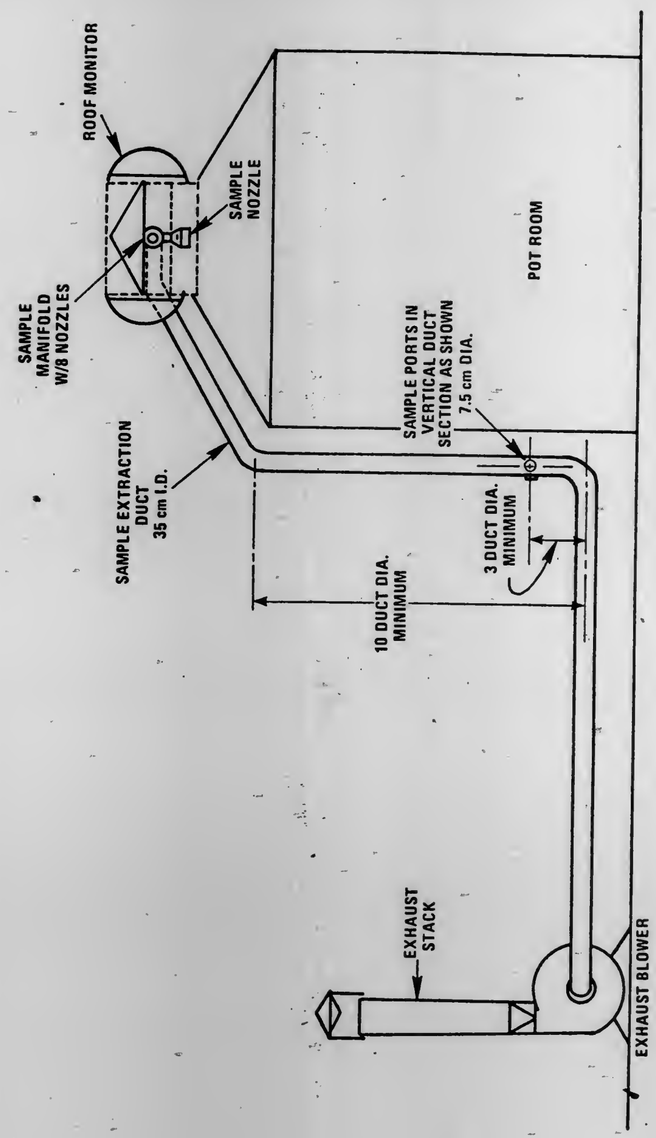

Figure 14-1. Roof monitor sampling system.

The manifold shall be located in the immediate vicinity of one of the propeller anemometers (see § 2.1.2.3) and as close as possible to the midsection of the potroom (or potroom segment). Avoid locating the manifold system in the direct path of any roof openings. Design the manifold system so that the sample is withdrawn isokinetically from the roof monitor. Design the sampling probe and its placement in the roof monitor so that the sample is withdrawn from a point that is representative of the average velocity in the roof monitor. Design the manifold system so that the static pressure in the manifold is sufficiently high to prevent water vapor condensation and to minimize particulate deposition within the manifold system. Design the manifold system so that the velocity of the gas entering the sampling nozzles is sufficiently high to minimize particulate deposition within the nozzles. Design the manifold system so that it has a minimum number of bends and so that sharp bends and abrupt changes in duct cross-section are avoided. Figure 14-2 shows a manifold system which has been found to be satisfactory for most roof monitors.

2.3 *Temperature measurement apparatus.*

2.3.1 *Temperature sensor*—Thermocouple, or equivalent, to measure the temperature of the gas stream within ± 1.5 percent of the minimum absolute temperature measured. Install the temperature sensor at the exit end of the duct, shielded and positioned to avoid radiation effects. Alternatively, the temperature sensor may be installed at the inlet to the exhaust blower.

2.3.2 *Signal Transducer*—Transducer, to change the thermocouple voltage output to a temperature readout.

2.3.3 *Temperature Readout*—Potentiometer, or equivalent, with an accuracy of ± 1.5 percent of the minimum absolute temperature measured.

2.4 *Volumetric flow rate calculation.* Calculate the volumetric flow rate using the specifications outlined in § 2.3 of Method 2.

2.3.2 *Signal Transducer*—Transducer, to change the thermocouple voltage output to a temperature readout.

2.3.3 *Temperature Readout*—Potentiometer, or equivalent, with an accuracy of ± 1.5 percent of the minimum absolute temperature measured.

2.4 *Volumetric flow rate calculation.* Calculate the volumetric flow rate using the specifications outlined in § 2.3 of Method 2.

3. *Reagents.* None required.

4. *Procedure.*

4.1 *Velocity measurement.* Measure the velocity of the gas stream in the roof monitor with the anemometers installed as specified in § 2.1.2. Record the velocity measurements at least once every 15 minutes. Alternatively, record the number of revolutions of each anemometer for each 15-minute period. Record the temperature of the gas stream at least once every hour.

4.2 *Volumetric flow rate calculation.* Calculate the volumetric flow rate using the method outlined in § 4.3 of Method 2.

5. *Calibration.* Maintain a record of the calibration of each anemometer and temperature sensor, and the method of calibration.

6. *Reserved.*

7. *Reserved.*

8. *Reserved.*

V 43 / 182

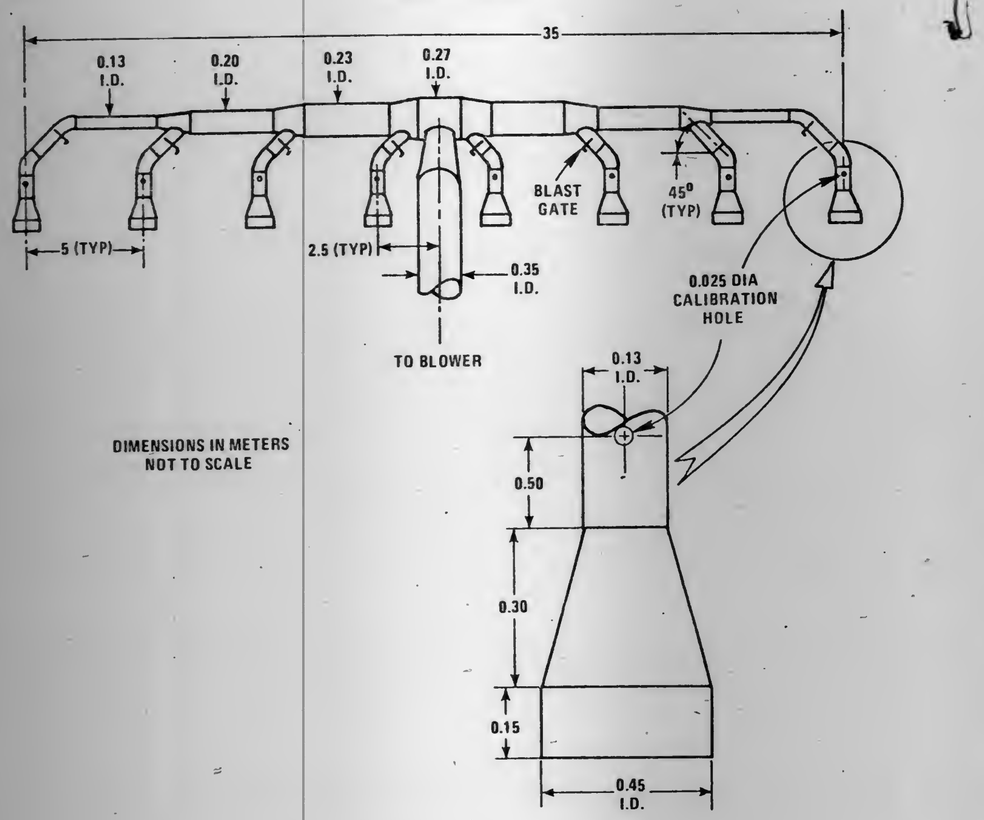

Figure 14-2. Sampling manifold and nozzles.

The manifold shall be located in the immediate vicinity of one of the propeller anemometers (see § 2.1.2.3) and as close as possible to the midsection of the potroom (or potroom segment). Avoid locating the manifold near the end of a potroom or in a section where the aluminum reduction pot arrangement is not typical of the rest of the potroom (or potroom segment). Center the sample nozzles in the throat of the roof monitor (see fig. 14-1). Construct all sample-exposed surfaces within the nozzles, manifold and sample duct of 316 stainless steel. Aluminum may be used if a new ductwork system is conditioned with fluoride-laden roof monitor air for a period of six weeks prior to initial testing. Other materials of construction may be used if it is demonstrated through comparative testing that there is no loss of fluorides in the system. All connections in the ductwork shall be leak free.

Locate two sample ports in a vertical section of the duct between the roof monitor and exhaust fan. The sample ports shall be at least 10 duct diameters downstream and three diameters upstream from any flow disturbance such as a bend or contraction. The two sample ports shall be situated 90° apart. One of the sample ports shall be situated so that the duct can be traversed in the plane of the nearest upstream duct bend.

2.2.2 *Exhaust fan*—An industrial fan or blower shall be attached to the sample duct at ground level (see fig. 14-1). This exhaust fan shall have a capacity such that a large enough volume of air can be pulled through the ductwork to maintain an isokinetic sampling rate in all the sample nozzles for all flow rates normally encountered in the roof monitor.

The exhaust fan volumetric flow rate shall be adjustable so that the roof monitor air can be drawn isokinetically into the sample nozzles. This control of flow may be achieved by a damper on the inlet to the exhauster or by any other workable method.

2.3 *Temperature measurement apparatus.* 2.3.1 *Thermocouple*—Install a thermocouple in the roof monitor near the sample duct. The thermocouple shall conform to the specifications outlined in § 2.3 of Method 2.

2.3.2 *Signal Transducer*—Transducer, to change the thermocouple voltage output to a temperature readout.

2.3.3 *Thermocouple Wire*—To reach from roof monitor to signal transducer and recorder.

2.3.4 *Recorder*—Suitable recorder to monitor the output from the thermocouple signal transducer.

2.4 *Sampling train*—Use the train described in Methods 13A and 13B.

3. *Reagents.*

3.1 *Sampling and analysis.* Use reagents described in Method 13A or 13B.

4. *Calibration.*

4.1 *Propeller anemometers.* 4.1.1 *Initial calibration*—Anemometers which meet the specifications outlined in § 2.1.1 need not be calibrated, provided that a reliable performance curve relating anemometer signal output to air velocity (covering the velocity range of interest) is available from the manufacturer. For the purposes of this method, a "reliable" performance curve is defined as one that has been derived from primary standard calibration data, with the anemometer mounted vertically. "Primary standard" data are obtainable by: (1) Direct calibration of one or more of the anemometers by the National Bureau of Standards (NBS); (2) NBS-traceable calibration; or (3) Calibration by direct measurement of fundamental parameters such as length and time (e.g., by moving the anemometers through still air at measured rates of speed, and recording the output signals). If a reliable performance curve is not available from the manufacturer, such a curve shall be generated, using one of the three methods described immediately above.

4.1.2 *Recalibration*—Extended field use of propeller anemometers can cause deterioration of some of the anemometer components, thus affecting performance. Therefore, a performance-check of each anemometer shall be made before (optional) and after (mandatory) each test series. The performance-check shall be done as outlined in § 4.1.2.1 through 4.1.2.3, below. Alternatively, the tester may use any other suitable method, subject to the approval of the Administrator, that takes into account the signal output, propeller condition and threshold velocity of the anemometer.

4.1.2.1 Check the signal output of the anemometer by using an accurate rpm generator (see fig. 14-3) or synchronous motors to spin the propeller shaft at each of the three rpm settings described in § 2.1.1 above (specification No. 7), and measuring the output signal at each setting. If, at each setting, the output signal is within ±5 percent of its original value, the anemometer can continue to be used. If the anemometer performance is unsatisfactory, the anemometer shall either be replaced or repaired.

4.1.2.2 Check the propeller condition, by visually inspecting the propeller, making note of any significant damage or warpage; damaged or deformed propellers shall be replaced.

4.1.2.3 Check the anemometer threshold velocity as follows: With the anemometer mounted as shown in figure 14-4(A), fasten a known weight (a straight-pin will suffice) to the anemometer propeller, at a fixed distance from the center of the propeller shaft. This will generate a known torque; for example, a 0.1 g weight, placed 10 cm from the center of the shaft, will generate a torque of 1.0 g-cm. If the known torque causes the propeller to rotate downward, approximately 90° (see fig. 14-4(B)), then the known torque is greater than or equal to the starting torque; if the propeller fails to rotate approximately 90°, the known torque is less than the starting torque. By trying different combinations of weight and distance, the starting torque of a particular anemometer can be satisfactorily estimated. Once an estimate of the starting torque has been obtained, the threshold velocity of the anemometer (for horizontal mounting) can be estimated from a graph such as figure 14-5. If the horizontal threshold velocity is acceptable [<16.7m/min (55 fpm), when this technique is used], the anemometer can continue to be used. If the threshold velocity of an anemometer is found to be unacceptably high, the anemometer shall either be replaced or repaired.

SEP 19 78

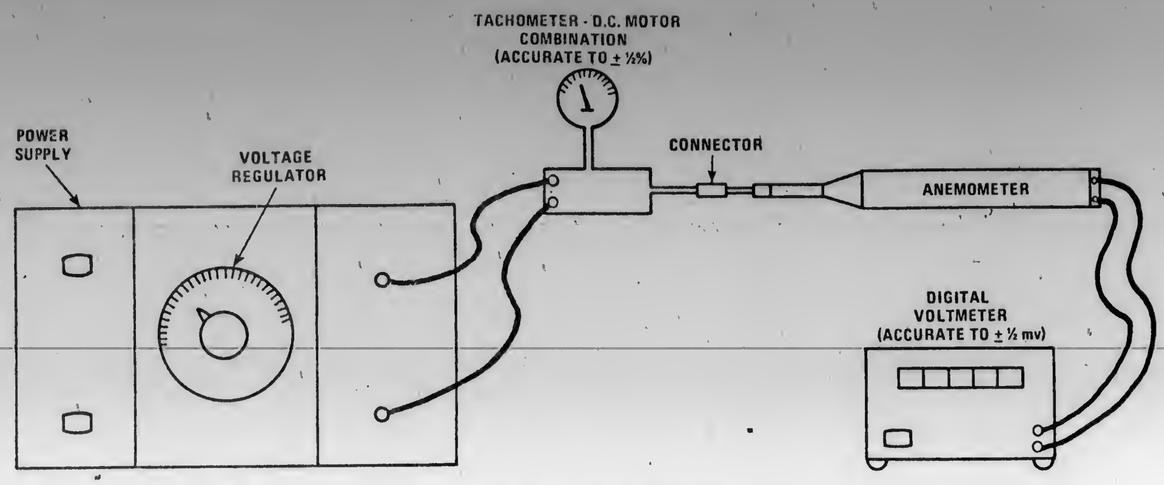

Figure 14-3. Typical RPM generator.

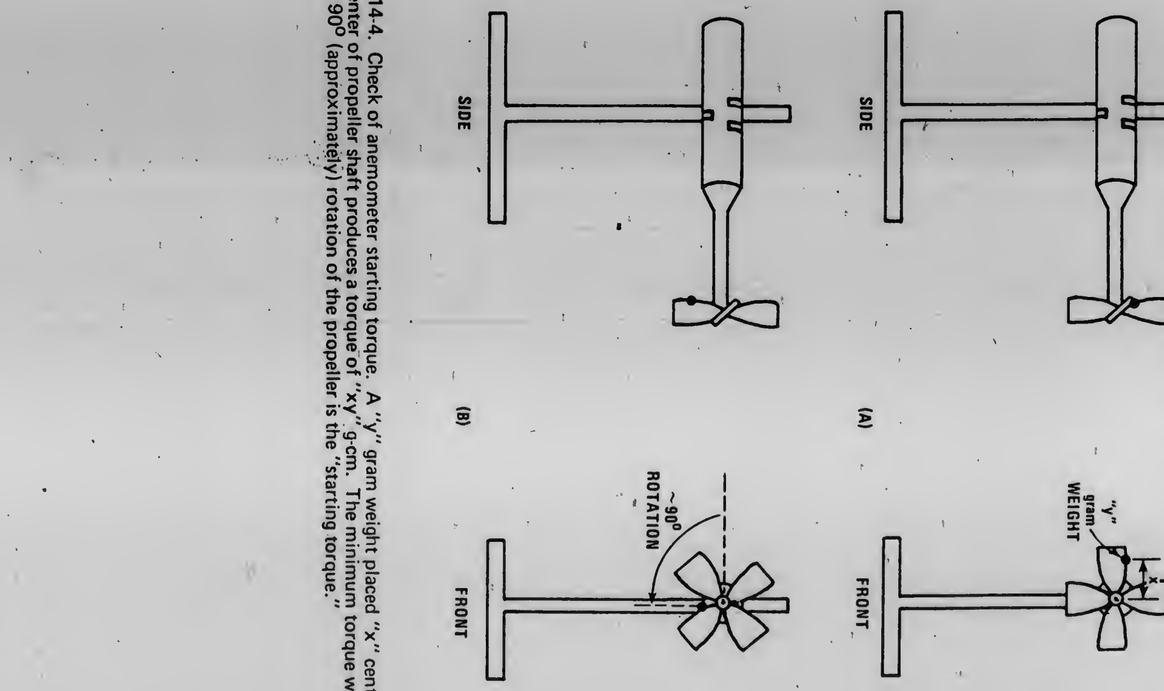

Figure 14-4. Check of anemometer starting torque. A "y" gram weight placed "x" centimeters from center of propeller shaft produces a torque of "xy" g-cm. The minimum torque which produces a 90° (approximately) rotation of the propeller is the "starting torque."

4.1.2.4 If an anemometer fails the post-test performance-check (i.e., if repair or replacement of any anemometer components is necessary), proceed as follows: (1) Calibrate the anemometer as received (i.e., before repair or replacement), (2) repair or replace components as necessary, (3) calibrate the repaired anemometer, and (4) report both sets of calibration data. If the anemometer, as received, is found to be out of calibration, by an average amount greater than 5 percent for the three calibration points, proceed as follows: (1) Based on the results of the post-test calibration, adjust the data from the test runs in accordance with the anemometer manufacturer's instructions, or (2) void the test runs. If adjustment is selected, the corrected data shall be used to calculate the particulate emission rate. If the anemometer, as received, is found to be out of calibration by an average amount greater than 10 percent for the three calibration points, void the test runs.

4.1.2.5 Isokinetic Nest. Verify that the correct average stream velocity has been achieved, by performing a pitot tube traverse of the sample duct isokinetically into the manifold nozzles.

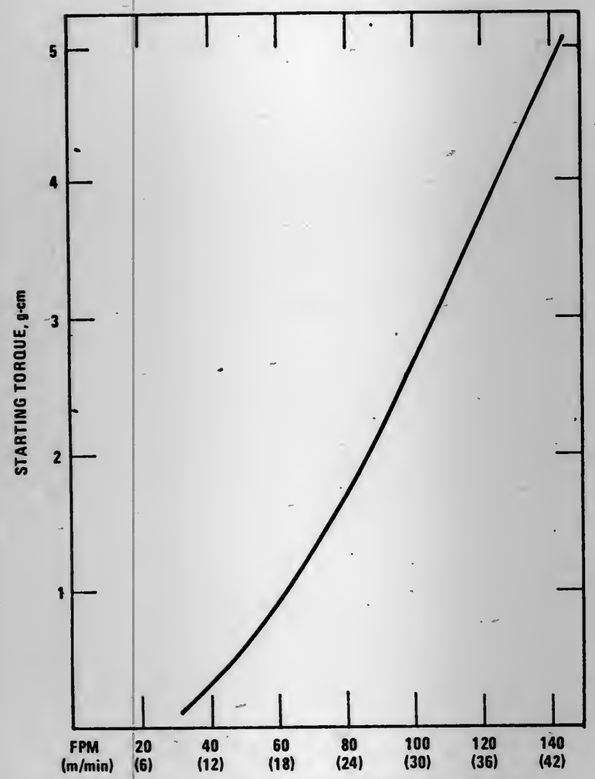

Figure 14-5. Typical curve of starting torque vs horizontal threshold velocity for propeller anemometers. Based on data obtained by R.M. Young Company, May, 1977.

4.1.2.4 If an anemometer fails the post-test performance-check (i.e., if repair or replacement of any anemometer components is necessary), proceed as follows: (1) Calibrate the anemometer (before repairing it), using one of the three methods described in section 4.1.1, above. Alternatively, the anemometer may be calibrated against another propeller anemometer that meets the specifications of section 2.1.1 (a detailed procedure is described in Citation 1 of section 7); (2) referring to the calibration curve obtained in step (1), recalculate (for each run) the average velocity (v) for the anemometer, using the data print-out obtained during the test series; (3) Compare each recalculated value of v against the reported value. If the recalculated value of v is less than the reported value, no adjustment in the reported overall average velocity for the run shall be made. If, however, the recalculated value of v exceeds the reported value, replace the reported value of v with the recalculated value, and then recompute the overall average velocity (and total flowrate).

NOTE.—If the anemometer located in the section of the roof monitor containing the sampling manifold fails the performance check, additional emission rate adjustments may be necessary (see section 6.1).

4.2 *Manifold Intake Nozzles.*—Adjust the exhaust fan to draw a volumetric flow rate (refer to equation 14-1) such that the entrance velocity into each manifold nozzle approximates the average effluent velocity in the roof monitor. Measure the velocity of the air entering each nozzle by inserting a standard pitot tube into a 2.5 cm or less diameter hole (see fig. 14-2) located in the manifold between each blast gate (or valve) and nozzle. Note that a standard pitot tube is used, rather than a type S, to eliminate possible velocity measurement errors due to cross-section blockage in the small (0.13 m diameter) manifold leg ducts. The pitot tube tip shall be positioned at the center of each manifold leg duct. Take care to insure that there is no leakage around the pitot tube, which could affect the indicated velocity in the manoifold leg. If the velocity of air being drawn into each nozzle is not the same, open or close each blast gate (or valve) until the velocity in each nozzle is the same. Fasten each blast gate (or valve) so that it will remain in this position and close the pitot port holes. This calibration shall be performed when the manifold system is installed.

NOTE.—It is recommended that this calibration be repeated at least once a year.

4.3 *Thermocouple.*—After each test series, the thermocouple shall be calibrated, using the procedures outlined in section 4.3 of method 2.

4.4 *Recorders and/or Counters.*—After each test series, check the calibration of each recorder and/or counter that was used (see section 2.1.3). Check the recorder or counter calibration at a minimum of three points, approximately spanning the range of velocities observed during the test series, use the calibration procedures recommended by the manufacturer, or other suitable procedures (subject to the approval of the Administrator). If a recorder or counter is found to be out of calibration, by an average amount greater than 5 percent for the three calibration points, proceed as follows: (1) Based on the results of the post-test calibration check, recalculate (for each run) the average velocity (v) for the anemometer that was connected to the recorder during the test series. If a particular recalculated value of v is less than the reported value, no adjustment in the reported overall average velocity for the run shall be made. If, however, the recalculated value of v is greater than the reported value, replace the reported value of v with the recalculated value, and recompute the overall average velocity (and total flowrate).

NOTE.—If the malfunctioning recorder or counter was connected to the anemometer in the section of the roof monitor containing the sampling manifold, additional emission rate adjustments may be necessary (see § 6.1).

5. *Procedure.*

5.1 *Roof Monitor Velocity Determination.* 5.1.1 *Velocity estimate(s) for setting isokinetic flow*—To assist in setting the flow in the manifold sample nozzles to isokinetic, the anticipated average velocity in the section of the roof monitor containing the sampling manifold shall be estimated prior to each test run. The tester may use any convenient means to make this estimate (e.g., the velocity indicated by the anemometer in the section of the roof monitor containing the sampling manifold may be continuously monitored during the 24-hour period prior to the test run.

If there is question as to whether a single estimate of average velocity is adequate for an entire test run (e.g., if velocities are anticipated to be significantly different during different potroom operations), the tester may opt to divide the test run into two or more "sub-runs," and to use a different estimated average velocity for each sub-run (see § 5.3.2.2).

5.1.2 *Velocity determination during a test run.*—During the actual test run, record the velocity or volumetric flowrate readings of each propeller anemometer in the roof monitor. readings shall be taken for each anmometer every 15 minutes or at shorter equal time intervals (or continuously).

5.2 *Temperature recording.* Record the temperature of the roof monitor every 2 hours during the test run.

5.3 *Sampling.* 5.3.1 *Preliminary air flow in duct.*—During the 24 hours preceding the test, turn on the exhaust fan and draw roof monitor air through the manifold duct to condition the ductwork. Adjust the fan to draw a volumetric flow through the duct such that the velocity of gas entering the manifold nozzles approximates the average velocity of the air exiting the roof monitor in the vicinity of the sampling manifold.

5.3.2 *Isokinetic sample rate adjustment(s)*—5.3.2.1 *Initial adjustment.*—Prior to the test run (or first sub-run, if applicable; see §§ 5.1.1 and 5.3.2.2), adjust the fan to provide the necessary volumetric flowrate in the sampling duct, so that air enters the manifold sample nozzles at a velocity equal to the appropriate estimated average velocity determined under § 5.1.1, Equation 14-1 gives the correct stream velocity needed in the duct at the sampling location, in order for sample gas to be drawn isokinetically into the manifold nozzles. Nest, verify that the correct average stream velocity has been achieved, by performing a pitot tube traverse of the sample duct (using either a standard or type S pitot tube); use the procedure outlined in method 2.

$$V_d = \frac{\pi (D_n)^2}{(D_d)^2} (V_m) \frac{1 \text{ minute}}{60 \text{ sec}} \quad \text{(Equation 14-1)}$$

Where:

V_d = Desired velocity in duct at sampling location, meters/sec.

D_n = Diameter of a roof monitor manifold nozzle, meters.

D_d = Diameter of duct at sampling location, meters.

V_m = Average velocity of the air stream in the roof monitor, meters/minute, as determined under § 5.1.1.

5.3.2.2 *Adjustments during run.*—If the test run is divided into two or more "sub-runs" (see § 5.1.1), additional isokinetic rate adjustment(s) may become necessary during the run. Any such adjustment shall be made just before the start of a sub-run, using the procedure outlined in § 5.3.2.1 above.

NOTE.—Isokinetic rate adjustments are not permissible during a sub-run.

5.3.3 *Sample train operation.*—Sample the duct using the standard fluoride train and methods described in methods 13A and 13B. Determine the number and location of the sampling points in accordance with method 1. A single train shall be used for the entire sampling run. Alternatively, if two or more sub-runs are performed, a separate train may be used for each sub-run; note, however, that is this option is chosen, the area of the sampling nozzle shall be the same (±2 percent) for each train. If the test run is divided into sub-runs, a complete traverse of the duct shall be performed during each sub-run.

5.3.4 *Time per run.*—Each test run shall last 8 hours or more; if more than one run is to be performed, all runs shall be of approximately the same (±10 percent) length. If question exists as to the representativeness of an 8-hour test, a longer period may be selected. Conduct each run during a period when all normal operations are performed underneath the sampling manifold. During the test period, all pots in the potroom group shall be operated such that emissions are representative of normal operating conditions in the potroom group.

5.3.5 *Sample recovery.*—Use the sample recovery procedures described in method 13A or 13B.

5.4 *Analysis.*—Use the analysis procedures described in method 13A or 13B.

6. *Calculations.*

6.1 *Isokinctic sampling check.* 6.1.1 Calculate the mean velocity (V_m) for the sampling run, as measured by the anemometer in the section of the roof monitor containing the sampling manifold. If two or more sub-runs have been performed, the tester may opt to calculate the mean velocity for each sub-run.

6.1.2 Using equation 14-1, calculate the expected average velocity (V_d) in the sam-

pling duct, corresponding to each value of V_m obtained under § 6.1.1.

6.1.3 Calculate the actual average velocity in the sampling duct for each run or sub-run, using the data obtained under § 5.1.1.

sampling train was used throughout the run, calculate the average fluoride concentration for the roof monitor using equation 13A-5 of method 13A.

where:

Q_m = Average volumetric flow from roof monitor at standard conditions on a dry

TUESDAY, SEPTEMBER 19, 1978
PART VII

V 43 / 182 SE 19 78

pling duct, corresponding to each value of V_m obtained under § 6.1.1.

6.1.3 Calculate the actual average velocity (v_s) in the sampling duct for each run or sub-run, according to equation 2-9 of method 2, and using data obtained from method 13.

6.1.4 Express each value of v_s from § 6.1.3 as a percentage of the corresponding V_d value from § 6.1.2.

6.1.4.1 If v_s is less than or equal to 120 percent of V_d, the results are acceptable (note that in cases where the above calculations have been performed for each sub-run, the results are acceptable if the average percentage for all sub-runs is less than or equal to 120 percent)

6.1.4.2 If v_s is more than 120 percent of V_d, multiply the reported emission rate by the following factor:

$$\frac{100\,\frac{v_s}{V_d} - 120}{1 + \frac{v_s}{200}}$$

6.2 *Average velocity of roof monitor gases.* Calculate the average roof monitor velocity using all the velocity or volumetric flow readings from § 5.1.2.

6.3 *Roof monitor temperature.* Calculate the mean value of the temperatures recorded in § 5.2.

6.4 *Concentration of fluorides in roof monitor air (in mg F/m³).* 6.4.1 If a single sampling train was used throughout the run, calculate the average fluoride concentration for the roof monitor using equation 13A-5 of method 13A.

6.4.2 If two or more sampling trains were used (i.e., one per sub-run), calculate the average fluoride concentration for the run, as follows:

$$\overline{C}_s = \frac{\sum_{i=1}^{n} (F_t)_i}{\sum_{i=1}^{n} (V_{m(std)})_i} \qquad \text{(Equation 14-2)}$$

where:

C_s = Average fluoride concentration in roof monitor air, mg F/dscm.

$(F_t)_i$ = Total fluoride mass collected during a particular sub-run, mg F (from equation 13A-4 of method 13A or equation 13B-1 of method 13B).

$(V_{m(std)})_i$ = Total volume of sample gas passing through the dry gas meter during a particular sub-run, dscm (see equation 13A-1 of method 13A).

n = Total number of sub-runs.

6.5 Average volumetric flow from the roof monitor of the potroom(s) (or potroom segment(s)) containing the anemometers is given by equation 14-3.

$$Q_m = \frac{V_{mt}\,(A)\,(M_d)\,P_m\,(293°K)}{(T_m + 273°)\,(760\ mm\ Hg)} \qquad \text{(Equation 14-3)}$$

where:

Q_m = Average volumetric flow from roof monitor at standard conditions on a dry basis, m³/min.

A = Roof monitor open area, m².

V_{mt} = Average velocity of air in the roof monitor, meters/minute, from § 6.2.

P_m = Pressure in the roof monitor; equal to barometric pressure for this application, mm Hg.

T_m = Roof monitor temperature, °C, from § 6.3.

M_d = Mole fraction of dry gas, which is given by:

$$M_d = \frac{100 - 100(B_{ws})}{100}$$

NOTE.—B_{ws} is the proportion by volume of water vapor in the gas stream, from equation 13A-3, method 13A.

ANIMAL WELFARE ACT

Proposed Standards and Regulations for the Humane Handling, Care, Treatment, and Transportation of Marine Mammals

AGENCY: Animal and Plant Health Inspection Service (USDA).

ACTION: Proposed rule.

SUMMARY: This document proposes regulations and standards under the Animal Welfare Act which would remove warmblooded aquatic animals or marine mammals from the list of species of warmblooded animals exempted by regulation and would bring them under the jurisdiction and protection of the Animal Welfare Act. The Marine Mammal Commission has recommended that the Secretary of Agriculture adopt certain standards under the Animal Welfare Act to govern the humane handling, care, treatment, and transportation of marine mammals. Regulations and standards were first proposed and published in the FEDERAL REGISTER on August 19, 1977. Comments and recommendations were received from the public and the Marine Mammal Commission. This Department has evaluated the comments and recommendations and has decided to modify the proposal of August 19, 1977, and to republish it as a proposed amendment to the regulations and standards under the Animal Welfare Act to govern the humane handling, care, treatment, and transportation of marine mammals.

DATE: Comments on or before November 20, 1978.

ADDRESSES: Comments to Deputy Administrator, USDA, APHIS, VS, Room 703, Federal Building, 6505 Belcrest Road, Hyattsville, Md. 20782. Comments are available for inspection at the above address during regular hours of business (8 a.m. to 4:30 p.m. Monday through Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT:

Dr. Dale F. Schwindaman, Senior Staff Veterinarian, Animal Care Staff, Veterinary Services, Animal and Plant Health Inspection Service, United States Department of Agriculture, Room 703, Federal Building, 6505 Belcrest Road, Hyattsville, Md. 20782, telephone number 301-436-8271.

SUPPLEMENTARY INFORMATION: On August 19, 1977, the Animal and Plant Health Inspection Service (APHIS) published a proposed rulemaking under the Animal Welfare Act (42 FR 42044) which proposed standards and regulations for the humane handling, care, treatment, and transportation of marine mammals when maintained in captivity. This proposed rulemaking would amend Parts 1 and 3, Subchapter A, Chapter I, of the Code of Federal Regulations. The Animal Welfare Act, as amended (7 U.S.C. 2131 et seq.), requires the Secretary to promulgate regulations and to set standards governing the humane handling, care, treatment, and transportation of animals by dealers, research facilities, exhibitors, and operators of auction sales. Such standards must include such specific areas as (1) handling, (2) housing, (3) feeding, (4) watering, (5) sanitation, (6) ventilation, (7) transportation, (8) shelter from extremes of temperature, (9) adequate veterinary care, and (10) separation of species, to provide the animals with the minimum essentials to maintain them in a state of good health.

Following publication of the proposed rulemaking on August 19, 1977 (42 FR 42044), a 60-day period was designated for the purpose of inviting public comment. During the comment period, three informal public hearings were held at different locations within the United States to provide the public the opportunity to voice its opinion regarding the proposed rulemaking. A notice regarding two of these meetings was announced in the FEDERAL REGISTER on September 13, 1977 (42 FR 45934). The first meeting was held on September 26, 1977, in Los Angeles, Calif., and the second in Miami Springs, Fla. on September 29, 1977. A third meeting was announced in the FEDERAL REGISTER on October 4, 1977 (42 FR 53968). It was held in College Park, Md., on October 18, 1977. The proceedings of all three meetings were recorded, and all the discussions and comments are a matter of public record. Written comments were also received during the comment period and are on file and available to the public.

At the end of the comment period there were 49 letters and written statements received with regard to the proposed rulemaking. In summary, the comments from the private sector of the public, including individuals who apparently do not have any direct interest in marine mammals consist of the following: One was opposed to APHIS' proposals as being much too lenient; there were 14 which generally agreed with the proposals and suggested that a few areas be strengthened, and there was one which agreed but indicated that extensive changes should be made. Comments from the various animal welfare groups consisted of one which was opposed to all the proposed standards as being too mild, and four which agreed with the standards as written. Most comments came from the industry such as zoos, circuses, universities, research facilities, and others who will be primarily affected by the new requirements. None of these agreed with the proposal as written. There were two which opposed any form of regulation over marine mammals. Fourteen agreed with the basic concept of the proposal but strongly urged modifications. The Marine Mammal Commission supported the basic concept of the proposal but noted that the provisions of the proposed regulations were not consistent with those it had recommended to the Department in 1975. It recommended that the Department modify the provisions to make them consistent with its recommendations. In order to more fully discuss such recommendations, the representatives of the Commission requested a meeting with the Department prior to publication of this proposal. Such a meeting was held on July 20 and 21, 1978, in Departmental offices of USDA.

The various comments that were received with regard to the proposed rulemaking and the recommendations of the Marine Mammal Commission were evaluated by this Department, and it was determined that several areas needed extensive revision. Therefore, the Department has decided to redraft the original proposal and to republish the regulations and standards as a proposed rulemaking.

Notice is hereby given in accordance with the administrative provisions in 5 U.S.C. 553, that, pursuant to the provisions of the Animal Welfare Act (7 U.S.C. 2131 et seq.), the Department of Agriculture is proposing (1) to amend the regulations under the Act (9 CFR 1.1) to revise the definition of "animal" to include marine mammals, to add the term "pool" to the definition of "primary enclosure", and to define the term "minimum horizontal dimension"; and (2) to provide new standards (9 CFR 3.1 et seq.) regarding the humane handling, care, treatment, and transportation of marine mammals.

These proposed standards and regulations would apply for the humane handling, care, and treatment of all marine mammals maintained in captivity. All facilities which house marine mammals in captivity would be required to comply with the proposed standards and regulations unless they are granted written permission by the Secretary to maintain a facility which does not meet every requirement of the standards and regulations. Such

permission would only be granted upon written application and upon the submission of all the information requested by the Secretary regarding the facility seeking such permission.

It is proposed herein that facilities housing marine mammals be allowed to obtain such permission to operate under license even though they may not be in full compliance with the standards for two reasons. The first of these is that there may be existing facilities containing healthy and well kept marine mammals, which do not meet the proposed requirements in every respect. The area of marine mammal care is relatively new to the Department and some of the requirements of the standards may go substantially beyond the requirements of the Animal Welfare Act, i.e., minimum standards for the humane handling, care, and treatment of marine mammals. It would therefore be unfair for the Department to demand that such facilities immediately comply with every standard or face administrative or criminal action for failure to do so. During the time period in which deviation from the requirements would be allowed (a maximum period is 4 years from the effective date of the regulations and standards), the Department would have an opportunity to further research the various aspects of marine mammal care, and to amend the requirements when deemed appropriate. The second reason for proposing to allow permission for deviation from the standards is a purely economic and practical one. If a facility needs to make extensive structural changes to come into full compliance, it may need enough time to be able to accomplish this task since renovation or new construction could entail a great amount of money as well as time. An exemption to deviate from the standards would also be granted by the Secretary in cases where a facility wishes to experiment in the area of maintaining marine mammals in captivity.

A request for permission to operate a facility that deviates from the proposed standards, or a facility which requests a temporary exemption to experiment with basic husbandry practices of maintaining marine mammals in captivity, would not be considered a right. The Secretary could deny such requests if he determines that granting them would be harmful or detrimental to the good health and well-being of the marine mammal involved.

The standards and regulations would become effective 90 days after publication as a final rulemaking in the FEDERAL REGISTER. It is proposed herein that within that 90-day period all facilities housing marine mammals be required to apply to the Deputy Administrator of APHIS to have their marine mammal facilities inspected by Department inspectors. A facility already licensed by the Department as an exhibitor or as a research facility having marine mammal housing areas which are in compliance with the Act would need no further license. Facilities not licensed by the Department would be issued a license provided they were in compliance with all the standards and regulations.

Any facility not totally in compliance at the time of the inspection would have the opportunity to obtain permission from the Secretary to operate as a licensee under the Act. Such permission would be in writing and all existing deficiencies would be listed thereon. A timetable would be required to be submitted to the Secretary, by the applicant, for correction of such deficiencies: *Provided, however,* That any facility having such serious deficiencies that the good health and well-being of the marine mammals contained therein are in jeopardy, would be required to immediately correct such deficiencies. A maximum of 4 years from the effective date of these standards and regulations would be granted for extensive new or renovative construction to bring the facility into total compliance with the Act. A determination would have to be made by representatives of the Secretary at the time of the first inspection, as to the priorities of correcting the deficiencies.

On evaluating the comments received, there appears to be some confusion under what authority this Department is proposing these regulations and standards. There is also some question regarding the duplication of authority of other Government departments or agencies in regulating marine mammals. The authority to promulgate the regulations and to set standards for the humane handling, care, treatment, and transportation of captive marine mammals by dealers, research facilities, exhibitors, and operators of auction sales was given to the Secretary of Agriculture by the 1970 Amendments to the Animal Welfare Act (Pub. L. 91-579). Such authority was extended to cover carriers and intermediate handlers by the Animal Welfare Act Amendments of 1976 (Pub. L. 94-279). The Secretary temporarily exempted warmblooded aquatic animals or marine mammals by regulation and is now prepared to remove them from exemption.

Under provisions of the Marine Mammal Protection Act of 1972) Pub. L. 92-522), the administrative responsibility for regulating marine mammals in the wild, and those removed from the wild and held in captivity after the effective date of the Act, was given by Congress to the Departments of Commerce and the Interior. Those Departments have prescribed the regulations that apply to such animals. Such authority is exercised through a permit system whereby permits to obtain new marine mammals or replacements from the wild are issued, provided that the applicants for such permits comply with provisions of these permits with respect to the handling and care of the animals. The authority of the Department of Agriculture extends to marine mammals held in captivity regardless of when they were taken. There appears to be some overlap and duplication of effort between the two Acts, but in fact, they dovetail very nicely and each agency has its own area of responsibility. The Departments of Commerce and the Interior have indicated their interest to enter into an agreement with USDA for purposes of regulating the maintenance in captivity of marine mammals that would otherwise be subject to their jurisdiction and regulations when these proposed regulations and standards become effective.

The Marine Mammal Commission, created by the Marine Mammal Protection Act of 1972, was given the responsibility of studying and recommending to the Secretaries of Commerce and the Interior, and to other Federal officials, such steps as it deems necessary or desirable for the protection and conservation of marine mammals. It has recommended that the Secretary of Agriculture remove marine mammals from the list of species exempted by regulation from coverage under the Animal Welfare Act and adopt certain standards and regulations for their humane handling, care, treatment, and transportation. Such recommendation and supporting technical data have been used as the basis for proposing these proposed amendments to the regulations and standards under the Animal Welfare Act. Prior to obtaining this data and other information regarding marine mammals, this Department did not have sufficient information on which it could base such regulations and standards.

In developing the proposed standards, this Department relied on information and recommendations from many sources, including the Marine Mammal Commission, and also added numerous paragraphs so that the proposed standards would conform to the present standards which apply to all other warmblooded species covered by the Animal Welfare Act. This is especially true with respect to the transportation standards which are required by the 1976 Amendments to the Animal Welfare Act and which would apply to common carriers and intermediate handlers.

The proposed regulations and standards apply to several orders and many species of marine mammals which

have significant differences with respect to their biological and behavioral requirements. In all cases, the goal of the proposed regulations and stand-

have significant differences with respect to their biological and behavioral requirements. In all cases, the goal of the proposed regulations and standards is to provide each individual marine mammal with at least minimum acceptable conditions consistent with its good health and well-being, in reference to its physical requirements and behavioral characteristics. It should be understood, however, that the Department is still developing new information regarding the proper procedure for maintaining marine mammals in captivity and that the standards and regulations proposed herein may, in some instances, be more or less than the minimum required. As new information regarding marine mammals is acquired, the Department expects to amend the standards and regulations accordingly.

Standards relating to the humane handling, care, treatment, and transportation of animals currently covered by the Animal Welfare Act are contained in 9 CFR part 3, subparts A, B, C, D, and E. The individual subparts are oriented to similar kinds or classes of animals and have many sections which are equally applicable to the humane handling, care, and treatment of all animals. It is proposed that subpart E of the standards be redesignated as subpart F and be renumbered accordingly, and that a new subpart E be added to the standards containing the minimum standards for marine mammals.

Discussion of Comments

Comments Regarding Facilities, Health, and Husbandry

There were several comments received stating that the proposed requirement, "that the surfaces within the primary enclosure pool and the area immediately surrounding the pool should provide a nonporous, waterproof finish, free of cracks or imperfect junctures," was impossible. The Department does not intend to say that cracks and imperfect junctures would not occur, but if cracks appeared or if there were settling or upheavals, then these would be required to be repaired as part of a regular ongoing maintenance program. Furthermore, it would be expected that an effort would be made to avoid or minimize such imperfections during construction. Broken cement is unsightly and indicates neglect, as well as being a health hazard to the animals, as it is difficult if not impossible to clean properly.

With regard to primary enclosures in general, the Marine Mammal Commission pointed out that in the original proposal there were no provisions for facilities commonly found in coastal areas which house marine mammals in tidal basins, bays, and estuaries. This type of primary enclosure would usually consist of a natural inlet which is fenced to house marine mammals. The water in such an enclosure is circulated naturally by tidal action or currents.

It is the determination of this Department that this type of primary enclosure would be required to meet or exceed the proposed standards and regulations with regard to the minimum space requirements of both the pool and resting areas, depth of the water (at the lowest tide), and the applicable sanitation regulations. Very little construction is actually done in a natural primary enclosure pool other than the fence. Therefore, it is proposed herein that such pools be exempt from the surface, construction, and drainage requirements proposed herein. However, the support facilities surrounding the primary enclosure would be required to meet or exceed all the proposed standards and regulations, and the fence and the enclosure itself would be required to meet the standards with respect to protection of the marine mammals from injury.

Facilities constructed near a source of natural water, and using the water for pool water in the primary enclosure, would be required to meet or exceed all parts of the proposed standards and regulations. Water quality would be required to be monitored and the discharge of the drainage effluent would be required to meet local, State, and Federal requirements for waste disposal.

Modern day pollution of natural waterways is a real problem, and facilities utilizing natural water would have to continually monitor the water quality to assure the water used in the primary enclosure pool is not harmful or detrimental to the good health and well-being of the marine mammals housed therein.

It is proposed that the area immediately surrounding the pool, especially in primary enclosures for pinnipeds, can be any surface such as rocks, sand, dirt, etc., as long as it can be properly cleaned.

One comment stated that the proposal would require a sterile exhibit and that no provisions for any "decorations" or "furniture" were made. This was not the intent of the regulations. Rocks, logs, or any other objects would be allowed to be placed in the enclosure for decoration or for the comfort or entertainment of the marine mammals, as long as such objects could be cleaned on a daily basis along with the rest of the interior of the enclosure. These objects would not be allowed to occupy space in the enclosure which is necessary to meet the minimum resting and social activity requirements of the animals.

Another comment regarding the original proposal consisted of a request for the deletion of part of a sentence, i.e., "to restrict the entrance of other animals" (§ 3.100(a)(1)), when describing the general construction requirements for primary enclosures, because in natural enclosures that are located in tidal basins or near bays and estuaries, small fish swim in and out of the enclosures. The Department does not intend to restrict the desirable or unobjectionable animals, such as small fish, gulls, or other birds, from entering the enclosure but intends to prevent the entrance of unwanted animals. This clarification is therefore reflected in this proposal.

There were several comments that the first proposal did not allow for public feeding or for petting pools whereby the public is allowed to actually touch the captive marine mammals. The proposed regulations did not prohibit public feeding or petting pools but stated that in the event there were no effective physical barriers to keep the public from injuring the animals or the animals from injuring the public, then close or constant supervision must be maintained at all times when there would be marine mammal/public contact. This means an employee or attendant would need to be physically present to exercise such supervision at the exhibit during the contact period.

There were numerous comments that emergency backup equipment at facilities would be expensive and unnecessary to provide for the animals in case of failure of the primary source. It was not intended that both power and water sources be present at all times on the premises. The regulation as proposed would allow for portable powerplants to be brought in for emergency use. Water could be hauled in, or any method could be used to bring in water for swimming, drinking, or cleaning purposes as long as the animals were not caused to suffer because of the failure. Although the power and water failure would not present an immediate problem to the animals, it would be very difficult to maintain water quality and provide for proper cleaning if the failure lasted for an extended period. Therefore, it is proposed herein that written contingency plans be provided to the Department for approval concerning supplying power and water in the event of an emergency failure of the primary sources. The plan must be capable of being implemented before the health and well-being of the marine mammal is jeopardized.

With regard to drainage, the former proposal stated that not only must proper drainage be present at the primary enclosure pool but also at the resting and social activity areas immediately around the pool in order to allow for complete drainage which would facilitate thorough cleaning. Furthermore, that proposal stated that the area immediately around the pool be sloped or graded toward drains to prevent soiled or contaminated water from reentering the pool. It was also proposed that all water, whether splashed from the pool, rainwater, or water used for cleaning purposes, should drain away from the pool and be disposed of in a manner that complies with all applicable State, Federal, and local antipollution laws.

Several comments were received regarding these proposed requirement, some stating that there are many well-operated facilities in which all drainage slopes toward the pool, this being especially true in closed systems that continually recirculate saltwater. Most localities prohibit the discharge of saltwater into public drainage systems as a violation of the antipollution laws. Therefore, all saltwater must be recovered for recirculation. Facilities with this type of drainage must have extremely efficient filtration systems with fast turnover or recirculation rates in order to maintain proper water quality standards. After giving these factors due consideration, the Department proposes to relax the proposed drainage requirements to allow the drainage to reenter the pool provided that proper water quality can be maintained.

There were several comments received with regard to the proposed requirements for indoor housing of marine mammals. Most of the comments concerned the ambient air and water temperatures in such housing. Eleven of the comments were of the opinion that the proposed temperature ranges were unnecessary. After due consideration of the comments received, the Department has determined not to impose the temperature ranges, as previously proposed. The reason for this decision is due to the number of adverse comments received stating that certain species of marine mammals cannot tolerate the upper proposed temperature range and other species cannot tolerate the lower proposed temperature range, and that even experts in the field do not agree that an optimum temperature can be found for all marine mammals.

Since the maximum and minimum acceptable temperatures for every known species of marine mammal have not been documented by scientific research, they are not available to the Department whereby they can be incorporated into the standards and regulation for each species. Nevertheless, this Department realizes that maintaining appropriate ambient air and water temperatures is vital to the good health and well-being of marine mammals. Therefore, although no specific temperature range is required by this proposal, it is proposed herein that the air and water temperatures in indoor facilities shall be sufficiently regulated by heating or cooling to protect the marine mammals from extremes of temperature, to provide for their good health and well-being and to prevent their discomfort, in accordance with currently accepted practices as cited in appropriate professional journals or reference guides depending entirely upon the species housed therein.

Marine mammals are air breathing animals and proper ventilation is very important to assure that they are provided an adequate quantity of air of good quality.

There were two comments that the proposed air space of 2.44 meters (8 feet) over the pools of water was excessive and that there could be less air space, provided that the flow of air in such space was increased. The technical and scientific advisers to the Department agree that the average minimum height requirement over the pool could be lowered to 1.83 meters (6 feet) if the air movement is such that it satisfies all minimum standards for ventilation. It is therefore proposed herein that the space over pools be not less than an average of 1.83 meters (6 feet) from the level of the water in the pool to the ceiling and that ventilation of indoor housing facilities be adequate to provide a flow of fresh air for the marine mammals.

The proposed standards regarding lighting in indoor facilities remain unchanged in this proposal. It is proposed herein that indoor facilities for marine mammals must have sufficient light provided by natural or artificial means so that animal caretakers can observe the marine mammals both in and out of the primary enclosure pool of water to detemine their general health and condition and so that they can observe and maintian good sanitary conditions. Lighting must also be sufficient in distribution and intensity for adequate inspection purposes. It also appears that lighting in indoor facilities is necessary to simulate the approximate lighting conditions existing in nature, allowing for certain periods of darkness and daylight.

The major comments concerning outdoor facilities were with regard to the amonut of ice in pools, shade from excessive sunlight, and shelter from inclement weather. Ten comments were received with regard to allowing ice in the pool for some species of marine mammals and not for others, twelve comments stated that there is no need to provide shade, and three comments stated that there is no need to provide shelter from inclement weather.

As was stated in the previous proposal, marine mammals come from a great variety of climatic conditions, from equatorial waters to the polar ice caps. There is also a great range of climatic conditions within the United States. Outdoor facilities are completely dependent upon local environmental conditions. Marine mammals have adapted to the most hostile environments in the world, and their natural habitats are very stark with little, if any, protection from adverse weather conditions. If their environment becomes too undesirable, the marine mammal can escape to the sea or migrate to more suitable environmental living conditions. Captive marine mammals have no such natûral escape route available to them. Therefore, artificial protection must be provided for use by the marine mammal in captivity when the need to do so arises. The protection is especially important in the case of marine mammals which, because of their age, illness, or any other debilitating condition, cannot adequately regulate their body temperature. For these reasons, the Department intends to continue to require that some sort of shelter be provided when necessary to protect the animals from either the sun or from inclement weather. Outdoor facilities would be required to be designed in a manner which would allow marine mammals contained therein to adapt to the variations of climatic conditions which exist in the geographical area where they are kept. If the local climatic conditions of the outdoor facility vary form the conditions in which they were previously housed, the marine mammals will have to be acclimated to their new environment before being placed in such outdoor housing facilities.

Originally, it was proposed that water in pools in primary enclosures be kept free of ice. Pools in outdoor facilities which are covered with ice can deny marine mammals access for exercise, drinking, body temperature regulation, or can obstruct their free access to the surface to obtain sufficient air for normal breathing. However, after considering various factors and after consulting with the Marine Mammal Commission, this Department has decided to modify the original proposal. It is therefore proposed that pools of water in outdoor facilities for cetaceans and sea otters be kept free of ice. It is further proposed that outdoor pools in polar bear and ice dwelling pinniped enclosures shall be kept sufficiently free of solid ice so as to not interfere with free access to the pool by the animals by preventing their entry or exit from the pool. It is also proposed that sirenians and warm water dwelling pinnipeds shall not be house in pools where water tempera-

ture cannot be maintained within the temperature range to meet their needs.

The Marine Mammal Commission

that has been collected by its scientific advisory committee and which has been used as a basis for the proposed space requirements for marine mam-

V 43 / 182 SEP 1978

ture cannot be maintained within the temperature range to meet their needs.

The Marine Mammal Commission has recommended that no marine mammal should be maintained alone. The Commission makes this recommendation because most marine mammals are gregarious and do not easily adapt to isolation. It may be desirable to keep several individuals of a species for more normal socialization, breeding, and for establishing normal species specific behavioral patterns. But it is the opinion of the Department that the imposition of such a requirement would be unnecessarily restrictive. This Department has no authority over the permit system of obtaining new or replacement marine mammals. The Department cannot prosecute a licensee for having a single marine mammal if other government agencies do not issue permits to obtain additional marine mammals. However, in order to encourage keeping more than one marine mammal in an enclosure, the Department has made the proposed minimum space requirements for marine mammals, with the exception of pinnipeds and polar bears, sufficiently large to hold at least two animals.

Many comments were received with regard to the proposed space requirements. Some of the general comments were that marine mammal space requirements should not be lumped together but should be determined for each individual species. Some suggested that the Department should also consider the purpose of the housing, such as training, research, isolation, performing arenas,and other functions when setting space requirements. Others felt there should be considerable space for exercise. All the comments were considered, and it is the opinion of the Department that most were valid. The problem is presented of proposing minimum space requirements under which marine mammals can be housed, while taking into consideration their good health and well-being. Many experts and humane organizations feel that more than the minimum should be provided, but the Animal Welfare Act speaks in terms on minimum requirements. Therefore, only the essential factors must be considered to assure that handling, care, treatment, and means of transportation are adequate to maintain the marine mammal in a state of good health.

Space requirements for the wide range of marine mammals are quite variable. The Marine Mammal Commission, in its advisory capacity to all agencies of the Federal Government with regard to marine mammals, has furnished this Department with its recommendations from information that has been collected by its scientific advisory committee and which has been used as a basis for the proposed space requirements for marine mammals. Such information appears to provide an adequate basis for setting space requirements which would be sufficient to assure the good health and well-being of captive marine mammals.

Regarding the comments advising different space requirements for different species, it should be noted that there are more than 100 species of marine mammals, and valid scientific data regarding the minimum requirements is not available regarding every species. Therefore, the Department has no choice other than "lumping" species of marine mammals together. However, consideration was given to the different orders of marine mammals.

The Marine Mammal Commission has specifically recommended that the order Cetacea (whales, dolphins, porpoises) be divided into two groups. This recommendation is, therefore, being adopted in this proposal. The Marine Mammal Commission's justification for such division is based upon the activity patterns of certain species of cetaceans, requiring more space for the more active species. Most cetaceans are grouped in a category designated as group I. Certain othe genera and species listed in § 3.104(b) of the standards proposed herein have been designated as Group II.

The four factors which must be considered when determining minimum space requirements for cetaceans are as follows: The minimum horizontal dimension (MHD), the depth, the surface area of the pool, and the volume of the pool.

MHD has been designated to mean the diameter of a circular pool, or in the case of a square, rectangular, oblong or other shape pool, the diameter of the largest circle that can be inserted within the confines of such pool. The MHD for each marine mammal is calculated to give it adequate freedom of movement in the pool horizontally. It is proposed herein that the MHD for a pool housing marine mammals cannot be less than the MHD required for the longest species of marine mammal contained therein.

It is also proposed that the primary enclosure for cetaceans (e.g., whales, porpoises, and dolphins) need consist of only a pool of water. The reason for this is that cetaceans spend all of their time in water. It is proposed that all group I cetaceans must be provided a pool of water with an MHD which is at least two times the average adult length of the longest cetacean to be contained therein, as measured from the tip of its lower jaw to the notch in the tail fluke. In the case of a narwhale, if a tusk is present or will potentially develop, the measurement shall be based on the average adult length from the tip of the tusk to the notch in the tail fluke. It is also proposed that group II cetaceans must be provided a pool with an MHD of four times the average adult length of the longest group II cetacean to be housed therein. If both group I and group II cetaceans are to be housed in the same enclosure pool, the MHD requirement must be determined for both groups and the MHD must be equal to or greater than the larger of the two.

The minimum depth of a primary enclosure pool for cetaceans would be required to be at least one-half the average adult length of the longest species of cetacean housed therein regardless of group I or II status, as measured from the tip of its lower jaw to the notch of its tail fluke. Computing proper depth, using this criteria, would allow the cetacean to be completely covered with water and still allow for vertical freedom of movement. It is therefore proposed that the minimum depth of a pool housing cetaceans shall not be less than 1.52 meters (5 feet) or one-half the average adult length of the longest species of cetacean housed therein, whichever is greater. Regardless of the total number of cetaceans to be housed in the pool, the minimum depth shall not be allowed to be less than the minimum determined for the average adult length of the longest species of cetacean housed therein. A pool of such depth which meets the required MHD and surface area would be considered to contain a sufficient volume of water for one or two group I cetaceans of one to four group II cetaceans.

The volume requirement for a pool of water containing two group I cetaceans or for four group II cetaceans would be calculated using the MHD and depth requirements described above. It is proposed herein that one-half the required MHD squared, times 0 (3.14), times the required depth would result in the volume required by the standards. Dividing this volume by two would result in the volume necessary for each group I cetacean, and dividing it by four would result in the volume necessary for each group II cetacean. The volume which would be required to be added to a pool containing additional cetaceans (more than two group I cetaceans or more than four group II cetaceans) may be obtained by expanding the lateral dimensions, by deepening the pool, or by a combination of the two.

One comment received was that the proposed regulations made no provisions for surface area requirements available to the cetaceans for breathing space. There was some concern

that, as more cetaceans are added to the pool, volume requirements could be met by only deepening the pool; eventually there would not be enough surface area for all the cetaceans to be on the surface at the same time to be able to breathe. This proposal obviates that problem by requiring that a pool containing cetaceans must also have a minimum surface area. This would be determined by dividing the average adult length of each cetacean in the pool by two and squaring this amount, then by multiplying the answer by 0 (3.14) times 1.5, which is the safety factor discussed below. The sum of the results of this computation for all cetaceans to be housed in a pool would represent the required surface area of the pool. It is not likely all cetaceans would be on the surface at the same time, but if that should occur they would all have room for breathing. A safety factor is also considered advisable to allow a little more than the cetaceans' own area. Therefore, it is proposed herein that a factor of 1.5 be arbitrarily used, since this would give each cetacean its own area plus 50 percent.

There were several comments received regarding space requirements for sirenians. Some stated the MHD need not be more than 1½ times the body length. Others commented that the 1.52 meters (5 feet) minimum was too deep for newborn sirenians. Others said that 1.52 meters (5 feet) was not deep enough as sirenians breed in a vertical position and feed in a diagonal position. After giving due consideration to all the comments, it has been decided to propose that the space requirements for sirenians be computed in the same manner as the space requirements for group I cetaceans, in that the MHD be based on two times the average adult length of a sirenian, as measured from the tip of the muzzle to the notch in the midline of the tail in the dugong, and from the tip of the muzzle to the most distal point in the midline of the rounded tail of the manatee. There are only two genera of sirenians, both being similar in size. Therefore for the purposes of these regulations, the average adult length would be essentially the same for both species.

It is therefore proposed herein that the depth of the pool holding sirenians cannot be less than one-half the average adult length of a sirenian or 1.52 meters (5 feet), whichever is greater. There may be areas in the pool that are less than 1.52 meters (5 feet), but this should not be included when computing MHD, volume, or depth. Surface area requirements for sirenians would be the same as for cetaceans.

There were few comments in regard to the proposals of space requirements for pinnipeds. One stated that there should be a limit of 10 pinnipeds per enclosure. This is considered to be an option of management. As long as management can properly meet the space and water quality requirements and can maintain the animals in a state of good health, the Department will not propose to restrict the number of pinnipeds that may be housed in the same enclosure. Most comments received stated that a minimum depth of 1.52 meters (5 feet) was not necessary and that the depth in the pool should be less. There was another comment stating that no ramp was necessary for the pinniped to leave the pool since pinnipeds can jump or pull themselves out of the water if the resting area is close to the water's edge.

After due consideration of all comments received, it is proposed herein that the space requirements for pinnipeds remain essentially the same in this proposal, with the exception of depth and ramp requirements. It is therefore proposed that the space requirements for a primary enclosure housing pinnipeds (e.g., seals, sea lions, and walruses) should include a pool of water as well as a dry area for resting and social activities, as they spend much of their time out of the water. The space allowed for each pinniped for freedom of movement, mating, postural adjustments and sleep would be determined by its size and by the number of pinnipeds sharing the same enclosure. A pinniped appears to require a minimum dry area at least 50 percent larger than its own length squared. As more pinnipeds are added to the primary enclosure less space should be allotted per animal because of the greater amount of communal space available. It is proposed that this be accomplished by reducing the multiplier of 50 percent for the first animal by 10 percentage points for each additional animal. The effect of this would be that the space requirement starting with animal number six and every additional animal would be figured by squaring its average adult length.

In computing the minimum dry space requirements for pinnipeds, it is proposed that the average adult length of each pinniped housed in the primary enclosure shall be ascertained by measuring it from the tip of its nose to the tip of its tail in a horizontal or extended position. The measurements should then be arranged in descending order from the largest pinniped, based on its average adult length for each species represented, which would be animal number one, to the smallest pinniped at the end. The largest pinniped would be given a minimum dry space of its own length squared, plus 50 percent, or its own length squared times 1.5. The second largest pinniped would be given a minimum dry space of its own length squared, plus 40 percent, or its own length squared times 1.4. The third largest pinniped would be given a minimum dry space of its own length, plus 30 percent, or its own length squared times 1.3. This would be continued to the fifth largest pinniped which would receive a minimum dry space equal to its own length squared, plus 10 percent, or its own length squared times 1.1. For all additional pinnipeds (more than five) added to the primary enclosure, the space would be determined by allotting each such pinniped a minimum dry space equal to its own average adult length squared. The sum of such figures for each pinniped in a primary enclosure would represent the minimum dry resting and social activity area required.

A pool of water whose MHD is twice the average adult length of the longest species of pinniped contained therein appears to have sufficient surface area for two such pinnipeds. However, additional surface area would be required when more than two pinnipeds are housed in the same primary enclosure. Pinnipeds spend one-half or less of their time in the water, and, therefore, rarely would all pinnipeds in a primary enclosure be in the pool of water at one time. It is, therefore, proposed that when more than two pinnipeds are housed in the same primary enclosure, the minimum surface area of the pool must be two-thirds of the dry resting and social activity area required for such pinnipeds. For purposes of calculation, it is proposed that the minimum depth of the pool shall not be less than 0.91 meters (3 feet) or one-half the length of the longest species of pinniped contained therein, whichever is greater. This is a change from the 5 feet in the prior proposal which is deemed to be justified by the comments. Any part of the pool less than 0.91 meters (3 feet) deep would not be considered in the calculation for either the dry resting area or pool size. There were some comments stating that the proposed resting and social activity area was excessive, but the proposed space requirements were just slightly more than would be needed for the pinnipeds to turn around if all of them were out of the water. The comment regarding the proposed requirement of a ramp for entering and leaving the pool was considered valid, and, therefore, that requirement has been deleted from this proposal. There were no comments concerning the size of the pool being either too small or too large.

A few comments were also received with regard to the proposed space requirements for polar bears. One

person commented that the pool should be bigger than proposed. Another thought that the proposed den size was too large. However, most agreed with the space requirements. Therefore, it is proposed that these proposed requirements remain essentially the same. It is proposed herein that a minimum dry resting area of 37.16 square meters (400 square feet) be provided for one or two polar bears and an additional 3.72 square meters (40 square feet) for each additional polar bear contained in a primary enclosure. It is also proposed that the den shall be at least 1.83 meters (6 feet) in width and depth and 1.52 meters (5 feet) in height (which is 1 foot less than the previous proposal), which would allow sufficient space for one polar bear to make normal postural adjustments. A separate den would be required for each adult female of breeding age as a private enclosure. It is also proposed that sufficient shade, other than the den, be provided in a primary enclosure containing polar bears. It is further proposed that the pool in any primary enclosure for polar bears be a minimum of 2.44 meters (8 feet) by 3.66 meters (12 feet) and at least 1.52 meters (5 feet) deep.

Sea otters appear to need a dry resting area and a pool of water in their primary enclosures. It is necessary for sea otters to have a pool of water to keep their hair coat wet at all times for proper grooming and for insulation of the body, as they spend most of their time in the water. They cannot regulate their body temperatures properly if the hair coat is allowed to dry. These animals when wet will usually die of exposure or hypothermia if the hair coat becomes soiled or hyperthermia if the hair coat is allowed to dry. Objective data concerning the minimum space requirements for sea otters is not available to the Department at this time. Therefore, the following minimum space requirements are proposed since this Department has no information that would indicate that such proposals are not reasonable, necessary, appropriate, or adequate for sea otters. The MHD of a pool of water for sea otters shall be at least twice the average adult length of the longest sea otter contained therein, as measured from the tip of its nose to the tip of its tail. It is also proposed that the minimum depth of the pool shall not be less than 0.91 meters (3 feet). The volume of water in such a pool would appear to be sufficient for one or two sea otters. It is also proposed that the minimum dry resting area for one or two sea otters be equal to the minimum surface area of the pool required for such sea otters.

When more than two sea otters are housed in the same primary enclosure, both the dry resting area and the pool volume would have to be increased, based on the average adult length of the sea otters. The additional minimum volume of water necessary to contain more than two otters would be calculated by multiplying the surface area of the pool by 0.91 meters or 3 feet (minimum depth of pool), and dividing the result by two. The resulting answer would represent the additional minimum volume of water the pool must contain for such sea otters. The surface area of a pool containing sea otters would be calculated in the same manner as the surface area of a pool containing cetaceans, which has been previously discussed. It is further proposed that the minimum dry resting area for two sea otters, which shall be computed as specified in § 3.104(f) of this proposal, be increased by one-half the square of the average adult length of each additional sea otter times 0 (3.14), when more than two such animals are contained in an enclosure.

Several comments were received with regard to the feeding of marine mammals. Some of the comments requested that the Department specify the kind of fish to be fed to captive marine mammals, require the food be vitamin fortified, and require extensive records of individual food intake. Most of these comments deal with husbandry or curatorial matters, and the Department does not wish to interfere as these are considered management responsibilities. The Department would require that marine mammals be maintained in a state of good health and would make this the responsibility of management.

Some comments requested that the food be allowed to come to ambient temperature before freezing. It is this Department's opinion that it would be risky to allow this because bacterial contamination and decomposition would be well advanced since thawing frozen fish or other food usually takes some time, and the surface thaws considerably sooner than the deeper portions.

It has come to the attention of this Department that frozen food may be thawed up to 24 hours prior to feeding without causing adverse effects. Therefore, the 18-hour time period for thawing of food, which was originally proposed, will be changed to 24 hours in this proposal, and the time would start running when the food is removed from the freezer. The food would be allowed to warm slightly but only immediately before feeding and not for an extended period of time. This would be to assure that no ice remains in the food since there is some opinion that ice in food could cause digestive upsets in marine mammals.

The Department is also deleting the term "competent" before the word "employee" in this proposal as it is hard to define a competent employee. Management of the facility would be responsible for assuring that the animals are properly fed and it is expected that this task would be entrusted to an employee who is capable of assuming the responsibility.

There were some comments that no provision was made to allow public feeding. The Department proposes to relax this restriction and allow public feeding provided it is closely supervised. The facility would still have the responsibility of assuring that each marine mammal receives a proper diet and that no foreign bodies or nonfood objects are given to the animals either maliciously or accidentally by the participating public. Close or constant supervision would be required to be maintained at all times when there is marine mammal/public contact. This would mean that an employee would need to be physically present to exercise such supervision during the contact period. The food given to the animals would be required to be obtained from the facility housing the marine mammals.

Water quality is extremely important for marine mammals and at least minimum standards need to be maintained for the good health and well-being of the animals. Marine mammals are air breathing animals, and it is not necessary for the water to contain sufficient oxygen for respiratory functions as there is no gaseous exchanges between marine mammals and the water.

Several comments were received indicating that polar bears should have less restrictive standards for water in pools that the other marine mammals. Pools for polar bears are generally smaller than pools of other marine mammals, and they are usually drained, cleaned, and refilled with water on a routine schedule. There is usually a continual flow of new water into the pool and the overflow is discharged. There is generally no attempt to reclaim the water by filtration. For these reasons, APHIS did not originally propose that the water quality standards for polar bears be the same as for other marine mammals, but simply required that the water quality would have to be maintained in such a manner as would be necessary to keep the polar bears in a state of good health. The Marine Mammal Commission has recommended that no special exemptions be allowed for polar bear pools. Therefore, this Department, being in agreement with that recommendation, is proposing herein that polar bear pools meets the same water quality requirements as for other marine mammals.

Some comments indicated that coliform count and chemical monitoring are not necessary in pools that receive

sea water directly from bays and estuaries. This appears to be true with respect to chemical monitoring, with the exception of chemicals that are added to maintain water quality, but is not true with respect to coliform count. It is proposed that both of these should still be done routinely to assure the proper quality of water if chemicals are added. This is especially true in light of the fact that some bays and estuaries are badly contaminated with human waste and sewage; therefore, coliform counts are important to assure that the water meets the compliance which are proposed herein.

Requests were also received that minimum and maximum levels of all chemical additives be specified in the standards. This is a function of management, as the Department would allow chemicals to be added to the water to assist in maintaining proper water quality and to control excessive algae and moss. These chemical additives, regardless of which ones are used, would not be allowed to be toxic or strong enough to cause the marine mammals injury or discomfort, and chemical monitoring is the only way to determine strength and effective levels of the chemicals.

It was also pointed out in some comments that eye infections, corneal opacities, poor hair coat, or contamination of surface wounds on the animals are not necessarily a sign of poor water quality, as was indicated by the former proposal. It is true that water quality can be substandard and still not cause the marine mammals to exhibit these conditions. It is also true that certain animals can exhibit some of these conditions and still have the proper water quality. If there is an isolated animal or two with a problem, it is probably not due to the water quality, but if most, or all, or the animals have similar conditions to some degree, then water quality must be suspected and that would be the starting place when trying to diagnose the etiology of the conditions. However, the Department must agree that a general statement that any of the above conditions automatically mean that the water quality is unacceptable if not valid. This proposal has therefore deleted such statement.

There were other comments that normal sea water can contain as much as 36 parts per thousand of salt and not be harmful to marine mammals. There was also a comment by the Marine Mammal Commission that there should be no minimum level of salt since it is proposed to allow fresh water to be used if the individual marine mammal species can tolerate fresh water over an extended period of time. These comments were considered to be valid and the part of this proposal dealing with salinity has been amended accordingly.

With respect to water quality, it is further proposed herein that the purity of water in closed systems be assured by keeping the coliform bacteria count below 1,000 MPN (most probable number) per 100 ml. of water and that filtration systems be used to filter out particulate material. All marine mammals defecate in the water of their pool, and the filtration system must be able to circulate the water through the filters to keep it free from excrement as well as dirt or other debris that gains entry to the pool. It is proposed that the filtration of recirculated water, or the addition of new water, be at a rate which is sufficient to maintain proper water quality at all times. It is also proposed that when salinized water is used, it be within the range of the salinity of normal sea water not exceeding 36 parts per thousand. Further, it is proposed that the pH of the water be monitored to assure that it approximates the pH of normal sea water. Chemicals that are added to the pool to control bacteria or algae must not be so strong as to adversely affect the quality of the water to the point that it might be harmful or cause discomfort to the marine mammals.

About the only comments received that are concerned with the proposed sanitation standards were comments by several persons that algae is not harmful to marine mammals and is, in fact, beneficial in small amounts. This Department did not intend to completely prohibit algae or moss. However, any algae or moss which is present must be kept under control. Therefore, the sanitation standards which appeared in the original proposal are proposed herein without change.

These standards are necessary to assure that the facility which houses marine mammals is maintained in a clean and sanitary condition so as not to pose a health hazard to the marine mammals contained therein, or to the employees who work at the facility, or to the viewing public.

Standards regarding pest control which appears in the original proposal are also part of this proposal.

The only comments received with regard to employees were requests that the type of training requirements be clarified. The type of training, be it academic or on-the-job training, will not be specified by this Department. The responsible officials of a facility which houses and maintains marine mammals must assure that their employees have sufficient training to do the job assigned and that captive marine mammals are not caused to suffer because of improperly trained employees. What is required by the proposed regulations (both these and the ones of August 19, 1977) is that employees taking care of the marine mammals must be under the supervision of an experienced marine mammal caretaker.

With respect to the subject of separation of animals, it is proposed that marine mammals that are not compatible shall not be housed in the same primary enclosure. In addition to the separation of imcompatible species, there should also be separation among the same species if the good health and well-being of any animal contained therein is in jeopardy. It is also proposed that marine mammals that are incompatible with other animals shall not be housed near animals that would cause them stress or discomfort or would interfere with their good health. On the advice of the Marine Mammal Commission, the Department has also added to this proposal the requirement that marine mammals be given access to other animals.

Those commenting on the proposed regulations and standards also mentioned veterinary care of marine mammals. Those comments were considered and appropriate action was taken where necessary. It was recommended that pools used for isolation or treatment, or for any reason as short-term holding pools, need not meet the lateral and depth dimensions of a permanent housing pool. This Department feels these comments are reasonable and accepts the recommendation. There were also some comments that yearly blood tests be required, but in the opinion of this Department, such activity should be a responsibility of management and the veterinary care program. The Marine Mammal Commission, in its advisory capacity, recommended that a thorough and complete necropsy be required following the death of any marine mammal in captivity. After carefully considering the recommendation, this Department has decided that such a necropsy would be useful in determining the cause of death, monitoring the health, and determining the adequacy of veterinary care of the animals. It is therefore proposed that a complete necropsy must be conducted by a veterinarian on all marine mammals that die in captivity. A necropsy report would have to be prepared by the veterinarian performing the necropsy. This report would be required to be kept by the management of the facility where the animal died for 2 years so that it could be presented to Department inspectors on request.

COMMENTS REGARDING TRANSPORTATION STANDARDS

Section 13 of the Animal Welfare Act (7 U.S.C. 2143) requires the Secretary to promulgate standards to

govern the humane handling, care, treatment, and transportation of animals by dealers, research facilities,

tions, it is the decision of this Department to propose that circuses and traveling shows meet the same re-

move with great difficulty. Therefore, it is proposed that cetaceans and sirenians be transported in well padded

humane and better for heat dissipation and ventilation. It was interpreted

perts in the field of transporting marine mammals must determine

sirenians would be required to be kept moist in transit or protected by some substance such as lanolin to keep it

V 4 3 / 1 8 2

govern the humane handling, care, treatment, and transportation of animals by dealers, research facilities, and exhibitors. Provisions of the Animal Welfare Act Amendments of 1976 (Pub. L. 94-279), enacted on April 22, 1976, also require the Secretary of Agriculture to promulgate standards to govern the transportation in commerce, and the handling, care, and treatment in connection therewith, by intermediate handlers and carriers of animals consigned by any dealer, research facility, exhibitor, operator of an auction sale, or other person, or any department, agency, or instrumentality of the United States or of any State or local government, for transportation in commerce. The Secretary was also given authority to promulgate such rules and regulations as he determines necessary to assure humane treatment of animals in the course of their transportation in commerce, including requirements such as those with respect to containers, feed, water, rest, ventilation, temperature, and handling.

The proposed transportation standards contained herein have been written to provide marine mammals with the same general protection and care as that proposed for all other species of animals covered by the Animal Welfare Act and published in the FEDERAL REGISTER on August 19, 1977, at 42 FR 42044.

The Marine Mammal Commission and other sources of expertise in transporting marine mammals have offered suggestions which were helpful in writing the proposed standards. In drafting the proposed standards contained herein, the Department has given careful consideration to the various suggestions and recommendations. For the sake of uniformity and consistency, it has followed the same format and imposed similar regulations on common carriers and intermediate handlers that transport marine mammals as those that have been promulgated for all other warmblooded animals covered by the Animal Welfare Act.

Special provisions were being considered for marine mammals which are part of traveling shows and are not permanently housed in stationary facilities. There were numerous comments to the effect that circuses and other traveling animal acts which exhibit marine mammals were not properly covered in the original proposal. The Marine Mammal Commission, as well as members of humane groups, have recommended to the Department that no special allowances be made for these animals and the regulations and standards as proposed should apply to all marine mammals covered by the Animal Welfare Act. After a thorough consideration of these recommendations, it is the decision of this Department to propose that circuses and traveling shows meet the same requirements as other exhibitors.

Most shipments of marine mammals will be consigned to private transporting concerns that specialize in transporting marine mammals. These business concerns should have the experience and the equipment to assure the safe delivery of the marine mammals to their destinations. It appears that very few marine mammals would be transported by the normal common carrier or intermediate handler. However, the proposed transportation standards for marine mammals would apply to all dealers, exhibitors, research facilities, carriers, and intermediate handlers.

There were several comments about consignments to normal common carriers and intermediate handlers and the obligations and responsibilities of the carriers. One comment was that no marine mammal should be transported unaccompanied at any time. Some comments suggested that prior arrangements should be made requiring the consignee to meet the shipment on arrival at its destination. Suggestions were also made that a 24-hour telephone number be required on the waybill so the carriers and intermediate handlers can notify the consignee immediately on arrival anytime day or night. The original proposed standards and regulations require that the carrier must attempt to notify the consignee as soon as possible after the arrival of the animal at the final terminal, and if unable to do so, must try at least once every 6 hours. A comment was received that the 6-hour requirement should be reduced to no more than 4 hours. After carefully considering this suggestion, it is proposed to lower that requirement to 4 hours.

As was done in the original proposal, requirements for primary enclosures used in transporting the different orders of marine mammals are divided into two categories in this proposal. Pinnipeds and the marine carnivores (polar bears and sea otters) are in one category, and it is proposed that they can be shipped in crates similar to those that are used in transporting other zoo animals. It is important that these animals be given sufficient space in the primary enclosure used for transportation to assure that they have room to move or lie down in normal postural positions without impeding their appendages. The second category includes the cetaceans and sirenians, and it is proposed that they be transported in devices which are designed to support their body weight and provide easy access to the animals by employees to administer their needs in transit. Without the buoyancy of water, these marine mammals move with great difficulty. Therefore, it is proposed that cetaceans and sirenians be transported in well padded straps, slings, harnesses, or other devices for body support that are designed to protect the animal while in transit and to allow attendants to administer to their needs. The proposed standards for transporting cetaceans and sirenians take into account the need of these animals to be supported and protected from injury during transportation. There was a comment from one person that straps, slings, harnesses, etc., are not used in transporting cetaceans and sirenians, and the animals he transports are place on a foam rubber pad and no restraining devices are used whatsoever. The Department considers a foam rubber pad a form of body support. Furthermore, some devices would have to be used in getting the animals in and out of the transporting conveyance. A large cetacean, totally unrestrained, could be dangerous to itself and the conveyance if allowed to thrash about for any reason.

There were several comments that the proposed ventilation requirements of the primary enclosures used to transport marine mammals, other than cetaceans and sirenians, were not adequate. It was the opinion of those commenting that due to the body temperature regulating capacity of marine mammals, in that they have a tendency toward overheating, the proposed 8-percent ventilation on two ends of the enclosure was not sufficient. It is agreed that this is a valid consideration and, therefore, it is proposed to increase the ventilation requirements to at least 15 percent on each side of all four sides of the enclosure. This should provide adequate ventilation for the animal contained therein in both a prone and standing position.

Comments were also received regarding the proposed requirement that female marine mammals in season (estrus) shall not be transported in the same primary enclosure with any male marine mammals. It was commented that it is not easy to determine if a marine mammal is in season. It is agreed that this is difficult. Therefore, it is proposed herein that female marine mammals shall not be transported in the same primary enclosure with a sexually mature male.

Some comments also stated that the proposed size of the primary enclosure used to transport pinnipeds was too large and extensive. They stated that pinnipeds seldom, if ever, fully extend their body and flippers in all directions. It was also stated that a small primary enclosure was better since the animal would not have room to move about excessively and injure itself. It is the determination of APHIS that the larger primary enclosure is more

SEP 19 78

humane and better for heat dissipation and ventilation. It was interpreted by some who commented that contact with supporting framework or other solid structures during transportation was prohibited by the proposed regulations and standards, whereas the Department's intent was that these solid objects, if capable of causing injury, should be padded or eliminated.

A few comments were received regarding the primary conveyance used to transport marine mammals. One person thought that the proposed regulation concerning the animal cargo space and the prevention of engine exhaust fumes and gases was too restrictive. It was argued that there should be some allowances since there was no way to completely prevent any exhaust fumes from entering, especially when the doors to the cargo space are open when loading and unloading cargo. It was not intended that there would be absolutely no tolerances and that any exhaust fumes or gases were prohibited. It was intended that every precaution be taken to protect the animal cargo space from being filled with exhaust fumes and gases that could reach such concentration that would make the animals ill or even cause their death. The Department, therefore, proposes that the ingress of exhaust fumes and gases cannot exceed that ordinarily contained in the passenger or operator compartment of the primary conveyance.

A comment was also received regarding the proposed requirement of positioning animals in the primary conveyance in such a manner that in an emergency they could be removed from the conveyance in a 5-minute period. It was pointed out that certain marine mammals are extremely large and heavy and that special animal handling equipment is required to move these animals. Therefore, it is proposed herein that marine mammals be positioned in a conveyance in such a way that in emergencies they can be femoved from the primary conveyance as soon as possible.

Most comments received were directed toward not feeding or watering the marine mammal during transit. Some stated that feeding or watering might result in the animal vomiting, and in certain animals, this could be very detrimental if not fatal. Another commented that feeding results in a problem of fecal contamination that can be minimized by fasting. The primary concern of the Department, however, in proposing regulations for feeding and watering while in transit is to assure that the marine mammal arrives at its destination in the best physical condition possible. It is true that denying the animal food and water while in transit is not necessarily cruel and inhumane treatment. Experts in the field of transporting marine mammals must determine what is best for the animal to assure that it does not suffer harm or injury during transportation. This is one of the reasons for proposing that an attendant accompany certain types of marine mammal shipments (shipments involving sirenians, cetaceans, and sea otters, and also shipments lasting more than 12 hours) so the condition of the animal can be closely observed.

Marine mammals are generally not fed while in transit and, in most cases, it is an accepted practice to actually fast the animals for a short period prior to shipment. The sea otter is an exception to this general rule in that it should have food available while in transit. Some comments were received indicating that sea otters should not be fed while in transit because of possible problems with sanitation inside the primary enclosure. However, on the recommendation of the Marine Mammal Commission, this Department has determined to propose that sea otters have food available while in transit.

Some comments expressed a desire that all shipments of marine mammals should be accompanied by an attendant. This was not proposed because when certain marine mammals are confined in strong, secure primary enclosures during shipments an attendent cannot monitor or service their in transit needs as he would not have access to the animal. If prolonged or extended shipping periods of more than 12 hours in transit occur, then it is proposed that all marine mammals are to be accompanied by an attendent.

Another comment presented the idea that the reason cetaceans and sirenians should have freedom of movement of the pectoral flippers is primarily for regulating the body temperature by waving or moving the flippers and not for relieving pressure on the rib cage which might interfere with the animal's breathing ability, as was claimed by the Department. This may be true to a certain extent. However, it is determined that relieving pressure on certain parts of the marine mammal's body when out of the water for an extended period of time is still the primary consideration in requiring freedom of movement of the flippers.

Therefore, in consideration of the above comments, it is proposed that an attendent be required to accompany shipments of cetaceans, sirenians, and sea otters because of the required special handling, feeding, and watering, or because of problems encountered due to their size, It is proposed that other marine mammals are to be so accompanied only during prolonged shipments. The skin of cetaceans and sirenians would be required to be kept moist in transit or protected by some substance such as lanolin to keep it from drying. It is also important that the pectoral fins of both cetaceans and sirenians have full mobility during transit. Periodic positional adjustments would have to be made when cetaceans and sirenians are transported in straps, slings, harnesses, or other body supports to prevent pressure necrosis of the skin over bony prominences or other points where extreme pressure is concentrated from the weight of the animal. It is proposed that restraining straps, securing the cetacean or sirenian to the sling, harness, or other device, shall be tight enough to restrain the marine mammal, but not so tight that they become irritating to the animal. Struggling and thrashing about would have to be minimized to prevent overheating of the marine mammal.

Sea otters must keep their hair coat wet for proper insulation and temperture control of their body. They will not groom their fur if it dries or becomes soiled with feces. It is therefore proposed that at least on-half of a primary enclosure used to transport sea otters shall be leakproof and contain sufficient crushed ice or water to provide the sea otter contained therin with moisture necessary to allow each sea otter to keep its hair coat wet. The ice or water would also serve to prevent feces and urine from contaminating the hair coat. it is also proposed that a dry area be available in the primary enclosure used to transport a sea otter so the animal can get out of the ice and water for resting or grooming purposes.

With regard to terminal facilities, the only comments received questioned the necessity of providing protection from the snow and cold weather in the case of arctic or ice dwelling marine mammals. These were considered valid and this proposal provides exceptions for ice dwelling marine mammals. There were no comments that objected to providing shelter from sunlight.

It is proposed that the indoor animal holding area be provided with fresh air either by means of windows, doors, vents, or air conditioning and be ventilated so as to minimize drafts, odors, and moisture condensation. The ambient or air temperature would not be allowed to fall below 7.2° C (45° F) except in certain cases, and would not be alowed to exceed 29.5° C (85° F) at any time. This is the temperature range which is being required for the transporation of all other animals under the Animal Welfare Act. Proposing different temperature ranges for marine mammals would impose an unfair hardship on terminal facilities since it might necessitate different

holding areas for marine mammals. The indoor animal holding area would be required to be cleaned and sanitized in the manner prescribed in § 3.107 of the standards often enough to prevent an accumulation of debris or excreta, to minimize vermin infestation, and to prevent disease hazards.

It is further proposed herein that carriers and intermediate handlers, in transporting live marine mammals from the indoor animal holding area of the terminal facility to the primary conveyance and from the primary conveyance to the indoor animal holding area of the terminal facility, including loading and unloading procedures, must provide shelter from sunlight when sunlight is likely to cause overheating or discomfort. It is also proposed that the terminal facility provide shelter from snow. Transporting devices would be required to be covered to provide protection for live marine mammals during snow. The terminal facility would also be required to provide the marine mammal with shelter from cold weather. Transporting devices would have to be covered to provide protection for live marine mammals when the atmospheric or outdoor temperature falls below 10° C (50° F) unless the marine mammal is an ice dwelling animal and can safely tolerate lower temperatures.

There were no comments received with regard to handling marine mammals at terminal facilities. The Department proposes that carriers and intermediate handlers should be responsible for moving live marine mammals from the indoor animal holding area of the terminal facility to the primary conveyance and from the primary conveyance to the indoor animal holding area of the terminal facility as expeditiously as possible. This proposal also contains a provision stating that care shall be exercised to avoid handling of the primary enclosure in a manner which may cause physical or emotional trauma to the live marine mammal contained therein. There is also a provision which states that primary enclosures housing live marine mammals shall not be tossed, dropped, or needlessly tilted and shall not be stacked in a manner which may result in their falling.

It is possible to encounter a wide variation of temperature ranges during transportation, and the ambient temperature extremes need to be controlled in order to prevent discomfort to the marine mammal and to protect the health and well-being of the animal. Marine mammals are generally more affected by hot temperatures than they are by cool or cold temperatures.

One comment received was that the proposed temperature of 35° C (95° F) within primary enclosures was too warm for marine mammals and that the allowable temperature should not exceed 29.4° C (85° F). Considering the problem of body temperature regulations and heat dissipation, due to the subcutaneous blubber layer of most marine mammals, is it proposed that the temperature around the marine mammal within the primary enclosure during transportation shall not exceed 29.4° C (85° F) for a period of more than 45 minutes nor fall below 7.2° C (45° F) for a period of more than 45 minutes unless the person transporting the marine mammal knows that is is acclimated to such higher or lower temperatures.

A detailed explanation of the proposed regulations and standards dealing with marine mammals also accompanied the original proposal of August 19, 1977. Anyone desiring additional information regarding this proposal should refer to that proposal, which appeared in Vol. 42, No. 161, of the FEDERAL REGISTER on Friday, August 19, 1977.

PART 1—DEFINITION OF TERMS

Accordingly, it is proposed that the regulations and standards (9 CFR 1.1 et seq.) be amended as follows:

1. It is proposed that the second sentence in § 1.1(n) of the regulations (9 CFR 1.1(n)) be amended to delete the words "aquatic animals," following the word "birds" and before the word "rats".

2. It is proposed that § 1.1(gg) of the regulations (9 CFR 1.1(gg)) be amended by inserting a comma after the word "compartment" and adding the word "pool" immediately thereafter and before the word "or".

3. It is proposed that a new definition for minimum horizontal dimension (MHD) be added to the end of § 1.1 of the regulations (9 CFR 1.1) to read as follows:

§ 1.1 Definition.

* * * * *

(qq) "Minimum horizontal dimensions" (MHD) means the diameter of a circular pool of water, or in the case of a square, rectangular, oblong or other shape pool, the diameter of the largest circle that can be inserted within the confines of such a pool of water.

PART 3—STANDARDS

4. It is proposed that the Table of Contents in Part 3—Standards of Title 9, Code of Federal Regulations, be amended by making present Subpart E of the Table of Contents, Subpart F, and renumbering §§ 3.11 to 3.114 thereof to §§ 3.125 through 3.138, respectively, and by adding a new Subpart E as follows:

Subpart E—Specifications for the Humane Handling, Care, Treatment, and Transportation of Marine Mammals.

FACILITIES AND OPERATING STANDARDS

Sec.
3.100 Special considerations regarding compliance.
3.101 Facilities, general.
3.102 Facilities, indoor.
3.103 Facilities, outdoor.
3.104 Space requirements.

ANIMAL HEALTH AND HUSBANDRY STANDARDS

3.105 Feeding.
3.106 Water quality.
3.107 Sanitation.
3.108 Employees.
3.109 Separation.
3.110 Veterinary care.
3.111 Handling.

TRANSPORTATION STANDARDS

3.112 Consignments to carriers and intermediate handlers.
3.113 Primary enclosures used to transport marine mammals.
3.114 Primary conveyances (motor vehicle, rail, air, and marine).
3.115 Food and water requirements.
3.116 Care in transit.
3.117 Terminal facilities.
3.118 Handling.
3.119 Ambient temperature within primary enclosures.

5. It is proposed that present Subpart E of Part 3—Standards (9 CFR Part 3, Subpart E) would be redesignated as Subpart F and §§ 3.100 to 3.114 thereof would be renumbered as §§ 3.125 through 3.138, respectively, and a new Subpart E would be added to read as follows:

Subpart E—Specifications for the Humane Handling, Care, Treatment, and Transportation of Marine Mammals

FACILITIES AND OPERATING STANDARDS

§ 3.100 Special considerations regarding compliance.

(a) All persons subject to the Animal Welfare Act who maintain marine mammals in captivity must comply with the provisions of this subpart, unless they are granted permission by the Secretary to deviate from one or more of the provisions. The provisions of this subpart shall not apply, however, in emergency circumstances where compliance with one or more provisions would not serve the best interest of the marine mammals concerned.

(b) From the effective date of the regulations and standards of this subpart, all facilities housing marine mammals which are not in full compliance with the standards shall have 60 days during which they may apply to the Secretary for written permission to operate as a licensee or registrant under the Act: Provided, however, That:

(1) Application is made to the Secretary, in writing, listing in detail all areas of deviation from the requirements of this subpart, the time period requested for each deviation, and the justification for such request.

(2) The Secretary shall deny any such application if he determines that allowing it would be detrimental to the health and well-being of the marine mammals concerned.

(3) Such permission to deviate from the provisions of this subpart shall not be granted for a period exceeding 4 years from the effective date of these provisions.

(c) Any person desiring to deviate from the requirements of this subpart for the purpose of experimentation in the areas of husbandry and care of marine mammals may apply to the Secretary for written permission to do so: Provided, however, That:

(1) Application is made to the Secretary, in writing, listing in detail all areas of deviation from the requirements of this subpart, the time period requested for each deviation, and the justification for such request.

(2) The Secretary shall deny any such application if he determines that allowing it will be detrimental to the health and well-being of the marine mammals concerned.

§ 3.101 Facilities, general.

(a) *Construction requirements.* (1) Housing facilities for marine mammals shall be structurally sound and shall be maintained in good repair, to protect the animal from injury, to contain the animals, and to restrict the entrance of unwanted animals.

(2) All marine mammals shall be provided with protection from abuse and harassment by the viewing public by the use of a sufficient number of employees to supervise the viewing public, or by physical barriers, such as fences, walls, glass partitions, or distance, or both.

(3) Any primary enclosure pool, including ramps for entering or leaving the pool, shall be constructed of materials having a nonporous, waterproof finish, which shall facilitate proper cleaning and disinfection, and which shall be maintained in good repair as part of a regular ongoing maintenance program.

(4) Facilities which utilize natural areas such as tidal basins, bays, or estuaries for housing marine mammals shall be exempt from the waterproof finish, nonporous surface construction, and drainage requirements of paragraphs (a)(3) and (c)(1) of this section, but they must meet the minimum standards with regard to space, depth, and sanitation. Water quality must be monitored as in other facilities.

(b) *Water and power supply.* Reliable and adequate sources of water and electric power shall be provided by the facility housing marine mammals. Written contingency plans must be submitted to and approved by Veterinary Services regarding emergency sources of water and electric power in the event of failure of the primary sources, if such failure could be detrimental to the good health and well-being of the marine mammals housed therein.

(c) *Drainage.* (1) Adequate drainage shall be provided for all primary enclosure pools and shall be located so as to rapidly eliminate all of the water contained in such pools when necessary for cleaning the pools or for other purposes. Drainage effluent from primary enclosure pools shall be disposed of in a manner that complies with all applicable Federal, State, and local pollution control laws.

(2) Drainage shall be provided for primary enclosures and areas immediately surrounding pools. Drains shall be located so as to rapidly eliminate excess water (except in pools). Such drainage effluent shall be disposed of in a manner that complies with all applicable Federal, State, and local pollution control laws.

(d) *Storage.* Supplies of food shall be stored in facilities which adequately protect such supplies from deterioration, molding, or contamination by vermin. Refrigerators and freezers shall be used for perishable food. No substances which are known to be or may be toxic or harmful to marine mammals shall be stored or maintained in the marine mammal food storage or food preparation areas.

(e) *Waste disposal.* Provision shall be made for the removal and disposal of animal and food wastes, dead animals, trash, and debris. Disposal facilities shall be so provided and operated as to minimize vermin infestation, odors, and disease hazards. All waste disposal procedures must comply with all applicable Federal, State, and local laws pertaining to pollution control, protection of the environment, and public health.

(f) *Washroom facilities.* Facilities such as washrooms, basins, showers, or sinks, shall be provided to maintain cleanliness among the marine mammal caretakers.

§ 3.102 Facilities, indoor.

(a) *Ambient temperature.* The air and water temperatures in indoor facilities shall be sufficiently regulated by heating or cooling to protect the marine mammals from extremes of temperature, to provide for their good health and well-being and to prevent discomfort, in accordance with the currently accepted practices as cited in appropriate professional journals or reference guides, depending upon the species housed therein. Rapid changes in air and water temperatures shall be avoided.

(b) *Ventilation.* Indoor housing facilities shall be ventilated by natural or artificial means to provide a flow of fresh air for the marine mammals and to minimize the accumulation of chlorine fumes, harmful gases, or other objectionable odors. A vertical air space averaging at least 1.83 meters (6 feet) shall be maintained in all primary enclosures housing marine mammals, including over their pools of water.

(c) *Lighting.* Indoor housing facilities for marine mammals shall have ample lighting, by natural or artificial means, or both, of a quality, distribution, and duration which is optimum for the species involved. Such lighting shall provide uniformly distributed illumination of sufficient light intensity to permit routine inspections, and to permit adequate observation and cleaning of all parts of the primary enclosure including any den areas. Lighting of primary enclosures shall be designed so as to prevent overexposure of the marine mammals contained therein to excessive illumination.

§ 3.103 Facilities, outdoor.

(a) *Environmental temperatures.* Marine mammals shall not be housed in outdoor facilities unless the air and water temperature ranges which they may encounter during the period they are so housed do not adversely affect their health and comfort. A marine mammal shall not be introduced to an outdoor housing facility until it is acclimated to the air and water temperature ranges which it will encounter therein. The surface of the water in pools in outdoor primary enclosures shall be kept sufficiently free of solid ice when housing polar bears and ice dwelling species of pinnipeds so as to allow entry and exit of the animals. Water in pools in outdoor primary enclosures shall be kept free of ice when housing cetaceans and sea otters. No sirenian or warm water dwelling pinnipeds shall be housed in outdoor pools where water temperature cannot be maintained within the temperature range to meet their needs.

(b) *Shelter.* Natural or artificial shelter which is appropriate to the local climatic conditions for the species concerned, shall be provided for all marine mammals kept outdoors to afford them protection and to prevent discomfort to such animals due to weather conditions or to direct sunlight.

§ 3.104 Space requirements.

(a) *General.* Primary enclosures, including pools of water housing marine mammals, shall be constructed and maintained so as to provide sufficient space, both horizontally and vertically, and so as to allow each marine

mammal contained therein, to make normal postural and social adjustments with adequate freedom of movement, in or out of the water.

tip of the lower jaw to the notch in the tail fluke. (iii) In a pool where a mixture of both group I and group II cetaceans are to be housed, the MHD must be satisfied. The additional volume needed shall be based on the number and kind of cetaceans housed therein and shall be determined in the

TABLE II*.—*Group II Cetaceans*

Average adult length	MHD	Minimum required depth	Volume of water required for each additional cetacean, exceeding four—

mammal contained therein, to make normal postural and social adjustments with adequate freedom of movement, in or out of the water.

(b) *Cetaceans.* Primary enclosures housing cetaceans shall contain a pool of water and may consist entirely of a pool of water. In computing the minimum space requirements in a pool holding cetaceans, four factors must be considered. These are the MHD, the depth, the volume, and the surface area. For the purposes of this subpart, cetaceans have been divided into the following groups:

Group I cetaceans. This group shall consist of all cetaceans except those specified in Group II below.

Group II cetaceans. This group shall consist of the following genera and species of cetaceans.

Genera, Species and Common Name

Delphinus—all species— common dolphin.
Lissodelphis—all species—right whale dolphin.
Stenella—plagiodon—spotted dolphin.
Stenella—attenuata—spotted porpoise.
Stenella—coeruleoalba—blue-white porpoise (striped dolphin).
Stenella—Longirostris—spinner porpoise.
Phocoenoides—dalli—Dall's porpoise.

(1) *The required minimum horizontal dimension (MHD)* of a primary enclosure pool shall be based on the average adult body length of the longest species of cetacean housed therein. (i) The MHD of a pool for Group I cetaceans shall be two times the body length of an average adult of the longest species of cetacean to be housed therein, measured from the tip of its lower jaw to the notch in the tail fluke.[3] (ii) The MHD of a pool for Group II cetaceans shall be four times the body length of an average adult of the longest species of cetacean to be housed therein as measured from the tip of the lower jaw to the notch in the tail fluke. (iii) In a pool where a mixture of both group I and group II cetaceans are to be housed, the MHD must be computed on the basis of both the average adult length of the longest species of group I cetacean and of the longest species of group II cetacean, and the required MHD shall be either two times the body length of an average adult of the longest species of group I cetacean to be housed therein or four times the body length of an average adult of the longest species of group II cetacean to be housed therein, whichever is greater. (iv) The pool size may also be required to be adjusted to assure there is adequate surface area available to all cetaceans housed in a pool, and to increase the volume when more cetaceans are added to a pool. The pool size can be increased to allow for more surface area or volume, but cannot be less than the MHD requirement as stated in subparagraph (1), (ii), and (iii) of this paragraph. Examples of MHD for group I cetaceans are shown in table I, and for group II cetaceans in table II.

(2) *The minimum depth requirements* for primary enclosure pools for all cetaceans shall be one-half the body length of the average adult of the longest species to be housed therein, regardless of the group I or group II classification, or 1.52 meters (5 feet), whichever is the greater, and can be expressed as d=L/2 or 5 feet, whichever is greater.

(3) *Pool volume.* A pool of water housing cetaceans which satisfies the MHD for either group I or group II cetaceans and which meets the minimum depth requirements, and surface area requirements discussed in paragraph (b)(4) of this section, shall have a sufficient volume of water to hold either two group I cetaceans or four group II cetaceans. If additional cetaceans of the same group are to be added to a pool, or in case the pool is to hold a mixture of group I and II cetaceans, the volume, as well as the surface area, necessary for each cetacean (if mixed), or for each additional group I or II cetacean (if not mixed), must be satisfied. The additional volume needed shall be based on the number and kind of cetaceans housed therein and shall be determined in the following manner. (i) The minimum volume of water (space) required for the first one or two group I cetaceans is based upon the formula:

Volume=(2 × average adult length of the longest species of cetacean/2)² × 0 × depth

(½ body length or 5 feet, whichever is greater, or $V=L^2 \times 0 \times d$. Volume divided by two would equal the volume required for each additional cetacean of group I. The volume requirements for each additional group I cetacean, more than two, are given in Table I. (ii) The minimum volume of water (space) required to maintain as many as four group II cetaceans is based upon the following formula:

Volume=(4 × average adult length of the longest species of cetacean/2)² × 0 × depth

(½ body length or 5 feet, whichever is greater), or $V=2L^2 \times 0 \times d$. Volume divided by four would be the volume required for each additional group II cetacean. The volume requirements for each additional group II cetacean. The volume requirements for each additional group II cetacean are given in Table II. (iii) When a mixture of both group I and group II cetaceans are housed together, the MHD must be satisfied as stated in § 3.103(b)(1), and the minimum depth cannot be less than required in § 3.103(b)(2). If additional volume is required when more cetaceans are added, this may be done by enlarging the pool in its lateral dimensions or by increasing the depth to allow for the increased volume of water, but the surface area requirements discussed below must also be met.

(4) *The minimum surface area* requirements are computed for each cetacean housed in the pool, regardless of group I or group II classification, based upon the following formula:

Surface area=(average adult body length/2)² × 0 × 1.5, or SA=L/2 × 0 × 1.5.

Surface area requirements are given in table III.

[3] The body length of a *Monodon monoceros* (narwhal) is measured from the tip of the upper incisor tooth to the notch in the tail fluke. If the upper incisor is absent or does not extend beyond the front of the head, then it is measured like other cetaceans, from the tip of the lower jaw to the notch in the tail fluke. Immature males should be anticipated to develop the "tusk" (usually left incisor tooth) beginning at sexual maturity.

TABLE I*.—*Group I Cetaceans*

Average adult length		MHD		Minimum required depth		Volume of water required for each additional cetacean, exceeding two—	
Meters	Feet	Meters	Feet	Meters	Feet	Cubic meters	Cubic feet
1.83	6	3.66	12	1.52	5	8.00	282.60
2.13	7	4.27	14	1.52	5	10.89	384.65
2.44	8	4.88	16	1.52	5	14.22	502.40
2.74	9	5.49	18	1.52	5	17.99	635.85
3.05	10	6.10	20	1.52	5	22.22	785.00
3.66	12	7.32	24	1.83	6	38.39	1,356.48
4.27	14	8.53	28	2.13	7	60.96	2,154.04
4.88	16	9.75	32	2.44	8	90.99	3,215.36
5.49	18	10.97	36	2.75	9	129.56	4,578.12
6.10	20	12.19	40	3.05	10	177.72	6,280.00
6.71	22	13.41	44	3.36	11	236.55	8,358.68
7.32	24	14.63	48	3.66	12	307.11	10,851.84
7.92	26	15.85	52	3.96	13	390.46	13,797.18
8.53	28	17.07	56	4.27	14	487.67	17,232.30

*All calculations are rounded off to the nearest hundredth. In converting the length of cetaceans from feet to meters, 1 foot shall equal .3048 meter. Due to rounding of meter figures as to the length of the cetacean, the correlation of meters to feet in subsequent calculations of MHD and additional volume of water required per cetacean, over two, may vary slightly from a strict feet to meters ratio. Cubic meters is based on: 1 cubic foot = 0.0283 cubic meter.

TABLE II*.—*Group II Cetaceans*

Average adult length		MHD		Minimum required depth		Volume of water required for each additional cetacean, exceeding four—	
Meters	Feet	Meters	Feet	Meters	Feet	Cubic meters	Cubic feet
1.52	5	6.10	20	1.52	5	11.11	392.50
1.83	6	7.32	24	1.52	5	16.00	565.20
2.13	7	8.53	28	1.52	5	21.77	769.30
2.44	8	9.75	32	1.52	5	28.44	1,004.80
2.74	9	10.97	36	1.52	5	35.99	1,271.10
3.05	10	12.19	40	1.52	5	44.43	1,570.00

*Converting cubic feet to cubic meters is based on: 1 cubic foot = 0.0283 of a cubic meter.

TABLE III.—*Minimum Surface Area Required for Each Cetacean*

Average adult length of each cetacean		Surface area required for each cetacean		Average adult length of each cetacean		Surface area required for each cetacean	
Meters	Feet	Square meters*	Square feet	Meters	Feet	Square meters*	Square feet
1.52	5	2.73	29.44	4.27	14	21.44	230.79
1.83	6	3.94	42.39	4.88	16	28.00	301.44
2.13	7	5.36	57.70	5.49	18	35.44	381.51
2.44	8	7.00	75.36	6.10	20	43.76	471.00
2.74	9	8.86	95.38	6.71	22	52.94	569.91
3.05	10	10.94	117.75	7.32	24	63.01	678.24
3.35	11	13.24	142.48	7.92	26	73.95	796.00
3.66	12	15.75	169.56	8.53	28	85.76	923.16

*Square meter = square feet/9 × 0.8361.

(c) *Sirenians.* Primary enclosures housing sirenians shall contain a pool of water and may consist entirely of a pool of water. The minimum pool size requirements, for MHD, depth, and volume shall be calculated by using the same formulas as used for group I Cetaceans (table I) and surface area in table III, in paragraph (b) of this section, based on the average adult length of such sirenians as measured from the tip of the muzzle to the notch in the tail fluke of dugongs and from the tip of the muzzle to the most distal point in the rounded tail of the manatee. This size pool shall be adequate for one or two sirenians.

(d) *Pinnipeds.* (1) Primary enclosures housing pinnipeds shall contain a pool of water and a dry resting or social activity area that must be close enough to the surface of the water to allow easy access for entering or leaving the pool. (2) The minimum size of the dry resting or social activity area of the primary enclosure for pinnipeds (exclusive of the pool of water) shall be based on the average adult length of each pinniped contained therein, as measured in a horizontal or extended position in a straight line from the tip of its nose to the tip of its tail. The minimum size of the dry resting and social activity area shall be computed using the following method:

List all pinnipeds contained in a primary enclosure by average adult length in descending order from the longest species of pinniped to the shortest species of pinniped. Square the average adult length of each pinniped. Multiply the average adult length squared of the longest pinniped by 1.5, the second longest by 1.4, the third longest by 1.3, the fourth longest by 1.2, and the fifth longest by 1.1, as indicated below. Square the average adult length of the sixth pinniped and all additional pinnipeds. Add the figures obtained for all the pinnipeds in the primary enclosure to determine the required minimum dry resting and social activity area required for such pinnipeds.

1st pinniped (average adult length)² × 1.5 = resting and social activity area required.
2nd pinniped (average adult length)² × 1.4 = resting and social activity area required.
3rd pinniped (average adult length)² × 1.3 = resting and social activity area required.
4th pinniped (average adult length)² × 1.2 = resting and social activity area required.
5th pinniped (average adult length)² × 1.1 = resting and social activity area required.
Over 5 (average adult length)² × 1.0 = resting and social activity area required for each additional animal.

Total minimum dry resting and social activity area for all pinnipeds housed in a primary enclosure.

(3) The minimum surface area of a pool of water for pinnipeds shall be at least two-thirds of the total minimum dry resting and social activity area required for the pinnipeds contained therein. The pool of water shall be at least 0.91 meters (3 feet) deep or one-half the length of the longest pinniped contained therein, whichever is greater. Parts of the pool less than 0.91 meters (3 feet) deep cannot be used in the calculation of either the resting and social activity area or as part of the pool.

(e) *Polar bears.* Primary enclosures housing polar bears shall consist of a pool of water, a dry resting and social activity area, and a den. A minimum of 37.16 square meters (400 square feet) of dry resting and social activity area shall be provided for one or two polar bears, with an additional 3.72 square meters (40 square feet) of dry resting

and social activity area for each additional polar bear. The dry resting and social activity area shall be provided with enough shade to accommodate all

for sea otters shall be based on the average adult length of each sea otter contained therein, as measured from the tip of its nose to the tip of its tail. The minimum volume of water re-

ANIMAL HEALTH AND HUSBANDRY STANDARDS

be conducted in a manner which will minimize contamination and which will assure that the food retains nutritive value and wholesome quality. The

maintain the required water quality and to prevent health hazards to the marine mammals contained therein.

(3) The wall and bottom surfaces of

when they are maintained in isolation for such purposes as medical treatment or training and given special attention.

V 43 / 182 SE 19 78

and social activity area for each additional polar bear. The dry resting and social activity area shall be provided with enough shade to accommodate all of the polar bears contained in such primary enclosure at the same time. The pool of water shall be at least 2.44 meters (8 feet) by 3.66 meters (12 feet) with a minimum depth of 1.52 meters (5 feet), with the exception of any entry and exit area. This size pool shall be adequate for two polar bears. For each additional bear, the surface area of the pool must be increased by 3.72 square meters (40 square feet). The den shall be at least 1.83 meters (6 feet) in width and depth and not less than 1.52 meters (5 feet) in height. It will be so positioned that the viewing public shall not be visible from the interior of the den. A separate den shall be provided for each adult female of breeding age in the same primary enclosure.

(f) *Sea otters.* (1) Primary enclosures for sea otters shall consist of a pool of water and a dry resting area. The MHD of the pool of water for sea otters shall be at least twice the length of the average adult sea otter contained therein as measured from the tip of its nose to the tip of its tail and the pool shall be not less than 0.91 meters (3 feet) deep. When more than two sea otters are housed in the same primary enclosure, additional dry resting area as well as pool volume is required to accommodate the additional sea otters (table IV).

(2) The minimum volume of water required for a primary enclosure pool for sea otters shall be based on the average adult length of each sea otter contained therein, as measured from the tip of its nose to the tip of its tail. The minimum volume of water required in the pool shall be computed using the following method. Multiply the square of the length of the average adult sea otter by 0 (3.14) and multiply the total by 0.91 meters (3 feet). This volume is satisfactory for one or two sea otters. For more than two sea otters, multiply one-half of the square of the length of the third average adult sea otter, and each additional sea otter (when more than two), by 0 (3.14), then multiply by 0.91 meters (3 feet).

(3) The minimum dry resting area required for one or two sea otters shall be based on the average adult length of each sea otter contained therein, as measured from the tip of its nose to the tip of its tail. The minimum dry resting area for one or two sea otters shall be computed using the following method. Square the length of the average adult sea otter and multiply the total by 0 (3.14). When the enclosure is to contain three sea otters, the additional dry resting area for the third animal shall be computed as follows. Multiply one-half of the square of the average adult length of the third sea otter by 0 (3.14). If more than three sea otters are to be kept in a primary enclosure, obtain the sum of one-half of the square of the average adult length of each additional sea otter (starting with otter number 3), and multiply this sum by 0 (3.14). Additional dry resting and social activities area is given in table IV.

TABLE IV *.—*Additional Space Required for Each Sea Otter More Than Two in a Primary Enclosure*

Length of sea otter		Resting area		Pool volume	
Meters	Feet	Square meters	Square feet	Cubic meters	Cubic feet
0.91	3.0	1.30	14.13	1.18	42.39
1.07	3.5	1.80	19.23	1.64	57.70
1.22	4.0	2.34	25.12	2.13	75.36
1.37	4.5	2.95	31.79	2.68	95.38
1.52	5.0	3.63	39.25	3.30	117.75
1.68	5.5	4.43	47.49	4.03	142.48

* All calculations are rounded off to the nearest hundredth. A conversion factor of 1 foot equals .3048 meter is used in converting the length of the sea otter from feet to meters. Due to rounding of meter figures as to the length of the sea otter, the correlation of meters to feet in subsequent calculations of additional resting area and pool volume required per sea otter, more than two, may vary slightly from a strict feet to meter ratio.

ANIMAL HEALTH AND HUSBANDRY STANDARDS

§ 3.105 Feeding.

(a) The food for marine mammals shall be wholesome, palatable, and free from contamination, and shall be of sufficent quantity and nutritive value to maintain all of the marine mammals in a state of good health. The diet shall be prepared with consideration for age, species, condition, size, and type of marine mammal being fed. Marine mammals shall be offered food at least once a day, except as directed by veterinary treatment or professionally accepted practices.

(b) Food receptacles, if used, shall be located so as to be accessible to all marine mammals in the same primary enclosure and shall be placed so as to minimize contamination of the food contained therein. Such food receptacles shall be cleaned and sanitized after each use.

(c) Food, when given to each marine mammal individually, shall be given by an employee responsible to management who has the necessary knowledge to assure that each marine mammal receives an adequate quantity of food to maintain it in good health. Such employee is required to have the ability to recognize deviations from a normal state of good health in each marine mammal so that the food intake can be adjusted accordingly. Public feeding shall be only permitted if it is done in the presence and under the supervision of an employee. Such employee must assure that the marine mammals are receiving the proper amount and type of food. Only food supplied by the facilities where the marine mammals are kept shall be fed to such mammals by the public.

(d) Food preparation and handling shall be conducted so as to minimize bacterial or chemical contamination and to assure the wholesomeness and nutritive value of the food. Frozen fish or other frozen food shall be stored in freezers which are maintained at a maximum temperature of −15° C (5° F). Thawing of the frozen food shall be conducted in a manner which will minimize contamination and which will assure that the food retains nutritive value and wholesome quality. The thawed product shall be kept iced or refrigerated until a reasonable time before feeding. All foods shall be fed to the marine mammals within 24 hours following the removal of such foods from the freezers for thawing.

§ 3.106 Water Quality.

(a) *General.* The primary enclosure shall not contain water which would be detrimental to the health of the marine mammal contained therein.

(b) *Bacterial standards.* (1) The coliform bacteria count of the primary enclosure pool shall not exceed 1,000 MPN (most probable number) per 100 ml. of water. Should a coliform bacterial count exceed 1,000 MPN, two subsequent samples may be taken at 48-hour intervals and average with the first sample. If such average count does not fall below 1,000 MPN, then the water in the pool shall be deemed unsatisfactory.

(2) When the water is chemically treated, the chemicals shall be added so as not to cause harm or discomfort to the marine mammals.

(3) Water samples shall be taken and tested at least weekly for coliform count and at least daily for pH and any chemical additives (e.g. chlorine and copper) that are added to the water to maintain water quality standards. Records must be kept concerning when all such samples were taken and the results of the tests. Records of all such test results shall be kept for a 1-year period and must be made available for inspection purposes on request.

(c) *Salinity.* Primary enclosure pools of water shall be salinized for marine cetaceans and harp seals as well as for those other marine mammals which require salinized water for their good health and well-being. The salinity of the water in such pools shall be maintained within a range of 15-36 parts per thousand.

(d) *Filtration and water flow.* Water quality must be maintained by filtration, chemical treatment, or other means so as to comply with the water quality standards specified in this section.

§ 3.107 Sanitation.

(a) *Primary enclosures.* (1) Animal and food waste in areas other than the pool of water shall be removed from the primary enclosure at least daily, and more often when necessary to prevent contamination of the marine mammals contained therein and to minimize disease hazards.

(2) Particulate animal and food waste, trash, or debris that enter the primary enclosure pool of water shall be removed as often as necessary to maintain the required water quality and to prevent health hazards to the marine mammals contained therein.

(3) The wall and bottom surfaces of the primary enclosure pool of water shall be cleaned as often as necessary to maintain proper water quality.

(b) *Food preparation areas and food receptacles.* Containers, such as buckets, tubs, and tanks, as well as utensils, such as knives and cutting boards, or any other equipment which has been used for holding, thawing or preparing food for marine mammals shall be cleaned and sanitized after each feeding, if the marine mammals are fed once a day, and at least daily if the marine mammals are fed more than once a day. Kitchens and other food handling and preparation areas shall be cleaned at least once daily and sanitized at least once every week. Sanitizing shall be accomplished by washing with hot water (82° C, 180° F, or higher) and soap or detergent in a mechanical dishwasher, or by washing all soiled surfaces with a detergent solution followed by a safe and effective disinfectant, or by cleaning all soiled surfaces with live steam.

(c) *Housekeeping.* Buildings and grounds, as well as exhibit areas, shall be kept clean and in good repair. Fences shall be maintained in good repair. Primary enclosures housing marine mammals shall not have any loose objects, sharp projections, and/or edges which may cause injury or trauma to the marine mammals contained therein.

(d) *Pest control.* A safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained. Insecticides or other such chemical agents shall not be applied in a primary enclosure housing marine mammals except when deemed essential by an attending veterinarian.

§ 3.108 Employees.

A sufficient number of adequately trained employees shall be utilized to maintain the prescribed level of husbandry practices set forth in this subpart. Such practices shall be under the supervision of a marine mammal caretaker who has a background in marine mammal husbandry or care. Training of marine mammals shall be done by experienced trainers without physical punishment or abuse being used or inflicted upon the marine mammals.

§ 3.109 Separation.

Marine mammals which are not compatible shall not be housed in the same enclosure. Marine mammals shall not be housed near animals that would cause them stress or discomfort, or interfere with their good health. Captive marine mammals must be given access to other animals except when they are maintained in isolation for such purposes as medical treatment or training and given special attention.

§ 3.110 Veterinary Care.

(a) Programs of disease prevention, parasite control, euthanasia, and adequate veterinary care for all marine mammals shall be established and maintained under the supervision of an attending veterinarian.

(b) Marine mammals shall be observed daily by the person in charge of the care of the marine mammals or by someone working under his direct supervision. Sick or diseased, stressed, injured, or lame marine mammals shall be provided with adequate veterinary care or humanely destroyed, when necessary, unless such action is inconsistent with the research purposes for which the marine mammal was obtained and is being held.

(c)(1) In the case of a research facility, the program of adequate veterinary care shall include the appropriate use of anesthetic, analgesic, or tranquilizing drugs, when such use would be proper in the opinion of the attending veterinarian of the research facility. The use of these three classes of drugs shall be in accordance with currently accepted veterinary medical practice as cited in appropriate professional journals or reference guides which shall produce in the individual subject animal as high a level of tranquilization, anesthesia, or analgesia as is consistent with the protocol or design of the experiment.

(2) It shall be incumbent upon each research facility through its Animal Care Committee and attending veterinarian to provide guidelines and consultation to research personnel with respect to the type and amount of tranquilizers, anesthetics, or analgesics recommended as being appropriate for each species of marine mammals used by that institution.

(d) Newly acquired marine mammals shall be isolated from resident marine mammals until such newly acquired marine mammals can be reasonably determined to be in good health. Any communicable disease condition in a newly acquired marine mammal must be remedied before it is placed with other resident marine mammals.

(e) Any primary enclosure containing a marine mammal with an infectious or contagious disease shall be cleaned and sanitized in the manner prescribed by the attending veterinarian. No additional animals shall be introduced into the primary enclosure prior to such cleaning and sanitizing procedures. Any marine mammal exposed to a diseased animal shall be isolated for observation for an appropriate period of time as determined by the attending veterinarian.

(f) Temporary holding facilities with adequately and properly designed pools, tanks, restraining devices or primary enclosures shall be provided for isolation, medication, and treatment of marine mammals. The pools, tanks and primary enclosures may be less than minimum size in both lateral dimensions and depth when used in special situations when prescribed by the professional staff for temporary usage.

(g) A complete necropsy must be conducted by a veterinarian on all marine mammals that die in captivity. A necropsy report must be prepared by the veterinarian listing all pathologic lesions observed and giving the apparent cause of death. All diagnostic tests conducted on post mortem specimens shall be listed in the report, and the results of each test recorded. The management of the facility, at which the marine mammal died, must maintain these necropsy records for a period of 2 years and present them to the Department inspectors when requested.

§ 3.111 Handling.

(a) Handling marine mammals shall be done as expeditiously and carefully as possible in a manner that does not cause unnecessary discomfort, overheating, behavioral stress, or physical harm. Care should also be exercised to avoid harm to the handlers of such marine mammals.

(b) Marine mammals, to which the public is afforded direct contact, shall only be displayed for periods of time and under conditions consistent with the animals' good health and well-being. A responsible attendant must be present at all times during periods of public contact.

(c) During public display, all marine mammals must be handled so that there is minimal risk of harm to the public or to the marine mammal, with sufficient distance allowed, or barriers placed between the marine mammal and the viewing public to assure safety to both the public and the marine mammal. Performing marine mammals shall be allowed a rest period between performances at least equal to the time for one performance.

TRANSPORTATION STANDARDS

§ 3.112 Consignments to carriers and intermediate handlers.

(a) Carriers and intermediate handlers shall not accept any marine mammal presented by any person or by any department, agency, or instrumentality of the United States or of any State or local government for transportation, in commerce, more than 4 hours prior to the scheduled departure of the primary conveyance on which it is to be transported.

(b) Carriers and intermediate handlers shall attempt to notify the consignee immediately on arrival, and if unsuccessful, at least once every 4 hours following the arrival of any marine mammal at the animal holding area of the terminal cargo facility. The time, date, and method of notification to the consignee and the person notifying the consignee shall be noted on one of the documents accompanying the marine mammal.

§ 3.113 Primary enclosures used to transport marine mammals.

(a) Primary enclosures, which are used to transport marine mammals other than cetaceans and sirenians, shall (1) be constructed from materials of sufficient structural strength to contain the marine mammals; (2) be constructed from material that is durable, nontoxic, and cannot be chewed, and/or swallowed; (3) be able to withstand the normal rigors of transportation; (4) have interiors which are free from any protrusions that could be injurious to the marine mammals contained therein; (5) be constructed so that no parts of the contained marine mammals shall be exposed to the outside of the enclosures in such a way which may cause injury to the animals or to persons who are nearby or who handle the enclosures; (6) have openings which provide access into the enclosures which shall be secured with locking devices of a type which cannot be accidentally opened; (7) have such openings located in a manner which makes them easily accessible at all times for emergency removal of any live marine mammal contained therein; (8) have air inlets at heights which will provide cross ventilation at all levels (particularly when the marine mammals are in a prone position) and located on all four sides of the enclosures, and such ventilation openings shall be not less than 15 percent of the total surface area of each side of the enclosures; (9) have projecting rims or other devices placed on the ends and sides of any enclosures which have ventilation openings to provide a minimum air circulation space of 1.9 centimeters (0.75 inches) between the enclosures and any adjacent cargo or conveyance wall; and (10) be equipped with adequate handholds or other devices on the exterior of the enclosures which shall enable them to be lifted without unnecessary tilting and which will insure that the persons handling the enclosures will not come in contact with any marine mammal contained therein.

(b) Straps, slings, harnesses, or other devices, if used for body support or restraint, when transporting marine mammals such as cetaceans and sirenians shall (1) be designed so as not to prevent access to such mammals by attendants during transportation for the purpose of administering in transit care; (2) be equipped with special padding to prevent trauma or injury at critical weight pressure points on the body of the marine mammals; and (3) be capable of keeping the animals from thrashing about and causing injury to themselves or their attendants, and yet be adequately designed so as not to cause injury to the animals.

(c) Primary enclosures used to transport live marine mammals shall be large enough to assure that (1) in the case of polar bears and sea otters, there is sufficient space to turn about freely in a stance whereby all four feet are on the floor and the animal can sit in an upright position and lie in a natural position; (2) in the case of pinnipeds, each animal has sufficient space to lie in a natural position; and (3) in the case of cetaceans and sirenians, each animal has sufficient space for support of its body in slings, harnesses, or other supporting devices, if used (as prescribed in paragraph (b) of this section) without causing injury to such cetaceans or sirenians due to contact with the primary enclosure.

(d) Marine mammals transported in the same primary enclosure shall be of the same species and maintained in compatible groups. Marine mammals which have not reached puberty shall not be transported in the same primary enclosure with adult marine mammals other than their dams. Female marine mammals shall not be transported in the same primary enclosure with any mature male marine mammals.

(e) Before being used to transport marine mammals, primary enclosures, if previously used, shall be cleaned and sanitized in the manner prescribed for food preparation areas and food receptacles in § 3.107(b) of these standards.

(f) Primary enclosures used to transport marine mammals shall be clearly marked on the top and on one or more sides with the words "Wild Animal" in letters not less than 2.5 cm. (1 inch) in height, and with arrows or other markings, to indicate the correct upright position of the container.

(g) Documents accompanying the shipment shall be attached in an easily accessible manner to the outside of a primary enclosure which is part of such shipment.

§ 3.114 Primary conveyances (motor vehicle, rail, air and marine).

(a) The animal cargo space of primary conveyances used in transporting live marine mammals shall be constructed in a manner which will protect the health and assure the safety and comfort of the marine mammals contained therein at all times.

(b) The animal cargo space shall be constructed and maintained in a manner which will prevent the ingress of engine exhaust fumes and gases in excess of that ordinarily contained in the passenger compartments.

(c) No marine mammal shall be placed in an animal cargo space that does not have a supply of air sufficient for normal breathing for each live animal contained therein, and the primary enclosures shall be positioned in the animal cargo spaces of primary conveyances in such a manner that each marine mammal contained therein shall have access to sufficient air for normal breathing.

(d) Primary enclosures shall be positioned in primary conveyances in such a manner that in an emergency the live marine mammals can be removed from the conveyances as soon as possible.

(e) The interiors of animal cargo spaces in primary conveyances shall be kept clean.

(f) Live marine mammals shall not knowingly be transported with any material, substance or device which may be injurious to the health and well-being of such marine mammals unless proper precaution is taken to prevent such injury.

§ 3.115 Food and water requirements.

(a) Those marine mammals which require drinking water shall be offered potable water within 4 hours prior to being transported in commerce or offered for transportation in commerce. Such marine mammals shall be watered as often as necessary and appropriate to the species involved to prevent excessive dehydration which would jeopardize the good health and well-being of the animals.

(b) Marine mammals shall not be transported for more than a period of 36 hours without being offered food. When an attendant is required to accompany a shipment of marine mammals, as provided in § 3.115 of these standards, such marine mammals shall be fed during transit when necessary to provide for their good health and well-being.

§ 3.116 Care in transit.

(a) An attendant or employee of the shipper or receiver of any marine mammal being transported, in commerce, knowledgeable in the area of marine mammal care, shall accompany cetaceans, sirenians, and sea otters during periods of transportation to provide for their good health and well-being, to observe such marine mammals and to determine whether they need veterinary care and to obtain any needed veterinary care as soon as possible. No cetacean or sirenian in need of veterinary care shall be transported in commerce, unless such transportation is for the purpose of obtaining such care.

(b) An attendant or other employee of the shipper or receiver of cetaceans or sirenians being transported, in commerce, shall provide for such cetaceans and sirenians during periods of transport by (1) keeping the skin moist with intermittent spraying of water or protecting it by applying a nontoxic emollient, such as lanolin, to prevent drying of the skin; (2) assuring that the pecoral flippers shall be allowed freedom of movement at all times; (3) making adjustments in the position of such marine mammals at 30-minute intervals to prevent necrosis of the skin at weight pressure points; and (4) calming such marine mammals to avoid struggling, thrashing, and other unnecessary activity which may cause overheating or physical trauma.

(c) One-half of the area in a primary enclosure used to transport sea otters shall be a dry area for resting and grooming, and the other half shall be a leakproof portion which shall contain sufficient crushed ice or water to provide each sea otter contained therein with moisture necessary to allow each sea otter to maintain its hair coat by preventing it from drying and to minimize soiling of the hair coat with urine and fecal material. No sea otter in need of veterinary care shall be transported in commerce, unless such transportation is for the purpose of obtaining such care.

(d) Polar bears and pinnipeds need not be accompanied by an attendant or other employee of the shipper or receiver, unless the period of transportation will exceed 12 hours in duration. During surface transportation, it shall be the responsibility of the carrier to inspect polar bears and pinnipeds unaccompanied by an attendant at least every 2 hours to determine whether they need veterinary care and to provide any needed veterinary care as soon as possible. When transported by air, live polar bears and pinnipeds, unaccompanied by an attendant, shall be inspected by the carrier at least every 2 hours if the animal cargo space is accessible during flight. If the animal cargo space is not accessible during flight, the air carrier shall inspect such live unattended pinnipeds and polar bears whenever loaded and unloaded and whenever the animal cargo space is otherwise accessible to determine whether such unattended live animals need veterinary care, and the carrier shall provide any needed veterinary care as soon as possible. No polar bear or pinniped in need of veterinary care shall be transported in commerce, unless such transportation is for the purpose of obtaining such care.

(e) During the course of transportation, in commerce, live marine mammals shall not be removed from their primary enclosure unless it is necessary to place them into another primary enclosure or other facility, or unless an emergency situation arises making removal of marine mammals from the primary enclosure necessary.

§ 3.117 Terminal facilities.

(a) *Indoor facilities.* Carriers and intermediate handlers shall not commingle live animal shipments with inanimate cargo. All live animal shipments shall be maintained in the same animal holding area of a terminal facility of any carrier or intermediate handler at any one time. All animal holding areas shall be cleaned and sanitized often enough to prevent an accumulation of debris or excreta, to minimize vermin infestation, and to prevent a disease hazard. An effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained for all animal holding areas. Any animal holding area containing live marine mammals shall be provided with fresh air by means of windows, doors, vents, or air conditioning and shall be ventilated or have its air circulated by means of fans, blowers, or an air conditioning system in a manner that will minimize drafts, odors, and moisture condensation. The ambient temperature around any marine mammal shall not be allowed to exceed 29.5° C (85° F) at any time, nor to fall below 7.2° C (45° F), unless the marine mammal is an ice dwelling species and can tolerate temperatures below the stated minimum.

(b) *Outdoor facilities.* Carriers and intermediate handlers, in transporting, loading, and unloading, live marine mammals from indoor animal holding areas of terminal facilities to pri- mary conveyances and from primary conveyances to indoor animal holding areas of terminal facilities, shall provide the following:

(1) *Shelter from sunlight.* When sunlight is likely to cause overheating or discomfort, sufficient shade shall be provided to protect the marine mammals from the direct rays of the sun.

(2) *Shelter from snow.* Transporting devices shall be covered to provide protection for the marine mammals during snow, except to ice dwelling marine mammals which can tolerate cold weather conditions.

(3) *Shelter from cold weather.* Transporting devices shall be covered to provide protection for the marine mammals when the atmospheric or outdoor temperature falls below 10° C (50° F) unless the marine mammal is an ice dwelling species and can tolerate temperatures below the stated minimum.

§ 3.118 Handling.

(a) Carriers and intermediate handlers are responsible for moving live mammals are acclimated to lower or higher temperatures.

All written submissions made pursu-

TUESDAY, SEPTEMBER 19, 1978
PART VIII

§ 3.118 Handling.

(a) Carriers and intermediate handlers are responsible for moving live marine mammals from indoor animal holding areas of terminal facilities to primary conveyances and from primary conveyances to indoor animal holding areas of terminal facilities as expeditiously as possible.

(b) Care shall be exercised to avoid handling primary enclosures in a manner that may cause injury or stress to live marine mammals contained therein.

(c) Primary enclosures housing live marine mammals shall not be tossed, dropped, or needlessly tilted and shall not be stacked in a manner which may result in their falling.

§ 3.119 Ambient temperature within primary enclosures.

The ambient temperature or the temperature surrounding the animal within the primary enclosure used to transport live marine mammals shall not exceed 29.5° C (85° F) for a period of more than 45 minutes and shall not fall below 7.2° C (45° F) for a period of more than 45 minutes unless the person transporting such live marine mammals knows that such live marine mammals are acclimated to lower or higher temperatures.

All written submissions made pursuant to this notice will be made available for public inspection at the Federal Building, 6505 Belcrest Road, Room 703, Hyattsville, Md., during regular hours of business (8 a.m. to 4:30 p.m., Monday through Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

Comments submitted should bear a reference to the date and page number of this issue in the FEDERAL REGISTER.

Done at Washington, D.C., this 14th day of September 1978.

NOTE.—The Department has determined that this document does not contain a major requirement preparation of an economic impact statement under Executive Order 11821 and OMB Circular A-107. However, an economic impact statement has been drafted and a copy of said draft statement may be obtained by writing to the Deputy Administrator, USDA, APHIS, VS, Room 703, Federal Building, 6505 Belcrest Road, Hyattsville, Md. 20782.

PIERRE A. CHALOUX,
Deputy Administrator,
Veterinary Services.

[24 CFR Part 58]

[Docket No. R-78-572]

COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM

Environmental Review Procedures; Proposed Amendments and Revision

AGENCY: Community Planning and Development, HUD.

ACTION: Proposed rule.

SUMMARY: HUD is soliciting comments on proposed amendments to the environmental review responsibilities of community development block grant applicants who apply for funds under title I of the Housing and Community Development Act of 1974, as amended (the Act). The changes proposed would require the applicant to use HUD or HUD approved formats in its various environmental review procedures, and provide HUD the option of commenting on the applicant's environmental review process as well as the environmental quality of individual projects. Other changes would exempt certain activities from environmental review, clarify the circumstances when a prior environmental review may be used in connection with a proposed community development block grant action, and establish a system of flexible thresholds for automatically requiring an EIS. These changes are developed to address the need for changes in the review procedures that have become apparent from the operation of the program over the last several years.

COMMENTS DUE: October 19, 1978.

ADDRESS: Comments should be addressed to: Office of the Rules Docket Clerk, Office of the General Counsel, Room 5218, 451 Seventh Street SW., Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard H. Broun, Office of Environmental Quality, Room 7258, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410; telephone 202-755-6308.

SUPPLEMENTARY INFORMATION: The changes proposed in this notice have been developed to address the need for changes in the environmental review procedures for the community development block grant program that have become apparent from the program's operation over the last several years. In part, the proposed changes are the result of suggestions received from an advance notice of proposed rulemaking which was published in the FEDERAL REGISTER on May 16, 1977. Additional suggestions for amendments to the regulations resulted from the HUD audit carried out by the Office of Inspector General in 1975 and 1976, an audit performed by the General Accounting Office (GAO) in 1977, and a report issued by the Council on Environmental Quality (CEQ) in 1977. The general operating experiences of HUD staff at headquarters, regional, and field levels have also been incorporated into the proposed amendments in order to make them more consistent with the environmental review procedures for other HUD programs. The changes proposed in these regulations have been the subject of consultation with the Council on Environmental Quality as required by section 104(h) of the Act. The intent of the proposed changes and the major issues involved are as follows:

AUTHORITIES AND RESPONSIBILITIES

The basic authorities listed in § 58.1(a)(3) have been revised to include Executive Orders 11990 on wetlands, and 11988 on floodplain management, both issued on May 24, 1977, Safe Drinking/Water Act of 1974 and the Endangered Species Act of 1973. A new § 58.23 contains provisions for complying with the Executive orders on wetlands and floodplain management.

Section 58.5 has been revised to make it clear that applicants' responsibilities include compliance with applicable laws and regulations pertaining to historic preservation and archeology as well as the recently issued Executive orders relating to flood-plain management and wetlands. Section 58.5(b)(3) has been amended to clarify that under section 104(h) of the Act HUD can delegate the environmental review responsibility only to units of general purpose government.

EXEMPTIONS OF ACTIVITIES FROM ENVIRONMENTAL REVIEW

A substantial number of commenters recommended that HUD expand the number of exempt activities presently listed in § 58.21. The most significant activities recommended for exemption were: Reconstruction or improvement of existing facilities, rehabilitation, land acquisition, recreation facilities, playgrounds, parks, social service type projects, engineering and design costs, and emergency demolition and repair projects. A few commenters recommended exempting all activities except new construction. Six commenters recommended that projects below a certain cost be exempted.

In addition to comments in response to HUD's notice, studies by CEQ, GAO, and HUD as well as the program experience of HUD personnel have shown that certain kinds of eligible block grant activities are such that they do not involve environmental consequences which significantly affect the quality of the human environment. The current regulations require the block grant applicant to complete the requirements of part 58, including the time periods for comments and the release of funds for all activities.

After extensive analysis, including consultation with the Council on Environmental Quality, HUD proposes to amend § 58.21 to provide certain exemptions from environmental review procedures.

Accordingly, environmental studies, planning and design, administration, payments of urban renewal project loans, and payments for notes guaranteed under section 108 of the Act may be exempt from environmental review procedures. In addition, projects consisting solely of acquisition, construction, reconstruction, or installation of certain types of public facilities; interim assistance, single purpose grants in the small cities program for imminent threat to public health or safety; certain types of public services; and certain types of rehabilitation of buildings which meet specific criteria are exempt from the environmental review process. However, projects in this second category must comply as appropriate with other separate statutes and regulations such as the National Historical Preservation Act.

PROJECTS REQUIRING AN ENVIRONMENTAL IMPACT STATEMENT

Several sources indicated a need for HUD to provide more indicators of projects likely to be environmentally significant. HUD proposes to expand § 58.25 to reclassify those additional projects which because of their size or scale are automatically deemed to be major Federal actions significantly affecting the quality of the human environment and, therefore, requiring preparation of an EIS. The automatic thresholds in this section augment and do not replace qualitative factors which may lead an applicant, under § 58.15, to conclude that an EIS is required.

Section 58.25(a) establishes a system of variable EIS thresholds applicable to various types of housing actions. The threshold system is the same as HUD is proposing for its housing programs. The thresholds relate to certain projects which would remove, demolish or substantially rehabilitate existing housing, or provide sites for

housing. For such projects located in non-SMSA counties, and for projects in SMSA counties but outside a defined "urbanizing belt", the threshold is 500 units. For projects located within the "urbanizing belt", the thresholds vary from 500 to 2500 units depending upon the total population of the SMSA county itself. The variable thresholds are presented in table 1. They are being made applicable to other HUD programs and replace a single threshold of 500 units which HUD concluded did not distinguish among the size, population, or density of development characteristics of various project areas in the United States and which did not recognize differences in the local ability to absorb and serve new or changed development.

Section 58.25(b) states that in calculating the threshold for projects which provide sites for hospitals and nursing homes, the term "bed" shall be substituted for "housing units".

A new § 58.25(c) has been provided to correct some of the confusion which has ensued from the application of the 100 acre threshold for water and sewer projects in the 1975 version of § 58.25(b) and to link this threshold with the residential threshold in § 58.25(a). In general, the new language provides that, where a new or enlarged water or sewer line provides additional capacity which would permit undeveloped or partially developed land to absorb new residential and/or nonresidential development, the amount of new development shall be applied to the thresholds of § 58.25(a) to determine whether an EIS will be required. The threshold will be calculated by the standard flows per unit and the increase in flow converted to the number of housing units.

USE OF PRIOR ENVIRONMENTAL REVIEWS

Section 58.19 has been retitled and amended to cover various circumstances when, in consideration of a proposed project level action, a prior environmental review may be used. The conditions under which a prior environmental impact statement may be used in lieu of a new EIS are completely rewritten and moved from § 58.19(c) to § 58.19(b). The new subsection is identical to proposed HUD environmental regulations applicable to programs other than CDBG.

COMPREHENSIVE AND EARLY EVALUATION

Several sources indicated that a proliferation of environmental reviews of individual activities has occurred in some CDBG localities. As a result environmental workload has increased, but the quality of the reviews has been inadequate because they were narrowly focused. Reviews often have had little relationship to local decisions about project selection and design. Therefore, HUD has supplied separate definitions of "project" and "activity" at § 58.3 and has considerably amplified the guidance on timing of review and on cumulative impact and aggregation at §§ 58.5 and 58.15.

HUD RECEIPT AND REVIEW OF EIS'S

Current regulations on the distribution of applicant EIS to Federal agencies do not provide for furnishing a copy to HUD. this exception has made it difficult for HUD to monitor, provide technical assistance, and improve environmental performance in the localities whose projects most significantly affect the environment. HUD now proposes to receive and review CDBG EIS's in the same manner as other Federal agencies. HUD may critique the actions of the applicant and make recommendations for modifications of proposed actions or for consideration of alternative activities. This revision is responsive to comments of the Council on Environmental Quality. Appropriate revisions have been made at §§ 58.17 and 58.27.

APPLICANT INTERACTION WITH HUD

A new subsection has been added to § 58,27. The new material describes HUD's role in commenting on or otherwise responding to the environmental review process of applicants, and is responsive to comments received from the Council on Environmental Quality (CEQ) and the General Accounting Office (GAO). It specifies that HUD may notify the applicant of defects in its environmental actions and make recommendations for correction. Such a notification will place the applicant on notice that a request for release of funds and certification of the applicant may be rejected by HUD, unless the defect is remedied to HUD's satisfaction. This revision will also clarify HUD's new role in EIS review.

REQUIRED USE OF HUD FORMATS

The poor quality of the Environmental Review Record (ERR) prepared and maintained by many CDBG applicants has been the subject of comment from the Council on Environmental Quality, the General Accounting Office, HUD's own auditors, HUD field staff, and from non-Federal sources. ERR's have been cited as omitting significant information and procedural steps needed to demonstrate that an environmental review adequate to comply with this part has been performed. Therefore, HUD has revised § 58.11 to require that applicants use the format contained in HUD-399-CPD, Environmental Reviews at the Community Level, or such other format as may be acceptable to HUD. The description of the project, which has often been defective in the ERR, will now have to include basic elements prescribed by HUD.

The use of HUD formats or other formats acceptable to HUD for findings of no significant effect on the environment, notices of intent to file an EIS, and notices of intent to request release of funds will be required. This revision is responsive to comments which indicated that local practice has frequently produced inadequate information. Appropriate revisions have been made in §§ 58.16, 58.17, and 58.30.

TIME PERIODS

Several commenters recommended that all time periods be counted by calendar days. Section 58.2 has been revised accordingly. The change simplifies the counting of days.

COMBINING OF NOTICE PERIODS

Thirty-two commenters recommended that the 15-day notice of finding of no significant effect and the 5-day notice of intent to request release of funds be combined. This has been accomplished by a change which permits the applicant to publish the two notices together. The period for the notice of intent to request release of funds has been changed from 5 business days to seven (7) calendar days. The periods for the two notices may run concurrently. Thus, at the end of the 15-day period for comment on the notice of finding of no significant effect, the applicant, if its funding is unchallenged, may request the release of funds.

PUBLICATION AND DISSEMINATION OF NOTICES

In response to complaints that notices have been placed in obscure and little read legal or commercial journals, § 58.17(b) has been revised to indicate that a notice of intent to request release of funds and notice of finding of no significant effect must be published at least once in a newspaper which is a source of general news used by the general public or published in some other manner most likely to inform residents.

PERMISSIBLE BASES FOR OBJECTING TO RELEASE OF FUNDS

The bases for objections to the request for release of funds are currently procedural only. Part 58.31 has been amended to allow HUD to reject an applicant's release for funds for a project which HUD determines to have a defective environmental review process or to be environmentally unsound. Other Federal agencies may submit a finding to HUD that an applicant's project is environmentally unsound.

CERTIFYING OFFICER OF APPLICANT

Several commenters recommended

Accordingly, HUD proposed to amend and revise Title 24, Part 58 to read as follows:

national policy, goals, and procedures for protecting and enhancing environmental quality. NEPA, as implemented

contract the categories of actions that would be subject to environmental identification and review procedures.

(3) *Other applicable authority.* The

diminished protection of the environment. The policies of NEPA, in addition to other responsibilities set out in section 2 and Title I of NEPA, require

State or a unit of general local government to undertake a community development program in whole or in part,

CERTIFYING OFFICER OF APPLICANT

Several commenters recommended that provision be made for delegating signature authority for purposes of environmental reviews and release of funds. HUD recognizes that for a multiactivity CDBG program signatures by the chief executive officer may be required with unnecessary frequency. Therefore a definition of "Certifying Officer of Applicant" has been supplied at § 58.3, and this officer is cited at relevant places in the revised regulation.

The Department wishes to solicit comment on changing § 58,17 to require at least one public hearing for an Environmental Impact Statement. The present regulations in § 58.17 (c) and (d) state that the applicant shall determine whether or not it will conduct a hearing or hearings and include the procedures and factors to be considered if a hearing is held. There has been comment that the optional nature of the public hearing does not provide for needed public input in the environmental review process and that requiring at least one public hearing on an EIS would result in better public review and comment. In commenting, the reader should be conscious of the relationship between the environmental procedures and the regulations for the CDBG program which require at least two public hearings prior to application submission. The Department will evaluate all comments received and shall make any needed adjustments in the final regulation.

* * * * *

With respect to the above proposed amendments, interested persons are invited to participate in the making of the final rule by submitting written comments or views on the proposed amendments. To facilitate HUD's review of written comments, reviewers are requested to clearly identify the amendment to which the comments are addressed. Comments should be filed with the Rules Docket Clerk, Room 5216, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410. All relevant comments received on or before the date specified above will be considered before adoption of the final rule. Copies of comments will be available for examination during business hours at the above address.

A finding of inapplicability with respect to environmental impact has been prepared in accordance with the Department's environmental procedures. A copy of this finding is available for inspection and copying in the Office of the Rules Docket Clerk at the above address.

* * * * *

Accordingly, HUD proposed to amend and revise Title 24, Part 58 to read as follows:

PART 58—ENVIRONMENTAL REVIEW PROCEDURES FOR THE COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM

Subpart A—General Policy and Responsibilities

Sec.

Subpart C—Releases of Funds for Particular Projects

58.30 Release of funds upon certification.
58.31 Objections to release of funds.
58.32 Effect of approval of certification.

AUTHORITY: Sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Subpart A—General Policy and Responsibilities

§ 58.1 Purpose and authority.

(a) *Authority—(1) Basic law.* The National Environmental Policy Act of 1969 (Pub. L. 91-190, 42 U.S.C. 4321 et seq.) (hereinafter "NEPA") establishes national policy, goals, and procedures for protecting and enhancing environmental quality. NEPA, as implemented by Executive Order 11514 and the Guidelines of the Council on Environmental Quality, 40 CFR Part 1500 (hereinafter "CEQ," as to the Council, and "CEQ Guidelines") requires in section 102(2)(c), in addition to other responsibilities, that all agencies of the Federal Government prepare detailed environmental impact statements on proposals for major Federal actions significantly affecting the quality of the human environment.

(2) *Section 104(h) of title I (of the Housing and Community Development Act of 1974* (Pub. L. 93-383, 42 U.S.C. 5301 et seq.) (hereinafter "section 104(h)" and "Title I" respectively) authorizes a procedure under which applicants with approved applications for assistance under Title I assume for specific projects the environmental review and decisionmaking responsibilities that would apply to the HUD Secretary were he to undertake such projects as Federal projects. The procedure eliminates the necessity for Federal environmental impact statements at the time of the initial application. At the same time, however, the procedure is intended to assure that NEPA policies and protection of the environment continue undiminished. Under the procedure applicants are to certify prior to any commitment of Title I funds for particular projects (other than funds for general planning or environmental study purposes) that they have met all of their environmental responsibilities in accordance with regulations issued by HUD Secretary, after consultation with CEQ. Approval of such certification by the Secretary under section 104(h) discharges the responsibilities he may otherwise have had under NEPA with respect to the specific projects covered by the certification. The Secretary is to wait 15 days after receipt before acting upon such a certification, thus giving those who may wish to challenge a certification an opportunity to take appropriate action. That challenge can include suit against the certifying officer or applicant who for purposes of enforcing NEPA has consented to accept the jurisdiction of the Federal courts. Such challenge may also include a request that the Secretary reject the certification. The Secretary will consider a request for rejection of the certification only if such request is grounded on certain bases, as set forth in § 58.31(b). Under section 104(h) cities, counties and other units of general local government assume only those responsibilities which would apply if the HUD Secretary were to undertake the projects proposed for assistance as Federal projects. Thus, these regulations neither expand nor

contract the categories of actions that would be subject to environmental identification and review procedures.

(3) *Other applicable authority.* The environmental review process must also take into account, where applicable, the criteria, standards, policies and regulations under the subsections below. The process should also consider the relationship of a project funded under Title I and the requirements of these authorities, to anticipated requests for other Federal assistance, particularly housing, to which these authorities may apply. An explanation of how these authorities are taken into account and considered shall be documented in the environmental review record prior to the applicant's submission of the certification and request for release of funds required by § 58.30.

(i) *Historic properties.* The National Historic Preservation Act of 1966 (Pub. L. 89-665); Preservation of Historic and Archeological Data Act of 1974 (Pub. L. 93-291) and regulations which may hereafter be issued; Executive Order 11593, Protection and Enhancement of the Cultural Environment, 1971; Procedures for Protection of Historic and Cultural Properties, Advisory Council on Historic Preservation, 36 CFR Part 800.

(ii) *Noise.* HUD Handbook 1390.2, Noise Abatement and Control, Department Policy, Responsibilities and Standards, 1971.

(iii) *Flood plain.* Flood Disaster Protection Act of 1973 (Pub. L. 93-234) and implementing regulations; Title 24, Chapter X, Subchapter B, National Flood Insurance Program; and Executive Order 11988.

(iv) *Coastal zones and wetlands.* Coastal Zone Management Act of 1972 (Pub. L. 92-583), Executive Order 11990 and applicable State legislation or regulations.

(v) *Air quality.* Clean Air Act (Pub. L. 90-148), as amended; and applicable U.S. Enviromental Protection Agency implementing regulations.

(vi) *Water quality.* Federal Water Pollution Control Act (Pub. L. 92-500), section 1424(e) of the Safe Drinking Water Act of 1974 (Pub. L. 93-523) and applicable U.S. Environmental Protection Agency implementing regulations.

(vii) *Wildlife.* Fish and Wildlife Coordination Act (Pub. L. 85-624).

(viii) *Endangered species.* The Endangered Species Act of 1973 (Pub. L. 93-205) and as applicable Department of the Interior and Department of Commerce implementing regulations.

(b) *Purpose.* These regulations implement the requirements of section 104(h), which is intended to assure that the policies of NEPA are most effectively implemented in connection with the expenditure of funds under Title I, and to assure to the public undiminished protection of the environment. The policies of NEPA, in addition to other responsibilities set out in section 2 and Title I of NEPA, require the use of all practicable means, consistent with other essential considerations of national policy, to improve and coordinate Federal plans, functions, programs, and resources to the end that the Nation may—

(1) Fulfill the responsibilities of each generation as trustee of the environment for succeeding generations;

(2) Assure for all Americans safe, healthful, productive, and esthetically and culturally pleasing surroundings;

(3) Attain the widest range of beneficial uses of the environment without degradation, risk to health or safety, or other undesirable and unintended consequences;

(4) Preserve important historic, cultural, and natural aspects of our national heritage, and maintain, wherever possible, an environment which supports diversity and variety of individual choice;

(5) Achieve a balance between population and resource use which will permit high standards of living and a wide sharing of life's amenities; and

(6) Enhance the quality of renewable resources and approach the maximum attainable recycling of depletable resources.

§ 58.2 Time periods.

All time periods in this part shall be counted in calendar days. The first day of a time period begins at 12:01 a.m. local time of the first day following the action which initiates it.

§ 58.3 Terminology.

For the purposes of this part, the following terminology shall apply:

Actions which may significantly affect the quality of the human environment. Those actions for which section 102(2)(c) of NEPA would require the preparation of an environmental impact statement (EIS). Applicants assuming NEPA responsibilities pursuant to Title I and these regulations shall review each project proposed for fund release under Title I in accordance with the environmental review process described in these regulations in order to determine whether the applicant's request to HUD for the release of Title I funds would constitute an action, were the applicant a Federal agency, which may significantly affect the quality of the human environment.

Applicant. The applicant is the State or unit of general local government which makes application pursuant to the provisions of subpart D or subpart E of 24 CFR Part 570. One or more public agencies, including existing local public agencies, may be designated by the chief executive officer of a State or a unit of general local government to undertake a community development program in whole or in part, but only the State or unit of general local government may be the applicant under the subparts cited above, and under this Part 58. Upon execution of its grant agreement with HUD, an applicant becomes a "recipient" under 24 CFR Part 570. As used in this Part 58, the term "applicant" includes "recipient" under Part 570, where the context so requires.

Certifying officer. The term "certifying officer" means the chief executive or another officer of the applicant authorized, in accordance with applicable local law, to execute the certification and request for release of funds specified at § 58.30, to consent to assume the status of a responsible Federal official under the National Environmental Policy Act of 1969, and to consent on behalf of the applicant to accept the jurisdiction of the Federal courts for the enforcement of NEPA responsibilities as such official.

Environmental impact. Any alteration of exiting environmental conditions, or creation of a new set of environmental conditions, adverse or beneficial, caused or induced in whole or in part, directly or indirectly, by a proposed project under Title I.

Environmental impact statement (EIS). A written statement, propared in accordance with NEPA and CEQ guidelines using such format as may be acceptable to HUD, describing any alteration of environmental conditions or creation of a new set of environmental conditions, adverse or beneficial, caused or induced by the action or set of actions under consideration, and the alternatives to such action or group of actions. The statement should include a quantitative measure of magnitude and a qualitative measure of importance of the environmental impacts.

Environmental review and environmental review process. The entire process for compliance by the applicant with NEPA under this part with respect to a project funded under Title I.

Level of clearance finding. The applicant's determination pursuant to § 58.15(d) as to which of the two levels of environmental clearance applies.

Activity. As used in this part, "activity" means both those actions funded or authorized to be funded with Title I assistance and those related actions which are not so funded or not authorized to be so funded. In the context of environmental review, it is not the source of funds for an activity, but the nature of the activity and its relationship to other activities which is relevent. Where the term "eligible activity" is used in this part, it means an activity which is eligible for Title I as-

sistance pursuant to 24 CFR parts 570 and 571.

Project. The term "project", as used in this part, means an activity or a

(v) At least ninety percent (90%), by estimated cost, of all relocation payments have been made;

(vi) With respect to each park, play-

§ 58.4 [Reserved]

§ 58.5 General policy.

(a) *Applicants to assume environ-*

assume and carry out the environmental responsibilities hereunder. If an applicant believes it may lack legal capacity to assume and carry out envi-

which should be implemented when the project is undertaken, in order to protect or enhance environmental quality or minimize adverse environ-

compass the entire multi-year scope of activities and shall not be limited to those activities scheduled for any given year. This subsection applies to

V 4 3 / 1 8 2

sistance pursuant to 24 CFR parts 570 and 571.

Project. The term "project", as used in this part, means an activity or a group of integrally related activities, designed by the applicant to accomplish, in whole, or in part, a specific goal. Geographically or functionally related activities designed to accomplish a specific goal, irrespective of the funding sources of those activities, shall be grouped together for consideration as a single project. Because of the interrelationships of the activities comprising the project, the project as a whole shall be subject to a single environmental review in accordance with this part. A project may take a number of years to complete and may require funds in addition to the amount provided in a single program year.

SMSA. A standard metropolitan statistical area as defined by the Office of Management and Budget.

SMSA county. Within a SMSA, a county or county equivalent as listed in the P-25 series, population estimates and projections, published by the Bureau of the Census.

Urbanizing belt. Urbanizing belts are identified as the delineated urbanized areas, as defined by the Bureau of the Census, plus a two-mile zone around the outer boundaries of such areas. In cases where this two-mile zone borders or includes a portion of an incorporated place lacking census tracts, or, when the two-mile zone borders or includes a portion of a census tract, the next outer boundary of such incorporated place or census tract may be used to delineate the outer limit of the urbanizing belt. In no case shall the urbanizing belt extend beyond the SMSA boundary.

Urban renewal project. A project as defined in § 110(c) of the Housing Act of 1949, as amended, or a neighborhood development program as defined in § 131(b) of the Housing Act of 1949, as amended.

Substantial completion. As applied to an urban renewal project, this term means that:

(i) Ninety percent (90%) or more of site improvement work has been completed and the remainder is under contract;

(ii) Ninety percent (90%) or more of demolition work has been completed and the remainder is under contract;

(iii) Relocation of all occupants of at least ninety-eight percent (98%) of the housing units in the relocation workload, or of all but five (5) such housing units, whichever is the lesser, has been completed;

(iv) Relocation for at least ninety-five percent (95%) of all cases in the nonresidential relocation workload, or for all but ten (10) such cases, whichever is the lesser, has been completed;

(v) At least ninety percent (90%), by estimated cost, of all relocation payments have been made;

(vi) With respect to each park, playground, public building or other public facility to be provided as a noncash local grant-in-aid:

A. All land necessary for the provision thereof has been conveyed to or is in the ownership of the providing entity or is covered by an unconditional purchase, or similar, agreement,

B. All necessary planning agency or other public body approvals have been obtained,

C. All, or virtually all, of the funds necessary for the provision thereof have been authorized by the governing body of the providing entity and all and any necessary bond referendums or other public approvals have been obtained,

D. Complete working drawings and specifications have been prepared for the construction thereof and firm supportable estimates of the costs incident to provision thereof have been developed, and

E. A firm assurance exists of timely completion and, in any event, of completion within five (5) years from the date of the assurance;

(vii) With respect to dwelling units not to be demolished, at least ninety-five percent (95%) comply with applicable codes and at least seventy-five percent (75%) comply with applicable property rehabilitation standards established for the urban renewal project: *Provided,* that in any event, project activities may be deemed complete in regard to dwelling units not to be demolished where the following conditions exist:

A. Area decline has been arrested and stability and self-generating renewal assured,

B. Public facilities and services have been, and will continue to be, provided to support continued stability,

C. Local financial institutions are making property loans in the area, and

D. The community will continue an adequate level of code enforcement activities in the area;

(viii) All project land acquisition has been completed; and

(ix) An amount equal to the HUD approved land disposition value of all acquired project land has been credited to the urban renewal project account(s): *Provided,* that for all project land actually sold, the full sale price thereof shall be so credited and for all leased or unsold project land, the full amount of the HUD approved estimate of the disposition value thereof shall be so credited from community development block grants or local funding sources.

§ 58.4 [Reserved]

§ 58.5 General policy.

(a) *Applicants to assume environmental responsibilities.* Except as provided at paragraph (b) of this section, all applicants for assistance under Title I shall be required to assume responsibility for carrying out all of the provisions of NEPA relating to particular projects for which the release of funds is sought. This shall include assuming all applicable responsibilities relating to such projects for compliance with the National Historic Preservation Act of 1966, as amended; the Preservation of Historic and Archeological Data Act of 1974, as amended; Executive Order 11593, May 13, 1971, Protection and Enhancement of the Cultural Environment; Procedures for Protection of Historic and Cultural Properties, Advisory Council on Historic Preservation, 36 CFR Part 800; Executive Order 11988, May 24, 1977, relating to Floodplain Management; Executive Order 11990, May 24, 1977, relating to Protection of Wetlands; Section 1424(e) of the Safe Drinking Water Act of 1974; the Endangered Species Act of 1973; and other regulations and orders issued relative to any of the foregoing. In assuming such responsibility, the applicant's certifying officer shall carry out the responsibilities of the "responsible Federal official" as that term is used in NEPA and applicable regulations thereunder. Such responsibilities include, where applicable, the conduct of environmental reviews; decisionmaking and action as to environmental issues; preparation and circulation of draft and final EIS's; and assumption of lead agency responsibilities for preparation of such statements in behalf of Federal agencies when such agencies consent to such assumption. The certifying officer shall be subject to the jurisdiction of the Federal courts pursuant to section 104(h); such certifying officer of the applicant shall not be represented by the Department of Justice in court, but reasonable defense costs, including the fees of attorneys and experts, incurred in environmental litigation may be funded from the applicant's grant amounts.

The carrying out of all environmental review responsibilities shall be documented in the environmental review record prior to the applicant's submission of the certification and release of funds required by § 58.30.

The certification described at § 58.30 must be submitted to HUD by the applicant prior to the release of funds for any such project as evidence of the assumption of the responsibilities set forth above.

(b) *Exception.* (1) Each applicant shall, prior to submitting an application, review its legal capacity to assume and carry out the environmental responsibilities hereunder. If an applicant believes it may lack legal capacity to assume and carry out environmental review responsibilities hereunder, then it shall submit to the HUD official authorized to receive the application the legal opinion of its attorney in support of such claim and shall consult with said HUD official in order to obtain appropriate instructions. Such claim shall be made prior to submitting an entitlement or discretionary application. Discretionary applicants shall submit such claim to HUD with the preapplication, if a preapplication is required. HUD will review such claim and approve or disapprove it.

(2) If an applicant's claim of lack of legal capacity has been approved by HUD, then HUD will complete an environmental assessment, including an EIS if appropriate, pursuant to HUD Handbook 1390.1, as amended, before the application is approved, or in those cases where a preapplication is required, before the applicant is invited to submit a full application.

(3) Community associations, other applicants which are eligible for assistance pursuant to 24 CFR section 570.403(b)(4) unless such applicant is also described in the first sentence of 24 CFR section 570.3(v), and private developers approved under Title VII of the Housing and Urban Development Act of 1970 or Title IV of the HUD Act of 1968, are considered by HUD to lack the legal capacity to assume or carry out environmental review responsibilities.

(c) *Environmental review process.* The environmental review process consists of a study by the applicant of each project to identify any environmental impacts of actions proposed to be taken by the applicant which are to be supported, in whole or in part, by Title I funds.

(d) *Determination of impact.* In the environmental review process, the applicant must arrive at a determination as to whether or not any proposed project will result in any environmental impact; or will itself be affected by the environment; the nature, magnitude and extent of any such impact; whether or not any changes could be made in the project as proposed, or alternatives to such project could be adopted, to eliminate or minimize adverse impacts; and the level of environmental clearance which is appropriate. Such determination is largely a matter of judgment on the part of the applicant, involving evaluation of available facts, pursuant to the procedures and guidelines contained in this part.

(e) *Conditions and safeguards.* If the applicant's environmental review process reveals conditions or safeguards which should be implemented when the project is undertaken, in order to protect or enhance environmental quality or minimize adverse environmental impacts, then such conditions or safeguards shall be set forth in the environmental review record and the applicant shall use all appropriate means to assure that those conditions and safeguards are implemented.

(f) *Decision not to implement.* If, through the environmental review process, the applicant concludes that the proposed project should not be implemented in whole or in part, then the applicant may reprogram to another eligible project, in accordance with the applicable provisions of 24 CFR 570.305.

(g) *Scope and timing of environmental reviews.* Applicants shall carry out their environmental review responsibilities for projects as defined at § 58.3 in accordance with the following:

(1) *Timing.* To the greatest extent possible, the environmental review of proposed projects shall be carried out concurrently with the formulation of the applicant's community development program and the preparation of the application for Title I funds. Environmental review shall commence at the earliest possible point in the development of a project. When a project is formulated, it shall be reviewed for environmental considerations in order to identify and evaluate expected or potential environmental impacts, to devise changes and modifications to eliminate or mitigate adverse impacts, and to explore alternatives. By developing and carrying out its environmental review as part of the overall program and application formulation process, the applicant can considerably shorten the time between program development and program implementation.

(2) *Cumulative impact and aggregation.* The cumulative effects of related actions must be considered together. Activities which are individually small may, in the aggregate, have cumulatively large effects on the environment, especially when a number of such activities will take place at or about the same general time and in the same general location. Also, a series of actions taking place over extended periods of time can, in the aggregate, have a cumulative effect upon the environment much greater than the effect of each individual action considered separately. All individual actions which are related either geographically or functionally, or are logical parts of a composite of contemplated actions, shall be grouped and shall be deemed by the applicant to be a project and must be evaluated as a whole in a single, comprehensive environmental review. The environmental review of a multi-year project shall encompass the entire multi-year scope of activities and shall not be limited to those activities scheduled for any given year. This subsection applies to all projects and activities, except that for exempt activities defined at § 58.21(a) the applicant may, but is not required to, apply these aggregation requirements.

(3) *Illustrations.* Where an applicant proposes to acquire a parcel of land, relocate its occupants, clear the site by demolition, then develop the site, or dispose of it for development by others, then all of these activities must be viewed as comprising a single project, for purposes of environmental review. Where an applicant proposes to undertake a number of small activities, such as street, water, and sewer improvements in a given neighborhood, the applicant shall aggregate all such geographically or functionally related activities and view them as a single project for environmental review purposes and shall evaluate their cumulative environmental impact. This applies even if the activities are to occur over a period of years and even if some of the activities are to be funded by other than Title I funds or carried out by someone other than the applicant.

§ 58.6 [Reserved]

§ 58.7 [Reserved]

§ 58.8 [Reserved]

§ 58.9 Financial assistance for environmental review.

Applicants may utilize Federal financial assistance to enable them to carry out environmental review pursuant to this part, in accordance with the provisions of 24 CFR 570.205, 570.206(h), 570.301 and 571.205 and 571.206(h). The costs of environmental reviews include any costs incurred in complying with any of the authorities mentioned at § 58.1(a)(3) of this part.

§ 58.10 [Reserved]

§ 58.11 Environmental review record.

Applicants shall prepare and maintain a written record of the environmental review pertaining to each project, which shall be designated the "Environmental Review Record," and shall be available for review as part of the project proposal at the request of interested agencies, groups or individuals. The environmental review record, shall be prepared and maintained in accordance with format I, contained in HUD-399-CPD, Environmental Reviews at the Community Level, or such other format as may be acceptable to HUD. It shall include all material required by this part and format I and any other material rele-

SEP 19 78

V 43 / 182 SEP 19 78

vant to the actions taken pursuant to this part.

§ 58.12 [Reserved]

§ 58.13 [Reserved]

§ 58.14 [Reserved]

§ 58.15 Steps to commence environmental review process.

The manner in which the applicant carries out the environmental review process, including the concurrent historic preservation review, and other reviews required by the authorities set forth in § 58.1(a) and the responsibilities assumed pursuant to § 58.5(a), is largely within the discretion of the applicant. However, the process should start as early in the planning and program development process as possible, should be completed while alternatives can still reasonably be considered and action taken to enhance environmental quality and shall include the following steps:

(a) *Determine existing conditions.* Existing environmental conditions and trends which are likely to occur absent implementation of the proposed project should be identified. Such information is an essential data base from which to assess and evaluate any effects of the project.

(b) *Identify environmental impacts.* An identification of the nature, magnitude, and extent of all environmental impacts of the project, whether beneficial or adverse, should be identified.

(c) *Examine identified impacts.* As to all environmental impacts of the proposed project which are identified:

(1) *Possible project modification.* Examine the project and consider ways in which the project or external factors relating to the project could be modified in order to eliminate or minimize any adverse environmental impacts and enhance environmental quality. The examination should include consideration in light of the policies set forth in § 58.1(b) of both positive and negative effects of any such modification in relation to design, use, location, cost, and timing of the proposed project and its implementation.

(2) *Alternatives.* Examine alternatives to the project itself which would eliminate or minimize environmental impacts or enhance environmental quality. The examination should include consideration of both positive and negative effects of any such alternatives in relation to design, use, location, cost, and timing, and consideration of the effect of no project.

(d) *Level of clearance finding.* Having completed each of the foregoing steps that may be applicable in the environmental review process, the applicant shall make one of the two level of clearance findings set forth below:

(1) *Finding that request for release of funds for project is not an action which may significantly affect the quality of human environment.* If the environmental review process of the applicant results in a finding by the applicant that the request for release of funds for the proposed project is not an action which may significantly affect the quality of the human environment, then a document stating this finding and the facts and reasons supporting the finding shall be prepared by the applicant and included in the environmental review record. The document shall set forth sufficient information to demonstrate that the applicant has complied with each step in the environmental review process.

(2) *Finding that request for release of funds for project is an action which may significantly affect the quality of the human environment.* If an EIS is required by § 58.25, or if the environmental review process of the applicant results in a finding by the applicant that the request for release of funds for the proposed project is an action which may significantly affect the quality of the human environment, then a document stating this finding shall be prepared by the applicant and included in the environmental review record. An EIS is required for each action which may have such significant effect.

§ 58.16 Steps to complete environmental review process where level of clearance finding is that the request for the release of funds for project is not an action which may significantly affect the environment (no EIS).

The following procedure shall be followed where the level of clearance finding is that specified in § 58.15(d)(1):

(a) *Notice of finding of no significant effect.* The applicant shall prepare a notice of finding of no significant effect on the environment using format VI of HUD-399-CPD, Environmental Reviews at the Community Level, or such other format as may be acceptable to HUD.

(b) *Publication and dissemination.* The notice of finding of no significant effect on the environment shall be published and disseminated in the same manner as a notice of intent to file an EIS, as described as § 58.17(b) and will provide at least 15 days from the date of initial publication for public comment. The applicant may, at the same time of publication of the above notice, also publish the notice required by § 58.30(a). In such case, both notices shall be published and disseminated in the manner specified at § 58.17(b).

(c) *Completion.* Following publication and dissemination of the notice of finding of no significant effect on the environment and the expiration of any time fixed for comments, the environmental review process shall be complete, unless further proceedings are found by the applicant to be necessary, due to responses to such notice, or otherwise.

§ 58.17 Steps to complete environmental review process where level of clearance finding is that the request for the release of funds for project is an action which may significantly affect the environment (EIS required).

The following procedure shall be followed where the level of clearance finding is that specified in § 58.15(d)(2):

(a) *Notice of intent to file an EIS.* As soon as practicable, the applicant shall prepare a notice of intent to file an EIS using format V of HUD-399-CPD, Environmental Review at the Community Level, or such other format as may be acceptable to HUD.

(b) *Publication and dissemination.* Copies of the notice of intent to file an EIS shall be sent to the local news media, individuals and groups, including low- and moderate-income neighborhood groups, known to be interested in the applicant's activities, local, state, and Federal agencies, including the headquarters and appropriate Regional Office of the Environmental Protection Agency, The HUD Area Office, the appropriate A-95 clearinghouses, and others believed appropriate by the applicant. Such notice shall be published at least once in a newspaper of general circulation in the affected community. If such newspaper is of a type specializing in the publication of legal, real estate, commercial, or other notices, listings, and advertisements and is not of a type subscribed to and read by the general public as a source of news of general public interest, then such notice shall also be published at least once in easily readable type in the nonlegal section of a newspaper of general circulation, and where appropriate in a minority and non-English language newspaper of general circulation where such exists. The applicant also shall make reasonable efforts to provide the notices, in the form of press releases to neighborhood newspapers or periodicals serving low- and moderate-income neighborhoods.

(c) *Public hearings—Procedure.* Prior to the preparation and distribution of a draft EIS, the applicant shall determine whether or not it will conduct a hearing or hearings at which members of the public may be heard respecting the preparation and contents of the draft EIS. The applicant should also determine whether or not separate public hearings shall be held concerning the draft EIS, or whether such public hearings shall be combined with other public hearings pertaining to the application of the applicant. All such public hearings concerning a draft EIS shall be preceded by a notice of public hearing, which shall be published and disseminated in the same manner as a notice of intent to file an EIS as set forth in § 58.17(b), at least 15 days prior to such hearing, and which shall: (1) State the date, time, place, and purpose of the hearing; (2) describe the project, its estimated costs, and the project area; (3) state that persons desiring to be heard on environmental issues will be afforded the opportunity to be heard; (4) state the name and address of the applicant and the certifying officer of the applicant; and (5) state where the draft EIS can be obtained, whether in person or by mail, and any charges that may apply.

(d) *Public hearings—Factors to consider.* The determination of whether or not public hearings shall be held prior to distribution of a draft EIS or after such distribution, or at any other time during the environmental review process, shall be within the reasonable discretion of the applicant. In determining whether or not to hold such public hearings on environmental issues, either separately, or in combination with other proceedings relating to the application of the applicant, the following factors should be considered: (1) The magnitude of the projects, in terms of economic costs, the geographic area involved, and the uniqueness of size of commitment of the resources involved; (2) the degree of interest in or controversy concerning the projects, as evidenced by requests from the public, or from Federal, State, or local authorities, for information, or that a hearing be held; (3) the complexity of the issues and the likelihood that information will be presented at the hearing which will be of assistance to the applicant in carrying out its environmental responsibilities respecting the particular projects; (4) the extent to which public involvement has been achieved with respect to environmental concerns through other means, such as other public hearings, citizen participation in the development of the applicant's community development program and in formulation of its application, meeting with citizen representatives, and written comments on the particular projects.

(e) *Draft EIS.* A draft Eis shall be prepared in accordance with CEQ guidelines (40 CFR Part 1500). Copies of the draft EIS shall be sent by the applicant to the HUD Area Office, The HUD Regional Office, and the HUD Library, Eighth Floor, U.S. Department of Housing and Urban Development, Washington, D.C. 20410 (one copy each), to the U.S. Environmental Protection Agency (EIS) (five copies to the appropriate Regional Office and five copies to the Office of Federal Activities (OFA), Room 537, West Tower, 401 M Street SW., Washington, D.C. 20460), and simultaneously to Federal agencies whose areas of jurisdiction of law or special expertise are involved, to the applicable OMB-designated A-95 clearinghouses, to appropriate local agencies and entities, including local and area planning agencies, and groups or individuals known by the applicant to have an interest in the proposed action of the applicant. The CEQ guidelines (appendix II) set forth a listing of the Federal agency jurisdictions and special expertise. Copies shall also be made available to the public at the offices of the applicant and at public libraries and either copies, or summaries, of the draft EIS, must be made available, upon request, to persons who request them. Upon filing of the draft EIS with EPA, a notice that the applicant has prepared a draft EIS will be published by EPA in the FEDERAL REGISTER. Commencing on the date of such publication, there shall be a minimum review period of 45 days for the draft EIS, plus any extensions thereof initiated or granted by the applicant. A draft EIS must be on file with EPA at least 90 days prior to submission to HUD of a certification and request for release of funds for the particular projects pursuant to § 58.30.

(f) *Final EIS.* A final EIS shall be prepared in accordance with CEQ guidelines (40 CFR Part 1500). The final EIS must take into account and must respond to the comments received as the result of circulation of the draft EIS. The final EIS, including all comments received and the applicant's responses thereto, shall be filed with the HUD Area Office, the HUD Regional Office, and the HUD Library, Eighth Floor, U.S. Department of Housing and Urban Development, Washington, D.C. 20410 (one copy each), with EPA (five copies to the Regional Office and five copies to OFA/EPA as noted in (e) above) and simultaneously sent to all agencies and individuals who commented on the draft EIS, to the Environmental Protection Agency, A-95 clearinghouses, appropriate Federal, State, regional, and local agencies, and shall be made available to the public. A final EIS must be on file with EPA not less than 30 days prior to submission to HUD of a certification and request for release of funds for the particular project pursuant to § 58.30. If the final EIS is filed within 90 days after publication by EPA in the FEDERAL REGISTER of notice of receipt of the draft EIS, then the minimum 30-day period for review of the final EIS, and the 90-day period provided for in § 58.17(e) will run concurrently, to the extent that they overlap.

§ 58.18 Limitation on action pending clearance.

During the environmental review process and pending completion of the appropriate environmental clearance procedures, the applicant may not use any funds to take any action with respect to the project under review where such action might have an adverse environmental effect, would limit choices among competing alternatives, or might alter the environmental premises on which the pending clearance is based in such fashion that the validity of the conclusions to be reached would be affected. Except as to exempt activities under § 58.21, no Title I funds will be released for a project until the Secretary shall approve said release of funds and the related certification. (See §§ 58.30, 58.31, and 58.32.) No Title I funds may be used to reimburse project costs subject to this part which have been incurred in advance of the Secretary's approval of the release of such funds and the related certification.

58.19 Use of prior environmental reviews.

(a) *Procedures for updating EIS's.* The following procedures shall be followed when new information becomes available or circumstances change during the process of environmental reviews.

(1) If information arises after a draft EIS has been transmitted for circulation, but prior to the expiration date for receipt of comments, then a copy of any revision, amendment, addendum to the draft EIS, or other issuance, shall be transmitted to all parties to whom the draft EIS was transmitted, and to all parties who have commented thereon, and, where appropriate, the applicant shall extend the time for comment on the draft EIS.

(2) If the time for comments on the draft EIS has expired, but the final EIS has not been circulated, then any revision, amendment or addendum to the draft EIS shall be transmitted to all parties to whom the draft EIS was transmitted and to all parties who commented thereon, and a reasonable time for receipt of comments shall be fixed and allowed. The final EIS shall then reflect the additional factors and contain the comments and responses respecting them.

(3) If the final EIS has been circulated, then it shall be revised and reissued or an addendum thereto shall be prepared and distributed, as appropriate, to all parties to whom the final EIS was distributed and to others who have commented thereon. Such revision or addendum shall be subject to the same review and comment proce-

V 43 1 182 SEP 19 78

dures, including those respecting time, as the final EIS which is being updated.

(b) *Use of prior environmental impact statements.* Where any final environmental impact statement has been listed in the FEDERAL REGISTER for a project or where an areawide or similar broad scale final EIS has been so listed and the EIS anticipated a subsequent project requiring an environmental clearance, then no new EIS is required for that subsequent project if the conditions set forth below in subparagraphs (1), (2), (3), and (4) are met.

(1) The environmental review record contains a decision based on a finding that the proposed project is not a new major Federal action significantly affecting the quality of the human environment.

(2) In addition to the content prescribed elsewhere in this section, the decision shall include:

(i) References to the prior EIS and its evaluation of the environmental factors affecting the proposed subsequent action subject to NEPA;

(ii) An evaluation of any environmental factors which may not have been previously assessed, or which may have significantly changed;

(iii) An analysis showing that the proposed project is consistent with the location, use, and density assumptions for the site and with the timing and capacity of the circulation, utility, and other supporting infrastructure assumptions in the prior environmental impact statement;

(iv) Documentation showing that where the previous EIS called for mitigating measures or other corrective action, these are completed to the extent reasonable given the current state of development.

(3) The prior final environmental impact statement has been kept current in the following ways:

(i) The EIS has been filed or updated within five (5) years; and

(ii) The EIS has been updated in accordance with significant revisions made to the underlying assumptions (covering at least those items in § 58.19(b)(2)(iii) above) as may be stated in the comprehensive plan or major elements thereof or other public policy revisions; and

(iii) The EIS has been updated to reflect new environmental issues and data or legislation and implementing regulations which the Department of Housing and Urban Development has determined to have significant environmental impact on the areas covered by the prior EIS.

(4) There is no litigation pending in connection with the prior EIS, and no final judicial finding of inadequacy of the prior EIS has been made.

(c) *Requirement for new environmental review.* A project which is a continuation of a previously commenced activity or activities for which no environmental review has been completed or for which a prior EIS does not meet the requirements of § 58.19(b) must be subjected to an original or updated environmental review under this part. Such review shall be carried out with respect to the entire project to the extent that the entire project or portions of it could still be altered in light of environmental considerations.

§ 58.20 Financial settlement of urban renewal projects.

(a) *Project undertaken to facilitate early financial settlement.* If an applicant proposes to submit an application for financial settlement of an urban renewal project prior to substantial completion thereof pursuant to 24 CFR 570.804, which will be coupled with a proposal to use Title I grants pursuant to 24 CFR 570.801 for the purpose of facilitating such financial settlement, the latter proposal shall be deemed a project which is subject to the following additional requirements and conditions:

(1) Section 58.19(b) shall be inapplicable to such project;

(2) The environmental review for such project shall include an assessment of the environmental consequences of the financial settlement of the urban renewal project prior to substantial completion thereof;

(3) The applicant shall include the following sentence with the notice required by § 58.30(a):

> Applicant will use the project to establish a financial basis, and will apply to the Secretary of HUD for financial settlement prior to substantial completion of the (*identify urban renewal project or NDP*) pursuant to 24 CFR 570.803 and 570.804.

(b) *Financial settlement prior to substantial completion of urban renewal project involving surplus of capital grant funds.* A financial settlement pursuant to 24 CFR 570.803 and 570.804 of an urban renewal project prior to substantial completion thereof which would result in a surplus of capital grant funds, $500 or more of which will be devoted to eligible Title I activities other than exempt activities under § 58.21 together with the proposed use(s) of the surplus shall be deemed a project and shall be subject to the following additional requirements and conditions:

(1) Section 58.19(b) shall be inapplicable to such project;

(2) The environmental review for such project shall include an assessment of the environmental consequences of the financial settlement of the urban renewal project prior to substantial completion thereof, and of the proposed use(s) of the surplus except any use(s) set forth in § 58.21;

(3) The application for financial settlement pursuant to 24 CFR 570.803 and 570.804 and use of the surplus resulting therefrom shall be treated as a request for release of funds and shall be subject to the requirements of subpart C of this part. However, the applicant shall use the following sentence in lieu of the first sentence set forth after the word "indicated" in § 58.30(a)(6):

> (*Name of applicant*) will apply for financial settlement prior to substantial completion of (*identify urban renewal project or NDP*) and will undertake certain activities, all as described above, with surplus capital grant funds resulting from financial settlement.

(4) The surplus of capital grant funds resulting from such financial settlement may be used for a project which consists entirely of exempt activities under § 58.21 and/or activities which are subjected to environmental assessment pursuant to § 58.20(b) without further compliance with this part.

(c) *HUD environmental review of certain financial settlements.* Prior to acting upon any application submitted pursuant to 24 CFR 570.803 and 570.804 for financial settlement of an urban renewal project which is not substantially completed and for which the environmental consequences of financial settlement prior to substantial completion thereof have not been assessed by the applicant pursuant to § 58.20 (a) or (b), HUD shall itself conduct an assessment of the environmental consequences of the proposed financial settlement. However, if HUD finds that the applicant should have conducted an environmental assessment pursuant to § 58.20 (a) or (b) but failed to do so, the application for financial settlement shall be rejected and the applicant shall be required to comply with the environmental assessment requirements of § 58.20 (a) or (b) as appropriate, on a catchup basis, as a condition precedent to resubmission of its application.

(d) *Financial settlement after substantial completion of urban renewal project.* Notwithstanding any other provision of this part an assessment of the environmental consequences of financial settlement pursuant to 24 CFR 570.803 and/or 570.804, or an urban renewal project which is substantially completed, is not required. However, the applicant or HUD, as appropriate, shall prepare and maintain in its records a written finding as to the substantial completion of the urban renewal project.

§ 58.21 Exempt activities.

(a) The following activities (to the extent eligible for assistance under

Title I) may be, but are not required to be, treated as separate projects for the purpose of environmental review and are exempt from the requirements of this part:

(1) Environmental studies or assessments.

(2) Activities authorized by section 105(a)(12) of Title I and 24 CFR 570.205 and 571.205.

(3) Administrative costs as provided by 24 CFR 570.206 and 571.206.

(4) The payment, under authority of section 105(a)(10) of Title I, of principal and interest on outstanding urban renewal project loans as defined in 24 CFR 570.800(b) where such payment is not covered by § 58.20 or where such payment is not associated with a change in the related urban renewal project.

(5) The payment, under authority of section 108(c) of Title I, of principal and interest due on notes or other obligations guaranteed pursuant to section 108; and the repayment, under authority of section 108(e), due the United States as a result of guarantees made pursuant to section 108.

(b) Projects (see definition at § 58.3 and aggregation requirements of § 58.5(g)) which consist solely of the following kinds of activities shall also be exempt from the requirements of this part:

(1) Acquisition, construction, reconstruction, rehabilitation, or installation of public facilities and improvements eligible under §§ 570.201(c) and 571.201(c) and economic development activities authorized pursuant to §§ 570.203 and 571.203, subject to the following limitations:

(i) Acquisition for continued use. The article to be acquired is in place and will be retained in the same use that existed at the time of acquisition, without change in size, capacity, or character.

(ii) Acquisition, construction, reconstruction, or installation for replacement or upgrading. The article will replace or upgrade a substantially identical original article, without changing its use, size, capacity, or location (e.g., replacement of water or sewer lines, reconstruction of curbs and sidewalks, repaving streets, and modification of buildings to provide access for elderly and handicapped persons).

(iii) Acquisition, construction, reconstruction, or installation to furnish or equip. The article will furnish or equip a site (other than furnishings and personal property prohibited by §§ 570:207(b)(2) and 571.207(b)(2)) where its placement and use is consistent with the use of that site and the action will not change the use, size, capacity, or character of the site (e.g., landscaping, street furniture, equipping established parks and playgrounds).

(2) Interim assistance eligible under § 570.201(f) and single purpose grants for imminent threats to public health or safety pursuant to § 570.432.

(3) Public services which:

(i) Are in support of a neighborhood strategy area program which consists entirely of activities exempt under this part; or

(ii) Are a continuation of services after completion of concentrated physical development activities of a neighborhood strategy area program pursuant to § 570.201(e)(1); or

(iii) Are provided by nonprofit or similar organizations in accordance with §§ 570.204(c)(4) and 571.204(c)(4) where the services are not part of a block grant funded physical development project.

(4) Rehabilitation of buildings and improvements as set forth in §§ 570.202 and 571.202, except paragraph (f), provided that:

(i) Unit density is not increased more than 20 percent; or

(ii) The project does not involve change in use from residential to nonresidential use or from one class of nonresidential use to another class of use; or

(iii) The estimated cost of rehabilitation is less than 75 percent of the total estimated cost of replacement after rehabilitation.

(5) Combinations of the above categories.

(c) *Other program requirements not affected.* The exemption of activities or projects from environmental review procedures, pursuant to this section, does not relieve the applicant from compliance with the historic preservation requirements of § 58.24, the flood plains and wetland requirements of § 58.23, other authorities set forth at § 58.1(a)(3), the responsibilities assumed pursuant to § 58.5(a), and other applicable program requirements set forth at 24 CFR Parts 570 and 571. Documentation of compliance with these other requirements shall be contained in the environmental review record.

§ 58.22 [Reserved]

§ 58.23 Flood plains and wetlands.

Applicants must comply with the requirements of section 2(a) of Executive Order 11988 on flood plain management and with sections 2 and 5 of Executive Order 11990 on protection of wetlands. In so doing, applicants shall use the flood plain management guidelines prepared by the U.S. Water Resources Council and published February 10, 1978, at 43 FR 6030. The following procedures apply where either of the Executive orders is applicable.

(a) *Early public review.* In carrying out the requirements of section 2(a)(4) of Executive Order 11988 and of section 2(b) of Executive Order 11990, applicants shall publish a notice providing opportunity for early public review as soon as it is determined that a project is proposed to be located in a flood plain or wetland as defined by the respective Executive order. Such notice may be brief, but shall: (1) Identify the affected project; (2) set forth the facts and reasons for such proposed project; (3) state that the applicant has additional information on the proposal available and where such information may be obtained; (4) indicate that comments may be submitted to the applicant until a certain date which shall not be less than 15 days following its first publication and dissemination; (5) state the name and address of the applicant and the certifying officer of the applicant; and (6) be dated as of the time it is first published and disseminated. Copies of this notice shall be published and disseminated in the same manner as a notice of intent to file an EIS as described at § 58.17(b).

(b) *Notice of explanation.* The notice of explanation of why a project is proposed to be located in a flood plain as required by section 2(a)(2)(ii) and 2(a)(3) of Executive Order 11988 may be published and distributed at the same time as the notice required by § 58.30(a). In such cases the notices shall be published and disseminated in the manner specified at § 58.17(b).

(c) *Certification.* Submission by the applicant of the certification form required by § 58.30(c) shall also be considered certification that the requirements of Executive Orders 11988 and 11990 have been met by the applicant.

§ 58.24 Historic preservation.

Applicants must comply with the following requirements relating to the Preservation of Historic and Archeological Data Act of 1974, section 106 of the National Historic Preservation Act of 1966 and Executive Order 11593 whenever any property or district included in or found by the Secretary of the Interior pursuant to 36 CFR Part 800 to be eligible for inclusion in the National Register provided for by such Act, is in the boundaries, or within the vicinity of, a project which is to be funded, in whole or in part, by Title I funds.

(a) As part of the environmental review process each project shall be examined in accordance with the procedures for protection of historic and cultural properties (36 CFR Part 800) for the purpose of identifying any National Register and National Register-eligible properties and determining whether or not the project may affect the property. If the property is not affected by the project, the applicant shall so state, in the environmental review record.

(b) If the project will affect the property, the applicant, as part of the environmental review process, shall carry out the procedures set forth at 36 CFR Part 800.

§ 58.25 Projects requiring an EIS.

Preparation and dissemination of an EIS is required pursuant to § 58.15(d)(2) and for the following types of projects:

(a) *Residential projects.* Residential projects which would remove, demolish, convert, or substantially rehabilitate existing housing units, or which would construct or install housing units, or which would provide sites for housing units, in a quantity which equals or exceeds the applicable threshold as follows:

(1) Five hundred units for projects which are to be located outside a standard metropolitan statistical area (SMSA), or which are to be located within an SMSA county but beyond the urbanizing belt as defined in (3) below; or

(2) For projects which are to be located in the urbanizing belt of an SMSA county as defined in (3) below, the applicable threshold is that number in table 1 opposite the population range that fits the SMSA county in which the project is to be located;

(3) Urbanizing belts are identified as the delineated urbanized areas, as defined by the Bureau of the Census, plus a 2-mile zone around the outer boundaries of such areas. In cases where this 2-mile zone borders or includes a portion of an incorporated place lacking census tracts, or, when the 2-mile zone borders or includes a portion of a census tract, the next outer boundary of such incorporated place or census tract, may be used to delineate the outer limit of the urbanizing belt. In no case shall the urbanizing belt extend beyond the SMSA boundary.

Also, when an applicant can document that significant development has occurred beyond, but contiguous to, the defined urbanized area, HUD may approve redefinition of the urbanizing area plus a 2-mile belt beyond.

TABLE 1.—*Automatic EIS Thresholds Appicable to Housing Projects*

[For use in connection with § 58.25(a)]

SMSA county population range	Automatic threshold (units)
1,500,000 = plus	2,500
1,000,000 to 1,499,999	2,100
750,000 to 999,999	1,800
800,000 to 749,999	1,500
500,000 to 599,999	1,200
400,000 to 499,999	1,000
300,000 to 399,999	900
200,000 to 299,999	800
100,000 to 199,999	700
50,000 to 99,999	600

TABLE 1.—*Automatic EIS Thresholds Appicable to Housing Projects*—Continued

[For use in connection with § 58.25(a)]

SMSA county population range	Automatic threshold (units)
Under 50,000	500

NOTE.—The thresholds are applied to population figures for an SMSA county or county equivalent (independent city) based on the latest Bureau of the Census population estimates published in the P-25 Series of Current Population Reports. Although the initial application of these thresholds will be to population data for 1975, revised figures may be used as they become available for subsequent years. Where the population estimate for a given SMSA county indicates that there has been a loss in population since the last decennial census, the census figures from that decennial census may be used.

(b) *Hospitals and nursing homes.* Projects which provide a site or sites for hospitals and nursing homes shall utilize the thresholds set forth above in § 58.25(a) and table 1 therein, except that the term "bed" shall be substituted for the term "housing unit."

(c) *Water and sewer projects.* Water and sewer projects capable of supporting additional residential development in partially developed and undeveloped areas at an estimated scale which meets the applicable thresholds in table 1. For nonresidential or mixed used areas, that portion of the hydraulic capacity allocable to additional development shall be converted into the equivalent number of housing units, using standard flows per unit for design assumptions, and the results compared with table 1 for determining whether the threshold is met or exceeded. In determining net potential development, the applicant shall consider the basic design assumptions used in determining the hydraulic capacity of the project and the land uses contemplated within the service area. Allowances may be made for significant factors such as standby water capacity for fire flow or the storm water of combined sewers which do not directly support new development, and for present development which is to be connected to or served by the project. However, the development potential of existing open areas along water or sewer lines as well as for the target service area must be included in the threshold calculation. The threshold calculation shall also be documented in the environmental review record.

(d) *Transitional EIS requirement.* The system of flexible EIS thresholds set forth in (a), (b), and (c) above is applicable upon the effective date of these regulations. However, since some environmental reviews will be in process when this change in thresholds becomes effective, the following transition rules shall apply to those situations where an EIS would have been required under the previous thresholds but will not be required under the new flexible thresholds:

(1) Where a draft EIS has been published for public comment, the EIS process, including the issuance of a final EIS, shall be completed or the termination process described in (3) below shall be completed before the release of funds actions prescribed by § 58.30 are taken.

(2) Where a notice of intent to file an EIS has been published pursuant to § 58.17(a) but a draft EIS has not been published for public comment, the EIS process shall be completed or the termination process described in (3) below shall be completed before the release of funds actions prescribed by § 58.30 are taken.

(3) Where an EIS already in process is to be terminated, as provided by subparagraph (1) or (2) above, the applicant shall make the level of clearance finding set forth at § 58.15(d)(1) that a request for release of funds for the project is not an action which may significantly affect the quality of the human environment; shall give full consideration to all comments which may have been received in response to a notice of intent to file an EIS or in response to a draft EIS; shall comply with the requirements of § 58.16; and shall publish a notice of intent to terminate an EIS. Such notice shall be published and disseminated in the same manner as a notice of intent to file an EIS as described at § 58.17(b). The notice may be brief but shall identify the name, character, site, and location of the project for which further processing of an EIS is to be terminated, set forth the circumstances and reasons for discontinuing further EIS processing, indicate that the finding required by this subsection has been completed and indicate where and when it is available for public review, describe how any comments received in response to a notice of intent to file an EIS or in response to a draft EIS where considered, and state that the applicant proposes to submit the request for release of funds for the project under consideration in no less than fifteen (15) calendar days from the date the notice is published. This notice may be combined with the notices required by §§ 58.16(a) and by 58.30(a).

§ 58.26 [Reserved]

§ 58.27 Interaction of applicant with HUD and Federal agencies.

(a) *Interaction with agencies other than HUD.* Where a project is to be jointly funded by one or more Federal agencies other than HUD and by HUD under Title I, and the preparation of an EIS is required by this part, a single agency, either the applicant or the other Federal agency, should assume responsibility as the "lead agency" for the preparation and clearance of an EIS, with the other agencies providing assistance. In the event that the regulations of none of the Federal agencies other than HUD require an EIS for such project, but the applicant determines under this part that an EIS is required then the applicant shall assume the "lead agency" role, or shall otherwise prepare an EIS, which shall comprehend the actions of the other Federal agency or agencies related to the project, as provided in the CEQ guidelines, 40 CFR 1500.7(b).

(b) *Joint reviews—Designation of lead agency.* All determinations respecting joint environmental review or designation of a "lead agency" to perform an environmental review shall be made and agreed upon between the applicant and any Federal agency involved, where practicable. In the event an applicant and a Federal agency are unable to reach such agreement, the applicant shall notify HUD, and HUD, with the advice and assistance of CEQ, will seek to obtain such agreement.

(c) *Interaction with HUD.* With respect to environmental matters, HUD has a dual relationship with applicants which applicants must recognize.

(1) *HUD as commenting agency.*

(i) HUD at all times reserves the right to review and comment upon the applicant's implementation of this part.

(ii) The applicant shall respond to HUD as a commenting and reviewing agency and interact with it in accordance with this part.

(2) *HUD responses to applicant's environmental review process.*

(i) In commenting on or otherwise responding to the applicant's implementation of this part, HUD will treat the applicant as if the applicant were another Federal agency. This means HUD may fully criticize the actions of the applicant, where deemed appropriate, and may make recommendations for modification of proposed actions or for new alternatives not addressed, which would enhance environmental quality or reduce adverse environmental impacts.

(ii) In all cases wherein HUD submits comments to the applicant respecting a draft EIS prepared by the applicant, such HUD comments and the response of the applicant thereto, shall be set forth in their entirety in the final EIS.

(iii) HUD may reject an applicant's environmental certification and request for release of funds for a project on grounds that the applicant's environmental process was defective or that the project is environmentally unsound. In either case, HUD shall notify the applicant of its possible rejection or denial and the reasons for it and may indicate means by which the procedural or environmental defect may be corrected. HUD's notification may be made through comments made in the course of review or by other written means. It will constitute formal notice that failure to correct the specified defect to HUD's satisfaction may result in HUD's rejection of the applicant's certification and request for the release of funds.

§ 58.28–58.29 [Reserved]

Subpart C—Releases of Funds for Particular Projects

§ 58.30 Release of funds upon certification.

An applicant which has completed all applicable environmental review and clearance requirements as provided in this Part with respect to a proposed project and which desires to submit a request to HUD for the release of Title I funds for the project, shall comply with the following:

(a) *Publication of notice.* An applicant, at least 7 calendar days prior to submitting the request for release of funds and certification, shall publish and disseminate, a notice to the public doing so in the same manner as a notice of intent to file an EIS, as described at § 58.17(b), using format VII of HUD-399-CPD, Environmental Reviews At The Community Level, or such other format as may be acceptable to HUD. An applicant may publish this notice at the same time as that required by § 58.16(b).

(b) *Request for release of funds.* A request for release of funds pursuant to this part shall be addressed to the HUD officer authorized to receive the application of applicant, shall be executed by the certifying officer and may be submitted with or as part of an application, or at any time after submittal of an application. Such request shall in all cases be accompanied by the certification of the applicant as stated at § 58.30(c) and shall:

(1) State the name and address of the applicant;

(2) State that the applicant requests the release of funds for particular projects, identify such projects; and

(3) Be accompanied by the certification described in paragraph (c).

(c) *Certification.* A certification pursuant to this part shall be addresses to the HUD officer authorized to receive the application of applicant, and shall:

(1) State the name and address of the applicant and be executed by the certifying officer;

(2) Specify that the applicant has fully carried out its responsibilites for environmental review decisionmaking and action pertaining to the projects named in the request for release of funds;

(3) Specify the levels of all environmental clearances carried out by the applicant in connection with each project pertaining to the certification;

(4) Specify the dates upon which any statutory or regulatory time period for review, comment, or other response or action in regard to each such environmental clearance commenced and has expired, or will expire, and that with the expiration of each statutory or regulatory time period the applicant is in compliance with the requirements of this part;

(5) Specify that the certifying officer is authorized to consent to assume the status of a responsible Federal official, under NEPA, insofar as the provisions of NEPA apply to the HUD responsibilities for environmental review, decision making and action assumed and carried out by the applicant, and that the certifying officer by so consenting, such officer assumes the responsibilities, where applicable, for the conduct of environmental reviews, decision making, and action as to environmental issues; preparation and circulation of draft and final EIS's; and assumption of lead agency responsibilities for preparation of such statements on behalf of Federal agencies other than HUD when such agencies consent to such assumption;

(6) Specify that the certifying officer is authorized to consent, on behalf of the applicant, to accept the jurisdiction of the Federal courts, for the enforcement of all responsibilities referred to in § 58.30(c)(5); and that the certifying officer so consents on behalf of the applicant and himself in his official capacity only;

§ 58.31 Objections to release of funds.

HUD shall not approve the release of funds for any project until fifteen (15) calendar days have elapsed from the time HUD shall have received the applicant's request for the release of such funds and the certification pertaining thereto or the time specified in the notice published pursuant to § 58.30(a), whichever shall be the later time. Applicants shall not commit any funds which are the subject of any request for the release of funds to any project rior to HUD's approval of such request. Any person or agency, including HUD, may object to an applicant's request for the release of funds and the certification pertaining thereto, but HUD will consider such objections only if the conditions and procedures set forth in this section are satisfied. HUD can refuse the request and certification on any grounds set forth in paragraph (b) or (e) of this section. Any decision by HUD approving or disapproving the request for the release of funds and the certification pertaining thereto shall be final.

(a) *Time for objecting.* HUD must receive objections within fifteen (15) days from the time HUD shall have re-

(7) That another Federal agency has submitted a written finding to HUD that an applicant's project is unsatisfactory from the standpoint of public

(5) Indicate that a copy of the objections has been mailed or delivered to the chief executive officer of the applicant.

V 43 / 182 SEP 1978

(a) *Time for objecting.* HUD must receive objections within fifteen (15) days from the time HUD shall have received the applicant's request for the release of funds and the certification pertaining thereto, or the time specified in the notice published pursuant to § 58.30(a), whichever shall be the later time.

(b) *Permissible bases.* (1) That the certification was not, in fact, executed by the certifying officer of the applicant;

(2) That the applicant has failed to make one of the two level of clearance findings pursuant to § 58.15(d), or to make the decision required by § 58.19(b), for the project, as applicable;

(3) That with regard to a project for which the level of clerance finding in § 58.15(d)(1) was made, the applicant has omitted one or more of the steps set forth at: § 58.15(a); § 58.15(b); § 58.15(c)(1); § 58.15(c)(2); § 58.16(a); or § 58.16(b);

(4) That with regard to a project for which the level of clearance finding in § 58.15(d)(2) was made, the applicant has omitted one or more of the steps set forth at: § 58.17(a); § 58.17(b); § 58.17(c) only if applicant has decided to conduct a public hearing as a part of its environmental review of the project; § 58.17(e); or § 58.17(f);

(5) That with respect to a property listed on the National Register of Historic Places, or found to be eligible by the Secretary of the Interior pursuant to 36 CFR Part 800 for inclusion in such Register, and which is affected by the project, no opportunity was given to the Advisory Council on Historic Preservation or its Executive Director to review the effect of the project on the property in accordance with the procedures set forth at 36 CFR Part 800; or,

(6) That with respect to a project for which the applicant has decided that § 58.19(b) applies, the applicant has failed to include in the environmental review record the written decision required pursuant to § 58.19(b) or that the applicant's decision is not supported by facts specified by the objecting party;

(7) That another Federal agency has submitted a written finding to HUD that an applicant's project is unsatisfactory from the standpoint of public health or welfare or environmental quality. This finding shall set forth at least the following:

(i) The Federal agency basis for stating that the applicant's project will have potentially adverse environmental impacts which would cause the violation of national environmental standards or policies of would be of such a severity, geographical scope, duration, or importance as precedent as to warrant HUD's disapproving the release of funds and the certification pertaining thereto;

(ii) The Federal agency's consultations with the applicant and the basis for failure to reach a satisfactory agreement;

(iii) Factual evidence that the project is environmentally unsound;

(iv) Recommendations for mitigation, alternatives, or other courses of action needed to make the project environmentally acceptable.

(c) *Public and agency objections.* The only bases upon which HUD will consider the objection of any person or agency to the certification of an applicant, or to the approval by HUD of such certification, are set forth at § 58.31 (b) and (e). Other objections will not be considered by HUD; but may be addressed to the applicant, and the certifying officer of the applicant.

(d) *Procedure.* A person or agency objecting to an applicant's request for the release of funds and the certification pertaining thereto shall:

(1) Submit such objection in writing, to the HUD officer authorized to receive the application of the applicant;

(2) Specify the name, address, and telephone number of the person or agency submitting the objection, and be signed by the person or authorized official of the agency;

(3) Be dated when signed;

(4) Specify the bases for objection, and the facts or legal authority relied upon in support of the objection;

(5) Indicate that a copy of the objections has been mailed or delivered to the chief executive officer of the applicant.

(e) *HUD-initiated objections.* HUD may object to an applicant's request for release of funds and the certification pertaining thereto and may disapprove such request upon any of the following bases:

(1) Those listed in § 58.31(b);

(2) That the environmental review process is defective;

(3) That the project is environmentally unsound;

(4) That the applicant has not mitigated or corrected the procedural or environmental quality defects identified by HUD in accordance with § 58.27.

§ 58.32 Effect of approval of certification.

(a) NEPA responsibilities of HUD. The approval by HUD of the certification of an applicant is deemed to satisfy the responsibilities of the Secretary under NEPA insofar as those responsibilities relate to the applicant and releases of funds under Title I for projects which are covered by such certification.

(b) *Public and agency redress.* Persons and agencies seeking redress in relation to environmental assessments covered by an approved certification shall deal with the applicant and not with HUD. It shall be the policy of HUD, following the approval of a certification, not to respond to inquires and complaints seeking such redress, and only to refer such inquiries and complaints to the applicant and the certifying officer of the applicant. Other remedies for noncompliance, in addition to those stated in this part, are set forth at 24 CFR 570.913.

(Sec. 7(d), Department of HUD Act (42 U.S.C. 3535(d)).)

Issued at Washington, D.C., on September 8, 1978.

PATRICIA ROBERTS HARRIS,
Secretary of Housing and Urban Development.

SAINT PAUL, MINNESOTA, WORKSHOPS

HOW TO USE THE FEDERAL REGISTER

FOR: Any person who must use the Federal Register and Code of Federal Regulations.

WHAT: In cooperation with the Minnesota State Metropolitan Council of the Twin Cities Area, free public workshops (approximately 2½ hours) to present:

1. Brief history of the Federal Register system.
2. Difference between legislation and regulations.
3. Relationship of Federal Register and the Code of Federal Regulations.
4. Important elements of a typical Federal Register document.
5. An introduction to the finding aids of the FR/CFR system.

WHEN: October 2 and 3, 1978, at 9 a.m. (Each session identical)

WHERE: Suite 300, Metro Square Building, Seventh and Robert Streets, St. Paul, Minn.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them, as part of the General Services Administration's efforts to encourage public participation in Government actions. There will be no discussion of specific agency regulations.

RESERVATIONS: Call Chuck McDew, 612-291-6421.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

list of cfr parts affected in this issue

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, follows beginning with the second issue of the month.

A Cumulative List of CFR Sections Affected is published separately at the end of each month. The guide lists the parts and sections affected by documents published since the revision date of each title.

Title 3—The President

Executive Order 12079 • **September 18, 1978**

Authorizing Certain Functions of Heads of Departments and Agencies Under the Airport and Airway Development Act of 1970 To Be Performed Without the Approval of the President

By the authority vested in me by section 301 of Title 3 of the United States Code, it is hereby ordered as follows:

SECTION 1. The authority vested in the heads of departments and agencies by Section 23(b) of the Airport and Airway Development Act of 1970 (84 Stat. 232; 49 U.S.C. 1723(b)), with the approval of the President and the Attorney General of the United States, to perform any acts and to execute any instruments necessary to make any conveyance requested by the Secretary of Transportation under Section 23(a) of that Act may be exercised by such heads of departments and agencies without the approval of the President.

SEC. 2. Executive Order No. 10536 of June 9, 1954, as amended, is revoked.

Title 4—Accounts

CHAPTER III—COST ACCOUNTING STANDARDS BOARD

PART 400—DEFINITIONS

PART 416—ACCOUNTING FOR INSURANCE COSTS

Cost Accounting Standards

AGENCY: Cost Accounting Standards Board.

ACTION: Final rule.

SUMMARY: This standard provides criteria for the measurement of insurance costs, the assignment of such costs to cost accounting periods, and the allocation of insurance costs to cost objectives. It is intended to resolve recurring problems involving the accounting for insurance premiums, self-insurance provisions, and insurance reserves, and the allocation of insurance costs among corporate segments. It is one of a series of cost accounting standards which the Board is promulgating "to achieve uniformity and consistency in the cost accounting principles followed by defense contractors and subcontractors under Federal contracts." (See section 719(g) of the Defense Production Act of 1950, as amended.) Any contractor receiving an award of a contract subject to the rules, regulations, and standards of the Cost Accounting Standards Board on or after the effective date of this standard will be required to follow it in accordance with the provisions of § 416.80.

EFFECTIVE DATE: July 10, 1979.

FOR FURTHER INFORMATION CONTACT:

Paul McClenon, Project Director, Cost Accounting Standards Board, 441 G Street NW., Room 4836, Washington, D.C. 20548, 202-275-5537.

SUPPLEMENTARY INFORMATION:

(1) BACKGROUND

Work on a potential standard on accounting for insurance costs was initiated for a number of reasons; these included (1) differences between armed services procurement regulation (ASPR) provisions governing self-insurance and Financial Accounting Standards Board (FASB) statement No. 5, (2) Armed Services Board of Contract Appeals (ASBCA) cases or other disputes related to insurance accounting, and (3) knowledge of unresolved problems obtained by discussions with contractors and audit agencies.

A statement of issues related to accounting for insurance and a preliminary draft standard were developed by the staff and circulated to contractors, agencies, and others. Responses to these staff papers and to the FEDERAL REGISTER publications of October 5, 1977, and May 15, 1978, and information obtained in subsequent meetings with respondents and other interested persons were considered in developing the standard which is being promulgated today. Twenty-nine comments were received in response to the most recent FEDERAL REGISTER publication. All comments have been considered by the Board and those addressing areas of significance are discussed below, together with explanations of the changes made in the cost accounting standard being promulgated today from the proposal published in the FEDERAL REGISTER of May 15, 1978.

Ten respondents said that the proposed standard was acceptable as written, or they suggested only minor word changes.

The Board wishes to take this opportunity to express its appreciation for the helpful suggestions and constructive criticisms it has received, and for the time devoted to assisting the Board in this endeavor by the many organizations and individuals involved.

(2) COVERAGE OF STANDARD

One respondent said that the standard should be limited in its application to significant problem areas rather than treating all insurance and insurance-related costs in a general fashion. As stated in the prefatory remarks which accompanied the May 15, 1978, FEDERAL REGISTER publication, in its research, the Board did not find that accounting practices depended upon the type of risk or insurance. Therefore this standard, applicable to the major problems, is also appropriate for all other insurance.

One respondent suggested that the standard deal with the subject of premiums paid to "captive" insurers. The Board reiterates its belief, which it stated in the May 15, 1978, FEDERAL REGISTER publication, that the technique for accounting for premium costs should not be influenced by questions of the reasonableness of the amounts paid. Consequently, no change in this regard has been made in the May 15, 1978, proposal.

(3) SELF-INSURANCE AS A COST

Three respondents suggested that the proposed standard failed to properly distinguish between self-insurance and the absence of insurance. The Board recognizes that there may indeed be differences in the amount of planning involved, but there is no difference in the principle applicable to cost measurement. "Absence of insurance" is in fact one kind of self-insurance. The respondents said that a contractor who does not purchase insurance or set up a funded reserve to cover possible losses does not incur a cost and that, in such situations, actual losses are a part of entrepreneurial risk taking and should come directly from profit. For the reasons set forth below the Board does not agree.

A contractor who acquires assets is exposed to two types of risks—static risks and dynamic risks. Static risks are the risks which are inherent in the ownership of the assets; dynamic risks result from the decision to utilize the assets for the production of specific goods or services. Static risks are the same for all owners of similar assets in similar circumstances; e.g., the risk that property of a given type in a given location will be destroyed or damaged. Consequently, they are normally predictable by mathematical methods and can be insured against. Dynamic risks are a function of managerial judgment, e.g., whether a proposed product can be produced for a profit. Dynamic risks are not normally predictable or insurable; they generate a profit or loss, depending on management's ability to forecast costs and markets; they are the true entrepreneurial risks. Static risks, because they can be measured, predicted, and quantified, are properly subject to treatment as costs rather than as entrepreneurial risks.

From a cost accounting standpoint, the decision to purchase insurance or self-insure is not one of cost versus no-cost. Rather it is a decision between two alternative methods of accounting for costs. Insurance premiums are costs of the period for which the insurance is purchased. Self-insurance charges are costs of the period in which the insured events occur. Thus, the decision to self-insure is a decision to defer the recognition of costs to the period in which the insured events occur. Such a decision is not appropriate for cost accounting purposes.

The Board has decided to retain the ing a special self-insurance charge in such circumstances.

to avoid the necessity of employing actuaries to perform computations which other actuaries have already

of home-office reinsurance agreements; they were concerned about after-the-fact disagreement as to

same cost objective, the problem would not be one of allocating costs to that cost objective. Rather it would be

the standard provide a transition mechanism to deal with the newly recognized liability. Therefore, the stand-

From a cost accounting standpoint, the decision to purchase insurance or self-insure is not one of cost versus no-cost. Rather, it is one of certainty versus uncertainty. A contractor who self-insures will be subject to cost variations in any short time period as compared to one who purchases insurance, but in the long run their costs should be substantially the same, and their product or service must be priced to cover the same long-term cost.

Whether a contractor should be required to make deposits in a fund to provide for replacement of assets in the event of loss is not a consideration in determining the costs of self-insurance.

(4) ACCOUNTING FOR SELF-INSURANCE

When the business entity purchases insurance coverage from an underwriter, the cost to the business—for the static risk—is the premium. When the business entity does not purchase insurance, the best method of assignment of cost to current activities is a matter of possible disagreement.

A contractor who self-insures can recognize the cost of self-insurance for product pricing purposes in either of two ways: (1) By recognizing actual losses as they occur and allocating them to the products of some time period, usually the cost accounting period in which the loss occurred; or (2) by estimating the long-term average loss per time period and allocating it to the products of each time period. The second method is conceptually preferable in that it allocates the costs of all losses to the products of all time periods without regard to the particular chance distribution of actual losses among time periods.

The proposals which were published in the October 5, 1977, and May 15, 1978, FEDERAL REGISTER included criteria for selecting between the two approaches to recognizing the costs of self-insurance. A charge which would represent the projected average loss was required except in those situations where the actual losses in a cost accounting period could be expected to serve as a good representative of the long-term average loss for that period. The recognition of actual losses, rather than the use of a predetermined charge, would be expected where many units are exposed to loss and the maximum loss related to any one unit would be relatively small. Examples are the losses falling within the deductible portion of the automobile collision coverage for a fleet of vehicles, the deductible portions of property and casualty coverage where the size of the deductible is nominal in relation to the total exposure to risk for that coverage, and the worker's compensation claims of a large work force. There would be little point in calculating a special self-insurance charge in such circumstances.

The Board has decided to retain the requirement for the use of a self-insurance charge, as contained in the FEDERAL REGISTER proposals. A reasonable assignment of cost should be made to products of each period in which there is exposure to the risk. The cost of each loss should be allocated to all work accomplished in the facility where it occurred (and successor facilities over the life of the enterprise, not just to the work of the day, month, or year in which the loss happened to occur. this can be accomplished by charging each period with a self-insurance charge which is equal to the projected average loss.

The standard also retains the provision of the FEDERAL REGISTER proposals which permitted the recognition of actual losses in those limited circumstances, as described above, in which the actual losses in any cost accounting period may be expected not to differ significantly from the projected average loss for that period.

Several respondents were concerned as to the possible consequences if a self-insurance charge were to be made, and, subsequently, actual losses differed substantially from the projected average loss. The self-insurance charge is, of necessity, an estimate. If the estimate is made in a reasonable and supportable manner, then the fact that actual losses depart significantly in either direction from the projected average loss is not a basis for adjusting the costs of that cost accounting period. However, the standard provides that contractor's actual loss experience shall be reviewed regularly and that self-insurance charges for subsequent periods shall reflect experience, as would premiums for purchased insurance. Similarly, if the situation were one in which it had been determined that actual losses were to be used because they were not expected to differ significantly from the projected average loss, and actual losses did, in fact, differ significantly, the actual losses would be nonetheless the measure of the cost.

(5) LIMITATION ON SELF-INSURANCE CHARGE

The proposals which were published in the FEDERAL REGISTER provided that the self-insurance charge plus insurance administration expenses could be equal to, but could not exceed, the cost of comparable purchased insurance plus the associated administration expenses. Several respondents saw this as a question of allowability. It is, however, not a limit on allowability; it permits the cost of comparable purchased insurance to be used as one means of estimating the projected average loss. The provision is intended to avoid the necessity of employing actuaries to perform computations which other actuaries have already performed for the insurance company in setting the premium. the standard has been modified to express this intention more clearly.

Other respondents were concerned that a company which calculated a self-insurance charge based on, say, a 5-year moving average of its own loss experience would encounter problems if it were to incur a large loss; this would raise its average above the cost of comparable purchased insurance and thereby preclude the recovery of the excess over time. Again, the Board intended the limitation to apply only where the cost of comparable purchased insurance is used as a convenient method of estimating the projected average loss. The standard specifically requires that the contractor's own loss experience be reviewed regularly and that self-insurance charges for future periods reflect such experience in the same manner as would purchased insurance. It should be noted that the cost of future insurance premiums would also be expected to reflect, to some degree, the unfavorable loss experience of the contractor.

Several respondents were concerned that the standard would require them to obtain quotations for insurance premiums for comparison with proposed self-insrance charges, and they questioned the feasibility of obtaining such quotations. The standard only requires such a quotation if the self-insurance charge is to be estimated thereby; it would not be required if, for example, the charge were to be based only on a projection of the contractor's own experience.

(6) TERMINOLOGY

Several respondents suggested that, in the definition of "actual cash value," the phrase "replacement cost less depreciation" could lead to confusion because the type of depreciation intended thereby was not clear. The phrase was intended to imply replacement of the destroyed asset with one in the same physical condition. The definition has been modified to make this intention clearer.

One respondent suggested that the provisions of § 416.50(a)(1)(v) relative to "insurance coverage on retired lives" should be applicable to all types of insurance, rather than being limited to life insurance. the Board intended that this phrase provide for all types of insurance for retired persons. The term "retired lives" has accordingly been replaced by the term "retired persons."

Two respondents asked that the standard define or prescribe criteria for determining when a loss is considered to be "catastrophic" for purposes

of home-office reinsurance agreements; they were concerned about after-the-fact disagreement as to whether a particular loss was "catastrophic" and thereby to be allocated in part to the home office, or "noncatastrophic" and to be absorbed entirely by the segment. the Board believes that what constitutes "catastrophic loss" depends on the individual circumstances of each contractor. The determination should be made at the time the internal loss-sharing policy is established and should be revised, as necessary, for changes in future circumstances. Obviously, a catastrophic loss would be one which would be very large in relation to the average loss per occurrence for that exposure, and losses of that magnitude would be expected to occur infrequently.

(7) PREMIUMS AND REFUNDS

The proposed standard provided that a premium refund or dividend would become an adjustment to the pro rata premium cost for the earliest cost accounting period in which the refund or dividend is actually or contructively received. However, the standard permitted the contractor the option of using estimated net premiums instead. One respondent suggested that the standard permit the shifting of adjustments to prior years for purposes of overhead analysis. This proposed change would not assure consistent measurement of cost; it has therefore not been adopted.

(8) DIRECT CHARGING OF PREMIUMS

Paragraph 416.50(a)(1)(ii) provides that where insurance is purchased specifically for, and directly allocated to, a single final cost objective, the premiums need not be prorated. One respondent was concerned that if the final cost objective included requirements for two or more customers and the insurance premium were not prorated over the policy period, the cost might be charged only to the earliest units of production. They suggested that the provision be qualified by limiting it to only those final cost objectives which include requirements for a single customer. If the need for the insurance were to be occasioned by only one customer's requirements, the cost should be allocated to only that customer's units regardless of the production sequence. If the requirement is common to all customers' units, it should be allocated to all units.

The accounting principle here is the same as the one for specialized materials, which are charged directly to a final cost objective at the time of acquisition. If costs within a final cost objective, either for materials or for purchased insurance, were to be inappropriately related among the customers whose work is accumulated in the same cost objective, the problem would not be one of allocating costs to that cost objective. Rather it would be a problem of the method of analyzing costs within that final cost objective, a subject not being dealt with here.

(9) DEPOSITS AND RESERVES

Insurance agreements frequently provide for substantial amounts to be held by the insurer for various contingencies. Such amounts may be negotiated in advance or may represent the unrefunded excess of premiums over losses; in either event they are not arrived at by actuarial computations of known risks. The contractor typically retains a significant amount of interest in, and control over, such funds. FASB statement No. 5 provides that amounts which do not represent transfers of risk from the insured to the insurer are deposits and should be accounted for as such. The proposed standard required that anything which would be a deposit under that statement be treated as a deposit for contract costing purposes. In addition, the standard required that "reserves" held by the insurer for the account of the contractor would be regarded as deposits unless they met stated criteria.

These special criteria included a prohibition against recapture of the reserve or fund so long as any beneficiary remained alive. Two commentators urged that this test be modified. The Board intended to assure that the cost had indeed been incurred, but there was no intention to tie up excess reserves for long periods. The provision has been modified accordingly.

One respondent pointed out that group insurance carriers in recent years have required that premium stabilization reserves be established on medium-size experience-rated programs to smooth the experience so it will be similar to a large group. He said that the contractor has no more right to these reserves than the monthly premium he pays on the policy. He therefore suggested that the reserves required by the insurance carrier should not be required to be treated as deposits unless these reserves are treated as deposits for financial statement purposes. The Board does not agree; such reserves are negotiated amounts and the contractor does in fact have some influence over them. Cost measurement is improved if these amounts are treated as deposits until settled.

Some respondents previously pointed out that where a contractor changes from a pay-as-you-go program for retired persons to a pre-funded program, or initially establishes a prefunded program, a liability arises to those employees who have already retired. The respondents suggested that the standard provide a transition mechanism to deal with the newly recognized liability. Therefore, the standard which was proposed in the May 15, 1978, FEDERAL REGISTER provided, and the standard being promulgated today provides that, for a transition from a pay-as-you-go plan to a terminal-funded plan, or on the initial establishment of a terminal funded plan, the actuarial present value of benefits applicable to employees already retired shall be amortized over a period of 15 years.

Two respondents inquired as to the Board's reason for not providing a similar provision for transitions to fully prefunded level-premium or entry-age-normal plans. The actuarial premium computations for such plans implicitly allow for appropriate amortization of the liability for past service; therefore, an explicit provision for this purpose is unnecessary.

Two respondents asked for some liberalization of the 15-year amortization requirement; one suggested that the period be negotiable depending upon the circumstances which occasioned the change, as for example, when a segment is abolished and many employees take immediate retirement. The 15-year period was chosen to be comparable to the amortization period for actuarial gains and losses contained in CAS 413. To permit the amortization period to be negotiated on a case-by-case basis would reduce uniformity. It might also create an incentive to make such changes at times when one of the parties could be expected to benefit. The Board does not accept the suggestion.

(10) RELATIONSHIP TO OTHER STANDARDS

One respondent was concerned about the realtionship of this standard to two other cost accounting standards, CAS NO. 412, composition and measurement of pension cost, and CAS No. 415, accounting for costs of deferred compensation. The respondent was concerned especially about health insurance carried for retired employees of a contractor; he felt that there might be confusion as to whether such insurance should be considered a form of deferred compensation, a part of a pension plan, or a part of an insurance program.

The Board believes that these standards provide ample criteria for determining which standard is applicable to any given cost. In particular, the question of whether a benefit, such as insurance provided to retired persons, is an integral part of a pension plan and thereby governed by CAS No. 412 or is a part of an insurance program and thereby governed by CAS No. 416 is a question of fact in each given instance. Moreover, application of either stand-

ard to this element would result in substantially the same amounts of allocable cost.

loss. The Board did not so intend; the term "incurred loss" has been eliminated.

spect to central payments or accruals made by a home office on behalf of its segments, CAS 403 requires that these

nouncements on the subject of materiality will provide sufficient guidance.

(15) RENEGOTIATION

may not be a normal part of such accounting records. The "records" provision of the standard recognizes both the need for such data and the prob-

anticipated increased disagreements. The Board has provided remarks about materiality in various public pronouncements. The Board believes

ard to this element would result in substantially the same amounts of allocable cost.

(11) AMOUNT OF A LOSS

The proposal which was published in the October 5, 1977, FEDERAL REGISTER provided, in part, that "the amount of an incurred loss shall be measured by the net book value of property destroyed . . ." A number of respondents disagreed with this provision and suggested that the proper measure of the loss was "fair value," "replacement cost," "replacement cost, net of depreciation," and "replacement cost if replaced and net book value if not replaced." After considering these comments, the Board concluded that the measure of the loss should be the economic value of the asset destroyed, and that this value was best described as "actual cash value"; consequently, the May 15, 1978, FEDERAL REGISTER proposal incorporated "actual cash value."

Three respondents have again asked that the standard recognize replacement cost as the measure of the loss, on the grounds that the asset would probably be replaced with a new asset and that the cost of insurance premiums which would provide for replacement cost coverage would be allowable. The Board believes that the measure of the loss is the economic value of the asset destroyed, and this may bear little relationship to the economic value of the asset which is acquired to replace it. In this connection it should also be noted that CAS No. 409 requires the treatment of a gain on involuntary conversion of an asset as a recovery of past depreciation or, alternatively, treatment as a reduction in the cost basis of the replacement asset. The Board has, accordingly, retained the use of "actual cash value" as one of the major measures of loss.

Contract audit agencies have reported that contractors sometimes charge the maximum potential loss for contract costing purposes but report a lesser amount for published financial statements; therefore, the proposed standard provided that where the amount of the loss is uncertain, the estimate of the loss shall be the amount includible in published financial statements. Three respondents suggested that this requirement be deleted because the amount reported for financial statement purposes might be too conservative. The Board continues to believe that the guidance contained in FASB statement No 5 and interpretation No. 14 thereto permits an objective measure of the loss. The Board, therefore, retains the requirement.

One respondent was concerned about whether use of the term "incurred loss" in § 416.50(a)(3) was intended to mean something other than an actual loss. The Board did not so intend; the term "incurred loss" has been eliminated.

Two respondents asked the Board to clarify the references to "published financial statements" contained in the previously proposed standards. One of these respondents pointed out that not all published financial statements are necessarily prepared in accordance with generally accepted accounting principles; the other pointed out that a loss may be required to be reported in a published financial statement under conditions where it is not accruable therein as a liability. In order to clarify its intent, the Board has replaced the phrase "published financial statements," whenever it appeared in the proposed standard, with the phrase "statements prepared in accordance with generally accepted accounting principles" and the standard now refers to the amount which would be "includible as an accrued liability" in such statements.

(12) PRESENT VALUE OF FUTURE LOSSES

On respondent objected to the requirement for discounting amounts of losses to be paid in the future at a rate different from that contained in existing procurement regulations. As it stated in the prefatory remarks which accompanied the May 15, 1978, FEDERAL REGISTER publication, the Board believes that the additional computational effort involved in using a rate for contract costing different from that required by the various States is not warranted. Where no rate is prescribed by a State, the use of the rate determined by the Secretary of the Treasury pursuant to Pub. L. 92-41, 85 Stat 97, as required by the standard, is consistent with the Board's requirement in CAS 415 to use that rate in discounting deferred compensation awards.

(13) ALLOCATION OF INSURANCE COSTS FROM A HOME OFFICE TO SEGMENTS

The October 5, 1977, proposal contained criteria for the allocation of insurance costs from a home office to segments. Various respondents questioned the need for such additional guidance on the grounds that the provisions of CAS 403 are adequate for this purpose. The Board concurred in this belief and omitted the related provisions from the May 15, 1978, proposal. Two respondents to that proposal suggested that the provisions of CAS 403 are too general and further guidance is needed to insure that such allocations will reflect significant differences in segment loss experience.

CAS 403 requires that home office expenses shall be allocated on the basis of the beneficial or casual relationship between supporting and receiving activities. Specifically, with respect to central payments or accruals made by a home office on behalf of its segments, CAS 403 requires that these shall be allocated directly to segments to the extent that they can be identified. CAS 403 provides further that payments or accruals which cannot be identified with individual segments are to be allocated by means of an allocation base representative of the factors on which the total payment is based. If there are significant differences in segment loss experience, then these differences would be identifiable and would be required by CAS 403 to be reflected in the allocation of the related home office premium cost or refund. The Board therefore continues to believe that additional guidance for such allocations in this standard is not necessary.

(14) MATERIALITY OF LOSSES AND INSURANCE ADMINISTRATION EXPENSES

The standard permits a contractor to recognize immaterial amounts of self-insured losses and insurance administration expenses as part of other expense categories rather than as "insurance expense." Two respondents were concerned that what is a "material" cost will be the subject of controversy.

The Board recognizes that some contractors may elect to purchase all of their insurance services from an insurance company or outside agencies; such services as claims processing or payment, risk analysis, loss prevention activities, etc. may be billed separately or included in the premium. Other contractors may elect to provide some or all of these services themselves. The standard recognizes this diversity of practice by stating, in § 416.40, that the amount of the insurance cost is the sum of the projected average loss plus the insurance administration expenses.

Where a contractor purchases substantially all of its insurance services and the cost is included in the premium, the allocation of the costs of such services automatically follows the allocation of the premium. In such situations, if immaterial amounts of in-house costs, such as portions of various individuals' salaries or allocable space costs, are not explicitly recognized as insurance administration expenses, the accuracy of cost allocation is not significantly impaired. On the other hand, if a contractor establishes a claim processing department to process group insurance claims for a large work force, and the costs of such a group are material, then the Board believes that uniformity will be better served by requiring that such costs be allocated in the same manner as the costs of the related insurance. The Board believes that its previous pronouncements on the subject of materiality will provide sufficient guidance.

(15) RENEGOTIATION

One respondent was concerned that contractors will have difficulty in following the standard while reporting to the Renegotiation Board, which is bound by law to allow items in accordance with chapter 1 of the Internal Revenue Code. This concern applies both to the election to account for refunds, dividends, and additional assessments on the basis of estimated net premiums, authorized in § 416.50(a)(1)(vi), and the use of a self-insurance charge in lieu of the recognition of actual losses. In both instances the standard could result in the recognition, as contract cost, of amounts which would not be recognized for tax purposes.

Other cost accounting standards have required the selection of specific cost measurement techniques from among the many which might have been available under the Internal Revenue Code. The respondent suggested that the proposal on insurance is different in that it can result in the use of a method of contract cost accounting which is not permitted for tax accounting purposes.

The Board recognizes that the Renegotiation Board is indeed bound by law to recognize those elements of cost which are identified in the Internal revenue Code. Measurement of the amounts of such costs to be recognized in any particular period, however, should be done in accordance with the best available accounting techniques. Where this standard recognizes a self-insurance charge in lieu of actual losses, the Renegotiation Board will also obtain a better measure of contractual profits by following the standard than by following the tax measurement. The Renegotiation Board, as a relevant Federal agency, can arrange for the application of this standard as it has for various others which have required reconciliations between tax reporting and contract costing. No exemption is, therefore, being made for renegotiation.

(16) RECORDS

A contractor who elects to make a self-insurance charge should be expected to provide sufficient documentation to support the amount of the charge. In addition, the standard requires that the contractor's own loss experience be evaluated regularly. Finally, the standard requires the identification of losses to the segment in which they occur. While the cost of losses is already reflected in the contractor's formal accounting records, the data on loss frequency, amount, and location which may be necessary to comply with the proposed standard may not be a normal part of such accounting records. The "records" provision of the standard recognizes both the need for such data and the probable memorandum nature of the records. The requirement to maintain such records was contained in the October 5, 1977, proposal but was inadvertently omitted from the May 15, 1978, FEDERAL REGISTER proposal. It has been reinstated in the standard now being promulgated.

(17) ILLUSTRATIONS

One respondent suggested that the dollar amounts used in illustrations were unrealistic and would serve as guidelines for unrealistic rulings in practice. As the Board has stated on previous occasions, the use of dollar amounts in illustrations is intended to improve the understandability of the illustration. Such dollar amounts are not intended to establish criteria for use in actual situations.

(18) COSTS AND BENEFITS

The Board's objective, with respect to uniformity, is to achieve comparability among entities operating under like circumstances. As applied to the measurement of insurance costs, there should be similar reported costs where there are similar exposures to risk. The Board has recognized the need to provide guidance on the determination of contract charges under self-insurance programs, especially under circumstances where the likelihood is that actual losses in a given period will differ materially from the long-term projected average. This standard will provide for increased uniformity in this field.

Consistency pertains to the use, by any one entity, of cost accounting practices which permit comparability of contract results under similar circumstances over periods of time. The decision whether to purchase insurance or to self insure is comparable to a make or buy decision. A change in the method of providing for the risks (which risks continue unchanged) is not a change in circumstances of the sort which should destroy comparability over time. This standard provides the basis for consistency in measuring insurance costs even when there are shifts between purchased insurance and self-insurance.

Only three respondents suggested that the implementation costs of the standard would be excessive or would exceed the benefits. One of these foresaw increased administrative costs but did not offer any specifics. The concerns of the others appeared to lie primarily in two areas—the lack of a definition of "materiality" in relation to insurance costs and the lack of specific procedural guidance in estimating a self-insurance charge. They therefore anticipated increased disagreements. The Board has provided remarks about materiality in various public pronouncements. The Board believes that these comments are sufficient and that the concerns in this regard are unwarranted.

A self-insurance charge is an estimate, and the Board has consistently refrained from dictating detailed estimating procedures. A contractor must, of necessity, estimate many costs, and the degree of sophistication and complexity of the estimating process is a matter for discussion between the contractor and procurement and audit personnel.

The standard provides for several methods of recognizing the costs of self-insurance. First, the contractor may recognize actual losses in those situations in which the distribution of actual losses may be expected to not differ significantly from the projected average loss. This is a matter which should be readily determinable from the nature of the exposure to risk; this will normally be expected where there are many units exposed to loss and the potential loss per unit is low in relation to the total exposure, as, for example, with worker's compensation, group insurance, and deductible portion of property and casualty insurance which is nominal in relation to the total exposure. In most such cases, contractors already charge actual losses, so no change will be necessary. Second, the contractor may use the premium cost of purchased insurance for comparable coverage as the basis for the self-insurance charge. This method would be appropriate when, for example, the contractor proposed to substantially increase a deductible provision for property and casualty insurance; he might propose to make a self-insurance charge equal to the premium reduction for the decreased coverage. Only in the event that neither of these two methods is appropriate would the contractor have to resort to the third method, that of actuarial review of his own or industry experience to develop a self-insurance charge. Under these circumstances, the Board believes that the majority of contractors will already be in compliance with the proposed standard and the costs of compliance for the remainder should not be significant. Therefore, the standard should have no significant inflationary impact.

Four respondents suggested that, if the majority of contractors would not have to change in order to comply with the standard, then the problems were not sufficient to justify the standard. The Board recognizes that, although the insurance problems resolved by this standard are likely to be encountered only by a minority of contractors, when they are encountered

they are of substantial importance and their resolution in a uniform and consistent manner will be beneficial in

nized. Alternatively, where settlement will consist of a series of payments over an indefinite time period, as in worker's compensation, the contractor

they are of substantial importance and their resolution in a uniform and consistent manner will be beneficial in contract costing.

In summary, the Board finds that this standard will increase the uniformity and consistency of measurement of the cost of insurance related to negotiated defense contracts. The standard will eliminate, or materially reduce, the problems listed in the Board's prefatory remarks with the May 15, 1978 publication. The Board finds that the costs of implementation will be slight and that there will be no inflationary impact.

* * * * *

There is also being published today an amendment to part 400, definitions, to incorporate in that part terms defined in § 416.30(a) of this cost accounting standard.

Title 4, Code of Federal Regulations, chapter III is amended as follows:

1. Section 400.1(a) is amended by inserting the following definitions in alphabetical order:

§ 400.1 Definitions.

(a) * * *

Actual cash value. The cost of replacing damaged property with other property of like kind and quality in the physical condition of the property immediately prior to the damage.

* * * * *

Insurance administration expenses. The contractor's costs of administering an insurance program, e.g., the costs of operating an insurance or risk-management department, processing claims, actuarial fees, and service fees paid to insurance companies, trustees, or technical consultants.

* * * * *

Projected average loss. The estimated long-term average loss per period for periods of comparable exposure to risk of loss.

* * * * *

Self-insurance. The assumption or retention of the risk of loss by the contractor, whether voluntarily or involuntarily. Self-insurance includes the deductible portion of purchased insurance.

* * * * *

Self-insurance charge. A cost which represents the projected average loss under a self-insurance plan.

* * * * *

2. Part 416 is added to read as follows:

Sec.
416.10 General applicability.
416.20 Purpose.
416.30 Definitions.
416.40 Fundamental requirement.
416.50 Techniques for application.
416.60 Illustrations.
416.70 Exemptions.
416.80 Effective date.

AUTHORITY: 84 Stat. 796, Sec. 103, 50 U.S.C. App. 2168.

§ 416.10 General applicability.

General applicability of this cost accounting standard is established by § 331.30 of the Board's regulations on applicability, exemption, and waiver of the requirement to include the cost accounting standards contract clause in negotiated defense prime contracts and subcontracts (4 CFR 331.30).

§ 416.20 Purpose.

The purpose of this standard is to provide criteria for the measurement of insurance costs, the assignment of such costs to cost accounting periods, and their allocation to cost objectives. The application of these criteria should increase the probability that insurance costs are allocated to cost objectives in a uniform and consistent manner.

§ 416.30 Definitions.

(a) The following definitions of terms which are prominent in this standard are reprinted from part 400 of this chapter for convenience. Other terms which are used in this standard and are defined in part 400 of this chapter have the meanings ascribed to them in that part unless the text demands a different definition or the definition is modified in paragraph (b) of this section.

Actual cash value. The cost of replacing damaged property with other property of like kind and quality in the physical condition of the property immediately prior to the damage.

Insurance administration expenses. The contractor's costs of administering an insurance program, e.g., the costs of operating an insurance or risk-management department, processing claims, actuarial fees, and service fees paid to insurance companies, trustees, or technical consultants.

Projected average loss. The estimated long-term average loss per period for periods of comparable exposure to risk of loss.

Self-insurance. The assumption or retention of the risk of loss by the contractor, whether voluntarily or involuntarily. Self-insurance includes the deductible portion of purchased insurance.

Self-insurance charge. A cost which represents the projected average loss under a self-insurance plan.

(b) The following modifications of definitions set forth in part 400 of this chapter are applicable to this standard: None.

§ 416.40 Fundamental requirement.

(a) The amount of insurance cost to be assigned to a cost accounting period is the projected average loss for that period plus insurance administration expenses in that period.

(b) The allocation of insurance costs to cost objectives shall be based on the beneficial or causal relationship between the insurance costs and the benefiting or causing cost objectives.

§ 416.50 Techniques for application.

(a) Measurement of projected average loss.

(1) For exposure to risk of loss which is covered by the purchase of insurance or by payments to a trusteed fund, the premium or payment, adjusted in accordance with the following criteria, shall represent the projected average loss:

(i) The premium cost applicable to a given policy term shall be assigned pro rata among the cost accounting periods covered by the policy term, except as provided in subparagraphs (ii) through (vi) of this paragraph. A refund, dividend or additional assessment shall become an adjustment to the pro rata premium costs for the earliest cost accounting period in which the refund or dividend is actually or constructively received or in which the additional assessment is payable.

(ii) Where insurance is purchased specifically for, and directly allocated to, a single final cost objective, the premium need not be prorated among cost accounting periods.

(iii) Any part of a premium or payment to an insurer or trustee, or any part of a dividend or premium refund retained by an insurer or trustee which would be includable as a deposit in published financial statements prepared in accordance with generally accepted accounting principles shall be accounted for as a deposit for the purpose of determining insurance costs.

(iv) Any part of a premium or payment to an insurer or to a trustee, or any part of a dividend or premium refund retained by an insurer, for inclusion in a reserve or fund established and maintained on behalf of the insured or the policyholder or trustor, shall be accounted for as a deposit unless the following conditions are met: (A) The objectives of the reserve or fund are clearly stated in writing;

(B) Measurement of the amount required for the reserve or fund is actuarially determined and is consistent with the objectives of the reserve or fund;

(C) Payments and additions to the reserve or fund are made in a systematic and consistent manner; and

(D) If payments to accomplish the stated objectives of the reserve or fund are made from a source other than the reserve or fund, the payments into the reserve or fund are reduced accordingly.

(v) If an objective of an insurance program is to prefund insurance coverage on retired persons, then, in addition to the requirements imposed by subparagraph (iv) of this paragraph:

(A) Payments must be made to an insurer or trustee to establish and maintain a fund or reserve for that purpose;

(B) The policyholder or trustor must have no right of recapture of the reserve or fund so long as any active or retired participant in the program remains alive unless the interests of such remaining participants are satisfied through adequate reinsurance or otherwise; and

(C) The amount added to the reserve or fund in any cost accounting period must not be greater than an amount which would be required to apportion the cost of the insurance coverage fairly over the working lives of the active employees in the plan. If a contractor establishes a terminal-funded plan for retired persons or converts from a pay-as-you-go plan to a terminal-funded plan, the actuarial present value of benefits applicable to employees already retired shall be amortized over a period of 15 years.

(vi) The contractor may adopt and consistently follow a practice of determining insurance costs based on the estimated premium and assessments net of estimated refunds and dividends. If this practice is adopted, then any difference between an estimated and actual refund, dividend, or assessment shall become an adjustment to the pro rata net premium costs for the earliest cost accounting period in which the refund or dividend is actually or constructively received or in which the additional assessment is payable.

(2) For exposure to risk of loss which is not covered by the purchase of insurance or by payments to a trusteed fund, the contractor shall follow a program of self-insurance accounting according to the following criteria:

(i) Except as provided in paragraph (a)(2) (ii) and (iii) of this section actual losses shall not become a part of insurance costs. Instead, the contractor shall make a self-insurance charge for each period for each type of self-insured risk which shall represent the projected average loss for that period. If insurance could be purchased against the self-insured risk, the cost of such insurance may be used as an estimate of the projected average loss; if this method is used, the self-insurance charge plus insurance administration expenses may be equal to, but shall not exceed, the cost of comparable purchased insurance plus the associated insurance administration expenses. However, the contractor's actual loss experience shall be evaluated regularly, and self-insurance charges for subsequent periods shall reflect such experience in the same manner as would purchased insurance. If insurance could not be purchased against the self-insured risk, the amount of the self-insurance charge for each period shall be based on the contractor's experience, relevant industry experience, and anticipated conditions in accordance with accepted actuarial principles.

(ii) Where it is probable that the actual amount of losses which will occur in a cost accounting period will not differ significantly from the projected average loss for that period, the actual amount of losses in that period may be considered to represent the projected average loss for that period in lieu of a self-insurance charge.

(iii) Under self-insurance programs for retired persons, only actual losses shall be considered to represent the projected average loss unless a reserve or fund is established in accordance with § 416.50(a)(1)(v).

(iv) The self-insurance charge shall be determined in a manner which will give appropriate recognition to any indemnification agreement which exists between the contracting parties.

(3) In measuring actual losses under paragraph (a)(2) of this section:

(i) The amount of a loss shall be measured by (A) The actual cash value of property destroyed; (B) amounts paid or accrued to repair damage; (C) amounts paid or accrued to estates and beneficiaries; and (D) amounts paid or accrued to compensate claimants, including subrogation. Where the amount of a loss which is represented by a liability to a third party is uncertain, the estimate of the loss shall be the amount which would be includable as an accrued liability in financial statements prepared in accordance with generally accepted accounting principles.

(ii) If a loss has been incurred and the amount of the liability to a claimant is fixed or reasonably certain, but actual payment of the liability will not take place for more than 1 year after the loss is incurred, the amount of the loss to be recognized currently shall not exceed the present value of the future payments, determined by using a discount rate equal to that prescribed for settling such claims by the State having jurisdiction over the claim. If no such rate is prescribed by the State, then the rate shall be equal to the interest rate as determined by the Secretary of the Treasury pursuant to Pub. L. 92-41, 85 Stat. 97, in effect at the time the loss is recognized. Alternatively, where settlement will consist of a series of payments over an indefinite time period, as in worker's compensation, the contractor may follow a consistent policy of recognizing only the actual amounts paid in the period of payment.

(4) The contractor may elect to recognize immaterial amounts of self-insured losses or insurance administration expenses as part of other expense categories rather than as "insurance costs."

(b) Allocation of insurance costs:

(1) Where actual losses are recognized as an estimate of the projected average loss, in accordance with § 416.50(a)(2), or where actual loss experience is determined for the purpose of developing self-insurance charges by segment, a loss which is incurred in a given segment shall be identified with that segment. However, if the contractor's home office is, in effect, a reinsurer of its segments against catastrophic losses, a portion of such catastrophic losses shall be allocated to, or identified with, the home office.

(2) Insurance costs shall be allocated on the basis of the factors used to determine the premium, assessment, refund, dividend, or self-insurance charge, except that insurance costs incurred by a segment or allocated to a segment from a home office may be combined with costs of other indirect cost pools if the resultant allocation to each final cost objective is substantially the same as it would have been if separately allocated under this provision.

(3) Insurance administration expenses which are material in relation to total insurance costs shall be allocated on the same basis as the related premium costs or self-insurance charge.

(c) Records. The contractor shall maintain such records as may be necessary to substantiate the amounts of premiums, refunds, dividends, losses, and self-insurance charges, paid or accrued, and the measurement and allocation of insurance costs. Memorandum records may be used to reflect any material differences between insurance costs as determined in accordance with this standard and as includable in financial statements prepared in accordance with generally accepted accounting principles.

§ 416.60 Illustrations.

(a) Contractor A pays a companywide property and casualty insurance premium for the policy term July 1, 1980, to July 1, 1983, and includes the entire amount as cost in its cost accounting period which ended December 31, 1980. This is a violation of § 416.50(a)(1)(i) in that only one-sixth of the policy term fell within the cost accounting period which ended De-

cember 31, 1980, and therefore only one-sixth of the premium should have been included in cost in that cost ac-

tired persons or by reducing the deposits to the fund by an equivalent amount in accordance with § 416.50(a)(1)(iv)(D). This practice would also comply with the requirement of

other reasonable method of estimating the projected average loss in order to determine the self-insurance charge.

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

§ 908.881 Valencia Orange Regulation 581.

Order. (a) During the period September 15, 1978, through January 15,

International Communication Agency under Reorganization Plan No. 2 of 1977, as amended, the functions of the

V 43/183 SE 20 78

cember 31, 1980, and therefore only one-sixth of the premium should have been included in cost in that cost accounting period.

(b) Contractor B has a retrospectively rated worker's compensation insurance program. The policy term corresponds with the contractor's cost accounting period. Premium refunds are normally received and applied in the following cost accounting period. The contractor's practice is to include the entire gross premium in insurance cost in the cost accounting period in which it is paid and to credit the refund against insurance cost in the cost accounting period in which it is received. This practice conforms with § 416.50(a)(1)(i). The contractor could also, under the provisions of § 416.50(a)(1)(vi), have followed a consistent practice of estimating such refunds in advance and including the estimated net premium in insurance cost.

(c) Contractor C establishes a self-insured program of life insurance for active and retired persons. The contractor pays death benefits directly to the beneficiaries of deceased employees and includes such payments in insurance costs at the time of payment. This practice complies with § 416.50(a)(2)(iii) which requires that only the actual losses be recognized unless a trusteed reserve or fund is established in accordance with § 416.50(a)(1)(v).

(d) Instead of paying death benefits directly, contractor D purchases annual group term life insurance on active and retired persons and charges the premiums to insurance costs (with proper recognition for refunds and dividends). Contractor D's retired persons wish to be protected against possible discontinuance of the program. Contractor D, therefore, establishes a trusteed fund. As each employee retires, contractor D deposits in the fund an amount which is equal to the premium on a paid-up policy for that employee, and he advises the trustee that the fund is to be used to continue to pay premiums on retired persons in the event the program is discontinued. The contractor also continues to purchase group term insurance on both active employees and retired persons and charges both the premiums and the deposits to insurance costs. This practice does not comply with § 416.50(a)(1)(iv)(D) which requires that if payments to accomplish the stated objectives of the reserve or funds are made from a source other than the reserve or fund, the payments into the fund shall be reduced accordingly.

NOTE.—In this instance the contractor could comply with the standard by paying from the fund that portion of the group term premium which represented the retired persons or by reducing the deposits to the fund by an equivalent amount in accordance with § 416.50(a)(1)(iv)(D). This practice would also comply with the requirement of § 416.50(a)(1)(v)(C) that the amount added to the fund not be greater than an amount which would be required to fairly allocate the cost over the working lives of the active employees in the plan.

(e) Contractor E wishes to provide assurance of his life insurance program continuance to both active and retired employees. He establishes a trusteed fund in accordance with § 416.50(a)(1) (iv) and (v) and thereafter pays into the fund each year for each active employee an actuarially determined amount which will accumulate to the equivalent of the premium on a paid-up life insurance policy at retirement. He charges the annual payments to insurance costs. Benefits are paid directly from the fund (or the fund is used to pay the annual premiums on group term life insurance for all employees). This practice also complies with the requirement of § 416.50(a)(1)(v)(C) that the amount added to the fund not be greater than an amount which would be required to fairly allocate the cost over the working lives of the active employees in the plan.

(f) Contractor F has a fire insurance policy which provides that the first $50,000 of any fire loss will be borne by the contractor. Because the risk of loss is dispersed among many physical units of property and the average potential loss per unit is relatively low, the actual losses in any period may be expected not to differ significantly from the projected average loss. Therefore, the contractor intends to let the actual losses represent the projected average loss for this exposure to risk. Property with an actual cash value of $80,000 is destroyed in a fire. The contractor charges the $50,000 of the loss not covered by the policy to insurance costs for contract costing purposes. The practice complies with the requirement of § 416.50(a)(2). However, had the contractor's plan been to make a self-insurance charge for such losses, then any difference between the self-insurance charge and actual losses in that cost accounting period would not have been allocable as an insurance cost.

(g) Contractor G is preparing to enter into a Government contract to produce explosive devices. The contractor is unable to purchase adequate insurance protection and must act as a self-insurer. There is a significant possibility of a major loss, against which the Government will not undertake to idemnify the contractor. The contractor, therefore, intends to make a self-insurance charge for this exposure to risk. The contractor may, in accordance with § 416.50(a)(2)(i), use data obtained from other contractors or any other reasonable method of estimating the projected average loss in order to determine the self-insurance charge.

(h) Contractor H purchases liability insurance for all of its motor vehicles in a single, company-wide policy which contains a $50,000 deductible provision. However, the company's management policy provides that when a loss is incurred in a segment, only the first $5,000 of the loss will be charged to the segment; the balance of the loss will be absorbed at the home-office level and reallocated among all segments. Because the risk of loss is dispersed among many physical units and the maximum potential loss per occurrence is limited, the actual losses in any cost accounting period may be expected not to differ significantly from the projected average loss. Therefore, the contractor intends to let the actual losses represent the projected average loss for this exposure to risk. An analysis of the loss experience shows that many past losses exceeded $5,000. Contractor H's practice of allocating the loss in excess of $5,000 to the home office is a violation of § 416.50(b)(1)(ii). The limit of $5,000 cannot realistically be considered a measure of a "catastrophic" loss when losses frequently exceed this amount, and the use of a limit this low would obscure segment loss experience.

§ 416.70 Exemptions.

None for this standard.

§ 416.80 Effective date.

(a) The effective date of this standard is July 10, 1979.

(b) This standard shall be followed by each contractor on or after the start of his next cost accounting period beginning after the receipt of a contract to which this cost accounting standard is applicable.

ARTHUR SCHOENHAUT,
Executive Secretary.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Valencia Orange Reg. 581, Amdt. 1]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Amendment of Size Regulation

AGENCY: Agricultural Marketing Service.

ACTION: Final rule.

SUMMARY: This amendment lowers the minimum size requirements applicable to fresh shipments of California-Arizona Valencia oranges grown in districts 1, 2, and 3 of the production area from 2.32 inches in diameter to 2.20 inches in diameter. The amendment recognizes current and prospective market conditions for Valencia oranges and is consistent with the size composition of the crop remaining for fresh shipment.

EFFECTIVE DATE: September 15, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTAL INFORMATION: *Findings.* (1) Pursuant to the amended marketing agreement, and order No. 908 (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendation of the committee established under the marketing agreement and order, and upon other information, it is hereby found that the amendment of the size regulation, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The amendment reflects the Department's appraisal of the current and prospective market conditions for Valencia oranges. Less restrictive size requirements on fresh shipments are consistent with the size composition of the crop remaining for fresh shipment.

(3) It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this amendment is based and the effective date necessary to effectuate the declared policy of the act; and this amendment relieves restrictions on the handling of Valencia oranges grown in Arizona and designated part of California.

The provisions of § 908.881 (Valencia orange regulation 581; 43 FR 13492) are revised to read as follows:

§ 908.881 Valencia Orange Regulation 581.

Order. (a) During the period September 15, 1978, through January 15, 1979, no handler shall handle any Valencia oranges grown in district 1, 2, or 3 of the production area which are of a size smaller than 2.20 inches in diameter, which shall be the largest measurement at a right angle to a straight line running from the stem to the blossom end of the fruit: *Provided,* That not to exceed 5 percent, by count, of the Valencia oranges contained in any type of container may measure smaller than 2.20 inches in diameter.

(b) As used in this section, "handle," "handler," "district 1," "district 2," and "district 3" mean the same as defined in the marketing order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674).

Dated: September 15, 1978.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Title 22—Foreign Relations

CHAPTER I—DEPARTMENT OF STATE

SUBCHAPTER G—INTERNATIONAL EDUCATIONAL AND CULTURAL EXCHANGE

[Dept. Reg. 108.758]

PART 64—PARTICIPATION BY FEDERAL EMPLOYEES IN CULTURAL EXCHANGE PROGRAMS OF FOREIGN GOVERNMENTS

Transfer of Departmental Regulation

AGENCY: Department of State.

ACTION: Final rule.

SUMMARY: Part 64, chapter I, of title 22 of the Code of Federal Regulations is deleted from chapter I and transferred to chapter V of title 22, Code of Federal Regulations, International Communication Agency. The educational and cultural affairs program is no longer under the jurisdiction of the Secretary of State.

EFFECTIVE DATE: September 20, 1978.

FOR FURTHER INFORMATION CONTACT:

Gladys Poticher, 202-632-7968.

SUPPLEMENTARY INFORMATION: As a result of the establishment of the International Communication Agency under Reorganization Plan No. 2 of 1977, as amended, the functions of the Department of State's Bureau of Educational and Cultural Affairs and the U.S. Information Agency were consolidated into a new International Communication Agency (ICA), effective April 1, 1978. Functions formerly vested in the Secretary of State in the cultural exchange area are now transferred to the International Communication Agency.

Dated: September 13, 1978.

WILLIAM J. BECKHAM, Jr.
Assistant Secretary (Administration).

(ICA). ICA has assumed overall responsibility for the participation by Federal employees in cultural exchange programs of foreign governments, and all related procedures.

Part 516 is added to 22 CFR chapter V to read as follows:

Sec.
516.1 Purpose.
516.2 Definitions.
516.3 Submission of application.
516.4 Contents of application.
516.5 Criteria for approval of program.
516.6 Request for further information.
516.7 Approval of application.
516.8 Obligation of employee to advise agency.
516.9 Termination of approval.
516.10 Grant not to constitute a gift.

AUTHORITY: Sec. 108A (Pub. L. 94-350, 90 Stat. 823) added to the Mutual Educational and Cultural Exchange Act, as amended, 75 Stat. 527-28, 22 U.S.C. 2451 et seq.; and under Executive Orders 11034 and 12048, as amended, Reorganization Plan No. 2 of 1977 and the Continuity Order (Continuity of Operations) of April 1, 1978 (43 FR 15371).

§ 516.1 Purpose.

This part sets forth the procedures for the application for approval of a cultural exchange program of a foreign government, so that Federal employees may participate in such program; the grant and termination of such approval; and related procedures.

§ 516.2 Definitions.

For the purpose of this part:

(a) "Federal employee" means: (1) An employee as defined by section 2105 of title 5, United States Code; (2) an individual employed by, or occupying an office or position in, the government of a territory or possession of the United States or the District of Columbia; (3) a member of a uniformed service; (4) the President and Vice President; and (5) a Member of the Senate or the House of Representatives, a Delegate from the District of Columbia in Congress, and the Resident Commissioner from Puerto Rico in Congress.

(b) A "foreign government" means a foreign government and an official agent or representative thereof; a group of governments and an official agent or representative thereof; an international organization composed of governments, and an official agent or representative thereof.

(c) A program of the "type described in section 102(a)(2)(i) of the Act" means a cultural exchange program involving "visits and interchanges between the United States and other countries of leaders, experts in fields of specialized knowledge or skill, and other influential or distinguished persons."

(d) The "purpose stated in section 101 of the Act" is "to enable the Government of the United States to increase mutual understanding between the people of the United States and the people of the other countries by means of educational and cultural exchange; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations, and the contributions being made toward a peaceful and more fruitful life for people throughout the world; to promote international cooperation for educational and cultural advancement; and thus to assist in the development of friendly, sympathetic, and peaceful relations between the United States and the other countries of the world."

(e) "Director" means the Director of the International Communication Agency.

(f) "Agency" means the International Commnication Agency.

(g) "Act" means the Mutual Educational Cultural Exchange Act of 1961, as amended (22 U.S.C. 2451 et seq.).

(h) "Member of the family or household" of a Federal employee means a relative of the employee by blood, marriage, or adoption or any person who is a resident of the household of the employee.

§ 516.3 Submission of application.

A foreign government intending to provide grants or other assistance to facilitate the participation of Federal employees in a program of cultural exchange shall submit to the Agency an application for approval of the program through its embassy, mission, or office at Washington, D.C. If there is no embassy, mission, or office at Washington, D.C., of the foreign government the application may be submitted by the home office or headquarters of the foreign government. The application shall be addressed to the director.

§ 516.4 Contents of application.

The foreign government shall provide information in the application showing that its program meets the criteria set forth in § 516.5, and shall include in such application the following:

(a) Name and description of the program and the provisions of legislation or regulation authorizing the program;

(b) Number of annual U.S. citizen participants expected, including the number of U.S. Federal employees;

(c) Average duration of stay abroad;

(d) Agency of the foreign government responsible for the program;

(e) Name and address of contact in the United States with whom communication may be made with respect to the program; in the absence of such a contact in the United States, the name and address of a contact in the home office or headquarters of the foreign government.

§ 516.5 Criteria for approval of program.

To obtain approval of its program of cultural exchanges, a foreign government is required to show that:

(a) The cultural exchange program is of the type described in section 102(a)(2)(i) of the Act;

(b) The cultural exchange program is conducted for a purpose comparable to the purpose stated in section 101 of the Act; and

(c) A grant under such program will not provide assistance with respect to any expenses incurred by or for any member of the family or household of such Federal employee.

§ 516.6 Request for further information.

The Agency may request the foreign government to supply additional information.

§ 516.7 Approval of application.

The Director shall review the application and if satisfied that the criteria of § 516.5 are met shall inform the foreign government of the approval of its program.

§ 516.8 Obligation of employee to advise agency.

Any Federal employee receiving any offer of a grant or other assistance under a cultural exchange program approved by the Director shall advise the employee's agency of such offer and shall not accept such offer unless the employee's agency states that it has no objection to such acceptance. In the case of the Agency, an employee shall advise the Associate Director for Management who may, after consultation with appropriate officials of the Agency, furnish a "no objection" statement.

§ 516.9 Termination of approval.

If at any time it appears to the Director that the purpose of a program which has been approved has been changed so that it no longer meets the criteria set forth in § 516.5 or that the program is being misused, the Director may terminate such approval, or suspend such approval pending the supplying of additional information. However, a termination or suspension shall not affect a grant which has been made under a previously approved program.

§ 516.10 Grant not to constitute a gift.

A grant made under an approved program shall not constitute a gift for purposes of 22 CFR 10.735-203 and section 7342 of Title 5, United States Code.

It is the general policy of the International Communication Agency to

allow time for interested parties to take part in the rulemaking process.

However, the addition of the new part is administrative in nature and was mandated by law. Therefore, the rulemaking process, involving comment and public procedure, is waived, and this new part will become effective September 20, 1978.

Issued at Washington, D.C.

JOHN E. REINHARDT,
Director, International Communication Agency.

Title 31—Money and Finance: Treasury

SUBTITLE A—OFFICE OF THE SECRETARY OF THE TREASURY

PART 1—DISCLOSURE OF RECORDS

Amendment to Regulations

AGENCY: Treasury Department.

ACTION: Final rule.

SUMMARY: The purpose of these amendments to part 1 of the Department of the Treasury regulations is to reflect the current offices and addresses of the Internal Revenue Service which have changed due to reorganization of this constituent unit. These changes are of administrative nature and do not require prior notice or public comment.

DATE: These changes are effective immediately.

FOR FURTHER INFORMATION CONTACT:

Marcus Farbenblum, Chief, FOI Branch, Internal Revenue Service, 202-566-4441.

Part 1, subtitle A of title 31 of the Code of Federal Regulations is amended, effective immediately, by updating subpart A, appendix B and subpart C, appendix B, as follows:

1. In subpart A, appendix B, paragraphs 2, 3, and 4 are revised to read as follows:

2. *Public reading rooms.* Public reading rooms for the Internal Revenue Service are maintained at the following locations:

NATIONAL OFFICE

Mailing address: Director, Disclosure Operations Division, Internal Revenue Service, P.O. Box 388, Ben Franklin Station, Washington, D.C. 20044.
Location: 1111 Constitution Avenue NW., Room 1567, Washington, D.C. 20224.

NORTH ATLANTIC REGION

Mailing address: Freedom of Information Reading Room, Internal Revenue Service, room 1002, 90 Church Street, New York, N.Y. 10007.
Location: Same as mailing address.

MID-ATLANTIC REGION

Mailing address: Freedom of Information Reading Room, Internal Revenue Service, P.O. Box 12805, Philadelphia, Pa. 19106.
Location: Federal Office Building, 600 Arch Street.

SOUTHEAST REGION

Mailing address: Freedom of Information Reading Room, Internal Revenue Service, P.O Box 926, Atlanta, Ga. 30301.
Location: 275 Peachtree Street NE., Atlanta, Ga. 30303.

MIDWEST REGION

Mailing address: Freedom of Information Reading Room, Internal Revenue Service, 230 South Dearborn Street, Room 2896, Chicago, Ill. 60604.
Location: Same as mailing address.

CENTRAL REGION

Mailing address: Freedom of Information Reading Room, Internal Revenue Service, P.O. Box 1699, Cincinnati, Ohio 45201.
Location: Room 7106, Federal Office Building, 550 Main Street.

SOUTHWEST REGION

Mailing Address: Freedom of Information Reading Room, Internal Revenue Service, 1100 Commerce Street, Room 13E10, Dallas, Tex. 75222.
Location: Same as mailing address.

WESTERN REGION

Mailing address: Freedom of Information Reading Room, Internal Revenue Service, 450 Golden Gate Avenue, Box 36040, San Francisco, Calif. 94105.
Location: Same as mailing address.

3. *Requests for records.* Initial determinations under 31 CFR 1.5(g) as to whether to grant requests for records of the Internal Revenue Service will be made by those officials specified in 26 CFR 601.702.

4. . . .

Requests may be delivered personally to the Director of the Disclosure Division in the Office of the Chief Counsel, in the Internal Revenue Building, located at 1111 Constitution Avenue NW., Washington, D.C.

2. In subpart C, appendix B is amended as follows:

APPENDIX B [AMENDED]

a. Paragraph (d) (8) and (10) are amended by deleting "Chief, Disclosure Staff, Attention: CP:D" and "Chief, Disclosure Staff" and replacing with "Director, Disclosure Operations Division, Attention: TX:D" and "Director, Disclosure Operations Division", respectively.

b. Subparagraph (11) is amended by deleting "Chief, Disclosure Staff" and replacing with "Director, Disclosure Operations Division."

management assistance grants and the administration of its sections 208(b)(4), 402, and 404 programs centered around three concerns. First, the

comment, 43 FR 29135, proposed amendments modifying part 224 of Title 39, Code of Federal Regulations, and adding new part 602 of that title, both dealing with the intellectual property rights (other than patents) of the Postal Service. The comment period expired on September 5, 1978; no comments were received. Accordingly, the Postal Service hereby adopts the amendments proposed without change.

SUBCHAPTER H—PROCUREMENT SYSTEM FOR THE U.S. POSTAL SERVICE: INTELLECTUAL PROPERTY RIGHTS OTHER THAN PATENTS

* * * * *

§ 224.1 [Amended]

1. Amend paragraph (c)(1) of § 224.1 by inserting immediately after the fourth sentence:

* * * * *

(c) * * *

(1) * * * It manages the Postal Service's intellectual property. * * *

2. Revise the heading of subchapter H and add new part 602 to read as follows:

Sec.
602.1 General principles.
602.2 Intellectual Property Rights Board.
602.3 Requests for use.

AUTHORITY: 39 U.S.C. 401(5).

§ 602.1 General principles.

It is the policy of the Postal Service to secure full ownership rights for its intellectual properties other than patents (hereinafter, intellectual properties) having significant economic or other business value, except when to do so would be contrary to the best interest of the Postal Service. Intellectual property rights shall be acquired and managed so as to:

(a) Promote the economic, operational, and competitive well-being of the Postal Service;

(b) Limit restrictions on the use of Postal Service intellectual property to a minimum consistent with its statutory obligations;

(c) Assure that all potential users are treated fairly;

(d) Give due regard to other relevant considerations.

§ 602.2 Intellectual Property Rights Board.

In accordance with the foregoing policy, the Postal Service Intellectual Property Rights Board, with the approval of the Assistant Postmaster General, Procurement and Supply Department, formulates the program for the management of the Postal Service's rights in intellectual property. It identifies intellectual properties in which the Postal Service should secure its rights. It receives and makes recommendations for the disposition of applications for use of Postal Service intellectual property. It periodically reviews the intellectual property rights portfolio to determine the extent of the utilization of protected properties and recommends relinquishment of ownership when it considers ownership no longer desirable. It is advised by the Office of Contracts of performance under license agreements and makes recommendations for corrective measures when necessary. In consultation with the Law Department, it recommends appropriate action against unauthorized use of intellectual property.

§ 602.3 Requests for use.

(a) Requests for the use of intellectual property shall be addressed to:

Chairman, Intellectual Property Rights Board, Office of Contracts, U.S. Postal Service, Washington, D.C. 20260.

Requests should be accompanied by sufficient information concerning the requester and the use requested to allow reasoned consideration by the Board.

(b) Each request shall be considered in a timely fashion by the Board in accordance with the policy established herein. Requests favorably considered by the Board shall be submitted to the Assistant Postmaster General, Procurement and Supply Department, for approval.

(c) Approved requests contemplating a permissive (no fee) use of the intellectual property will be evidenced by a letter of permission furnished the requester on behalf of the Board.

(d) Approved requests contemplating a contractual (fee) use of the intellectual property shall be forwarded to the Office of Contracts, Procurement and Supply Department, for the negotiation of a satisfactory license agreement.

(e) Each license agreement shall be subject to legal review.

(f) Requesters shall be promptly advised of requests which are not approved.

(39 U.S.C. 401.)

ROGER P. CRAIG,
Deputy General Counsel.

[FR Doc. 78-26411 Filed 9-19-78; 8:45 am]

[7710-12]

PART 265—RELEASE OF INFORMATION

Availability of Records

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: This notice announces the amendment of Postal Service regulations concerning the availability to the public of Postal Service records. The Postal Service has determined that it is necessary to make three changes to 39 CFR 265.6(d). The purpose of the first change is to eliminate confusion in the field offices regarding the release of information from boxes being used for business purposes. Questions have arisen as to whether the name or address appearing on the application for release of records must be a "business" name or address. Because that point is irrelevant to the disclosure, the Postal Service is changing the word "business" to "recorded" in the first sentence of § 265.6(d)(4). The second change is necessary to provide a clarification as to the extent of information that may be disclosed. The third change provides a limited exception for law enforcement agencies to the requirement that requests for records be in writing.

EFFECTIVE DATE: September 20, 1978.

ADDRESS: Comments on these regulations are welcome and will be considered with a view toward making changes in the regulations in the future. Written comments should be directed to the Records Officer, U.S. Postal Service, Washington, D.C. 20260. Copies of all written comments received are available for public inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, in room 3211.

FOR FURTHER INFORMATION CONTACT:

Mr. John E. Finlay, 202-245-4142.

Accordingly, the Postal Service hereby adopts the following revisions of Title 39, Code of. Federal Regulations:

In § 265.6 delete in the first sentence of paragraph (d)(4) the word "business" the first time it appears and insert the word "recorded" in lieu thereof; insert in paragraph (d)(5) immediately after the word "boxholder" the phrase "or other recorded information about the boxholder"; and add new paragraph (d)(5)(iv) to read as follows:

§ 265.6 [Amended]

* * * * *

(d) * * *
(5) * * *

(iv) A law enforcement agency, for oral requests made through the Inspection Service, but only after the Inspection Service has confirmed that the information is needed in the course of a criminal investigation. (All other requests from law enforcement agencies should be submitted in writing to the postmaster as in paragraph (d)(5)(i) of this section.)

(39 U.S.C. 401.)

ROGER P. CRAIG,
Deputy General Counsel.

[1505-01]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 947-3]

PART 2—PUBLIC INFORMATION

General Provisions; Confidential Business Information

Correction

In FR Doc. 78-25341 appearing at page 39997 in the issue for Friday, September 8, 1978, make the following changes:

(1) On page 40002, middle column, in the 12th line of § 2.301 (b)(1)(i), "* * * Act, 42 U.S.C. 7412, (b) of determining * * *" should have read "* * * Act, 42 U.S.C. 7412, (B) of determining * * *".

(2) In paragraph (c) of § 2.301, the fourth through sixth lines should have read, "* * * apply without change to information to which this section applies."

(3) In the third column of the page, in paragraph (h)(2)(ii)(A), five lines from the bottom, "* * * contractor of subcontractor * * *" should read "contractor or subcontractor * * *, and in the next to the last line, "* * * contract of subcontract * * *" should have read "* * * contract or subcontract * * *".

(4) In paragraph (h)(2)(ii)(B), in the fourth line, "* * * of subcontract from * * *" should have read "* * * or subcontract from * * *". Also, in the fifth line, "* * * contractor's of subcontractor's * * *" should have read "* * * contractor's or subcontractor's * * *".

[6560-01]

[FRL-951-8a]

PART 35—STATE AND LOCAL ASSISTANCE

Subpart F—State Management Assistance Grants

AGENCY: Environmental Protection Agency.

ACTION: Rule.

SUMMARY: This final regulation implements section 205(g) of the Federal Water Pollution Control Act, as amended by the Clean Water Act of 1977 (the Act). These regulations make funds available to States to manage the construction grants program, and, as needed, to hire qualified staff and provide training necessary to carry out delegated functions.

DATES: Effective Date: October 1, 1978. Actions taken after April 24, 1978, and before October 1, 1978, are subject to the interim final regulations published on April 25, 1978, in the FEDERAL REGISTER.

ADDRESS: Comments submitted on these regulations may be inspected at the Public Information Reference Unit, EPA Headquarters, Room 2922, Waterside Mall, 401 M Street SW., Washington, D.C., between 8 a.m. and 4:30 p.m. on business days. EPA-prepared summaries of the comments are also available.

FOR FURTHER INFORMATION CONTACT:

Mr. Albert Pelmoter, Chief, Program Policy Branch (WH-547), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, telephone 202-426-8902.

SUPPLEMENTARY INFORMATION: Extensive public involvement was obtained in the development of these regulations. It is described at length in the preamble to 40 CFR Part 35, Subpart E, Grants for Construction of Treatment Works, which is published as a final rule on this date in the FEDERAL REGISTER.

In drafting these regulations, substantive issues arose in connection with (1) interfacing a State's construction management assistance grants with its sections 402, 404, and 208(b)(4) programs; (2) maintaining continuity in a State construction grants program in the face of uncertain timing of Federal appropriations; and (3) satisfying public participation requirements for delegation of the construction grants program. A discussion of these topics and issues follows.

1. Interfacing of programs. Discussions of the interface between State management assistance grants and the administration of its sections 208(b)(4), 402, and 404 programs centered around three concerns. First, the need for a separate grant for managing the State's construction grants program; second, the timing of the release of 205(g) funds for administering sections 402, 404, and 208(b)(4) programs; and third, the need to maintain current levels of a State's financial support for existing water pollution control programs.

a. *Separate grants.* The thrust of this new legislative amendment is to decentralize the management of the construction grants program, i.e., to shift the management from the Federal Government has been performing this management function since the inception of the program in 1956, this shift represents a major operational change. We must insure that, in carrying out the provisions of section 205(g), the national characteristics of this program will be maintained, high standards of conduct will not be compromised and, in the long run, applicants and grantees will benefit by the removal of one layer of government from the grant approval process.

The purpose of these regulations is to implement section 205(g) of the Act and thus make funds available to States to manage the construction grants program, and, as needed, to hire qualified staff and provide training necessary to effectively carry out delegated functions.

Section 205(g)(1) of the Act authorizes the Administrator to reserve each fiscal year a sum not to exceed 2 percent of the allotment made to each State for construction grants. Sums so reserved shall be available for making grants to States under section 205(g)(2) to cover the reasonable costs of administering any aspects of the construction grants program which the Administrator delegates to a State. Section 205(g)(2) also provides that these funds may also be used to increase the amount made available to the States for administering an approved program under sections 402, 404, or 208(b)(4) of the Act and managing waste treatment construction grants for small communities. Reserved funds that are not used for making State management assistance grants by the end of the 2-year allotment period will be added to the construction grant amounts last allotted to a State and shall be immediately available for awarding grants for the construction of wastewater treatment projects.

The delegation agreement is to be the mechanism for implementation of the construction management assistance grant program and shall address both the functions to be delegated and

the State's capability to conduct those functions.

These regulations also provide that State programs funded under § 35.913

States are expected to begin negotiating delegation agreements with EPA regional officials as soon as possible so that the award of construction man-

Two commenters felt that more specific guidance should be given to EPA regional offices for making State competency assessments. EPA has pro-

sible, integrate a variety of programs under the Clean Water Act, the Resource Conservation and Recovery Act, the Safe Drinking Water Act, and

Sec.

35.1030-6 State assurance.
35.1030-7 Regional administrator determi-

tor's determination of the amount of grant funds reasonably necessary to provide for the management of the ultimate delegation of the construction

V 43 / 183 SEP 20 1978

the State's capability to conduct those functions.

These regulations also provide that State programs funded under § 35.913 prior to April 25, 1978, may continue to be funded under that regulation through April 24, 1979, or until a construction management assistance grant is awarded to the State, whichever occurs first.

Section 205(g) funds for use in administering sections 208(b)(4), 402, and 404 programs are to be awarded in conjunction with sections 106 and 208 State grants. Amendment of these grants will facilitate use of section 205(g) funds since the basic mechanism for providing support for permit and planning activities, together with regulations governing their conduct, already exist in the sections 106 and 208 grant programs. EPA currently is amending regulations governing the sections 106 and 208 grant programs, which will be governed by new regulations in subpart G of this part. These regulations were published as proposed in the FEDERAL REGISTER on September 12, 1978 (43 FR 40742). Until published as final, references in the State management assistance grants regulations to subpart G shall be considered references to §§ 35.200 through 35.236 and 35.551 through 35.570.

b. *Timing.* The language and the legislative history of section 205(g) clearly establish that the State's management of the construction grants program is the first priority for the use of section 205(g) funds. Funds in excess of those required to manage properly the construction grants program are to be made available for administering sections 208(b)(4), 402, and 404 activities as necessary. Accordingly, these regulations provide that the award of the construction management assistance grant is a first order of priority and that funds in support of a substantial delegation would have to be made available through that grant prior to increasing section 106 and 208 grants with section 205(g) funds. Therefore, before section 205(g) moneys will be made available for section 106 or 208 grant program purposes, the level of funding required for proper management of a State's construction grants program must be determined.

However, it is important to recognize that upon receipt of section 205(g) grant funds, most States will be in a position to release section 106 grant funds which were being used to support construction grant management activities. Since these funds would be immediately available to support additional activities customarily funded under the section 106 grant (e.g., permitting, planning, etc.), plans for using the released funds should be described in the delegation agreement.

States are expected to begin negotiating delegation agreements with EPA regional officials as soon as possible so that the award of construction management assistance grants can be expedited.

c. *State level of support.* Funds provided to State under section 205(g) must not be used to reduce the level of Federal or State expenditures on water pollution control programs; rather, these funds will be used to supplement (not supplant) State funding. To do otherwise would be contrary to congressional intent. These regulations contain a provision to assure that this intent is met.

2. Continuity. In order to assure continuity in State programs from one fiscal year to the next, funds obligated under construction management assistance grants shall be available for expenditure for a period of 5 years. The grant may be amended annually as subsequent allotments are appropriated by Congress. We believe that States will have sufficient funding stability to hire, train, and maintain qualified staff under this provision regardless of the timing or amounts of future congressional appropriations.

The award of a construction management assistance grant after the execution of a delegation agreement between the State and EPA constitutes the State's obligation of the funds under the State management assistance grant for purposes of the requirements of 205(g)(1).

3. Public participation. Section 35.1033 of these regulations provides for public participation during the development, review, and approval of a new delegation agreement or modification of an existing agreement and requires public hearing to be conducted on a draft delegation agreement whenever the regional administrator determines that there is significant interest in such a hearing. States already operating under delegation agreements which are under § 35.913 must conduct a public hearing or public meeting on the first application for a construction management assistance grant. In addition, these regulations provide that any interested citizen adversely affected by a State decision or omission under a delegation agreement may appeal to the Regional Administrator for review of the State's determination.

Following publication in the FEDERAL REGISTER on April 25, 1978, EPA received formal comments on the interim State management assistance regulations. Numerous comments pertained to certain text wordings which were felt to be lacking in clarity. The text has been edited to provide necessary clarifications. Significant issues raised by other commenters are addressed below.

Two commenters felt that more specific guidance should be given to EPA regional offices for making State competency assessments. EPA has provided guidance in program operations memorandum 78-5 issued June 16, 1978.

Two commenters took issue with the use of the word "all" in the limitations on award paragraph (§ 35.1016). "The" has been substituted for the word "all" in the revised text.

A third issue pertained to the need to allow a State to contract with other organizations in the State to provide assistance programs for small communities where the State finds an organization capable of providing such service and desires to use this service. EPA concurs and the regulations have been revised to reflect this option.

A fourth comment pertained to the need for procedures clarifying the role of the States and regional office in the event of a dispute. EPA and the State recognize this need and are developing such procedures in conjunction with delegation agreements under preparation.

Other significant comments suggested the following:

a. Delete § 35.1030-3(g) which allows the regional administrator to intercede and impose a Federal oversight on a project in which he determines that an overriding Federal interest exists. This provision is needed to assure that EPA has the capability to meet its basic stewardship responsibilities under the Act. Therefore, no change was made in the regulation as proposed.

b. Change the word "shall" to "may" in connection with the requirement to hold public meetings prior to the end-of-year reviews. EPA does not feel that this should be an optional requirement. Therefore, no change was made in the regulations as proposed.

c. Remove from § 35.1045 the phrase "unilaterally amend the delegation agreement." EPA agrees. Such language was determined to be superfluous since the remainder of the sentence containing that phrase has the same effect.

d. Clarify the statement in § 35.1033(d), which provides that the State's performance of delegated functions should comply with all applicable Federal public participation requirements, because it is too general. EPA's proposed public participation regulations, which were published on August 7, 1978 (43 FR 34794) address this matter.

In these and other regulations currently under review and revision, EPA intends to include the concept of a State/EPA agreement. The agreement will provide a way for EPA Regional Administrators and States to coordinate and, to the maximum extent feasible, integrate a variety of programs under the Clean Water Act, the Resource Conservation and Recovery Act, the Safe Drinking Water Act, and other laws administered by EPA. Since this subpart governs only the portion of the State/EPA Agreement relating to State management assistance grants for delegated programs under section 205(g) of the Act, other programs included in the State/EPA Agreement will be governed by the applicable provisions found elsewhere in this chapter. This regulation requires State delegation agreements to be integrated into the State/EPA Agreements. Beginning in fiscal year 1980, State programs funded under section 205(g) of the Act will be part of the State/EPA Agreement and the State/EPA Agreement must be completed before execution of the delegation.

This regulation reflects current EPA strategy to delegate to capable and willing States those functions and authorities which we think we can legally delegate under the Clean Water Act. In addition, we are actively exploring a number of other strategies for increasing the role of the States in management of the construction grants program in future years. Before implementing any new strategies, we will inform and consult with interested parties and the public.

These regulations do not impose economic costs large enough to necessitate preparation of an economic impact analysis under Executive Order 12044.

Effective Date. This subpart will be effective on October 1, 1978, unless otherwise specified in particular sections. Good cause exists for an effective date prior to 30 days after publication in the FEDERAL REGISTER because many of the requirements are made effective by the 1977 Act on October 1, 1978, and because of the need to start these interrelated requirements together to insure program continuity.

Dated: September 15, 1978.

DOUGLAS M. COSTLE,
Administrator.

40 CFR Part 35 is amended by revising subpart F to read as follows:

Subpart F—State Management Assistance Grants

Sec.
35.1000 Purpose and scope.
35.1005 Policy.

AUTHORITY.—Sec. 205(g) of the Clean Water Act, as amended, 33 U.S.C. 1251 et seq.

Subpart F—State Management Assistance Grants

§ 35.1000 Purpose and scope.

(a) These regulations establish policies and procedures for grants under section 205(g) of the Clean Water Act, as amended (the Act). That section authorizes the Administrator each fiscal year to reserve either up to 2 percent of the allotment made to each State under section 205 of the Act, or $400,000, whichever is greater, to make State management assistance grants. These regulations supplement the EPA general grant regulations in part 30, of this chapter and other requirements in this part 35.

(b) Construction management assistance grants will be awarded to States for reasonable costs of administering any elements of the construction grant program under sections 201, 203, 204, and 212 of the Act of managing waste treatment construction grants for small communities.

(c) Financial assistance to States under section 205(g) of the Act for administering the permit program under sections 402 and 404 of the Act and the statewide waste treatment management planning program under section 208(b)(4) may be provided to the States in conjunction with grants under subpart G of this part and will be administered under those regulations. Regional Administrators will coordinate the funding of construction management assistance grants with grants under subpart G of this part consistent with requirements of paragraph (d) of this section.

(d) Financial assistance will be granted under this subpart for the administration of section 402, 404, and 208(b)(4) programs under subpart G of this part only after a construction management assistance grant has been awarded to provide for the management of a substantial portion of the construction grant program as determined by the regional administrator. The amount of funds that will be made available under a section 205(g) grant for these programs will be limited to those funds remaining in the reserved portion of each State's allotment after the regional administrator's determination of the amount of grant funds reasonably necessary to provide for the management of the ultimate delegation of the construction grant program under this subpart.

§ 35.1005 Policy.

EPA's policy is to decentralize management of the wastewater treatment construction grant program to the maximum extent possible consistent with the environmental objectives of the Act and with prudent fiscal management. This is to be accomplished through formal delegation agreements between the regional administrator and those States which are capable of managing the program and are ready and willing to carry out the program within the spirit of Federal laws and policies governing its conduct. These agreements will specify the functions which the State will perform and certify to EPA, thereby preventing Federal-State duplication in the management of the construction grant program and increasing operating efficiency. The construction management assistance grant can provide compensation to States for the reasonable cost of performing the functions specified in the delegation agreement.

§ 35.1010 Application for grant.

Application for a grant shall be made on EPA Form 5700-31, Application for Federal Assistance (short form). Part III, Program Narrative Statement, will reference the delegation agreement.

§ 35.1015 Eligibility for funding.

(a) Grants may be awarded to cover the allowable costs of administering functions which are necessary to manage the construction grant program and which are identified in the delegation agreement. Funds to carry out delegated functions may be supplemented to meet costs of preparing to administer other functions which the regional administrator determines will be subsequently delegated to the grantee. An application may be made by the State water pollution control agency or another agency designated by the Governor.

(b) Construction management assistance grant funds may also be used for administering that segment of a State's construction grant program implemented without Federal assistance if the regional administrator determines that the program segment is administered consistent with subpart E of this part and this chapter.

§ 35.1016 Limitations on award.

(a) Maintenance of effort.

(1) No construction management assistance grant will be awarded in any fiscal year unless the regional administrator is satisfied that the expenditure

of non-Federal funds for recurrent expenses of its water pollution control program under section 106 of the act in that year will be at least equal to

State/EPA agreement. Beginning in fiscal year 1980, State programs funded under section 205(g) of the Act will be part of the State/EPA agreement and the State/EPA agreement

the Act, and will be immediately available for funding the construction of treatment works in the same manner and to the same extent as the last al-

(2) *Step 2.* Subagreements, subagreement cost analysis, user charge and industrial cost recovery systems, plans, and specifications for construction

(a) Award of step 1, step 2, step 3, and step 2+3 grant assistance and amendments;

(b) Review of projects to determine

delegation agreement may be extended.

§ 35.1030-5 Implementation of the delega-

V 4 3 / 1 8 3

of non-Federal funds for recurrent expenses of its water pollution control program under section 106 of the act in that year will be at least equal to those same expenditures during fiscal year 1977. But, if the regional administrator determines that a reduction in State expenditures is attributable to a general nonselective reduction in the programs of the executive branch agencies of the State, this limitation may be waived to the extent of the general nonselective reduction.

(2) The limitation in paragraph (a)(1) of this section does not apply to a construction management assistance grant awarded in any fiscal year for which, as of April 25, 1978, a State budget for environmental protection which contains lower recurrent expenditures than those of fiscal year 1977, was (i) already adopted by the State legislature, or (ii) already formally submitted to the State legislature by the Governor, provided that the State makes no further reduction in that budget. Where this exception is used, subsequent grants awarded to the State are subject to the level of effort requirements of paragraph (a)(1) of this section.

(b) Upon award of the construction management assistance grant, unexpended section 106 funds (State and Federal) committed to activities which will be covered under the construction management assistance grant will be reprogramed. The delegation agreement shall discuss the reprograming of these funds which will occur under subpart G of this part. The regional administrator will review the reprograming for approval in accordance with priorities established by the Agency. Such funds shall be used for the:

(1) Water quality management programs under sections 208 and 303, including nonpoint source regulatory programs and dredged or fill programs under section 208(b)(4);

(2) Conduct of a continuing planning process, including waste load allocations and the update of water quality standards;

(3) Development of data required for section 305(b) reports;

(4) Conduct of section 402 activities, including program development assistance and approval, support of enforcement litigation, permitting, and compliance monitoring;

(5) Conduct of section 404 regulatory programs to control the discharge of dredged or fill material; and

(6) Conduct of other activities as may be required under section 106.

(c) In fiscal year 1979, the regional administrator and the State must develop the State/EPA agreement sufficiently before executing a delegation agreement under this subpart so that the latter will be consistent with the State/EPA agreement. Beginning in fiscal year 1980, State programs funded under section 205(g) of the Act will be part of the State/EPA agreement and the State/EPA agreement must be completed before execution of the delegation agreement.

§ 35.1020 Grant amount and award.

(a) As provided in § 35.915-1(a), the Administrator may reserve up to 2 percent of each State's fiscal year allotment for construction grants or $400,000, whichever is greater, for State management assistance grants. Within these limits, the regional administrator may award a construction management assistance grant for 100 percent of the estimated allowable cost of:

(1) Managing, or preparing to manage, under § 35.1030-5, any aspect of sections 201, 203, 204, and 212 of the act which the Administrator has delegated to the State;

(2) Obtaining and reviewing information on behalf of the regional administrator necessary for his determination under the Clean Water Act and other Federal statutes; and

(3) Performing other essential functions associated with managing the construction grant program as noted in § 35.1030-1.

(b) State programs funded under § 35.913 before April 25, 1978, may continue to be funded under that provision through April 24, 1979, or until a construction management assistance grant is awarded under these regulations, whichever occurs first.

(c) States charging fees under § 35.913, with the approval of the Administrator, may be reimbursed for efforts carried out under those agreements for the period after September 30, 1977, and before the date of award of an initial construction management assistance grant. This reimbursement is applicable only if the State demonstrates that insufficient funds were available under § 35.913 to support its delegated activities during that period.

(d) Funds for State management assistance grants may be obligated by a grant award at any time during the 2-year period in which the construction grant allotment is available for obligation.

(e) Funds from initial and subsequent construction management assistance grants which have been awarded will remain available for expenditure for a period not to exceed 5 years from the date of award of each grant.

(f) Unobligated balances in paragraph (d) of this section and unliquidated balances in paragraph (e) of this section remaining at the end of the period for which they are available will be added to the amount last allotted to a State under section 205(c) of the Act, and will be immediately available for funding the construction of treatment works in the same manner and to the same extent as the last allotment.

§ 35.1025 Payment.

Payment under construction management assistance grants will normally be made in accordance with anticipated expenditures under § 30.615 of this subchapter. Payment may be made in advance or by letter of credit, under § 30.615-1 (b) or (c), as the regional administrator determines.

§ 35.1030 Delegation agreement.

(a) A delegation agreement between the regional administrator and the State water pollution control agency, or another agency designated by the Governor, must be executed prior to the award of the initial construction management assistance grant. The grant agreement incorporates the delegation agreement. Following the end-of-year review (see § 35.1040(b)), the delegation agreement may be revised and the grant agreement amended as necessary.

(b) Notwithstanding the existence of delegation agreements previously approved under § 35.912, no construction management assistance grant will be awarded unless the regional administrator approves a new delegation agreement meeting the requirements of this subpart. The State may include in its new delegation agreement those elements of its prior agreement which the regional administrator determines will meet the requirements of this subpart.

§ 35.1030-1 Scope of delegation agreement.

(a) *Development of State capability.* The delegation agreement shall specify the State organization responsible for implementing the delegation agreement and the goals and timetable for staffing that organization to accept responsibility for the effective administration of the construction grant program.

(b) *Delegation of grant management activities.* The regional administrator may delegate to the State agency authority to review and certify grant documents required before and after grant award and to perform grant review and management activities, which may include the following:

(1) *Step 1.* Preapplication conference, plan of study, subagreements, subagreement cost analysis, infiltration/inflow analysis, facility plan, environmental assessment and related documents, public participation, relocation plans, cost-effectiveness analysis, and analysis of BPWTT and innovative and alternative wastewater treatment technology application;

SEP 20 78

(2) *Step 2.* Subagreements, subagreement cost analysis, user charge and industrial cost recovery systems, plans, and specifications for construction, preliminary plan of operation, and the plan and schedule for the Operation and Maintenance Manual;

(3) *Step 3.* Subagreements, subagreement cost analysis, bid solicitation and contract documents, contract change orders and amendments, draft and final operation and maintenance manuals, final plans of operation, interim and final inspections, sewer use ordinances, and audits.

(c) *Small community assistance.* In addition, the delegation agreement may include State authority to act as the manager of waste treatment construction grant programs of small communities. In this capacity, the State, with the approval of the community, would serve as the community's contracting agent and undertake responsibilities such as (1) negotiating and administering planning, design and construction subagreements; (2) providing technical advice (especially on cost-effective and innovative alternatives); and (3) assisting grantees in exercising their resident engineering responsibilities. Where the State finds that an organization already exists within that State which is capable of immediately performing the assistance, it may elect to enter into an annually renewable contract with that organization for the service. Contract costs will be grant eligible if plans for the contracting are set forth in the delegation agreement and the regional administrator approves the provisions of the contract in advance of its execution.

§ 35.1030-2 Certification procedures.

The State shall furnish a written certification to the regional administrator, on a project-by-project basis, stating that applicable Federal requirements within the scope of authority delegated to the State under the delegation agreement have been met. The certification must be supported by documentation specified in the delegation agreement which will be made available to the regional administrator upon his request. The regional administrator shall accept the certification unless he determines that the State has failed to adequately establish the basis for its certification or that applicable requirements have not been met.

§ 35.1030-3 Limitation on delegation.

The regional administrator shall retain responsibility and primary authority, notwithstanding the provisions of any delegation agreement, for the following:

(a) Award of step 1, step 2, step 3, and step 2+3 grant assistance and amendments;

(b) Review of projects to determine whether environmental impact statements will be required under the National Environmental Policy Act of 1969, 42 U.S.C. 4321, and the preparation and issuance of such statements or of negative declarations required by Part 6 of this chapter;

(c) Civil rights determinations, and enforcement, related to the Civil Rights Act of 1964 and Executive Order 11246 and other Federal requirements related to discrimination;

(d) Final dispute determinations under § 35.960;

(e) Determinations of protests under § 35.939(e);

(f) Resolution of construction grant audit exceptions;

(g) Determination that an overriding Federal interest exists in a particular project which requires greater Federal oversight or participation; and

(h) Final determinations under Federal statutes other than the Clean Water Act.

§ 35.1030-4 Terms of delegation agreement.

(a) The delegation agreement shall cover State activities necessary for the orderly implementation of the construction management assistance program, including:

(1) The designation and maintenance of an organizational unit within the State agency responsible for the implementation of the program;

(2) The determination of necessary staffing and the hiring and training of new personnel;

(3) The establishment of an accounting system and audit process, acceptable to the regional administrator, which will properly identify and relate State costs to the conduct of delegated functions;

(4) The scheduling for the assumption of delegated functions over the terms of the agreement;

(5) The detailed estimates of program costs for the initial year, and general estimates for succeeding years;

(6) The plan for corrrelating the implementation of the construction management assistance program with relevant activities under subpart G of this part;

(7) The proposed detailed procedures to be followed by the State in carrying out each delegated function; and

(8) The frequency, method and extent of EPA reviews.

(b) The term of the delegation agreement and the budget shall generally be 5 years. However, as subsequent construction management assistance is awarded, the term of the delegation agreement may be extended.

§ 35.1030-5 Implementation of the delegation agreement.

After the Regional Administrator approves the delegation agreement, the construction management assistance grant may be awarded. Upon receipt of the award, the State will promptly proceed to carry out the delegated functions and, as necessary, to hire staff and organize in accordance with the terms of the delegation agreement.

§ 35.1030-6 State assurance.

In the delegation agreement, the State agency will assure the Regional Administrator that in performing its management responsibilities under the delegation agreement, it will execute its responsibilities in conformance with the intent and substance of all applicable Federal laws, regulations, orders, policy issuances, and guidelines.

§ 35.1030-7 Determination of competence.

The Regional Administrator shall evaluate the State's organizational unit charged with implementing the agreement with respect to: Numbers, levels, technical expertise, and training of existing and proposed staff; management and organization; and the quality of past efforts in the construction grant program. Based on this review, the Regional Administrator shall determine the capability of the State to carry out the functions identified in the delegation agreement. Until the Regional Administrator affirmatively determines the State's capability, no delegation agreement shall be executed.

§ 35.1030-8 Amendments.

The delegation agreement may be amended at any time by mutual agreement in writing, and funding adjustments will be reflected in grant amendments.

§ 35.1030-9 Right of review; appeal.

An aggrieved applicant or grantee may request the Regional Administrator to review findings, recommendations, and certifications made and actions taken by the State agency under the delegation agreement in accordance with procedures established in or issued under the delegation agreement. The Regional Administrator may also review such findings, recommendations, certifications, and actions on his own initiative. As provided in § 35.1050, a Regional Administrator's final decision in such matters may be appealed.

§ 35.1033 Public participation.

(a) *New and revised agreements.* Public participation during the development, review, and approval of the delegation agreement shall be in accordance with the requirements of section 101(e) of the Act, Part 25 of this chapter, and this subpart.

(1) Informal consultation with members of the public shall take place while the draft delegation agreement is being negotiated. This consultation may involve any of the following:

(i) Task forces;
(ii) Public meetings;
(iii) Advisory groups;
(iv) Workshops or conferences;
(v) Contact with interested citizens and public interest groups.

(2) A copy of the draft delegation agreement shall be available and distributed to the public 45 days before its approval by EPA, together with a fact sheet adequately describing, in laymen's language, the importance of the functions being considered for delegation. If a public hearing is held, the draft agreement and fact sheet shall be available 30 days prior to the hearing. These time periods may overlap.

(3) A public hearing must be held by the Regional Administrator on a draft delegation agreement if he determines that significant public controversy or substantial interest in a public hearing exists. In a large State, hearings should be held at more than one location. The purpose of the hearing will be to determine:

(i) The adequacy of the State program for the proposed delegation; and

(ii) Any conditions that should be imposed to insure that the delegated responsibilities will be implemented in compliance with the Act and applicable regulations.

(4) Following the public hearing, EPA shall prepare a summary of major issues raised at the hearing, and the manner in which the issues were resolved. This "summary of Agency responsiveness" shall be mailed to all participants of the hearing.

(b) *Substantial amendments.* Amendments to the delegation agreement involving delegation of substantial authority (e.g., facilities planning) shall be subject to the public participation requirements of paragraph (a) of this section.

(c) *Existing delegation agreements.* States operating under former delegation agreements and charging fees under former § 35.913 as of December 27, 1977, shall be subject to the following public participation requirements:

(1) The State shall hold a public hearing or public meeting on the State's first grant application for a construction management assistance grant. A fact sheet outlining the functions already delegated and those to be delegated under the proposed agreement shall be distributed to the public 30 days prior to the public hearing. The fact sheet and the hearing should solicit public input on the adequacy of the terms of the grant and the delegation agreement.

(2) Subsequent grant applications that involve amendments to the delegation agreement which delegate substantial new functions shall also be subject to the public hearing or meeting requirements described in paragraph (c)(1) of this section.

(3) Whenever a Regional Administrator determines that the public hearing or meeting requirements described in paragraphs (c)(1) and (c)(2) of this section have been met prior to the execution of the delegation agreement, a requirement for further public meetings or hearings may be waived.

(d) *Public participation in delegated programs.* (1) The State's performance of delegated construction grant program functions and activities shall comply with all applicable Federal public participation requirements.

(2) The State must assure that the delegation agreement and the State's construction grant program provides for adequate resources, including competent personnel, to oversee public participation requirements.

(e) *Citizen request for regional administrator review.* Nothing in this subpart or the terms of the delegation agreement shall preclude interested citizens who have been adversely affected by a State agency's decision or omission under the delegation agreement to request the Regional Administrator to review or investigate the circumstances resulting in the State agency's decision or action. The regional administrator will respond promptly to written complaints and will hold a public meeting if he considers it appropriate.

§ 35.1035 Adherence to budget estimates.

(a) Grant expenditures shall be based on costs incurred in the conduct of delegated functions and in the hiring and training of staff personnel under the provisions of the delegation agreement and shall be consistent with the budget approved in the grant agreement and the terms of the delegation agreement. Other expenditures are not allowable costs.

(b) If rebudgeting of funds among program elements becomes necessary, the provisions of § 30.610 of this subchapter apply.

§ 35.1040 Program evaluation and reporting.

The regional administrator will monitor the performance of the State under the delegation agreement. In addition, each regional administrator shall review and evaluate each State delegation program as follows:

(a) *Mid-year evaluation.* Semiannually, the regional administrator will conduct reviews in order to insure that State expenditures under the construction management assistance grant are directly related to the conduct of activities and functions delegated to that State under the delegation agreement.

(b) *End-of-year review.* Annually, the Regional Administrator will conduct an evaluation with appropriate State officials to review the accomplishments of the program year, the consistency of the year's activities with the delegation agreement, and the work projected for the next program period. This evaluation will also apply to State grant programs discussed in § 35.1015(b). Upon completion of this evaluation the delegation agreement may be renewed. The renewal will reflect changes resulting from the evaluation and will be the basis for approving subsequent construction management assistance. The regional administrator shall hold a public meeting (which may be in conjunction with any other relevant State hearing or meeting), or workshop, in order to obtain public input regarding this review.

§ 35.1045 Reduction of grant amount; suspension or termination of grants.

If the regional adminstrator's evaluation of the State agency's management of the program or performance of any of the activities authorized by the delegation agreement reveals that the State agency will not achieve agreed goals or that the agency's performance is otherwise unsatisfactory, the regional administrator shall seek to achieve satisfactory performance through mutual agreement. If agreement is not reached, the regional administrator may disallow costs associated with continued performance of such activities. He may reduce the grant amount on a proportional basis or suspend or terminate the grant, in whole or in part, in accordance with § 30.915 or § 30.920 of this subchapter and any other provisions in the delegation agreement. As provided in § 35.1050 a regional administrator's final decision in such matters may be appealed.

§ 35.1050 Disputes.

The regional administrator's determinations on denials of applications for a State management assistance grant and on disputes arising under a State management assistance grant, including suspension or termination of grant assistance, shall be final and conclusive unless appealed by the applicant or grantee or State within 30 days from the date of receipt of such final determination in accordance with the "disputes" provisions of part 30 subpart J of this subchapter.

Title 41—Public Contracts and Property Management

CHAPTER 101—FEDERAL PROPERTY MANAGEMENT REGULATIONS

SUBCHAPTER E—SUPPLY AND PROCUREMENT

[FPMR Amdt. E-228]

PART 101-30—FEDERAL CATALOG SYSTEM

Supply Support Requests

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This regulation provides policy pertaining to supply support as a result of the revision and redesignation of GSA Form 1303, Request for Federal Cataloging/Supply Support Action, to Standard Form 1303, Request for Federal Cataloging/Supply Support Action. This amendment takes the necessary action to update the FPMR.

EFFECTIVE DATE: September 20, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. John I. Tait, Director, Regulations and Management Control Division, Office of the Executive Director, Federal Supply Service, General Services Administration, Washington, D.C. 20406, 703-557-1914.

The table of contents for part 101-30 is amended to add §§ 101-30.101-17, 101-30.101-18, 101-30.305, and 101-30.404-1 and revise 101-30.404 as follows:

Sec.
101-30.101-17 Supply support.
101-30.101-18 Supply support request.
101-30.305 Exemptions from the system.
101-30.404 Supply support.
101-30.404-1 Consolidation of supply support requests.

Subpart 101-30.1—General

Sections 101-30.101-17 and 101-30.101-18 are added as follows:

§ 101-30.101-17 Supply support.

"Supply support" means the functions performed by the supply manager to provide requesting (using) activities with a Government source and method of supply for an item; e.g., GSA stock program, Federal supply schedule program, GSA's buy-on-demand program, or GSA's authorizing an agency to purchase locally.

§ 101-30.101-18 Supply support request.

"Supply support request" means a request from an activity to a supply manager; e.g., a request to GSA to provide that activity with supply support for an item.

Subpart 101-30.3—Cataloging Items of Supply

Section 101-30.305 is added as follows:

§ 101-30.305 Exemptions from the system.

When an agency believes that the benefits of the Federal catalog system may be realized without formal participation, a request for an exemption shall be submitted to the General Services Administration (FFL), Washington, D.C. 20406. After reviewing the request for an exemption, GSA will inform the requesting agency of the decision and will provide instructions for implementation. The request for an exemption shall include, but not be limited to, the following information:

(a) Number of items repetitively procured, stored, distributed, or issued.

(b) Number of items currently used having national stock numbers.

(c) Identification system planned or in use other than the Federal catalog system.

(d) Whether procurement is centralized.

(e) Description of any catalogs published. If none, so state.

(f) Whether supply support is received from another agency including the name of the agency and category of item involved; e.g., electronics.

(g) Cost differential between submitting a request for cataloging action and identifying the item under the agency's current or planned system.

Subpart 101-30.4—Use of the Federal Catalog System

1. Section 101-30.400 is revised as follows:

§ 101-30.400 Scope of subpart.

This subpart prescribes the policies and procedures governing the dissemination of Federal catalog data, the conversion to and use of the Federal catalog system by Federal agencies, and the requesting of supply support from Government supply managers.

2. Section 101-30.404 is revised and retitled to read as follows:

§ 101-30.404 Supply support.

Civilian agencies requiring supply support on an item of supply shall request this action by preparing Standard Form 1303, Request for Federal Cataloging/Supply Support Action (illustrated at § 101-30.4901-1303), and submitting the form to the General Services Administration (FFLD), Washington, D.C. 20406. Guidance on the preparation of supply support requests is contained in the GSA Handbook, Federal Catalog System—Logistics Data (FPMR 101-30.3), issued by the Commissioner, Federal Supply Service.

3. Section 101-30.404-1 is added as follows:

§ 101-30.404-1 Consolidation of supply support requests.

Requests for supply support should be consolidated in one focal point within each agency or activity. On the basis of the total consolidated agency or activity requirement; i.e., annual demand, GSA can determine the most economical and efficient method of supply support.

(Section 205(c), 63 Stat. 390; 40 U.S.C. 486(c).)

Dated: September 6, 1978.

JAY SOLOMON,
Administrator of General Services.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Service Order No. 1338]

PART 1033—CAR SERVICE

Madison Railroad, Division of City of Madison Port Authority Authorized To Operate Over Tracks Formerly Operated by Madison Railway Co., Inc.

Decided September 15, 1978.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Service Order No. 1338).

SUMMARY: The Madison Railway Co., Inc., has operated a line of railroad between Madison, Ind., and North Vernon, Ind., under an operating agreement with the State of Indiana. This operating agreement has been canceled, and the State has entered into an operating agreement with the Madison Railroad, Division of City of Madison Port Authority to operate this line of railroad. Service order No. 1338 authorizes the Madison Railroad, Division of City of Madison Port Authority to operate this line, pending disposition of its application

to operate as the designated operator in order to provide uninterrupted rail service to shippers on this line.

from, or via these lines which were formerly in effect on such traffic when routed via MRY, until tariffs

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to hunting of

on any motorized vehicle or its attachments is prohibited. An uncased firearm means any firearm not encased in a holster, scabbard, or gun case (soft

retrieval of kill must be by foot. The use of horses on the refuge is prohibited.

to operate as the designated operator in order to provide uninterrupted rail service to shippers on this line.

DATES: Effective 11:59 p.m., September 15, 1978. Expires 11:59 p.m., October 15, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, Telephone 202-275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION: The Madison Railway Co., Inc. (MRY) has operated approximately 24 miles of railroad between Madison, Ind., and North Vernon, Ind., under an operating agreement with the State of Indiana (State). The State has terminated its operating agreement with MRY effective September 15, 1978, and has entered into an agreement with Madison Railroad, Division of City of Madison Port Authority (MRR). The operation of this line by the MRR has been authorized by State of Indiana Public Service Commission in an order dated August 29, 1978. An application seeking authority to operate as the designated operator of this line will be filed by the MRR. If service over this line is not continued, numerous shippers on the line will be left without essential railroad service.

It is the opinion of the Commission that an emergency exists requiring the operation by MRR over tracks formerly operated by MRY in the interest of the public; that notice and public procedure are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than 30 days' notice.

It is ordered,

§ 1033.1338 Service Order 1338.

(a) *Madison Railroad, Division of City of Madison Port Authority authorized to operate over tracks formerly operated by Madison Railway Co., Inc.* The Madison Railroad, Division of City of Madison Port Authority is authorized to operate over tracks formerly operated by Madison Railway Co., Inc. (MRY), between Madison, Ind., and North Vernon, Ind., a distance of approximately 24 miles.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate and foreign traffic.

(c) Nothing herein shall be considered as a prejudgment of the MRR seeking authority to operate over these aforementioned tracks.

(d) *Rates applicable.* Inasmuch as this operation by the MRR over tracks previously operated by the MRY is deemed to be due to carrier's disability, the rates applicable to traffic moved over these lines shall be the rates applicable to traffic routed to, from, or via these lines which were formerly in effect on such traffic when routed via MRY, until tariffs naming rates and routes specifically applicable via the MRR become effective.

(e) In transporting traffic over these lines, the MRR and all other common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to that traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between the carriers; or upon failure of the carriers to so agree, the divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 11:59 p.m., September 15, 1978.

(g) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., October 15, 1978, unless otherwise modified, changed or suspended by order of this Commission.

(49 U.S.C. 1 (10-17).)

A copy of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association. Notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington, and John R. Michael.

H. G. Homme, Jr.,
Acting Secretary.

Title 50—Wildlife and Fisheries

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of Certain National Wildlife Refuges in Arizona, California, New Mexico, Oklahoma, and Texas

AGENCY: U.S. Fish and Wildlife Service, Department of the Interior.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to hunting of certain national wildlife refuges in the States of Arizona, California, New Mexico, Oklahoma, and Texas is compatible with the objectives for which these areas were established, will utilize a renewable national resource, and will provide additional recreational opportunity to the public. This document establishes special regulations effective for the upcoming hunting season for hunting deer, desert bighorn sheep, and wapiti (elk).

EFFECTIVE DATES: September 20, 1978, through December 31, 1978.

FOR FURTHER INFORMATION CONTACT:

The refuge manager at the address or telephone number listed below in the body of these special regulations.

GENERAL CONDITIONS

Hunting on portions of the following refuges shall be in accordance with applicable State and Federal regulations. Portions of refuges which are open to big game hunting are designated by signs and/or delineated on maps. Special conditions applying to individual refuges are listed on hunting leaflets available at the individual refuge headquarters. Vehicular travel is restricted to designated roads and trails.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Listed big game species may be hunted on the following refuges:

ARIZONA

Cabeza Prieta National Wildlife Refuge, P.O. Box 418, Ajo, Ariz. 85321, telephone 602-387-6483, desert bighorn sheep; and Havasu National Wildlife Refuge, P.O. Box A, Needles, Calif. 92363, telephone 714-326-3853, desert bighorn sheep; and Kofa National Wildlife Refuge, P.O. Box 1032, Yuma, Ariz. 85464, telephone 602-261-2619, mule deer and desert bighorn sheep.

Special conditions (Cabeza Prieta, Havasu, and Kofa Refuges): (1) Hunting of mule deer and/or desert bighorn sheep is permitted but only by those holding a valid permit from the Arizona Game and Fish Department for the species being hunted. The permit must be for the period (season) and area being hunted. (2) Possession or transportation of a loaded firearm or strung bow within or on any motorized vehicle or its attachments is prohibited. A loaded firearm means any firearm containing any cartridge or ammunition in its chamber, magazine, or clip. (3) Possession or transportation of an uncased firearm within or on any motorized vehicle or its attachments is prohibited. An uncased firearm means any firearm not encased in a holster, scabbard, or gun case (soft or hard). (4) Possession of weapons is permitted only by those legally hunting on the refuge and weapons are restricted to those legal for use in the permitted hunt being engaged in by a particular hunter.

ARIZONA AND CALIFORNIA

Cibola National Wildlife Refuge, P.O. Box AP, Blythe, Calif. 92225, telephone 714-922-4433, mule deer (archery and gun seasons).

Special conditions: (1) Hunting is prohibited within one-fourth (¼) mile of any occupied dwelling or 250 yards of any field farmworker. (2) Possession of handguns and/or rimfire firearms is prohibited. Rifled firearms of legal caliber for hunting deer may be possessed on the refuge but only during the legal "gun" deer hunting season. (3) Shotguns of legal bore may be possessed on the refuge but only for use in hunting small game, dove, and migratory waterfowl during legal seasons for these species. Possession of shot shells loaded with shot of greater than size "BB" is prohibited.

Imperial National Wildlife Refuge, Box 2217, Martinez Lake, Ariz. 85364, telephone 602-783-3400, mule deer; (gun seasons only; there will be no archery deer season on this refuge).

Special condition: (1) Except as provided under the special regulations covering the hunting of small game, doves, and migratory waterfowl on the Imperial National Wildlife Refuge, possession of any firearms other than a legal deer hunting firearm, as defined by State hunting regulations, is prohibited. Legal deer hunting firearms may be possessed on the refuge only during legal "gun" deer hunting seasons.

NEW MEXICO

Bitter Lake National Wildlife Refuge, P.O. Box 7, Roswell, N. Mex. 88201, telephone 505-622-6755, mule deer.

Special condition: (1) Vehicles are not permitted in the wilderness area; otherwise, vehicles are restricted to established roads and trails.

Bosque del Apache National Wildlife Refuge, P.O. Box 1246, Socorro, N. Mex. 87801, telephone 505-835-1828, mule deer.

Special conditions: (1) Only the State stratified modern firearms deer season will be opened on the refuge. (2) All hunters must leave the refuge by one (1) hour after sunset. (3) Overnight camping is prohibited. (4) Center-fire rifles chambered for a center-fire cartridge are the only legal weapons for the hunt. (5) Hunting and retrieval of kill must be by foot. The use of horses on the refuge is prohibited.

San Andres National Wildlife Refuge, care of Bosque del Apache National Wildlife Refuge, P.O. Box 1246, Socorro, N. Mex. 87801, telephone 505-835-1828, mule deer and desert bighorn sheep.

Special conditions: (1) Hunting of mule deer and/or desert bighorn sheep is permitted but only by those holding a valid permit from the New Mexico Department of Game and Fish for the species being hunted and for the special refuge hunt. (2) Hunters must check into the area in accordance with instructions from the department of game and fish and/or the refuge manager. (3) No entry into the hunting area from the west will be permitted north of the Rope Springs road. Hunters will not be permitted to enter the hunting area from the east side of the San Andres Reguge except at the discretion of officers in charge. (4) Officers-in-charge may restrict the numbers of hunters entering any particular local area. If required by the military firing schedule, hunters will be cleared from all areas where their safety is endangered. (5) Each hunting party will camp within an assigned area and within 100 feet of the road.

OKLAHOMA

Salt Plains National Wildlife Refuge, Route 1, Box 49, Jet, Okla. 73749, telephone 405-626-4794, white-tailed deer.

Special conditions: (1) An archery hunt, a primitive rifle hunt, and a modern gun hunt for deer will be conducted on the Salt Plains Refuge, with participants to be selected by the Oklahoma Department of Wildlife Conservation through its application-special permit system. (2) Permitted hunters must check in at the refuge office prior to entering the assigned hunting area and must check out at the refuge office upon leaving the area. (3) Shooting hours on the refuge will end each day at sunset.

Tishomingo National Wildlife Refuge, P.O. Box 248, Tishomingo, Okla. 73460, telephone 405-371-2402, white-tailed deer.

Special conditions: (1) The open season for archery deer (either sex) hunting on the Tishomingo Wildlife Management Unit (all zones) extends from October 14 through November 5, 1978, inclusive. No special permits are required. The management unit will be closed to all other public use during the archery deer hunt. (2) The open season for gun deer (antlerless only) hunting on the Tishomingo Wildlife Management Unit (all zones) extends from November 13 through November 14, 1978, inclusive. Hunting will be by Oklahoma Department of Wildlife Conservation special permit only. The management unit will be closed to all other public use during the gun deer hunt. (3) The open season for gun deer (antlerless only) hunting on Tishomingo National Wildlife Refuge extends from November 13 through November 14, 1978, inclusive. Hunting will be by Oklahoma Department of Wildlife Conservation special permit only. Hunters will be assigned hunt areas within the area of the refuge open to deer hunting. Hunters holding permits to hunt in an area accessible only by boat will furnish their own boat transportation and will depart from Nida Point boat ramp on the morning of each hunt day. The Tishomingo National Wildlife Refuge will be closed to all other public use on November 13 and 14, 1978. (4) Hunters, upon entering or leaving, shall report at designated checking stations as may be established for the regulation of hunting activities and shall furnish information pertaining to their hunting, as required.

Wichita Mountains Wildlife Refuge, P.O. Box 448, Cache, Okla. 73527, telephone 405-429-3222, wapiti (elk).

Special conditions: (1) Hunting of wapiti (elk) is permitted on the Wichita Refuge but only by those holding a valid permit from the Oklahoma Department of Wildlife Conservation for this special hunt. (2) Except as provided in special condition (3) below, the applicable portions of the Quanah-Elk Mountain Unit will be closed to all public use except elk hunting during the hunt period. (3) Authorized hunters may retain approved, unloaded hunting rifles and camp overnight (in Camp Doris only) during the period when the Quanah-Elk Mountain Unit is closed to all other public use. Such camping hunters may be accompanied by, but not to exceed, one (1) camping companion who will be confined to Camp Doris or refuge headquarters during the hunt period unless authorized by the refuge manager or his agent to assist with the removal of game. (4) Authorized hunters will comply with all official written refuge rules and regulations issued at mandatory hunter briefings. Violation of any of these rules or regulations or of any Federal or State hunting law will terminate the hunt of the person(s) so involved.

TEXAS

Aransas National Wildlife Refuge, P.O. Box 68, Austwell, Tex. 77950, telephone 512-286-3559, white-tailed deer and feral hogs.

Special conditions: (1) Archery hunting of white-tailed deer and feral hogs is permitted on the Aransas Refuge during the following periods: September 21 through September 25, September 29 through October 2, and October

6 through October 8, all in calendar year 1978. (2) The bag limit per hunter for the total season (three segments) shall be in accordance with all applicable State regulations subject to the following conditions:

panied by an adult 21 years of age or older.

NOTE.—The Fish and Wildlife Service has

proposed rules

6 through October 8, all in calendar year 1978. (2) The bag limit per hunter for the total season (three segments) is three (3) deer of either sex but not to include more than two (2) buck deer. There is no limit as to the number of feral hogs that may be taken. (3) All hunters must check in and out of the hunt area at the refuge entrance on Texas Farm Road 2040. (4) A valid 1978-79 Texas hunting license is required of each participant. A current State archery tag is also required. (5) All hunting arrows must bear, in a non-water-soluble medium, the name and address of the user. (6) No target, field, or practice arrows are permitted on the refuge. (7) No deer may be removed from the refuge without a metal transportation seal being attached to the carcass by a refuge officer. (8) In the event of the arrival of whooping cranes, the refuge or any portion thereof may be immediately closed to hunting.

Laguna Atascosa National Wildlife Refuge, P.O. Box 2683, Harlingen, Tex. 78550, telephone 512-423-8328, white-tailed deer.

Special conditions: (1) Archery hunting of white-tailed deer is permitted on the Laguna Atascosa National Wildlife Refuge from 30 minutes before sunrise until 2 p.m. d.s.t. during the period of October 1 through October 15, 1978. (2) Only longbows and arrows legal for use in taking deer may be possessed on the refuge. All other weapons are prohibited. (3) The bag limit per person for the season is two (2) deer of either sex. (4) Hunters must check in and out each day of the hunt at the Laguna Atascosa Hunter Check Station, which will be open from 5 a.m. until 2 p.m. daily during the hunt. Required permits will be issued and collected at this point. Failure to check out will result in the loss of future hunting privileges. (5) Any game taken in the hunt must be checked out of the refuge at the hunter check station. (6) Vehicles will not be permitted off designated refuge tour roads. (7) Archery equipment must be left at the check station prior to trailing wounded deer into closed areas or prior to any trailing of wounded game after 2 p.m. (8) The use of horses and/or dogs is not permitted. (9) The construction of permanent blinds is not permitted. (10) Hunters under 16 years of age must be accompanied by an adult 21 years of age or older.

NOTE.—The Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

PART 32—HUNTING

Opening of Swanquarter National Wildlife Refuge, N.C., to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening of hunting on Swanquarter National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: December 6, 1978 through January 20, 1979.

FOR FURTHER INFORMATION CONTACT:

Steven W. Frick, Refuge Manager, Mattamuskeet National Wildlife Refuge, Route 1, Box N-2, Swanquarter, N.C. 27885, telephone 919-926-4021.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Hunting is permitted on the Swanquarter National Wildlife Refuge, N.C., only on the areas designated by signs as being open to hunting. These areas comprising 7,055 acres are delineated on maps available at the refuge headquarters and from the office of the Area Manager, U.S. Fish and Wildlife Service, Room 279, Federal Building, Asheville, N.C. 28801. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

(1) A refuge hunt permit will be required of everyone, regardless of age, wishing to hunt the refuge.

(2) Only ducks and coots may be taken in accordance with State and Federal regulations. Shooting of swans, geese, canvasbacks, redheads, or other wildlife is prohibited.

(3) Hunting is restricted to steel shot shells. No lead or other toxic shell will be permitted in the hunting area.

(4) Hunting season: December 6, 1978 through January 20, 1979.

(5) Shooting hours: One-half hour before sunrise until sunset. Hunters may enter hunting area 1 hour prior to legal shooting time and must be out of the area 1 hour after legal shooting time.

(6) All guns must be encased and/or dismantled while traveling within the refuge.

(7) No permanent or seasonal blinds will be allowed on the hunt area. Temporary blinds, carried in and out daily, or made of native vegetation are permissible.

(8) Hunters are not permitted to hunt from floating or beached water crafts.

(9) Hunters will not be permitted to hunt closer than 100 yards apart.

(10) The use of retrievers is permissible and encouraged, but dogs must be under firm control at all times.

(11) Hunters under the age of 16 must be under close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile, but in no case should one adult have more than two juveniles under his/her supervision.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 12, 1978.

WILLIAM C. HICKLING,
Area Manager.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-4484]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the City of Patterson, Stanislaus County, Calif.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Patterson, Stanislaus County, Calif. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, 344 West Las Palmas Avenue, Patterson, Calif. Send comments to: Mr. Jack Osteen, City Manager, City of Patterson, P.O. Box 667, Patterson, Calif. 95363.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Patterson, Calif, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Lateral D Canal.....	Intersection of Northmead Way and North 3d St.	97
	Intersection of North 2d St. and J St.	97

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: August 31, 1978.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Lafayette, Boulder County, Colo.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Lafayette, Boulder County, Colo.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, 201 East Simpson, Lafayette, Colo. Send comments to: Hon. Roy Roberts, Mayor, city of Lafayette, City Hall, 201 East Simpson, Lafayette, Colo. 80026.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Lafayette, Colo., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Coal Creek	South 120th St.—50 ft*	5142
	Burlington Northern RR.—100 ft*.	5147
Rock Creek	South 120th St.—at centerline.	5152

*Upstream from centerline.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: September 5, 1978.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the Town of East Hartford, Hartford County, Conn.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of East Hartford, Hartford County, Conn. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Town Hall, 740 Main Street, East Hartford, Conn. Send comments to: The Honorable Richard Balckstone, Mayor, Town of East Hartford, Town Hall, 740 Main Street, East Hartford, Conn. 06108.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of East Hartford, Conn., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980,

which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
	Just upstream of footbridge, 1,250 ft downstream of Walnut St.	64
	Just upstream of Walnut St.	66

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Naples, Collier County, Fla.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Naples, Collier County, Fla. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, 735 Eighth Street, South Naples, Fla. Send comments to: Mr. George Patterson, City Manager, City of Naples, City Hall, 735 Eight Street, South, Naples, Fla. 33940.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Naples, Fla., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Gulf of Mixico	Neopolitan Way (entire street).	12
	Crayton Rd. between Harbour Dr. and Mooring Line Dr.	12
	Coral Dr. (entire street).	11
	Admiralty Parade East (entire street).	11
	18th Ave. South between 4th St. and 8th St.	10
	8th St. between 12th Ave. South and 8th Ave. South.	9

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: August 31, 1978.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Decatur, Macon County, Ill.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Decatur, Macon County, Ill. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the City Clerk's Office in the City Hall, Decatur, Ill. Send comments to: Hon. Elmer Walton, Mayor of Decatur, 707 East Wood Street, Decatur, Ill. 62523.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Decatur, Macon County, Ill., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Sangamon River	Confluence of Stevens Creek.	605
	A. E. Staley Bridge	619
	Nesbitt Bridge (upstream).	625
Stevens Creek	West Main St	604
	Westlawn Ave	620
	Mound Rd	628
	Interstate 72	645
Spring Creek	Hill Ave. (downstream)	624
	Monroe St	632
	Neeley Ave	648
	Timber Beam Bridge	650
	Interstate 72	665
Big Creek	Lake Decatur	619
	Baltimore Ave. (upstream).	623
	State Route 121	624
Tributary No. 1	Lost Bridge Rd	623
	Upstream study limits	638
Tributary No. 2	Lake Ridge Ave. (upstream).	623
Tributary No. 3	Concrete slab bridge	620
Tributary No. 4	Private road	629
Tributary No. 5	Mound Rd	660

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: September 1, 1978.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Village of Golf, Cook County, Ill.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the village of Golf, Cook County, Ill. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Village Hall, 1 Briar Road, Golf, Ill. Send comments to: The Honorable Alan J. Helverson, Village President, Village of Golf, Village Hall, 1 Briar Road, Golf, Ill. 60029.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Village of Golf, Ill., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
West Fork, North Branch, Chicago River.	South corporate limits	623
	North corporate limits	624

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: September 6, 1978.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of North Newton, Harvey County, Kans.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of North Newton, Harvey County, Kans. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the City Hall, North Newton, Kans. Send comments to: The Honorable Hartzel Schmidt, Mayor, City of North Newton, City Hall, North Newton, Kans. 64114.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of North Newton, Kans., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Sand Creek	Just upstream of East 24th St.	1,433
	Corporate limits, 800 ft upstream from East 24th St.	1,435
	Corporate limits, 2,376 ft downstream from Interstate 135.	1,436

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Town of Randolph, Kennebec County, Maine

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of Randolph, Kennebec County, Maine. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Randolph Town Office, Water Street, Randolph, Maine. Send comments to: Mr. John Lasselle, Chairman, Board of Selectmen, Town of Randolph, Randolph Town Office, Water Street, Randolph, Maine 04345.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Town of Randolph, Maine, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Kennebec River	Randolph-Gardiner Bridge—20 ft*.	28
Togus Stream	State Route 27 Bridge—20 ft*.	26
	Transmission Line Crossing—30 ft*.	30
	Barber Rd. Bridge—40 ft*.	74

*Upstream of centerline.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Oakland Creek	Upstream corporate limits	1,433
	Downstream corporate limits	1,433
Youghiogheny River	Upstream corporate limits	1,433
	Downstream corporate limits	1,433

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Town of Westernport, Allegany County, Md.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of Westernport, Allegany County, Md. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Westernport City Hall, Box 266, Westernport, Md. 21562. Send comments to: Honorable James Wills, Mayor of Westernport, City Hall, Box 266, Westernport, Md. 21562.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of Westernport, Allegany County, Md., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Georges Creek	Upstream corporate limits	1,433
	Downstream corporate limits	1,433
Potomac River	Upstream corporate limits	1,433
	Downstream corporate limits	1,433

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

[Docket No. FI-4498]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Town of Sangerville, Piscataquis County, Maine

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of Sangerville, Piscataquis County, Maine. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Town Office, Sangerville, Maine. Send comments to: Mr. William Starbaird, Town Manager, Town of Sangerville, Town Office, Sangerville, Maine 04479.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of Sangerville, Maine, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Manhanock Pond..	Areas adjacent to shore .	449
Center Pond.....	Areas adjacent to shore..	506
Carlton Stream	Old Dunbarton Dam—100 ft*.	394
	Old Dunbarton Dam—100 ft**.	402
	Numberall Inc. Dam—100 ft*.	414
	Numberall Inc. Dam—100 ft**.	431
	Dover Stove Company Dam—100 ft*.	435
	Dover Stove Company Dam—100 ft**.	446
	State Route 23-20 ft**....	447
Piscataquis River ..	Lows Bridge—20 ft**.....	379
	State Route 23-20 ft**....	386

*Downstream of centerline.
**Upstream of centerline.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: September 1, 1978.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Town of Oakland, Garrett County, Md.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of Oakland, Garrett County, Md. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Garrett County Planning Commission, 323 Oak Street, Oakland, Md. 21550. Send comments to: Hon. H. D. Swartzentruber, Mayor of Oakland, 109 South Third Street, Oakland, Md. 21550.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of Oakland, Garrett County, Md., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Little Youghiogheny River.	Confluence of an unnamed tributary 770 ft upstream from 3d St. Bridge.	2,382
	3d St. bridge upstream ...	2,381
	Oak St. bridge, 240 ft upstream.	2,379
	Confluence of Wilson Run.	2,376
	Oakland Rosedale Rd bridge upstream.	2,373
	Corporate limits 80 ft downstream from Oakland Rosedale bridge.	2,372
Bradley Run	Fairway Dr	2,382
	Oakland Rosedale Rd.....	2,382
	Corporate limits 55 ft downstream from Chessie System.	2,371

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: September 6, 1978.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Town of Westernport, Allegany County, Md.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of Westernport, Allegany County, Md. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Westernport City Hall, Box 266, Westernport, Md. 21562. Send comments to: Honorable James Wills, Mayor of Westernport, Box 266, Westernport, Md. 21562.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of Westernport, Allegany County, Md., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
George's Creek.....	Confluence with North Branch Potomac River.	916
	Upstream side of State Route 36.	917
	Upstream side of Chessie System, State Route 135.	919
	Upstream side of Washington St., State Route 325.	924
	Upstream side of Chessie System.	931
	700 ft upstream of Chessie System.	935
	Upstream side of Waverly St.	948
	830 ft upstream of Waverly St.	958
	1,650 ft upstream of Waverly St.	968
	2,450 ft upstream of Waverly St.	979
	2,750 ft upstream of Waverly St.	983
North Branch Potomac River.	Downstream corporate limits.	900
	350 ft downstream of State Route 36.	910
	State Route 36 (upstream side).	917
	Upstream corporate limits.	920

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Proposed Flood Elevation Determination for the Town of Stow, Middlesex County, Mass.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of Stow, Middlesex County, Mass. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Town Clerk's Office, Town Hall, Stow, Mass. Send comments to: The Honorable jack Clayton, Chairman, Board of Selectmen, Town of Stow, Town Hall, Stow, Mass. 01775, Attention: Catherine A. Desmond, Administrative Assistant.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of Stow, Mass., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second

layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Assabet River	White Pond Rd. at east corporate limit.	180
	At Sudbury Rd.	181
	4,000 ft downstream from Gleasondale Rd. (Route 62).	182
	Upstream at private road located 450 ft above Gleasondale Rd.	184
	Upstream of Waterfall Dam located 800 ft above Gleasondale Rd.	195
	At southern corporate limit.	198
Branch No. 3, Assabet River.	At confluence with Assabet River.	195
	0.3 mile upstream of confluence.	196
	Downstream side of Hudson Rd. and Randall St.	200

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Town of Deering, Hillsborough County, N.H.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of Deering, Hillsborough County, N.H. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Town Office, Deering, N.H. Send comments to: The Honorable Whitney S. Yeaple, Chairman, Board of Selectmen, Town of Deering, Town Office, Post Office, Hillsboro, N.H. 03244.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of Deering, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Contoocook River	North corporate limit	592
	0.2 miles upstream of north corporate limit.	594
	Just downstream of 2d New Hampshire turnpike.	598
	1.6 miles upstream of 2d New Hampshire turnpike.	600
	Southwest corporate limits.	603
Piscataquog River	East corporate limits	658
	0.4 mile upstream of east corporate limits.	660
	Just downstream of State Route 149.	665
	Just upstream of State Route 149.	669
	Just downstream of Bartlett Hill Rd.	670
	Just upstream of Bartlett Hill Rd.	671
	0.3 miles upstream of Bartlett Hill Rd.	676
	Just downstream of Dirt Rd Bridge.	714
	0.02 mile upstream of Dirt Rd Bridge.	723
	Just downstream of dam near Camp Rd.	742
	Just upstream of dam near Camp Rd.	745
	0.24 mile upstream of dam near Camp Rd.	780
	Just downstream of beaver made dam.	789
	Just upstream of beaver made dam.	791
	0.5 mile upstream of beaver made dam.	800
	0.01 mile downstream of Francestown Rd.	827
	Just upstream of Francestown Rd.	834
	Just downstream of beaver made dam.	839
	Just upstream of beaver made dam.	843
	Just upstream of Pleasant Pond Rd.	845
	0.9 mile upstream of Pleasant Pond Rd.	852
	1.1 miles upstream of Pleasant Pond Rd.	864
	0.4 mile downstream of Reservoir Rd.	899
	0.08 mile downstream of Reservoir Rd.	901
	Just upstream of Reservoir Rd.	911
	Just downstream of Deering Reservoir Dam.	921
	Deering Reservoir	921

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
North Branch Rancocas Creek.	King St	11
	Pine St	13
	Mill Dam (upstream side).	15
	Upstream corporate limits.	18
Mill Race	Park Dr	12
	Pine St	14
Mount Holly Bypass Channel (all backwater).	Bispham St	12
Buttonwood Run	Washington St	13
	Buttonwood St	15
	Cherry St	21
	Branch St	23

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: September 5, 1978.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the Town of New Castle, Westchester County, N.Y.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of New Castle, Westchester County, N.Y. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Town Clerk's Office, New Castle, N.Y. Send comments to: Mr. Charles G. Banks, Jr., Town Supervisor of New Castle, 200 South Greeley Avenue, Chappaqua, N.Y. 10514.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of New Castle, Westchester County, N.Y. in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, (national geodetic vertical datum)
Saw Mill River	Downstream corporate limits.	309
	Saw Mill River Parkway	312
	New York Route 120	346
	Private driveway	365
Gedney Brook	Downstream corporate limits.	267
	Millwood Rd	309
	Swimming pool culvert	333
	Woodmill Rd	409
Kisco River	Confluence with New Croton Reservoir.	199
	Lake Rd	199
	Nitra Rd	215
	Millwood	281
	Upstream corporate limits.	284
Branch No. 2, Kisco River.	Downstream corporate limits.	343
	Horseshoe Rd	347
	Daly Cross Rd	349
	Kathleen Lane	349

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: September 5, 1978.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Rugby, Pierce County, N. Dak.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Rugby, Pierce County, N. Dak. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, Rugby, N. Dak. Send comments to: Hon. Mark Butz, Mayor, City of Rugby, P.O. Box 392, Rugby, N. Dak. 58368.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for city of Rugby, N. Dak., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Rush Lake Tributary.	State Highway 3—20 ft*	1530
	Main Ave. South—50 ft*	1533
	Fifth Ave. South—50 ft*	1533
	Unnamed Road—20 ft*	1535

*Upstream of centerline.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

AGENCY: U.S. Parole Commission.

ACTION: Proposed rule.

SUMMARY: From time to time sentencing judges, defense attorneys, prosecutors, and other interested persons make written recommendations to the Parole Commission concerning the parole of a Federal prisoner. This proposed rule would clarify the factors that a recommendation for or against parole should address in order to be of the greatest possible usefulness in the Commission's decisionmaking process.

DATE: Comments must be received by November 15, 1978.

ADDRESS: Send comments to the U.S. Parole commission, 320 First Street NW., Washington, D.C. 20537, Attention: Office of the General Counsel.

FOR FURTHER INFORMATION, CONTACT:

Michael A. Stover, Office of the General Counsel, telephone 202-724-3143.

SUPPLEMENTAL INFORMATION: This proposed rule is specifically designed (1) to be as helpful as possible to persons who wish to make effective recommendations concerning the parole of any prisoner, and (2) to clarify present practice that no recommendation (including a prosecutorial recommendation pursuant to a plea agreement) may be considered as binding the Commission to make any parole decision other than that reached by its independent exercise of discretion. This latter point is of particular relevance in the case of plea agreements in which the prosecutor's lack of authority to promise a particular parole result may not be fully understood by all of the parties. The proposed text of the rule is as follows (adding a new paragraph (c) to 28 CFR 2.19):

§ 2.19 **Information considered.**

* * * * * *

(c) Recommendations and information from sentencing judges, defense attorneys, prosecutors, and other interested parties are welcomed by the Commission. In evaluating a recommendation concerning parole, the Commission must consider the degree to which such recommendation provides the Commission with specific facts and reasoning relevant to the statutory criteria for parole (18 U.S.C. 4206) and the application of the Commission's guidelines (including reasons for departure therefrom). Thus, to be most helpful, a recommendation must state its underlying factual basis and reasoning. However, no recommendation (including a prosecutorial recommendation pursuant to a plea agreement) may be considered as binding upon the Commission.

Dated: September 14, 1978.

CECIL C. MCCALL,
Chairman,
U.S. Parole Commission.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 970-6]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Louisiana Regulation 19.0

AGENCY: Enviromental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency proposes to approve revisions in the air quality Louisiana State implementation plan by approving Louisiana Regulation 19.0 Emission Standards for Particulate Matter. The need to control additional sources of particulate matter in Louisiana brought about the revision of regulation 19.0. Implementation and enforcement of the revised regulation will result in a general statewide reduction in particulate matter emissions. The EPA invites public comments on the revision especially as to its consistency with the Clean Air Act.

DATES: Comments on this proposed rulemaking by interested persons must be received on or before October 20, 1978, in order to be considered by EPA in making a final approval/disapproval decision.

ADDRESSES: Comments on this proposed rulemaking should be submitted to the address below: Environmental Protection Agency, Region VI, Air Program Branch, 1201 Elm Street, Dallas, Tex. 75270. Copies of the State's submittal are available for inspection during normal business hours at the address above and at the following address: Environmental Protection Agency, Public Information Reference Unit, Room 2922, 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Anita B. Turpin, Air Program Branch, Environmental Protection Agency, Region VI, Dallas, Tex., 75270, 214-767-2742.

SUPPLEMENTARY INFORMATION: Revised regulation 19.0 was submitted by the Governor, after adequate notice and public hearing, on December 9, 1977. The revision consists of changes in three primary areas, administrative changes, applicability of fugitive dust control to existing sources, and the addition of visible emission limitations. These three areas are discussed in detail below.

ADMINISTRATIVE CHANGES

In sections 19.2, 19.3, 19.5, and 19.8.1, the applicability of the regulation was changed to include "suspended particulate matter" as well as particulate matter. Section 19.5.1 has been renumbered as 19.5.2. In addition, this section was changed to reflect that the "Technical Secretary" may make findings on variances rather than the "Department". EPA's approval of the new section 19.5.2 does not imply approval of variances which may be granted by the Technical Secretary. Any variance under section 19.5.2 must be approved by EPA before it becomes a part of the State implementation plan.

FUGITIVE DUST CONTROL

The current section 19.3 applies only to new sources, as defined by regulation 4.0. In the revised section 19.3, fugitive dust control is applicable to all sources. Paragraph (c) of section 19.3 currently "Recommends" control of dusty materials by stating that containment methods "should be" employed during sandblasting or other similar operations. In the revised paragraph (c), the term "should be" is changed to "shall be". This makes containment methods required rather than recommended.

VISIBLE EMISSION LIMITATIONS

A new section 19.5.1 has been added to the regulation. In this new section, a visible emission limit of 20 percent opacity is specified for any source except new or existing fluid catalytic cracking unit incinerator-waste heat boilers. A limit of 30 percent opacity is specified for such boilers. Emissions are exempted from the requirements of section 19.5.1 if the presence of uncombined water is the only reason for failure to meet the visible emission limits.

CURRENT ACTION

This action proposes approval of the administrative changes to regulation 19.0, the changes in applicability of fugitive dust controls, and the addition of visible emission limits. This action on regulation 19.0 supersedes action on a previous revision of the regulation submitted by the Governor on March 20, 1974.

This notice of proposed rulemaking is issued under the authority of section 110(a) of the Clean Air Act, as amended, 42 U.S.C. 7410-(a).

Dated: September 7, 1978.

EARL N. KARI,
Deputy Regional Administrator.

It is proposed to amend part 52 of chapter 1, title 40 of the Code of Federal Regulations as follows:

Subpart T—Louisiana

1. In § 52.970, paragraph (c) is amended by adding a new paragraph (11) as follows:

§ 52.970 **Indentification of Plan.**

* * * * * *

(c) * * *

(11) Revisions to Regulation 19.0, Emission Standards for Particulate Matter, as adopted on November 30, 1977, were submitted by the Governor on December 9, 1977.

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Delayed Compliance Order for Iowa State Board of Regents, University of Iowa, Oakdale Powerplant

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to issue an administrative order to the Iowa State Board of Regents. The order requires the board to bring air emissions from its boilers Nos. 1, 2, 3, and 4 at the University of Iowa Oakdale powerplant into compliance with certain regulations contained in the federally-approved Iowa State Implementation Plan (SIP). Because the board is unable to comply with these regulations at this time, the proposed order would establish an expeditious schedule requiring final compliance by January 15, 1979. Source compliance with the order would preclude suits under the Federal enforeement and citizen suit provision of the Clean Air Act for violation of the SIP regulations covered by the order. The purpose of this notice is to invite public comment and to offer an opportunity to request a public hearing on EPA's proposed issuance of the order.

DATES: Written comments must be received on or before October 20, 1978, and requests for a public hearing must be received on or before October 5, 1978. All requests for a public hearing should be accompanied by a statement of why the hearing would be beneficial and a text or summary of any proposed testimony to be offered at the hearing. If there is signficant public interest in a hearing, it will be held after 21 days prior notice of the date, time, and place of the hearing has been given in this publication.

ADDRESSES: Comments and requests for a public hearing should be submitted to Director, Enforcement Division, EPA, Region VII, 1735 Baltimore, Kansas City, Mo. 64108. Material supporting the order and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Peter J. Culver or Henry F. Rompage, EPA, Region VII, 1735 Baltimore, Kansas City, Mo. 64108, telephone 816-374-2576.

SUPPLEMENATRY INFORMATION: Iowa State Board of Regents operates

a powerplant at University of Iowa, Oakdale campus. The proposed order addresses emissions from boilers Nos.

[Docket No. VII-78-DCO-10]

In the matter of Iowa State Board of Regents, Oakdale power plant, Oakdale, Iowa.

No later than 5 days after any date for achievement of an incremental step or final compliance, specified in this order, the Iowa State Board of Regents shall notify EPA in

[6712-01]

FEDERAL COMMUNICATIONS COMMISSION

cilities to locate the aircraft in distress. These emergency frequencies are normally monitored by control towers, flight service stations, direc-

important. Additionally, a number of persons expressed concern over the necessity of making personnel available to monitor and search, the real value

a powerplant at University of Iowa, Oakdale campus. The proposed order addresses emissions from boilers Nos. 1, 2, 3, and 4 at this facility, which are subject to subrule 400—4.3(2)b, Combustion for indirect heating and 4.3(2)d, Visible emissions. The regulation limits the emissions of particulates, and is part of the federally-approved Iowa State Implementation Plan. The order requires final compliance with the regulation by Janurary 15, 1979, and the source has consented to its terms. The source has agreed to meet the order's increments during the period of this informal rulemaking.

The proposed order satisfies the applicable requirements of section 113(d) of the Clean Air Act (the Act). If the order is issued, source compliance with its terms would preclude further EPA enforcement action under section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provisions of the Act (section 304) would be similarly precluded.

Comments received by the date specified above will be considered in determining whether EPA should issue the order. Testimony given at any public hearing concerning the order will also be considered. After the public comment period and any public hearing, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

The provisions of 40 CFR Part 65 will be promulgated by EPA soon, and will contain the procedure for EPA's issuance, approval, and disapproval of an order under section 113(d) of the Act. In addition, part 65 will contain sections summarizing orders issued, approved, and disapproved by EPA. A prior notice proposing regulations for part 65, published at 40 FR 14876 (Apr. 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

(42 U.S.C. 7413, 7601.)

Dated: September 11, 1978.

KATHLEEN Q. CAMIN,
Regional Administrator,
Region VII.

In consideration of the foregoing, it is proposed to amend 40 CFR Chapter 1, as follows:

PART 65—DELAYED COMPLIANCE ORDERS

1. By adding § 65.200 to read as follows:

§ 65.200 Federal delayed compliance orders issued under Section 113(d)(1), (3), and (4) of the Act.

[Docket No. VII-78-DCO-10]

In the matter of Iowa State Board of Regents, Oakdale power plant, Oakdale, Iowa.

This order is issued this date pursuant to section 113(d) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq. "the Act." This order contains a schedule for compliance, and reporting requirements. Public notice and opportunity for a public hearing, and 30-days notice to the State of Iowa has been provided pursuant to section 113(d)(1) of the Act.

FINDINGS

On March 15, 1976, the Iowa State Board of Regents acknowledged by signed waiver that the University of Iowa, Oakdale powerplant boilers Nos. 1, 2, 3, and 4 are in violation of Iowa air pollution control regulations, specifically subrule 400—3(2)b, Combustion for indirect heating, and 4.3(2)d, Visible emissions, part of the Iowa State Implementation Plan (SIP). The board waived the notification of violation under 42 U.S.C. 1857c-8(a)(1) (now 42 U.S.C. 7413(a)(1)) including the 30-day period, and the opportunity to confer under 42 U.S.C. 1857c-8(a)(4) (now 42 U.S.C. 7413(a)(4)). Pursuant to section 113(a)(1) of the Act, Environmental Protection Agency (EPA) issued to the Iowa State Board of Regents an administrative order finding that the University of Iowa, Oakdale powerplant boilers Nos. 1, 2, 3, and 4, are in violation of subrule 400—4.3(2)b and 4.3(2)d above, a part of the applicable Iowa Implementation Plan as defined in section 110(d) of the Act. The order required installation of control equipment to achieve compliance with the above regulations by July 1, 1978. Due to manufacturing delay of some of the necessary equipment, the July 1, 1978, achievement date was not met. For this reason this order is issued pursuant to section 113(d) of the Act (42 U.S.C. 7413(d)).

ORDER

After a thorough investigation of all relevant facts, including public comment, it is determined that the schedule for compliance set forth in this order is expeditious as practicable, and that the terms of this order comply with section 113(d) of the Act. Therefore, it is hereby ordered:

I. That Iowa State Board of Regents will comply with the Iowa Implementation Plan regulations in accordance with the following schedule on or before the dates specified therein, for:

A. University of Iowa, Oakdale powerplant boilers Nos. 1, 2, 3, and 4.

1. November 1, 1978—Complete onsite construction of emission control equipment.

2. January 15, 1979—Achieve and demonstrate final compliance with subrule 400—4.3(2)b and 4.3(2)d above.

II. That no interim requirements, as described in section 113(d)(7) of the Act, are reasonable and practicable.

III. That the Iowa State Board of Regents is not relieved by this order from compliance with any requirements imposed by the applicable State implementation plan, EPA, and/or the courts pursuant to section 303 during any period of imminent and substantial endangerment to the health of persons.

IV. That the Iowa State Board of Regents shall comply with the following reporting requirements on or before the dates specified below:

No later than 5 days after any date for achievement of an incremental step or final compliance, specified in this order, the Iowa State Board of Regents shall notify EPA in writing of its compliance, or noncompliance and reasons therefor, with the requirement. If delay is anticipated in meeting any requirement of this order, the Iowa State Board of Regents shall immediately notify EPA in writing of the anticipated delay and reasons therefor. Notification to EPA of any anticipated delay does not excuse the delay.

All submittals and notifications to EPA pursuant to this order shall be made to Director, Enforcement Division, Environmental Protection Agency, Region VII, 1735 Baltimore, Kansas City, Mo. 64108.

V. Nothing herein shall affect the responsibility of the Iowa State Board of Regents to comply with State or local regulations.

VI. Iowa State Board of Regents is hereby notified that your failure to achieve final compliance by July 1, 1979 (or other applicable date specified in accordance with section 120(a)(2)(B) of the Act) will result in a requirement to pay a noncompliance penalty under section 120. In the event of such failure, the Iowa State Board of Regents will be formally notified, pursuant to section 120(b)(3) and any regulations promulgated thereunder, of its noncompliance.

VII. This order shall be terminated in accordance with section 113(d)(8) of the Act if the Administrator (or his delegatee, as appropriate) determines on the record, after notice and hearing, that an inability to comply with subrule 400—4.3(2)b and 4.3(2)d no longer exists.

VIII. Violation of any requirement of this order shall result in one or more of the following actions:

A. Enforcement of such requirement pursuant to section 113 (a), (b), or (c) of the Act, including possible judicial action for an injunction and/or penalties and in appropriate cases, criminal prosecution.

B. Revocation of this order, after notice and opportunity for a public hearing, and subsequent enforcement of subrule 400—4.3(2)b and 4.3(2)d in accordance with the preceding paragraph.

C. If such violation occurs on or after July 1, 1979, notice of noncompliance and subsequent action pursuant to Section 120 of the Act.

IX. This order is effective immediately.

Date:————

Administrator, Environmental Protection Agency.

WAIVER OF RIGHTS TO CHALLENGE ORDER

Iowa State Board of Regents, by the duly authorized undersigned, hereby consents to the provisions of this order and waives any and all rights under any provision of law to challenge this order.

Date:————

Iowa State Board of Regents.

[6712-01]

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 87]

[Docket No. 21495; FCC 78-630]

Monitoring of Emergency Locator Transmitter Signals To Improve Safety Communications on the Aeronautical Emergency Frequencies

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: The FCC terminated an inquiry into whether it would be desirable, as a means of assisting in the detection of inadvertent emergency locator transmitter signals, to require that aeronautical advisory stations monitor the aeronautical emergency frequencies. The Commission concluded that implementation of such a requirement would not materially aid in the location or reduction of such signals and would impose a serious financial and possible legal burden on the station licensees.

EFFECTIVE DATE: Not applicable.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION:

John E. Jacobs, Safety and Special Radio Services Bureau, 202-632-7197.

SUPPLEMENTARY INFORMATION:

Adopted: September 11, 1978.

Released: September 15, 1978.

In the matter of monitoring of emergency locator transmitter signals to improve safety communications on the aeronautical emergency frequencies. Report and order, proceeding terminated [43 FR 7990].

1. A notice of inquiry in the above-captioned matter was released on December 5, 1977. It was published in the FEDERAL REGISTER on December 13, 1977 (42 FR 62508). On petition of the Civil Air Patrol the time for comments and reply comments was extended by order released on February 17, 1978. That time has now expired.

2. Since 1971, in accordance with the provisions of Pub. L. 91-596 (49 U.S.C. 142), most general aviation aircraft have been required to carry emergency locator transmitters (ELT). These transmitters, operating as beacons on the aeronautical emergency frequencies of 121.5 and 243 MHz are designed to be activated automatically on crash of the aircraft or manually in the event of other emergencies where assistance is required. They transmit a distinctive tone modulated signal which is used by search and rescue facilities to locate the aircraft in distress. These emergency frequencies are normally monitored by control towers, flight service stations, direction finding stations, radar facilities, military aircraft and others interested and involved in search and rescue of downed aircraft.

3. For some time, the aviation community has been plagued with false or inadvertent activations of these transmitters. It has been found that the ELT can be activated by such actions as "hard" landings, slamming of aircraft doors and equipment failure. This has resulted in thousands of hours being expended in attempting to locate the transmitter and in the case of accidental activation shutting the ELT down. The Air Force Rescue Coordinating Center (AFRCC) reported that 6,603 ELT activations were reported to the center during calendar year 1975. Of these, only 54 were the result of a crash or forced landing.

4. The notice of inquiry in this matter was intended to solicit comments on the proposal that aeronautical advisory (Unicom) stations located at airports not served by a control tower be required to monitor the aeronautical emergency frequencies. The intent was to add more stations to those already monitoring in order to assist in locating those transmitters that were inadvertently activated. Since the majority of the inadvertent activations occur on or near airports, it was thought that monitoring by the Unicom stations would be of some assistance in locating the source of the transmissions and determining their validity more rapidly.

5. A list of those parties who filed comments in this proceeding is contained in the appendix. No reply comments were received. Of those commenting, 85 percent were against the proposal.

6. Nine persons commented in favor of the proposal. For the most part, they indicated an agreement with the concept in principle, but offered no specifics on method of implementation. Those who suggested specifications for monitoring receivers all felt that the technical standards should be stringent enough to insure reliability. The suggested operating characteristics can be found on equipment available today. The cost of obtaining the equipment was not specifically discussed by those submitting favorable comments, but a wide variance in this cost was presented by those opposed.

7. Most of those commenting against the proposal gave two predominant reasons for their objections. These were the cost to the Unicom licensee with no appreciable benefit to the public and the possibility of legal liabilities being incurred by the licensee. They felt these two reasons were most important. Additionally, a number of persons expressed concern over the necessity of making personnel available to monitor and search, the real value of the monitoring and the necessity to train operators.

8. Alternative solutions were not presented by the majority of the respondents. However, those who did make a suggestion were unanimous in pointing out that equipment unreliability was the major source of trouble, therefore, upgrading the minimum performance standards of the ELT's was of the utmost importance.

9. In our notice we indicated that we did not anticipate that the monitoring requirement would impose a significant economic burden on the station licensee. The commenters almost unanimously disputed this. They pointed out that the station equipment would either have to be capable of simultaneously monitoring at least two frequencies or separate receiving equipment would be required. In either case, the estimates ranged from a low of $100 to a high of $2,500 in additional costs. They pointed out that the receiver would have to be reasonably sophisticated and, with a limited market, the cost set by manufacturers would be understandably high. The Unicom operators claim that theirs is a marginal operation at best and the mandated expense of additional radio equipment is more than they should be asked to assume. This is particularly onerous to them when the Unicom station is looked on as a convenience to the flying public rather than a profitmaking venture. Although we did not specifically discuss the required monitoring periods in the notice, but rather asked for comments on this, the Unicom licensees appeared to presume that continuous monitoring during their hours of operation would be required. They feel that having personnel available for this purpose would also be an unwanted and nonproductive expense. They indicated that in the normal course of their doing business there are many times when no one is near to monitor or answer the radio.

10. Many of the parties who commented expressed concern over the liabilities the licensee might assume once he is assigned the responsibility for monitoring the emergency frequencies. In the event a malfunctioning ELT is found in a locked aircraft, they are not willing to accept responsibility for forcing entry in violation of local laws and possibly damaging the aircraft to disable the transmitter. Additionally, the fixed base operators questioned the extent to which a search should be pursued. Since their area of interest and responsibility generally lies within the confines of the airport, they question whether they

should search beyond its boundaries and to what extent they would be liable if they chose not to. Although it

shutting down the airplane and this has the effect of monitoring for the field.

should search beyond its boundaries and to what extent they would be liable if they chose not to. Although it was not our intent that the party hearing and locating the source of the signal take any direct action, the possibilities of legal liabilities cannot be ignored.

11. Inadvertent activations of ELT's is a serious problem and one which cannot be easily solved. As stated in our notice, our purpose in proposing monitoring was to enable local people to more readily detect the presence of emergency signals on the frequencies. However, we are persuaded by the comments made in response that mandating such a procedure is treating the symptom rather than the cause. We are in sympathy with the efforts expended by the AFRCC in locating and attempting to locate these transmitters, but do not feel that mandatory monitoring is the proper solution. Although it may be of some assistance in reducing the time required to locate a small percentage of the malfunctioning ELT's, the unreasonable burden placed on the Unicom licensees to accomplish this is not warranted. The statistics provided by AFRCC indicated that 4,503 out of 6,603 reported activations were located and silenced before search procedures could be instituted by the rescue center. This in itself shows that the aviation community is aware of the problem and is already providing assistance. Efforts by the Federal Aviation Administration, the Aircraft Owners and Pilots Association and similar interested parties to make the flying public more aware of the problem and what can be done about it are continuing. Many of the persons commenting stated that voluntary monitoring programs by both pilots and airport personnel are being carried out in various parts of the country. A number of individuals pilots remarked that they routinely check the emergency frequencies on shutting down the airplane and this has the effect of monitoring for the field.

12. The Radio Technical Commission for Aeronautics, of which the Commission is a member, is close to finalizing improved performance standards for what is known as the next generation of ELT's. When these standards are finalized, appropriate regulatory and manufacturing steps will be considered to improve the quality of the equipment in use. It appears obvious that equipment malfunction is the major source of the problem and improving the quality of the ELT's should substantially reduce the number of false signals. In addition, the proposed satellite monitoring program which is currently being considered will be of considerable assistance in locating and determining the validity of emergency signals.

13. The Commission staff is continuing to work with governmental, industry and user groups to assist in arriving at a solution to this problem. However, in the meantime, we feel that no substantive benefits can be derived by imposing the burden of mandatory monitoring of the emergency frequencies on a small segment of the aviation community.

14. Regarding questions on matters covered in this document contact J. E. Jacobs, telephone 202-632-7197.

15. In view of the foregoing, it is ordered, that this proceeding is terminated.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO
Secretary.

NORTHERN CALIFORNIA SUBGROUP OF THE PACIFIC CREST NATIONAL SCENIC TRAIL ADVISORY COUNCIL

Open Meeting

The Pacific Crest National Scenic Trail Advisory Council will meet on October 14, 1978, at the Tree House Motel, Mount Shasta, Calif. The meeting will begin on October 14, at 11 a.m.

The purpose of the meeting will be to review status of trail construction and rights-of-way acquisition through agency reports, planning for the 1979 meeting of the Pacific Crest National Scenic Trail Advisory Council, and discussion of needs for trailhead and feeder trail facilities.

The meeting will be open to the public. Persons who wish additional information concerning the meeting should contact Alan Lamb, Recreation Staff, California Region, 630 Sansome Street, San Francisco, Calif., phone 415-556-6986.

Dated: September 12, 1978.

Science and Education Administration

JOINT COUNCIL ON FOOD AND AGRICULTURAL SCIENCES

Open Meeting

According to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776), the Science and Education Administration announces the following meeting:

Name: Joint Council on Food and Agricultural Sciences.
Date: October 11, 12, and 13, 1978.
Time: 1 p.m.
Place: Room 330, GHI Building, 500 12th Street SW., Washington, D.C.
Type of meeting: Open to the public. Persons may participate in the meeting as time and space permit.
Comments: The public may file written comments before or after the meeting with the contact person below.
Purpose: To receive reports from several ad hoc and standing subcommittees and initiate further measures to foster coordination of the agricultural research, extension, and teaching activities of the Federal, State, and private sector.
Contact person for agenda and more information: Dr. James Nielson, Executive Director of the Joint Council, Science and Education Administration, U.S. Department of Agriculture, Washington, D.C. 20250, telephone 202-447-8662.

Done at Washington, D.C., this 15th day of September 1978.

JAMES NIELSON,
Executive Director, Joint Council on Food and Agricultural Sciences.

NATIONAL AGRICULTURAL RESEARCH AND EXTENSION USERS ADVISORY BOARD

Open Meeting

According to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776), the Science and Education Administration announces the following meeting:

Name: National Agricultural Research and Extension Users Advisory Board.
Date: October 10 and 11, 1978.
Time: 8:30 a.m.
Place: Room 330, GHI Building, 500 12th Street SW., Washington, D.C.
Type of Meeting: Open to the public. Persons may participate in the meeting as time and space permit.
Comments: The public may file written comments before or after the meeting with the contact person below.
Purpose: To organize this new Board and initiate measures to develop independent advisory opinions on the food and agricultural sciences.
Contact person for agenda and more information: Dr. James Nielson, Executive Director of the Board, Science and Education Administration, U.S. Department of Agriculture, Washington, D.C. 20250, telephone 202-447-8662.

Done at Washington, D.C., this 15th day of September 1978.

JAMES NIELSON,
Executive Director, National Agricultural Research and Extension Users Advisory Board.

Soil Conservation Service

BUCK CREEK WATERSHED, ALA.

Intent To Not Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR part 1500); and the Soil Conservation Service Guidelines (7 CFR part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Buck Creek Watershed, Covington County, Ala.

The environmental assessment of this Federal action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. William B. Lingle, State conservationist, Soil Conservation Service, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The project concerns a plan for watershed protection and flood prevention. Alternatives being considered are conservation land treatment, critical area treatment, and land stabilization.

The notice of intent to not prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment is on file and may be reviewed by interested parties at the Soil Conservation Service, 138 South Gay Street, Auburn, Ala. 36830, 205-821-8070. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal is available to fill single copy requests.

No administrative action on implementation of the proposal will be taken until October 20, 1978.

Notice of intent to prepare an environmental impact statement for Buck Creek Watershed, Ala., published in the FEDERAL REGISTER, volume 43, No. 12, Wednesday, January 18, 1978, is hereby canceled.

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the Unted States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, Bureau of Trade Regulation, U.S. Department of Commerce, Washington, D.C. 20230, on or before October 10, 1978.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 a.m. and 5 p.m., Monday through Friday, in room 6886C of the Department of Commerce Building, 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00379. Applicant: The University of Alabama, Department of Biology, P.O. Box 1927, University, Ala. 35486. Article: Electron microscope, model EM 10A complete with accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used for studies of cell division, protozoan development, cytological localization of enzymes in hepatomas, virion morphology and nucleic acid structure, bacterial cell wall structure, striation spacing in fatigued metal, and crystallite sizing and topography. The proposed research will include the following:

1. A study of the comparative cytology and evolutionary affinities of the coccoid, zoospore-producing green algae,
2. Ultrastructure of the Cytoplasmic region containing the cytopharyngeal pouch in *Tetrahymena vorax*,
3. Ultrastructure of the attachment organelle in Oxymonad Flagellates from the Termite Reticulitermes flavipes,
4. Development of the Cytopharyngeal pouch in *Tetrahymena vorax*,
5. Cytochemical localization of Isozymes of aldehyde dehydrogenase in chemically reduced rat hepatomas,
6. Characterization of transducing phages for *Pseudomonas acidovorans*,
7. Cell wall ultrastructure of *Staphylococcus staphylolyticus*,
8. Fatigue crack growth studies, and
9. Crystallite size and surface topography studies of supported metal catalysts by electron microscopy.

In addition, the article will be used in the course introduction to electron microscopy to familiarize the student with as many aspects of electron microscopy as possible, expecially those which deal with the actual operation of the microscope. Application received by Commissioner of Customs: August 22, 1978.

Docket No. 78-00380. Applicant: Texas Research Institute of Mental Sciences, Department of Gerontology, Texas Medical Center, 1300 Moursund Avenue, Houston, Tex. 77030. Article: Electron microscope, model EM 10A and accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used to study a variety of human and animal tissues including brain, liver, kidney, heart, and skeletal muscle. Subcellular fractions prepared from brain homogenates will also be examined. Subcellular processes associated with aging in the brain and other organs of both human and animal origins will be investigated. Also, studies will be conducted to further basic knowledge of molecular pharmacology and long-term drug effects on the subcellular oganization of susceptible target tissues such as the brain and other vital organs of the body. Application received by Commissioner of Customs: August 23, 1978.

Docket No. 78-00381. Applicant: Mount Holyoke College, Department of Chemistry, Carr Laboratory, South Hadley, Mass. 01075. Article: Nuclear magnetic resonance spectrometer, model FX 900 and accessories. Manufacturer: JEOL Analytical Instruments, Inc., Japan. Intended use of Article: The article is intended to be used to carry out a number of collaborative investigations convering a wide range of organic chemistry, inorganic chemistry, analytical chemistry, biochemistry, and pharmacology. The experiments to be conducted will include:

A. Measurement of ^{1}H, ^{13}C, ^{2}H, ^{19}F, ^{10}B, ^{15}N, ^{17}O, ^{31}P, ^{113}Cd, ^{23}Na, ^{35}Cl, and ^{133}Cs chemical shifts with and without shift reagents present.

B. Measurement of coupling constants between ^{1}H and ^{1}H, ^{13}C, ^{19}F, ^{15}N, and ^{31}P.

C. Measurement of spin lattice relaxation times, T_1 and the spin lattice relaxation time in the rotating coordinate system, $T_{1\rho}$, of ^{13}C, ^{1}H and ^{19}F to determine the relationship between T_1's and conformations.

D. Measurement of nuclear Overhauser enhancement of ^{13}C and ^{15}N signals while irradiating ^{1}H resonances.

E. Measurement of ^{1}H-^{13}C coupling constants in complex molecules such as steroids using spin-echo techniques.

The primary purpose of these studies is to determine the conformations and configurations of molecules in solution and to study their reactions. The article will also be used for educational purposes in the courses Chem. 332. Nuclear Magnetic Resonance Spectroscopy, Chem 295 Independent Study, Chem 395. Independent Study, Chem 324 Advanced Techniques in Organic Chemistry Laboratory, and Chem 341 Graduate Research. Application received by Commissioner of Customs: August 23, 1978.

Docket No. 78-00382. Applicant: University of Kansas Medical Center, College of Health Sciences and Hospital, 39th and Rainbow Boulevard, Kansas City, Kans. 66103. Article: LKB 14800-3/Cryokit and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for investigations that include ultrastructural studies on normal and pathologic animal tissues, viral infected cells, cyto and histochemical studies on enzyme and subcellular organelle localization in cells and tissues, membrane interactions at host cell and viral interfaces, and subcellular changes in cells induced by changes in their biochemical and physical environment due to the presence of tumor viruses. The experiments will be conducted in order to further basic knowledge on cell and tissue ultrastructure in the frozen state to reveal enzyme localization and distribution in cells and tissues under normal and pathological conditions. The article will also be used in a course entitled "Ultrastructural Histology" which involves a study of general principles on techniques and the use of the electron microscope to study the fine structure of cells and various subcellular organelles and the employment of cytochemical staining methods to localize various enzymes. Application received by Commissioner of Customs: August 23, 1978.

Docket No. 78-00383. University of Kansas Medical Center College of Health Science and Hospital, 39th and Rainbow Boulevard, Kansas City, Kans. 66103. Article: LKB 2128-010/Ultrotome IV ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to section animal and viral tissues which have been embedded in hardened epoxy resins. These specimens will be used for investigations that include ultrastructural studies on normal and pathologic animal tissues, developmental studies on viral systems, cyto and histochemical studies on enzyme and subcellular organelle localization in cells and tissues, membrane interactions at host cell and viral interfaces, and subcellular changes in cells induced by changes in their biochemical and physical environments due to the presence of tumor viruses. In addition, the article will be used in a course entitled "Ultrastructural Histology" which involves a study of general principles on techniques and the uses of the electron microscope to study the fine structure of cells and various subcellular organelles and the employment of cytochemical staining methods to localize various enzymes. Application received by Commissioner of Customs: August 23, 1978.

Docket No. 78-00384. Applicant: New Jersey Institute of Technology, Chemistry Division, 323 High Street, Newark, N.J. 07102. Article: LKB 8721-4 Closed bomb reaction calorimetric assembly and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The foreign article is intended to be used in calorimetric studies of strained bridgehead lactams, such as, 6, 6-dimethy-1-azabicyclo (2.2.2.) octan-2-one which exhibits reduced (or zero) pi resonance stabilization since its amide linkage is severely twisted. The enthalpies of combustion and vaporization will be obtained. This research will be also be extended to include the compounds required in the synthesis of the 6, 6-dimethyl-1-azabicyclo (2.2.2.) octan-2-one parent molecule, 1-Azabicyclo (3.3.1) nonan-2-one which exhibits another unique twisted pi linkage, and 1-azabicyclo (3.2.2.) nonan-2-one which when the ΔH_f values are compared with 6, 6-dimethyl-1-azabicyclo (2.2.2.) would provide some quantitation of Wiseman's rule which explains stability and transient nature of its isomers. The foreign article will also be used in education; two courses Chemistry 491/492 Undergraduate Chemistry Research and in Masters and Doctoral Degree Research. Application received by Commissioner of Customs: August 23, 1978.

Docket No. 78-00385. Applicant: University of Connecticut Health Center, 263 Farmington Avenue, Farmington, Conn. 06032. Article: JEM-100CX Electron microscope with slide entry eucentric goniometer and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for the following research purposes:

(1) Analyses of the control of microtubule assembly in human leukocytes,

(2) Interactions between microtubules, microfilaments, and membranes during Concanavilin A induced "capping" and phagocytosis,

(3) Correlative studies of leukocyte shape, membrane flow, and ligand redistribution during Con A induced capping and phagocytosis,

(4) The organization of the erythrocyte cytoskeleton using transmission microscopy of thin section, negative staining, freeze-fracture and surface replicas of derived structures from erythrocytes,

(5) Analysis of lectin receptors on erythrocytes using high resolution localization by transmission and scanning modes of immunochemically labeled ligands,

(6) In vitro interactions between cytoskeletal elements and membrane,

(7) Actin polymerization onto membranes, and

(8) Analysis of the contractile mechanism of muscle utilizing negatively stained, thin sectioned, and freeze-fracture replicas of intact and isolated, purified and reconstituted components of the contractile apparatus of smooth and skeletal muscle.

The article will also be used in the course "Medical Science 388" to provide a background to the operation of instrumentation and methods of preparation for electron microscopy, and (2) practical experience in the operation of the electron microscope and auxillary equipment, and in diverse methods of preparation of biological materials. Application received by Commissioner of Customs: August 24, 1978.

Applications for Duty Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, Bureau of Trade Regulation, U.S. Department of Commerce, Washington, D.C. 20230, on or before October 10, 1978.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 a.m. and 5:00 p.m., Monday through Friday, in Room 6886C of the Department of Commerce Building, 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00386. Applicant: University of Kansas Medical Center, College of Health Science and Hospital, 39th and Rainbow Blvd., Kansas City, Kans. 66103. Article: Electron Microscope, Model JEM-100S and accessories. Manufacturer: Jeol Ltd., Japan. Intended use of Article: The article is intended to be used for the study of ultrastructure of biological materials from all areas with emphasis on the study of tumor viruses and cells. Experiments involving characterization of tumor cells in vitro will be conducted to perfect these techniques so that new information may be obtained regarding the transformation of normal to malignant cells at the ultrastructural level. The article will also be used for technical, faculty and graduate student instruction in ultra technique in courses in Ultrastructural Histology. Application received by Commissioner of Customs: August 24, 1978.

Docket No. 78-00387. Applicant: East Los Angeles College, Department of Life Sciences, Allied Health Sciences, K-8 103, 1301 E. Brooklyn Ave., Monterey Park, Calif. 91754. Article: LKB 8800A Ultrotome III Ultramicrotome and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to train students in the use and application of electron microscopy and to use the electron microscope in solving individual research problems in various courses in an electron microscopy program. Instruction is given in the preparation and the examination of speciments as well as the basic principles of electron microscopy. Application received by Commissioner of Customs: August 24, 1978.

Docket No. 78-00388. Applicant: Ramapo College of New Jersey, 505 Ramapo Valley Road, Mahwah, N.J. 07430. Article: LKB 8800A Ultrotome III Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to section biological materials that have been embedded in an appropriate resin. These specimens will then be used in investigations that include ultrastructural studies on normal and pathologic plant and animal tissues, developmental studies on fungal systems, cyto and histochemical studies on enzyme and subcellular organelle localization in cells and tissues, membrane interactions at hostparasite interfaces, and subcellular changes in cells induced by changes in their biochemical and physical environments. The article will also be used in the

courses, Introduction of Electron Microscopy and Advanced Electron Microscopy I, II, and III which will in-

Sweden. Intended use of article: The article is intended to be used for investigations that will include ultrastruc-

grated into and existing Extra-High Voltage test facility at the MIT high Voltage Research Laboratory to allow

fiber textile products which are subject to the terms of the Bilateral

lished below directs the Commissioner of Customs to prohibit entry for con-

The action taken with respect to the Government of the Republic of the Philippines and with respect to imports of cotton, wool

courses, Introduction of Electron Microscopy and Advanced Electron Microscopy I, II, and III which will involve a study of general principles on techniques and the use of the electron microscope to study the fine structure of tissues and cells and various subcellular organelles and the employment of cytochemical staining methods to localize various constituents. Application received by Commissioner of Customs: August 24, 1978.

Docket No. 78-00389. Applicant: St. John Hospital, 22101 Moross Road, Detroit, Mich. 48236. Article: LKB 8800A Ultrotome III Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to section materials which have been embedded in hardened epoxy resins. Investigations will include ultrastructural studies on normal and pathological human and animal tisues, studies on cyto and histochemical properties as well as enzyme and immunopathological features of cells and tissues, and ultrastructural changes in cells induced by various naturally occurring experimental pathological environmental factors. The objective pursued in the course of these investigations is to understand early pathological alterations in tissues (as induced in animal models) and to correlate these changes with clinical alterations seen in human disease tissues. In addition, the article will be used to train students in the general principles and techniques of the use of electron microscopy, to study the fine structure of cells and various subcellular organelles, and the employment of cytochemical staining methods to localize various enzymes and antigens. Courses in Ultrastructure, and Ultrastructural Histopathology are situations in which the instrument will be used, in addition to diagnostic histopathology. Application received by Commissioner of Customs: August 28, 1978.

Docket No. 78-00390. Applicant: Michael Reese Hospital and Medical Center, 2929 S. Ellis Ave., Chicago, Ill. 60616. Article: LKB 8800A Ultrotome III Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to section bone cartilage specimens which will be used for ultrastructural studies including histochemical and morphometric analysis of hormonally stimulated specimens using organ culture techniques. Application received by Commissioner of Customs: August 24, 1978.

Docket No. 78-00391. Applicant: University of Albama in Birmingham, University Station, Birmingham, Ala. 35294. Article: LKB 8800A Ultrotome III Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for investigations that will include ultrastructural studies on normal and pathologic human and animal tissues, cyto and histochemical studies on enzyme antigens and subcellular organelle localization in cells and tissues, and subcellular changes in cells induced by change in their biochemical and physical environments. The objective pursued in the course of these investigations is to understand early pathological alterations in tissues (as induced in animal models) and to correlate these changes with clinical alterations seen in human diseased tissues. In addition, the article will be used in the courses Ultrastructure and Cytochemistry to train students in the use and application of electron microscopy and to the electron microscope in solving individual research problems. Application received by Commissioner of Customs: August 24, 1978.

Docket No. 78-00393. Applicant: Ohio State University, Botany Department, 1735 Neil Avenue, Columbus, Ohio 43210. Article: Electron Microscope, Model H-300 and accessories. Manufacturer: Hitachi (Perkin-Elmer) Japan. Intended use of article: The article is intended to be used to support the following research project: (1) An ultrastructural analysis of Paniceae (Gramineae), (2) membrane ultrastructure in response to TIBA and Ca^{2+}, (3) ultrastructural studies of the green algae, (4) Gametophyte development in ferns, (5) ultrastructural studies of aquatic fungi, and (6) electron microscopy of carboniferous pollen. The article will also be used in the course Electron Microscopy for Botanists, 693 to train students in electron microscopy techniques. Application received by Commissioner of Customs: August 28, 1978.

Docket No. 78-00394. Applicant: University of California—Los Alamos Scientific Laboratory, P.O. Box 990, Los Alamos, NM 87545. Article: 3(Three) each CO_2 Lasers, TEA 103-2 and accessories. Manufacturer: Lumonics Research Ltd., Canada. Intended use of article: The article is intended to be used to demonstrate the scientific and economic feasibility of laser-induced separation of uranium isotopes. The articles will be the basic tools for generating the necessary wavelengths for a selective photoseparation process. Application received by Commissioner of Customs: August 28, 1978.

Docket No. 78-00400. Applicant: Massachusettes Institute of Technology, 77 Massachusetts Ave., Cambridge, Mass. 02139. Article: 500 KV Metalclad Test Transformer Type TES 510/90BM and accessories. Manufacturer: Messwandler-Bau GMBH, West Germany. Intended use of article: The article is intended to be integrated into and existing Extra-High Voltage test facility at the MIT high Voltage Research Laboratory to allow high voltage research studies under AC as well as DC. These studies are primarily concerned with electrical insulation and high voltage techniques in which electrical breakdown and loss mechanisms are investigated. Initial work with the article will be directed at improving the insulating performance of SF, gas-insulated, electric power transmission cables. In addition, the article will be used for educational studies in the field of electrical engineering and physics particularly insulation and electrical discharges. Application received by Commissioner of Customs: August 28, 1978.

Docket No. 78-00401. Applicant: National Bureau of Standards, Washington, D.C. 20234. Article: Automatic Inductive ratio-arm bridge, Model A7. Manufacturer: Automatic Systems Laboratories, United Kingdom. Intended use of article: The article is intended to be used to make precise temperature measurements at several locations in a heat-flow calorimeter on a continuous basis for periods of several days, or in the case of half-life determinations for periods of several months. The calorimeter will in turn be used to accurately measure the heat produced in radioactive specimens and to relate these values to electrical standards. Application received by Commissioner of Customs: August 30, 1978.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN TEXTILE PRODUCTS EXPORTED TO THE UNITED STATES FROM THE REPUBLIC OF THE PHILIPPINES

New Visa and Exempt Certification

SEPTEMBER 14, 1978.

AGENCY: Committee for the Implementation of Textile Agreement.

ACTION: Announcing a new export visa and certification for exempt textile products, exported to the United States from the Republic of the Philippines.

SUMMARY: The Government of the republic of the Philippines has informed the Government of the United States that it is using a new export visa for cotton, wool, and manmade fiber textile products which are subject to the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of October 15, 1975, as amended and extended. A new certification is also being used for textile products which are exempt from the agreement.

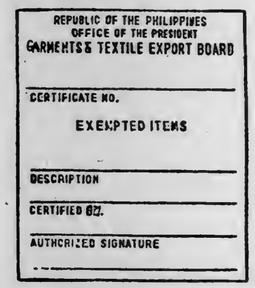
EFFECTIVE DATE: September 20, 1978, for merchandise exported on and after June 22, 1978. Merchandise exported before June 22, 1978, which is accompanied by the previously authorized visa or exempt certification will not be denied entry for consumption, or withdrawal from warehouse for consumption, provided all other visa and certification requirements have been met.

SUPPLEMENTARY INFORMATION: On September 9, 1976, a letter was published in the FEDERAL REGISTER (41 FR 38205) from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs, which established an export visa requirement and a certification for exempt textile products, produced or manufactured in the Republic of the Philippines and exported to the United States. The letter published below directs the Commissioner of Customs to prohibit entry for consumption, or withdrawal from warehouse for consumption, of cotton, wool, and manmade fiber textile products, produced or manufactured in the Philippines and exported to the United States on and after June 22, 1978, that are not accompanied by the new visa or certification. It further directs that merchandise exported before June 22, 1978, that is accompanied by the previously authorized visa or certification shall not be denied entry, provided all other requirements have been met. Facsimiles of the new visa and certification stamps accompany this notice.

FOR FURTHER INFORMATION CONTACT:

Donald R. Foote, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-5423.

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.



SEPTEMBER 14, 1978.

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C.

DEAR MR. COMMISSIONER: This directive amends, but does not cancel, the directive of August 31, 1976, from the Chairman, Committee for the Implementation of Textile Agreements, that directed you to prohibit entry into the United States for consumption, and withdrawal from warehouse for consumption, of cotton, wool and manmade fiber textile products in certain specified categories, produced of manufactured in the Republic of the Philippines, for which the Government of the Republic of the Philippines had not issued a visa or exempt certification.

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977, pursuant to the Bilateral Cotton, wool and ManMade Fiber Textile Agreement of October 15, 1975, as amended and extended, between the Governments of the United States and the Republic of the Philippines; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, the directive of August 31, 1976 is hereby amended, effective on September 20, 1978, to provide for the use of new visa and certification stamps by the Government of the Republic of the Philippines for merchandise exported on and after June 22, 1978. Merchandise exported before June 22, 1978 shall not be denied entry for consumption, or withdrawal from warehouse for consumption, provided all other requirements have been met. The new visa and certification stamps are the same as those used previously by the Government of the Republic of the Philippines except that the following has been added to each: Office of the President, Garments and Textile Export Board.

The action taken with respect to the Government of the Republic of the Philippines and with respect to imports of cotton, wool and manmade fiber textile products from the Republic of the Philippines has been determined by the Committee for the Implementation of Texile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation, of Textile Agreements, and Deputy Assistant, Secretary for Domestic Business Development.

Federal Energy Regulatory Commission

[Docket Nos. CP71-68 et al.; CP71-290 et al.]

COLUMBIA LNG CORP. AND CONSOLIDATED SYSTEM LNG CO.

Declaratory Order Establishing Rates and Accounting Treatment for LNG Plant Testing

SEPTEMBER 12, 1978.

On May 19, 1978, Columbia LNG Corp. (Columbia) filed a petition in docket No. CP71-68 et al., requesting a declaratory order approving plant testing procedures and reasonable rates to be charged during plant testing. Consolidated System LNG Co. (Consolidated) filed in docket No. CP71-290, et al., a similarly styled petition on May 24, 1978. Because these petitions involve common questions of law and fact we shall address both by this order.

Generally, petitioners ask for an interpretation of previous Commission

orders in these dockets [1] and certain gas plant instructions [2] to insure that petitioners' plant testing and startup

date for the Cove Point facility. Columbia, on the other hand, states that it will require 30 days of continuous

date shall be limited to the actual cost of LNG purchases and any other actual, out-of-pocket, operating costs.

the vicinity of Long Lake and Nine Mile developments, pursuant to item (3) of article 34. On March 30, 1978,

sure, and the agencies' interests. Therefore—on condition that the Licensee continue to review the Long

(B) The Licensee shall continue to review the Long Lake recreation plan in cooperation with HCRS and PRC to analyze the need for additional recre-

V 43 / 183 SEP 20 78 V 43 / 183 SEP 20 78

orders in these dockets [1] and certain gas plant instructions [2] to insure that petitioners' plant testing and startup procedures are appropriately treated for rate and accounting purposes.

Columbia and Consolidated are joint owners of a LNG terminal and regasification facility at Cove Point, Md. LNG was first received at Cove Point from Arzew, Algeria, on March 13, 1978. Because operational constraints require the maintenance of cryogenic conditions at the plant, the first shipment was stored at Cove Point until the second shipment was received from Arzew on May 20, 1978. At that time, deliveries of regasified LNG from Cove Point commenced.

The Commission's prior orders in these dockets [3] required petitioners to place their respective LNG sales tariffs into effect upon the commencement of deliveries from Cove Point. Under a literal reading of these prior orders Columbia and Consolidated should have placed the Cove Point plant "inservice" and their respective LNG tariffs into effect on May 20, 1978.

Petitioners point out, however, that 18 CFR, Part 201, Gas Plant Instruction 9D provides for the testing of equipment prior to placing it in service. Petitioners request authorization to complete testing procedures prior to placing the Cove Point plant in service and prior to making their respective tariffs effective.

During such testing period, Columbia proposes to charge its customer, Columbia Gas Transmission Corp., $2 per Mcf [4] for all deliveries of regasified LNG, provided that the total billing during the plant testing period will not exceed the amount that would have been billed under Columbia LNG's tariff had the tariff been in effect during such period. Consolidated proposes to bill its customer, Consolidated Gas Supply Corp., at the cost of LNG purchased from El Paso-Algeria Corp.[5] Both petitioners propose that allowance for funds used during construction (AFUDC) should continue to accrue during the testing. AFUDC plus all revenues received and expenses incurred during the period would be recorded to gas plant accounts.[6]

Consolidated requests that July 1, 1978, be established as the "inservice" date for the Cove Point facility. Columbia, on the other hand, states that it will require 30 days of continuous deliveries at an average of 218 MMcf per day, or one-third of the certificated volume, to adequately test the facilities. It, accordingly, proposes to place the terminal "inservice" on the first day of the calendar month following 30 days of delivery at an average of 218 MMcf per day. Based on Consolidated's projections, however, final testing of the facility should have been completed on July 1, 1978. Consolidated has not subsequently informed the Commission of any modification in its projection.

Having reviewed the pleadings, the Commission finds that the petitioners should be provided a reasonable period to test their facilities prior to placing them "inservice" for rate and accounting purposes. The Commission shall accept Consolidated's proposal to establish July 1, 1978, as the "inservice" date for the Cove Point facility. Columbia's proposal to end the plant testing period after 30 days of continuous deliveries at 218 MMcf per day appears unreasonable because it may result in an indefinite testing period wholly unrelated to the actual readiness of the Cove Point facility. Columbia's proposal in this respect shall be denied. Accordingly, the Commission shall require that both Columbia and Consolidated place their respective LNG tariffs into effect on July 1, 1978.

The Commission notes that both petitions request permission to capitalize testing and operating expenses during the testing period. Neither petition precisely defines what "expenses" would be recorded. The Commission, therefore, shall specify that the expenses recorded for the period shall be limited to actual LNG purchase costs and any other actual, out-of-pocket, operating or testing costs.

In all other respects the petitions shall be granted.

The Commission orders: (A) Columbia and Consolidated shall place their respective LNG tariffs into effect on July 1, 1978.

(B) For accounting and rate purposes the Cove Point LNG facility shall be placed "inservice" on July 1, 1978, at which time accrual of AFUDC and capitalization of construction costs shall terminate.

(C) Prior to July 1, 1978, Columbia and Consolidated shall be permitted to accrue AFUDC and to capitalize construction costs pursuant to gas plant instructions 3(17) and 3(18). Testing and operation expenses incurred prior to July 1, 1978, net of any revenues received, also shall be capitalized pursuant to gas plant instructions, provided however, that expenses associated with the operation of the Cove Point LNG facility prior to the "inservice" date shall be limited to the actual cost of LNG purchases and any other actual, out-of-pocket, operating costs.

(D) Columbia shall be permitted to bill Columbia Gas Transmission Corp. at $2 per Mcf for all revaporized LNG deliveries prior to July 1, 1978, provided, however, that total billings prior to July 1, 1978, shall not exceed the amount that would have been billed had Columbia's tariff been in effect during such period.

(E) For all revaporized LNG deliveries prior to July 1, 1978, Consolidated shall be permitted to bill Consolidated Gas Supply Corp. at a rate per dekatherm equal to Consolidated's purchase cost per dekatherm for LNG.

(F) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-26374 Filed 9-19-78; 8:45 am]

[1] Issued Feb. 6, 1978, in docket No. CP71-68 and Apr. 3, 1978, in docket No. CP71-290.

[2] 18 CFR Part 201, Gas Plant Instructions 3(17), 3(18) and 9D.

[3] Cited in footnote 1, supra.

[4] This amount is equal to the average cost per Mcf of revaporized LNG as estimated in Columbia Gas Transmission Corp.'s filing of Nov. 30, 1977, in docket No. RP78-20.

[5] Consolidated estimates that this price will be approximately $1.20 per MMBtu.

[6] Pursuant to 18 CFR, Part 201, Gas Plant Instructions 3(17) and 3(18).

[Project No. 2545]

WASHINGTON WATER POWER CO.

Order Granting Extension of Time

SEPTEMBER 7, 1978.

On July 17, 1978, the Washington Water Power Co. (Licensee), Licensee for the constructed Spokane River project (FERC project No. 2545), filed an application for Commission approval to further extend the time in which to comply with item (2) of article 34 [1] of the project license.[2] In addition, Licensee filed a copy of the memorandum of agreement, dated July 3, 1976, between the Washington State Parks and Recreation Commission (PRC) and the Licensee concerning construction, operation, and maintenance responsibilities for the recreational facilities at the Riverside State Park, in the vicinity of Long Lake and Nine Mile developments, pursuant to item (3) of article 34. On March 30, 1978, pursuant to item (1) of article 34, Licensee filed a copy of a letter from the Bureau of Outdoor Recreation (now Heritage Conservation and Recreation Service (HCRS)) setting forth the Bureau's recommendations resulting from its review of the Long Lake recreation plan.

On July 12, 1978, the Washington, D.C., a representative for the Licensee had requested an extension of time with which to comply with article 34 of the License. By letter dated August 2, 1978, the Secretary of the Commission granted the request for the extension of time until September 12, 1978. However, the July 17 request contains information—agency concurrence that recreational development at Long Lake is not now needed—that more fully explains why construction of additional recreational facilities is not necessary at this time. It is appropriate to act upon the July 17 request now.

LONG LAKE RECREATION PLAN

The HCRS, PRC, the Washington State Interagency Committee for Outdoor Recreation, and the Washington Department of Natural Resources have reviewed the Long Lake recreation plan. They note that certain parts of the Long Lake area are utilized in an undeveloped state, and they consider that the area has good potential for future development; however, the lake is subject to a heavy algae bloom during the summer. The agencies concur that further recreational development should be deferred, subject to a comprehensive review in the future of recreation needs, public use pressure, and the agencies' interests. Therefore—on condition that the Licensee continue to review the Long Lake recreation plan in cooperation with HCRS and PRC—the Licensee will be granted an extension of time to file the plans and schedule required by article 34, item (2), until further order of the Commission, or until HCRS or PRC recommends additional recreation facilities. The biennial filing by the Licensee of the form 80 will help to keep the Commission informed on the need for future recreation facilities.

Licensee's filing of its agreement with the State to operate certain project recreation facilities, and a copy of the HCRS report on the review of the Long Lake recreation plan meets the requirements of items (1) and (3) of article 34.

ENVIRONMENTAL IMPACT

This order does not approve any construction, or change in operation and maintenance of the project. Accordingly, approval of the application to extend the time in which to comply with item (2) of article 34 does not constitute a major Federal action significantly affecting the quality of the human environment.

It is ordered that:

(A) The Licensee is granted an extension of time to file the plans and schedule required by item (2) of article 34 of the license for project No. 2545 until further Commission order or until the Heritage Conservation and Recreation Service (HCRS) of the Department of the Interior or the Washington State Parks and Recreation Commission (PRC), recommends additional recreational facilities, subject to the condition in ordering paragraph (B).

(B) The Licensee shall continue to review the Long Lake recreation plan in cooperation with HCRS and PRC to analyze the need for additional recreational development at the project.

WILLIAM W. LINDSAY,
Director, Office of Electric Power Regulation.

[FR Doc. 78-26376 Filed 9-19-78; 8:45 am]

[1] ART. 34. Licensee shall consult and cooperate with appropriate Federal, State, and local agencies in analyzing the need for any additional recreational development at the project, and shall, within 1 year from the date of this order: (1) File the results of the review of the Long Lake recreation plan, as described on p. 17 of the exhibit R; (2) file for Commission approval, as an amendment to the exhibit R: (a) Plans for any additional recreation facilities to be developed at the project, and (b) a construction schedule for any public recreation areas to be developed at the project; and (3) file a copy of any agreements between the Licensee and Federal, State, or local agencies for the construction, operation, or maintenance of existing or proposed recreational facilities at the project.

[2] Authority to act on this matter is delegated to the Director, Office of Electric Power Regulation, under sec. 3.5(g) of the Commission's regulations, 18 CFR 3.5(g) (as amended Aug. 14, 1978).

Office of Hearings and Appeals

CASES FILED WITH THE OFFICE OF HEARINGS AND APPEALS

Week of August 11 Through August 18, 1978

Notice is hereby given that during the week of August 11 through August 18, 1978, the appeals and applications for exception or other relief listed in the appendix to this notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under the DOE's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the DOE action sought in such cases may file with the DOE written comments on the application within 10 days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

MELVIN GOLDSTEIN,
Director, Office of Hearings and Appeals.

SEPTEMBER 12, 1978.

APPENDIX.—*List of Cases Received by the Office of Hearings and Appeals*

[Week of Aug. 11 through Aug. 18, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Aug. 11, 1978	Champlin Petroleum Co, Fort Worth, Tex	DXE-1486 and DXE-1487.	Extension of relief granted in *Champlin Petroleum Company*, case Nos. FEE-3459 (decided Dec. 18, 1976) (unreported decision) and FXE-4267 (decided June 30, 1977) (unreported decision). If granted: Champlin Petroleum Co.would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Dover and East Texas plants.
Do	Champlin Petroleum Co., Forth Worth, Tex.	DEE-1488 through DEE-1490.	Price exception (sec. 212.165. If granted: Champlin Petroleum Co. would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005 per gallon for natural gas liquid products produced at the Adena, Conroe, and Enid plants.
Do	Crystal Petroleum Co., Washington, D.C	DRH-0081 and DRD-0081.	Motion for an evidentiary hearing and motion for discovery. If granted: An evidentiary hearing would be convened in connection with Crystal Petroleum Co.'s statement of objections regarding the June 20, 1978, proposed remedial order issued to the firm. Crystal Petroleum Co. would also be granted discovery with respect to materials collected and prepared in connection with a DOE audit of the firm.
Do	Independent Refining Corp. Washington, D.C.	DEE-1553	Allocation exception (sec. 211.13). If granted: Independent Refining Corp.would be permitted to increase its base period use of natural gasoline.
Do	National Helium Corp., Liberal, Kans	DXE-1485	Extension of relief granted in *National Helium Corporation*, case No. DXE-0515 (decided Apr. 28, 1978) (unreported decision). If granted: National Helium Corp. would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products.

APPENDIX.—*List of Cases Received by the Office of Hearings and Appeals*—Continued

[Week of Aug. 11 through Aug. 18, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Do	Quincy Oil, Inc., and Taunton Municipal Lighting Plant, Quincy, Mass.	DEX-0102	Supplemental order. If granted: Quincy Oil, Inc., would disclose certain confidential financial information regarding its operations to Taunton Municipal Lighting Plant for the purpose of permitting Taunton to contest a proposed DOE order approving exception relief for Quincy.
Do	Special Counsel for Compliance, Washington, D.C.	DSG-0028	Petition for special redress. If granted: The Office of Hearings and Appeals would promulgate procedures for handling claims for refunds filed by purchasers of Gulf Oil Corp. products in connection with a proposed consent order entered into on July 26, 1978, by the Office of the Special Counsel and Gulf Oil Corp.
Do	Sun Production Co., Washington, D.C	DEE-1483	Exception from the entitlements program. If granted: Sun Oil Co. would be granted an exception from proposed amendments to 10 CFR 211.67 which provide for entitlements obligations for certain nonrefining uses of domestic crude oil.
Do	Sun Co., Inc., Dallas, Tex	DEE-1484	Price exception (sec. 212.165). If granted: Sun Co. Inc., would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005 per gallon for natural gas liquid products produced at the Mercer plant.
Do	Time Oil Co, Washington, D.C	DRH-0083 and DRD-0083.	Motion for evidentiary hearing and motion for discovery. If granted: An evidentiary hearing would be convened in connection with Time Oil Co.'s objection to a proposed remedial order issued to Chevron U.S.A., Inc. Time Oil Co. would also be permitted to serve interrogatories on the DOE in connection with that proceeding.
Aug. 14, 1978	Estate of George H. Coates, Dallas, Tex	DXE-1482	Extension of relief granted in *Estate of George H. Coates*, case No. DXE-0688 (decided Apr. 20, 1978) (unreported decision). If granted: The estate of George H. Coates would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products.
Do	Estates of Inez and Loyce Phillips, Austin, Tex.	DXE-1491	Extension of relief granted in *Estates of Inez and Loyce Phillips*, case No. DXE-0545 (decided May 2, 1978) (unreported decision). If granted: The estates of Inez and Loyce Phillips would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products.
Do	El Paso Natural Gas Co., El Paso, Tex	DXE-1589 and DXE-1590.	Extension of relief granted in *El Paso Natural Gas Co.*, case Nos. DXE-0557 and DXE-0558 (decided Apr. 21, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Jal No. 4 and San Juan plants.
Do	Northland Oil & Refining Co., Tulsa, Okla.	DES-0096	Request for stay. If granted: Northland Oil & Refining Co. would be granted a stay of the entitlements purchase obligations pending a decision on its application for exception.
Do	Panhandle Eastern Pipeline Co., Houston, Tex.	DXE-1492, DXE-1493, and DXE-1494.	Price exception (sec. 212.165). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Interstate, North Richland, and Woods plants.
Aug. 15, 1978	Aminoil U.S.A., Inc., Houston, Tex	DXE-1495 through DXE-1500.	Extension of relief granted in *Aminoil U.S.A., Inc.*, case Nos. DXE-0623 through DXE-0628 (decided Apr. 25, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Aline, Fox, Huntington Beach, Inglewood, Taloga, and Tioga plants.
Do	Coline Gasoline Corp., Washington, D.C	DXE-1605	Extension of relief granted in *Coline Gasoline Corporation*, case No. DXE-0518 (decided Apr. 21, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Rincon plant.
Do	Diamond Shamrock Corp., Amarillo, Tex	DXE-1502	Extension of relief granted in *Diamond Shamrock Corporation*, case No. DXE-0614 (decided Apr. 25, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its McKee plant.
Do	Eagle Enterprises, Inc., Portland, Oreg	DRH-0078	Request for evidentiary hearing. If granted: An evidentiary hearing would be convened with respect to Eagle Enterprises, Inc.'s statement of objections to a proposed remedial order issued by DOE region X.
Do	Enkay Corp., Shreveport, La	DXE-1502	Extension of relief granted in *Enkay Corporation*, case No. DXE-0544 (decided Apr. 21, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its East Texas plant.
Do	H.W. Bass & Sons, Inc., Dallas, Tex	DXE-1503	Extension of relief granted in *H.W. Bass & Sons, Inc.*, case No. DXE-0543 (decided Apr. 21, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Walnut Bend plant.
Do	Howell Drilling, Inc., San Antonio, Tex	DRD-0075 and DRH-0075.	Motion for discovery and motion for evidentiary hearing. If granted: An evidentiary hearing would be convened with respect to the proposed remedial order issued to Howell Drilling, Inc., on June 22, 1978. Howell would also be allowed to serve interrogatories on DOE officials and examine documents related to the June 22 proposed remedial order.
Do	Homer T. Moore, Baton Rouge, La	DEE-1608	Price relief (sec. 212.73). If granted: Homer T. Moore would be permitted to sell the crude oil produced from the Eunice-Crowley lease, located in Acadian Parish, La., at upper tier ceiling prices.
Do	Robert W. O'Meara, New Orleans, La	DXE-1552	Extension of relief granted in *Robert W. O'Meara*, 1 DOE par. 81,074 (Feb. 17, 1978). If granted: Robert W. O'Meara would be permitted to sell crude oil produced from the Louisiana Fruit No. 2 lease at upper tier ceiling prices.
Do	Phillips Petroleum Co., Bartlesville, Okla	DXE-1554	Extension of relief granted in *Phillips Petroleum Company*, 1 DOE par. 81,107 (Apr. 11, 1978). If granted: Phillips Petroleum Co. would be permitted to sell the crude oil produced from the Foote lease, located in Oklahoma County, Okla., at upper tier ceiling prices.

APPENDIX.—*List of Cases Received by the Office of Hearings and Appeals*—Continued

[Week of Aug. 11 through Aug. 18, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Do	Shell Oil Co., Houston, Tex	DXE-1504 through DXE-1521.	Extension of relief granted in *Shell Oil Company*, case Nos. FXE-4666, FXE-4687 FXE-4677, and FXE-4679 (decided Nov. 4, 1977) case No. DEE-1060 (decided Feb. 27, 1978) (unreported decision) case Nos. DXE-0592 through DXE-0595, DXE-0597 through DXE-0600, DXE-0602, DXE-0603, DXE-0607, DXE-0609 and DXE-0610 (decided Apr. 21, 1978) (unreported decisions). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Black Bayou, Bryans Mill, Camargo, Chalkley, Enville, Fashing, Grand Chenier, KNDU, Lirette, Mermentau, O'Keene, Prentice, Red Fish Bay, Tallahala, TXL, Van, Weeks Island, and West Seminole plants.
Do	Shell Oil Co., Houston, Tex	DEE-1522	Price exception (sec. 212.165). If granted: Shell Oil Co. would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005 per gallon for natural gas products produced at the Yates plant.
Do	Signal Petroleum, New Orleans, La	DXE-1523	Extension of relief granted in *Signal Petroleum*, case No. DXE-0735 (decided Apr. 20, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Lake Washington plant.
Do	Southland Royalty Co., Fort Worth, Tex	DXE-1555	Extension of relief granted in *Southland Royalty Company*, 1 DOE par. 81,100 (Mar. 22, 1978). If granted: Southland Royalty Co. would be permitted to sell the crude oil produced from the Aztec Totah unit, located in San Juan County, N. Mex., at upper tier ceiling prices.
Do	Standard Oil Co. (Indiana), Chicago, Ill	DXE-1524 through DXE-1529.	Extension of relief granted in *Standard Oil Co. (Indiana)*, case Nos. DXE-0647, DXE-0649, DXE-0650, DXE-0653, DXE-0654 and DXE-0656 (decided Apr. 20, 1978) (unreported decisions). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Cotton Valley, Luby, Old Ocean, South Pecan Lake, Thibodaux, and West Bastion Bay plants.
Do	Standard Oil Co. (Indiana) Chicago, Ill	DEE-1556	Price exception (sec. 212.165). If granted: Standard Oil Co. (Indiana) would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005 per gallon for natural gas liquid products produced at the Ysclosky Gas Processing Plant.
Do	Tenneco Oil Co., Houston, Tex	DXE-1557	Extension of relief granted in *Tenneco Oil Company*, 1 DOE par. 81,109 (Apr. 11, 1978). If granted: Tenneco Oil Co. would be permitted to sell the crude oil produced from the South Coast unit, located in St. Mary's Parish, La. at upper tier ceiling prices.
Do	Union Oil Co. of California, Los Angeles, Calif.	DXE-1530 through DXE-1550.	Extension of relief granted in *Union Oil Co. of California*, case Nos. DXE-0759, DXE-0761 through DXE-0779 (decided on Apr. 25, 1978) (unreported decision) case No. DEE-0395 (decided May 3, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Bakke, Bryans Mill, Caddo, Carrick, Coalinga, Como, Cotton Valley, Dollarhide, Gillette, Houma, Kettleman Hills, Lisbon, Mermentau, North Okarche, Putnam Oswego, Santa Clara, Santa Maria, Stearns, Timbalier Bay, Van, and Warland plants.
Do	Well-Gas, Inc., of Texas, Dallas, Tex	DXE-1551	Extension of relief granted in *Well-Gas, Inc. of Texas*, case No. DXE-0555 (decided Apr. 4, 1978) (unreported decision). If granted: Well-Gas, Inc., of Texas, would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at the Possum Kingdom plant.
Aug. 16, 1978	Allied Chemical Corp., Houston, Tex	DXE-1561 through DXE-1565.	Extension of relief granted in *Allied Chemical Corporation*, case Nos. DXE-0540 through DXE-0542 (decided Apr. 25, 1978) (unreported decisions) case Nos. DEE-0323 through DEE-0324 (decided May 3, 1978) (unreported decisions). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Benedum, Chaney Dell, Sligo, Toca, and Walnut Bend plants.
Do	Atlantic Richfield Co., Dallas, Tex	DXE-1566 through DXE-1577.	Extension of relief granted in *Atlantic Richfield Company*, case Nos. DXE-0668 through DXE-0670, DXE-0672, DXE-0673, DXE-0678 through DXE-0681, DXE-0683 through DXE-0685 (decided Apr. 25, 1978) (unreported decisions). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Bayou Sale, Covington, Crane, Drumright, Eldorado, Midland, North Cowden, Nueces River, Price, Seminole, Spivey, and Swanson River plants.
Do	Continental Oil Co., Houston, Tex	DEE-1610	Price exception (sec. 212.165). If granted: Continental Oil Co. would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005 per gallon for natural gas liquid products produced at the Fruita plant.
Do	Craft Petroleum Co., Jackson, Miss	DEE-1558 through DEE-1560.	Price exception (sec. 212.73). If granted: Craft Petroleum Co. would be permitted to sell the crude oil produced from the Bedford 33-11, Hodges 33-10, and Jackson 33-6 wells, located in Franklin County, Miss., at market prices.
Do	Kerr-McGee Corp., Oklahoma City, Okla	DXE-1591 through DXE-1594.	Extension of relief granted in *Kerr-McGee Corp.*, case Nos. DXE-0547 through DXE-0550 (decided Apr. 25, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Beaver, Beaver Creek, Maysville, and Pampa plants.
Do	P & M Petroleum Management, Denver, Colo.	DXE-1606	Price exception (sec. 212.73). If granted: P & M Petroleum Management would be permitted to sell the crude oil produced from the Track No. 1 well, located in Roosevelt County, Mont., at upper tier ceiling prices.

have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request made the records available to

and Veterinary Products Division, North Chicago, Ill. 60064, submitted a pesticide petition (PP 8G2056) to the Environmental Protection Agency

APPENDIX.—*List of Cases Received by the Office of Hearings and Appeals*—Continued

[Week of Aug. 11 through Aug. 18, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Do	Phillips Petroleum Co., Bartlesville, Okla	DEE-1596	Price exception (sec. 212.165). If granted: Phillips Petroleum Co. would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005 per gallon for natural gas liquid products produced at the Rollover plant.
Do	Standard Oil Co. (Indiana), Chicago, Ill	DXE-1597 through DXE-1603.	Extension of relief granted in *Standard Oil Co. (Indiana)*, case Nos. DXE-0645, DXE-0648, DXE-0657, DXE-0652, DXE-0834, DXE-0835 and DXE-0655 (decided Apr. 20, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Burnell-N. Pettus, Edgewood, Patterson, S. Gillock, S. Manchester, Toca and Vermillion plants.
Do	Suburban Propane Gas Corp., Morristown, N.J.	DXE-1604	Extension of relief granted in *Suburban Propane Gas Corporation*, case No. DEE-0321 (decided June 26, 1978) (unreported decision). If granted: Suburban Propane Gas Corp. would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at the Martha Berry plant.
Do	Continental Oil Co., Houston, Tex	DXE-1578 through DXE-1588.	Extension of relief granted in *Continental Oil Company*, case Nos. DXE-0630 through DXE-0640 (decided Apr. 25, 1978) (unreported decision). If granted: Continental Oil Co. would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at the Acadia, Burnell N. Pettus, Edmond, Hamlin, Maljamar, North Cowden, North Okarche, Rincon, Sussex, West Seminole, and West World plants.
Do	Northern Natural Gas Co., Omaha, Nebr	DXE-1595	Extension of relief granted in *Northern Natural Gas Co.*, case No. DXE-0734 (decided Apr. 21, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Martin County plants.
Aug. 17, 1978	Damson Oil Corp., Houston, Tex	DXE-1607	Extension of relief granted in *Damson Oil Corporation*, 1DOE par. 81,101 (Apr. 7, 1978). If granted: Damson Oil Corp. would be permitted to sell the crude oil produced from the Venice Beach lease at upper tier ceiling prices.
Do	Laketon Asphalt Refining, Inc., Evansville, Ind.	DEX-0103	Supplemental order. If granted: Laketon Asphalt Refining, Inc., would receive a stay of its entitlement purchase obligations during the period August 1, 1978, through January 31, 1979.
Do	McCulloch Gas Processing Corp., Washington, D.C.	DXE-1617 and DXE-1618.	Extension of relief granted in *McCulloch Gas Processing Corporation*, case Nos. DXE-0538, DXE-0539 (decided Apr. 25, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Gillette and Oedekoven plants.
Do	Piedmont Natural Gas Co., Inc., Greensboro, N.C.	DES-0098 and DST-0098.	Request for stay; request for temporary stay. If granted: Piedmont Natural Gas Co. would receive a stay of the DOE regulations which govern the allocation of propane pending a determination of certain petitions for regulatory relief which the firm has filed with the DOE Economic Regulatory Administration.

ENVIRONMENTAL PROTECTION AGENCY

[FRL971-5; PP 8G2040/T165]

ESTABLISHMENT OF TEMPORARY TOLERANCES

Pendimethalin

American Cyanamid Co., Agricultural Division, P.O. Box 400, Princeton, N.J. 08540, submitted a pesticide petition (PP 8G2040) to the Environmental Protection Agency (EPA). This petition requested that temporary tolerances be established for residues of the herbicide pendimethalin (*N*-(1-ethylpropyl)-3,4-dimethyl-2,6-dinitro- benzeneamine) in or on the raw agricultural commodities sorghum grain, fodder, and forage at 0.1 part per million (ppm).

These temporary tolerances will permit the marketing of the above raw agricultural commodities when treated in accordance with an experimental use permit that has been issued under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (86 Stat. 973, 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

An evaluation of the scientific data reported and other relevant material showed that the requested tolerances were adequate to cover residues resulting from the proposed experimental use, and it was determined that the temporary tolerances would protect the public health. The temporary tolerances have been established for the pesticide, therefore, with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.

2. American Cyanamid Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request made the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire August 24, 1979. Residues not in excess of 0.1 ppm remaining in or on sorghum grain, fodder, and forage after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerances. These temporary tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicates such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Mr. Robert Taylor, Product Manager (PM) 25, Registration Division (TS-767), Office of Pesticide Programs, East Tower, 401 M Street SW., Washington, D.C. 20460, 202-426-2632.

(Sec. 408(j), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j).))

Dated: September 14, 1978.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

[6560-01]

[FRL 971-4; PP 8G2056/T163]

ESTABLISHMENT OF A TEMPORARY EXEMPTION FROM THE REQUIREMENT OF A TOLERANCE

Phytophora Citrophthora MWV Isolate

Abbott Laboratories, Agricultural and Veterinary Products Division, North Chicago, Ill. 60064, submitted a pesticide petition (PP 8G2056) to the Environmental Protection Agency (EPA). This petition requested that a temporary exemption from the requirement of a tolerance be established for residues of the spores *Phytophora citrophthora* MWV isolate (140,000 spores per gram of *Phytophora citrophthora* (milkweed vine race which is equivalent to 6.36×107 spores per pound) (ABG-5001)) when used as a mycoherbicide on citrus fruits.

This temporary exemption from the requirement of a tolerance will permit the marketing of the above raw agricultural commodity when treated in accordance with an experimental use permit that has been issued under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (86 Stat. 973, 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

Based on an evaluation of the scientific data reported and other relevant material, it was concluded that the requested exemption from the requirement of a tolerance would protect the public health. The temporary exemption has been established for the pesticide, therefore, with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.

2. Abbott Laboratories must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribu-

tion, and performance and on request make the records available to any authorized officer or employee of the

cations for pesticide registration listed below. In some cases these applications have recently been received; in

The Interim Policy Statement requires that claims for compensation be filed on or before November 20, 1978.

Application proceeds under 2(b) of interim policy. PM17

EPA File Symbol 2831-AA. Napasco International, P.O. Box 1219, Thibodaux, La. 70301. [3-Phenoxybenzyl d-cis and trans 2,2-dimethyl-3-(2-methylpropenyl) cyclopropanecarboxylate 0.200%; 3-Phenoxybenzyl d-cis and trans 2,2-dimethyl-3-(2-methylpropenyl) cyclopropanecarboxylate 0.191%; Other isomers 0.009%. Piperonyl butoxide technical 1.000%. Petroleum distillate 98.800%. Method of support: Application proceeds under 2(b) of interim policy. PM17

EPA File Symbol 2831-AE. Napasco International, P.O. Box 1219, Thibodaux, La. 70301. [3-Phenoxybenzyl d-cis and trans 2,2-dimethyl-3-(2-methylpropenyl) cyclopropanecarboxylate 0.143%; Other isomers 0.007%. Petroleum distillate 9.250%. Method of support: Application proceeds under 2(b) of interim policy. PM17

tion, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary exemption from the requirement of a tolerance expires August 21, 1980. Residues of the pesticide remaining in or on citrus fruits after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and the temporary exemption. This temporary exemption may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicates such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Mr. George LaRocca, Acting Product Manager (PM) 23, Registration Division (TS-767), Office of Pesticide Programs, East Tower, 401 M Street SW., Washington, D.C. 20460, 202-755-2196.

(Sec. 408(j), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j)).)

[FRL 971-3; OPP-33000/556 & 557]

RECEIPT OF APPLICATION FOR PESTICIDE REGISTRATION

Data to be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (39 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended ("Interim Policy Statement"). On January 22, 1976, EPA published in the FEDERAL REGISTER a document entitled "Registration of a Pesticide Product—Consideration of Data by the Administrator in Support of an Application (41 FR 3339). This document described the changes in the Agency's procedures for implementing section 3(c)(1)(D) of FIFRA, as set out in the Interim Policy Statement which were effected by the enactment of the amendments to FIFRA on November 28, 1975 (Pub. L. 94-140), and the regulations governing the registration and reregistration of pesticides which became effective on August 4, 1975 (40 CFR Part 162).

Pursuant to the procedures set forth in these FEDERAL REGISTER documents, EPA hereby gives notice of the applications for pesticide registration listed below. In some cases these applications have recently been received; in other cases, applications have been amended by the submission of additional supporting data, the election of a new method of support, or the submission of new "offer to pay" statements.

In the case of all applications, the labeling furnished by the applicant for the product will be available for inspection at the Environmental Protection Agency, Room 209, East Tower, 401 M Street SW., Washington, D.C. 20460. In the case of applications subject to the section 3 regulations which utilize either the 2(a) or 2(b) method of support specified in the Interim Policy Statement, all data citations submitted or referenced by the applicant in support of the application will be made available for inspection at the above address. This information (proposed labeling and, where applicable, data citations) will also be supplied by mail, upon request. However, such a request should be made only when circumstances make it inconvenient for the inspection to be made at the Agency offices.

Any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after January 1, 1970, are being used to support an application described in this notice, (c) desires to assert a claim under section 3(c)(1)(D) for such use of his data and wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, or (d) wishes to assert confidential status under section 10 for his data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Process Coordination Branch, Registration Division (TS-767), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. Every such claimant must include, at a minimum, the information listed in the Interim Policy Statement of November 19, 1973.

Specific questions concerning applications made to the Agency should be addressed to the designated product manager (PM), Registration Division (TS-767), Office of Pesticide Programs, at the above address, or by telephone as follows:

PM 12 and 16—202-755-9315.
PM 21 and 22—202-426-2454.
PM 24—202-755-2196.
PM 31 and 32—202-426-2635.
PM 15 and 17—202-426-9427.
PM 23—202-755-1397.
PM 25—202-426-2632.

The Interim Policy Statement requires that claims for compensation be filed on or before November 20, 1978. EPA will not delay any registration pending the assertion of claims for compensation or the determination of reasonable compensation. Inquiries and assertions that data relied upon are subject to protection under section 10 of FIFRA, as amended, should be made on or before October 20, 1978. Registration will be delayed pending resolution of section 10 claims.

Dated: September 14, 1978.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

RECEIPT OF APPLICATION FOR PESTICIDE REGISTRATION

Data To Be Considered In Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (39 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended ("Interim Policy Statement"). On January 22, 1976, EPA published in the FEDERAL REGISTER a document entitled "Registration of a Pesticide Product—Consideration of Data by the Administrator in Support of an Application" (41 FR 3339). This document described the changes in the Agency's procedures for implementing section 3(c)(1)(D) of FIFRA, as set out in the Interim Policy Statement which were effected by the enactment of the amendments to FIFRA on November 28, 1975 (Pub. L. 94-140), and the regulations governing the registration and re-registration of pesticides which became effective on August 4, 1975 (40 CFR Part 162).

Pursuant to the procedures set forth in these FEDERAL REGISTER documents, EPA hereby gives notice of the applications for pesticide registration listed below. In some cases these applications have recently been received; in other cases, applications have been amended by the submission of additional supporting data, the election of a new method of support, or the submission of new "offer to pay" statements.

In the case of all applications, the labeling furnished by the applicant for the product will be available for inspection at the Environmental Protection Agency, Room 209, East Tower, 401 M Street SW., Washington, D.C. 20460. In the case of applications subject to the section 3 regulations which utilize either the 2(a) or 2(b) method of support specified in the interim policy statement, all data citations submitted or referenced by the applicant in support of the application will be made available for inspection at the above address. This information (proposed labeling and, where applicable, data citations) will also be supplied by mail, upon request. However, such a request should be made only when circumstances make it inconvenient for the inspection to be made at the Agency offices.

Any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after January 1, 1970, are being used to support an application described in this notice, (c) desires to assert a claim under section 3(c)(1)(D) for such use of his data and wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, or (d) wishes to assert confidential status under section 10 for his data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Process Coordination Branch, Registration Division (TS-767), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. Every such claimant must include, at a minimum, the information listed in the Interim Policy Statement of November 19, 1973.

Specific questions concerning applications made to the Agency should be addressed to the designated Product Manager (PM), Registration Division (TS-767), office of pesticide programs, at the above address, or by telephone as follows:

PM 12 and 16—202/755-9315
PM 21 and 22—202/426-2454
PM 24—202/755-2196
PM 31 and 32—202/426-2635
PM 15 and 17—202/426-9427
PM 23—202/755-1397
PM 25—202/426-2632

The Interim Policy Statement requires that claims for compensation be filed on or before November 20, 1978. EPA will not delay any registration pending the assertion of claims for compensation or the determination of reasonable compensation. Inquiries and assertions that data relied upon are subject to protection under section 10 of FIFRA, as amended, should be made on or before October 20, 1978. Registration will be delayed pending resolution of section 10 claims.

Dated: September 14, 1978.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

STATE OF OKLAHOMA

State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides; Approval Status

Section 4(a)(2) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136 et seq.) and the implementing regulations of 40 CFR part 171, require each State desiring to certify applicators to submit a plan for such purpose, subject to approval by the Environmental Protection Agency (EPA). On January 19, 1977, the Oklahoma State plan was approved contingent upon enactment of proposed legislation and subsequent promulgation of regulations necessary to implement the plan. Notice of contingent approval was published in the FEDERAL REGISTER on January 31, 1977 (42 FR 5719). Subsequently, on June 6, 1978 necessary legislation was enacted and implementing regulations promulgated. The amended State Plan incorporates the following changes from the contingency plan:

1. Written examinations will not be required of private applicators.
2. The dealer permit requirement has been deleted.
3. Four (4) subcategories are added to category number seven (7), the industrial, institutional, structural, and health related pest control category:
   (a) General pest.
   (b) Termite control.
   (c) Fumigation.
   (d) Food processing.
4. Two (2) categories of commercial and noncommercial applicators are added:
   (11) Bird and predatory animal control.
   (12) Timber treating.
5. The term "License" is replaced by the term "Permit."
6. Right of entry for pesticide establishment inspection is added.

These relatively minor revisions were necessary to make the State plan consistent with the final version of the Oklahoma pesticide laws and rules. None of the changes substantially affect the State's basic program or its ability to effectively implement the State plan. Nor do they affect the issues which EPA considers in deciding whether or not to approve a State plan.

Having reviewed the legislation and regulations and finding that all requisite legal authorities required by FIFRA and 40 CFR part 171 are now enacted and promulgated, the Regional Administrator, EPA, Region VI, gives notice that the Oklahoma State plan is now a fully approved State plan.

Dated: September 6, 1978.

ADLENE HARRISON,
Regional Administrator.
EPA, Region 6.

[FRL 970-4]

TOTAL MAXIMUM DAILY LOADS UNDER CLEAN WATER ACT

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: The purpose of this notice is to propose for public comment an identification of polutants suitable for total maximum daily load calculations pursuant to the Clean Water Act. The Act requires EPA to develop and publish information "on and the identification of pollutants suitable for maximum daily load measurement correlated with the achievement of water quality objectives." EPA is proposing to identify all pollutants, under proper technical conditions, as being suitable for the calculation of total maximum daily loads. Within 180 days after EPA publishes its final identification, which will occur after consideration of comments on this notice, the Act requires each State to submit its first identification of waters requiring total maximum daily loads and its first load calculations.

DATE: Written public comments should be submitted to the person listed immediately below on or before November 6, 1978.

FOR FURTHER INFORMATION CONTACT:

Tim S. Stuart, Chief, Monitoring Branch (WH-553), Monitoring and Data Support Division, Office of Water Planning and Standards, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, telephone 202-426-7766.

SUPPLEMENTARY INFORMATION:

I. BACKGROUND

Section 304(a)(2)(D) (33 U.S.C. § 1314(a)(2)(D)) of the Clean Water Act (33 U.S.C. § 1251 et seq.) required that EPA publish an identification of pollutants suitable for total maximum daily load (TMDL) calculation within 1 year of the enactment of the 1972 amendments to the Act. On October 26, 1973, EPA published a notice of availability (38 FR 29646) of a two-Volume document containing a draft identification of pollutants potentially suitable for TMDL calculations. The draft identification was never finalized.

EPA has not considered such finalization a matter of high priority, because many of the practical results of such an action are being accomplished in any event through the State water quality management planning process under sections 208 and 303(e) of the Act (33 U.S.C. 1288 and 1313(e)). In particular, EPA's regulations at 40 CFR 131.11 (f) and (g) include TMDL calculations and waste load allocations as part of State water quality management plans.

On June 20, 1978, however, the U.S. District Court for the District of Columbia in *Board of County Commissioners of Calvert County, et al.* v. *Costle, et al.* (No. 78-0572) issued an order requiring EPA to publish a final identification under section 304(a)(2)(D) within 180 days. EPA is accordingly issuing this proposal today. Since final identification under section 304(a)(2)(D) triggers the requirement under section 303(d) that States or, in certain instances EPA, calculate TMDL's, it is imperative to consider implementation issues before a final identification. EPA realizes that care must be taken to fashion its requirements so as to have the least disruptive effect on ongoing State programs designed to meet water quality objectives.

Accordingly, EPA's proposed identification would make the requirement for establishment of TMDL's part of the States' ongoing section 208 and section 303 planning processes. The identification should therefore not require States which are carrying out their functions under sections 208 and 303 to devote additional resources to waste load allocations and TMDL development. Priority ranking systems (discussed in part II.C) will be established to keep the development of TMDL's within available resources.

II. PROPOSED IDENTIFICATION AND IMPLEMENTATION INFORMATION

A. IDENTIFICATION

EPA's proposed identification is as follows: All pollutants, under the proper technical conditions, are suitable for the calculation of total maximum daily loads.

The Agency believes that under the proper technical conditions TMDL's and waste load allocations can be developed for all pollutants. The requirements to perform TMDL's will be adjusted according to a priority ranking as envisioned by section 303(d) to avoid overloading either the States or EPA during the phased development of TMDL's.

B. INFORMATION—CALCULATION OF TMDL'S

1. *Water quality standards.* Section 303(d)(1)(C) of the Clean Water Act provides that TMDL's will be calculated in order to establish an upper limit on pollution loading which will still allow meeting applicable water quality standards for the particular body of water. The water quality standard for each body of water consists of the designated use (classification) of the body of water, the associated numerical and nonnumerical water quality criteria necessary to protect the designated use, and antidegradation requirements. See 43 FR 29588-92 (July 10, 1978) for a recent detailed statement on water quality standards.

TMDL's can only be calculated for water bodies and pollutants with a specified numerical limit based upon approved or promulgated ambient water quality standards. Such numerical limits may be specified in the water quality standards or may be based upon the level of control necessary to prevent the violation of a quantitative or nonquantitative water quality criterion. For example, a TMDL could be calculated for a certain concentration limit for a toxic substance, when this particular pollutant is not specifically addressed in the numerical criteria, if the concentration limit used is necessary to prevent the violation of a general prohibition against the discharge of toxic substances in toxic amounts.

Since TMDL's must be established at levels necessary to implement the applicable water quality standards, any change in numerical criteria for pollutants contained in water quality standards will impact the TMDL's calculated for such a pollutant. Therefore, TMDL's should be reviewed each time the corresponding water quality standards are revised.

Finally, EPA recognizes that State development of TMDL's and waste load allocations for all water quality limited segments will be a lengthy

process. Water quality standards will continue to be enforced during this process. Development of TMDL's pur-

ical modeling, which takes these factors into account. As with the C-TMDL, the N-TMDL results in an am-

will be negotiated as part of the State/EPA agreement under the water quality management regulations. 40 CFR

waste treatment reviews conducted under section 208.

(5) States should also consider any

Dated: September 14, 1978.

THOMAS C. JORLING,
Assistant Administrator for

posed acquisition should be submitted to the Director, Office of District Banks, Federal Home Loan Bank

process. Water quality standards will continue to be enforced during this process. Development of TMDL's pursuant to section 303(d) is not a necessary prerequisite to adoption or enforcement of water quality standards, and, therefore, will not determine the validity of existing, revised or new water quality standards.

2. *Methods for TMDL calculation.* Water pollutants can generally be classified as either conservative or nonconservative. Technical conditions for calculation of TMDL's and waste load allocations vary with the type of pollutant, with one method of calculation for pollutants which are generally classified as conservative and another method for pollutants generally classified as nonconservative. Conservative pollutants (such as certain dissolved solids) are those pollutants which persist in the water column of the aquatic environment. The amount of a conservative pollutant in a given segment will remain essentially constant over time. Nonconservative pollutants (such as many organic compounds) decay or are otherwise removed over time. This decrease in concentration may be due to a number of factors including chemical breakdown and biodegradation.

EPA recognizes that the dividing line between conservative and nonconservative pollutants is not sharp and the classification of a given pollutant may vary depending upon the level of sophistication required in a particular analytical situation. The classification is helpful, however, in determining which method of calculation should be used. See Simplified Mathematical Modeling of Water Quality, EPA, March 1971, and Addendum to Simplified Mathematical Modeling of Water Quality, EPA, May 1972.

a. Conservative pollutant TMDL (C-TMDL). The C-TMDL of a body of water is that pollutant loading which, by simple dilution with the receiving body of water, results in an ambient concentration equal to the specified numerical concentration limit for that pollutant, i.e., the concentration limit based upon the applicable water quality standards. Since the C-TMDL depends upon simple dilution, the C-TMDL varies directly with the volumes or flows of dischargers and the receiving body of water, with a larger flow providing a larger C-TMDL.

b. Nonconservative pollutant TMDL (N-TMDL). The N-TMDL is not an intrinsic property of a body of water, since the N-TMDL varies with a number of factors, e.g., flow or volume of the receiving body of water, flow from dischargers, and the configuration of discharge locations on the body of water. Therefore, the N-TMDL can only be calculated with fairly sophisticated techniques such as mathematical modeling, which takes these factors into account. As with the C-TMDL, the N-TMDL results in an ambient concentration of the pollutant equal to the specified numerical concentration limit for that pollutant, i.e. the concentration limit based upon the applicable water quality standards.

C. INFORMATION—PRIORITY RANKING

EPA's proposed identification of pollutants is not designed to require States to devote additional resources to waste load allocations and TMDL development. As stated previously, it is envisioned that establishment of TMDL's would be part of States' ongoing sections 208 and 303(e) planning processes funded under sections 106 and 208 of the Act. To keep the requirements of developing TMDL's within available resources and to meet statutory schedules for preparing TMDL's States must establish priority rankings.

1. *Statutory requirements.* Section 303(d)(1)(A) requires States to identify waters where water quality standards will not be met by application of effluent limitations required under sections 301(b)(1) (A) and (B) of the Act. These waters are designated as water quality limited segments. the process of stream segment classification has been largely completed as part of basin planning under section 303(e) of the Act. Section 303(d)(2) requires States to submit their first segment identifications and TMDL calculations within 180 days of the Administrator's final identification pursuant to section 304(a)(2)(D).[1] After the States' first submission, subsequent segment identifications and TMDL calculations must be submitted from "time to time." Section 303(d)(2). Priority rankings of waters will insure compliance under a reasonable schedule with the Act's "time to time" requirement.

Section 303(d)(1)(A) requires the States to establish a priority ranking for those waters which States identify as water quality limited. In establishing the priority ranking section 303(d)(1)(A) requires the States to take into account (1) the severity of pollution and (2) the uses to be made of the waters identified. In assessing severity of pollution, States should consider the type of pollutants involved as well as the violations of water quality standards. In addition, States are not required to address only segments with existing problems but may also take into account the need to protect existing high quality waters.

2. *Priority ranking agreements.* Since calculation of TMDL's will be part of State water quality management planning, priorities for TMDL's will be negotiated as part of the State/EPA agreement under the water quality management regulations. 40 CFR 130.11; see proposed 40 CFR 35.1507, 43 FR 40742 (September 12, 1978). EPA's recently proposed regulations would require States to establish priority ranking as part of the State strategy. The priority ranking, timing, resource needs, level of technical detail, and other specifics of TMDL development will be negotiated by the States and EPA, and then set forth in the work program.

3. *Content of priority ranking.* In developing the priority ranking in the work programs for water quality segments on which TMDL's will be calculated during each following year, the States should consider at least the following factors.

First, section 303(d)(1)(A) requires States to take into account (1) the severity of pollution and (2) the uses to be made of the waters identified. (See discussion, part II.C.1.)

Second, States should also consider other factors in establishing priority ranking of segments or priorities for calculation of TMDL's among the high ranking segments. Some of the factors for consideration in ranking may include the following:

(1) Calculation of TMDL's should be given higher priority when they are expected to result in effluent limitations in NPDES permits. If NPDES permits are not scheduled for reissuance in the near future, the calculation of TMDL's for that segment may receive a low priority. Similarly, if implementation of national effluent limitation guidelines would eliminate water quality violations for certain stream segments, calculation of TMDL's may receive low priority. These considerations will avoid use of limited resources where implementation of the TMDL's would not be likely in the near future.

(2) Resources may be concentrated on segments and pollutants where acceptable models and adequate data are available at reasonable cost.

(3) Since the Act requires TMDL's to be established at levels necessary to implement water quality standards, TMDL's should be designed to result in the attainment of standards. If nonpoint sources are significant contributors to water quality problems in the segment, then the development of TMDL's in the segment should be high priority only when nonpoint sources will also be addressed.

(4) States should also consider coordinating the development of TMDL's with other water quality analyses. These analyses include fixed station analyses under the basic water monitoring program, water quality standard revisions, preparation of the section 305(b) report, and advanced waste treatment reviews conducted under section 208.

(5) States should also consider any national priorities developed by EPA.

States may consider the above factors as well as additional factors they deem important to the priority ranking process for development of TMDL's. States will be required to set forth justification for the priority ranking of each stream segment but will not be required to develop a system which sets forth each factor considered and the weight given to each factor. States will be required to rank every water quality segment in the State. However, States need not reclassify segments already classified.

D. STATE SUBMISSIONS AND EPA APPROVAL

To comply with the requirements of the Act, States must submit the following information within 180 days of EPA's final identification of pollutants suitable for TMDL calculation.

(1) An identification of waters for which effluent limitations required by sections 301(b)(1) (A) and (B) are not stringent enough to implement applicable water quality standards. This requirement can be satisfied by referencing documents already submitted to EPA, e.g., section 305(b) reports.

(2) The TMDL established under section 303(d)(1)(A) for one or more of the above waters. This requirement can be satisfied by referencing documents already submitted to EPA or by submitting TMDL's based on information available in other water quality studies. States should indicate whether those loads previously submitted to EPA are still regarded as adequate. Priority rankings are not required within 180 days. They will be submitted pursuant to schedules established in the State/EPA agreements. Subsequent submission of TMDL's shall also be submitted pursuant to State/EPA agreements. Under section 303(d)(2), EPA must approve or disapprove State submissions. In reviewing State submissions, EPA may conditionally approve the submissions with the understanding that States will provide supplementary information within a reasonable time and according to a schedule established by the State/EPA agreement. After EPA approval, section 303(e) requires States to incorporate the TMDL's into their water quality management plans pursuant to section 303(e)(3)(C). EPA solicits written public comments upon all aspects of this proposal. Written comments must be submitted on or before November 6, 1978. EPA is only providing 45 days for public comment pursuant to order of the court in *Board of County Commissioners of Calvert County et al.* v. *Costle et al.* (No. 78-0572).

[1] In accordance with the court order referenced above, the final identification should be issued on or before December 20, 1978.

Dated: September 14, 1978.

THOMAS C. JORLING,
Assistant Administrator for Water and Hazardous Materials.

FEDERAL COMMUNICATIONS COMMISSION

PRIVATE LAND MOBILE ADVISORY COMMITTEE

Notice of Meeting

In preparation for the 1979 World Administrative Radio Conference (WARC), the Private Land Mobile Advisory Committee headed by Neal Pike, will hold its next meeting on October 13, 1978, in Washington, D.C. The meeting will be held in conference room A-110, Federal Communications Commission, 1229 20th Street NW., at 9 a.m. The purpose of the meeting is to consider reply comments in docket 20271, Ninth Notice of Inquiry for a General World Administrative Conference in 1979. The meeting is open to the public and will be conducted in accordance with the following agenda:

1. Call of the agenda
2. Opening remarks of the chairman
3. Consideration of Reply comments in the Ninth Notice of Inquiry, docket 20271
4. Further business
5. Adjournment

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service

CENTER FOR DISEASE CONTROL

Occupational Safety and Health Field Research Projects

AGENCY: National Institute for Occupational Safety and Health (NIOSH), Center for Disease Control, PHS, HEW.

ACTION: Notice of research projects to be initiated.

SUMMARY: This notice announces the field research projects involving the collection of information from the public which are planned for initiation by NIOSH during the remainder of calendar year 1978. This notice does not constitute a request for proposal.

FOR FURTHER INFORMATION CONTACT:

Mr. Ronald F. Coene, Director, Office of Program Planning and Evaluation, NIOSH, CDC, 5600 Fishers Lane (Room 8A-09), Rockville, Md. 20857, telephone 301-443-4364.

SUPPLEMENTARY INFORMATION: The NIOSH field research projects described below will be conducted under the authority of section 20 of the Occupational Safety and Health Act (29 U.S.C. 669) and in accordance with the provisions of part 85a of title 42, Code of Federal Regulations. The protocol for the conduct of these types of projects has been reviewed by the Office of Management and Budget and determined to be incompliance with the Federal Reports Act. The list of projects includes the title and (a) purpose of each project, (b) the frequency with which the information will be collected, (c) an indication of types of workers from whom information will be sought, (d) the estimated number of responses and (e) the estimated burden in reporting hours.

1. *Reproductive history study of women exposed to lead in the workplace.* (a) The purpose of this study is to determine the possible adverse health effects of an occupational exposure to lead, (b) single time, (c) women workers exposed to lead, (d) 400 respondents, (e) 30 minutes manhour burden per response.

2. *Reproductive history study of wives of carbon disulfide workers.* (a) The purpose of this study is to determine the possible adverse health effects in wives of workers in the viscose rayon industry, (b) single time, (c) wives of workers in the viscose rayon industry, (d) 600 respondents, (e) 30 minutes manhour burder per response.

3. *Reproductive history study of women exposed to synthetic estrogens in the workplace.* (a) The purpose of this study is to determine whether adverse health effects are associated with occupational exposure of women to synthetic estrogens, (b) single time, (c) women working with synthetic estrogens, (d) 400 respondents, (e) 30 minutes manhour burden per response.

4. *Reproductive history study of women working in the pharmaceutical industry.* (a) The purpose of this study is to determine the possible adverse health effects in women in the pharmaceutical industry, (b) single time, (c) women workers in the pharmaceutical industry, (d) 1200 respondents, (e) 30 minutes manhour burden per response.

5. *Reproductive history study of workers exposed to microwaves.* (a) The purpose of this study is to determine the possible adverse health effects of an occupational exposure to microwaves, (b) single time, (c) women workers exposed to microwaves and wives of exposed male workers, (d) 800 respondents, (e) 30 minutes manhour burden per response.

6. *Delayed neurotoxicity of organophosphate exposed workers.* (a) The purpose of this study is to determine the possible adverse health effects of an occupational exposure to organophosphates, (b) single time, (c) nonpesticide organophosphate workers, (d) 500 respondents, (e) 30 minutes manhour burden per response.

7. *Neuropathy of pesticide workers.* (a) The purpose of this study is to determine whether adverse health effects, particularly subclinical neurological effects, are associated with occupational exposure to pesticides, (b) single time, (c) workers in the pesticide industry, (d) 500 respondents, (e) 30 minutes manhour burden per response.

Six weeks before beginning field work on any of these projects, NIOSH will publish a separate notice in the FEDERAL REGISTER giving specific information on the project.

This notice supplements the list of field research projects published in the FEDERAL REGISTER of July 11, 1978, at 43 FR 29834.

Dated: September 14, 1978.

VERNON E. ROSE,
Acting Director, National Institute for Occupational Safety and Health.

AGENCY: Department of Health, Education, and Welfare Office of Education.

ACTION: Revision to Notice.

SUMMARY: Notice is hereby given of the revision of the proposed agenda of the October 3-4, 1978, meeting of the Advisory Committee on Accreditation and Institutional eligibility to include the review of the interim report of the American Dietetic Association, Commission on Evaluation of Dietetic Education. Notice of the meeting of the Advisory Committee on Accreditation and Institutional Eligibility was published previously in the FEDERAL REGISTER on September 11, 1978, 43 FR 40316-40319. All written materials regarding this matter should be submitted to John R. Proffitt at the address below, and will be considered by the Committee. Requests for oral presentations before the Committee regarding this matter should include the names of all persons seeking an appearance, the party or parties which they represent, and the purpose for which the presentation is requested. Requests must be received by John R. Proffitt on or before September 22, 1978. Time constraints may limit oral presentations.

DATES: October 3, 1978, 8:30 a.m. to 5 p.m., local time and October 4, 1978, 9 a.m. to 12 Noon.

ADDRESS: Dulles Marriott Hotel, Dulles International Airport, Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

John R. Proffitt, Director, Division of Eligibility and Agency Evaluation, Office of Education, Room 3030, ROB 3, 400 Maryland Avenue SW., Washington, D.C. 20202, 202-245-9873,

Signed at Washington, D.C., on September 14, 1978.

JOHN R. PROFFITT,
Director, Division of Eligibility and Agency Evaluation Office of Education.

Office of the Secretary

PRIVACY ACT OF 1974

AGENCY: Department of Health, Education, and Welfare (HEW), Office of the Secretary.

ACTION: Publication of a summary of deletions and modifications to HEW notices of systems of records.

SUMMARY: This document is a summary of major modifications to the HEW notices of systems of records. This summary includes new deletions of notices and other changes which we have not yet described in the FEDERAL REGISTER (FR). We have not included new or altered system notices or new routine uses which we published in the FR during the year. The purpose of this document is to give the reader of our annual publication of notices, which we will publish in the FR in September 1978, a brief reference to major changes including deletions of notices. We will publish all current notices in their entirety in the September 1978 annual republication.

To further assist the reader, we have listed the modifications and deletions by major HEW component and listed the major components in the same order that they appear in the annual publication. That order is as follows: (A) Office of the Secretary (OS), (B) Office of Human Development Services (OHDS), (C) Education Division (E), (D) Health Care Financing Administration (HCFA), (E) Public Health Service (PHS), and (F) Social Security Administration (SSA).

SUPPLEMENTARY INFORMATION:

A. The OS changes and deletions are as follows:

1. OS clarified the Notification Procedures, Record Access Procedures, and Contesting Records Procedures sections, where appropriate, in order to indicate to the public the information an individual should supply when requesting notification, access, and correction of his/her records.

2. OS deleted the system of records entitled "Health Insurance Study," No. 09-90-0029, published on 9-20-76, page 40737 of the FR, because of reconsideration based upon legal opinion.

3. OS deleted the system of records entitled "Employee Housing Service," No. 09-90-0042, published on 9-20-76, page 40709 of the FR, because it no longer exists.

4. OS deleted the system of records entitled "Office of General Council (OGC) Directory," No. 09-90-0063, published on 9-29-77, page 51970, because it no longer exists.

5. OS deleted system No. 09-90-0040 entitled "OS Federal Women's Program and Privacy Act" because this notice is subsumed under OS system No. 09-90-0006. The deleted notice was last published in the FR on August 27, 1975, on page 38423.

6. OS deleted system No. 09-90-0076 entitled "Persons Authorized to Represent a State Agency in Acquisition, Maintenance, and Donation of Surplus Property" because the General Services Administration now performs the function which required this system. The deleted system was last published in the FR on September 29, 1977, page 51977.

7. OS deleted system No. 09-90-0077 entitled "Placement and Career Development Service Program for Indo-Chinese Refugees, Jewish Federation of Metropolitan Chicago (Contractor) because HEW no longer maintains this system. Notice was last published in the FR on September 29, 1977, on page 51977.

8. The Office for Civil Rights (OCR) deleted the following four notices because they are included in other OCR notices.

Name	Number	Last published in FR	
		Issue	Page
Complaint Files, Contract Compliance Division	09-90-0052	9-29-77	51964
Complaint Log, Elementary Secondary Division	09-90-0053	9-29-77	51965
Complaint Files, Health and Social Services Division	09-90-0054	9-29-77	51965
Complaint File, Higher Education Division	09-90-0055	9-29-77	51966

B. The OHDS changes and deletions are as follows:

1. OHDS clarified the Notification Procedures, Record Access Procedures, and Contesting Records Procedures sections, in order to indicate to the public the information an individual should supply when requesting notification, access, and correction of his/her records.

2. OHDS deleted the following notices because the systems of records no longer exist.

Name	Number	Last published in FR	
		Issue	Page
Complaint Files, Contract Compliance Division	09-90-0052	9-29-77	51964
Complaint Log, Elementary Secondary Division	09-90-0053	9-29-77	51965
Complaint Files, Health and Social Services Division	09-90-0054	9-29-77	51965
Complaint File, Higher Education Division	09-90-0055	9-29-77	51966

5. The Office of the Assistant Secretary for Education has deleted the following notices because the systems no longer exist under the Privacy Act.

Name	Number	Last published in FR	
		Issue	Page
Complaint Files, Contract Compliance Division	09-90-0052	9-29-77	51964
Complaint Log, Elementary Secondary Division	09-90-0053	9-29-77	51965
Complaint Files, Health and Social Services Division	09-90-0054	9-29-77	51965
Complaint File, Higher Education Division	09-90-0055	9-29-77	51966

V43/183 SE 20 78

Name	Number	Last published in FR	
		Issue	Page
Manpower Resources Contractual Services for Reviewing and Evaluating ORD-MR Projects	09-80-0001	9-29-78	51978
OCD Project Staff Lists	09-80-0003	9-29-78	51980

OCD Research and Development Program Mailing Lists	09-60-0008	9-29-78	51981

C. The Education Division (E) changes and deletions are as follows:

1. E clarified the Notification Procedures, Record Access Procedures, and Contesting Records Procedures sections, on order to indicate to the public the information an individual should supply when requesting notification, access, and correction of his/her records.

2. The Guaranteed Student Loan Program of the Office of Education clarified the Categories of Records section of a system named "Claims and Collections Master File," No. 09-40-0027. This system contains records of student borrowers who have defaulted, and for whom the Federal Government has paid claims under the Guaranteed Student Loan Program. The Guranteed Student Loan Program includes both the Federal direct insurance component and the reinsurance state or private non-profit guarantee agency component.

3. The Office of Education deleted the following notices because the systems no longer exist:

Name	Number	Last published in FR	
		Issue	Page
Client List for Direct Services From Regional Resource Centers	09-40-0010	9-20-76	40770-40771

Science Curriculum Evaluation Subjects	09-40-0039	8-27-75	38489
Rand Interactive CCTV Evaluation	09-40-0040	8-27-75	38489

4. The National Institute of Education deleted the following systems.

Name	Number	Last published in FR	
		Issue	Page
National Council on Educational Research Attendance Lists (should not have been identified as a system of records as defined in the Privacy Act)	09-42-0084	9-29-77	52015
NIE Project Management System (reconsideration based upon legal opinion)	09-42-0001	9-29-77	52011
NIE Child Study Center (no longer being used)	09-42-0045	9-29-77	52011
Manpower Economic Education and the Transition from School to Work (no longer being used)	09-42-0012	9-29-77	52008
Evaluation of the Use and Interpretation of the Guidelines for Assessment of Sex Bias and Sex Fairness in Career Interest Inventories (should not have been identified as a system of records as defined in the Privacy Act)	09-42-0010	9-20-76	40761
Debt Counseling Records (replaced by other systems of records)	09-42-0003	9-20-76	40765
Evaluation of a Work Shop on freeing Sex Roles (no longer being used)	09-42-0058	9-20-76	40761
Fellows Program Nominees (no longer being used)	09-42-0064	9-20-76	40765
Management Information System for Vocational Education (no longer being used)	09-42-0061	9-20-76	40764
Hyperkinesis and Food Activities Study (no longer being used)	09-42-0006	9-20-76	40760
Alaska Education Satellite Project Teacher Participants (no longer being used)	09-42-0077	9-20-76	40764
Career Education Rural Needs Assessment (should not have been identified as a system of records as defined in the Privacy Act)	09-42-0062	8-27-75	38467
Employment Inquiries, Suggestions and Resources for the Basic Skills Group (replaced by other system of records)	09-42-0063	8-27-75	38467

5. The Office of the Assistant Secretary for Education has deleted the following notices because the systems no longer exist under the Privacy Act.

Name	Number	Last published in FR	
		Issue	Page
Support for Improvement of Postsecondary Education Contract to the National Radio Institute (NRI) to Develop a Prospectus for Correspondence Study	09-44-0006	9-20-76	40757
Support for Improvement of Postsecondary Education Contract to Heald Colleges to Develop a Model Prospectus for Potential Students	09-44-0007	9-20-76	40757-40758
Support for Improvement of Postsecondary Education Contract to Formative Evaluation Research Associates to Evaluate Women' Programs at Four Types of Postsecondary Institutions	09-44-0008	9-20-76	40758

D. The HCFA changes are a result of an HEW reorganization. The reorganization created HCFA from parts of other HEW organizations. This caused a transfer of systems from SSA, PHS, and HEW Regional Components to HCFA. The following table deletes the notices with the old numbers from SSA, PHS, and HEW Regions and lists the new HCFA numbers for the notices.

Name	Old number	New number	Last published in FR	
			Issue	Page
Medicare Second Surgical Opinion Experiments	None	09-70-0001	3-23-78	12088

E. Following is the PHS summary of modifications and deletions of Privacy Act record System notices, representing changes which the major organizational segments of the Public Health Service have made to their system of individually identifiable records since the 1977 FEDERAL REGISTER annual republication of notices. All current notices will be published in their entirety in the 1978 annual republication. The major organizational segments of the Public Health Service are: the Office of the Assistant Secretary for Health; the Alcohol, Drug Abuse and Mental Health Administration; the Center for Disease Control; the Food and Drug Administration; the Health Resources Administration; the Health Services Administration; and the National Institutes of Health.

1. The following system notices have been assigned new identifiers (numbers) to reflect their administrative transfer from the Health Resources Administration to the Office of the Assistant Secretary for Health, due to reorganization of the Public Health Service. The titles of the systems, designated System Managers, and all records in the systems remain unchanged.

Name	Old Number	New Number
Applied Statistics Training Institute Applicants and Students	09-35-0001	09-37-0009
National Center for Health Services Research Grants Record System	09-35-0002	09-37-0015
Health and Demographic Surveys Conducted in Probability Samples of the U.S. Population	09-35-0017	09-37-0010
Health Manpower Inventories and Surveys	09-35-0034	09-37-0011
Vital Statistics for Births, Death, Fetal Deaths, Marriages and Divorces Occurring in the United States During Each Year	09-35-0035	09-37-0012
Health Resources Utilization Statistics	09-35-0041	09-37-0013
Curricula Vitae of Consultants to the National Center for Health Statistics	09-35-0043	09-37-0014

2. Titles of, and in some cases, the legal authorities for, the following systems of records have been changed to reflect the current status of agency programs:

Number	
09-35-0007	"Public Health Service Scholarship Program" is now "Public Health Service Scholarship and National Health Service Corps Scholarship Program." The Health Professions Educational Assistance Act of 1976 amended the statutory authority for this program, and in so doing, changed its name to the National Health Service Corps Scholarship Program. The change in title of the system of records reflects both the old and the new program names.
09-35-0014	"Special Nursing Research Fellowship Grants" is now "National Research Services Awards" and is accompanied by a change in statutory authority. The changes reflect the expiration of the original authority for this program and its replacement by the new section 472(a)(1) of the Public Health Service Act.
09-10-0010	"Clinical Investigators Records" is now "Bioresearch Monitoring Information System." The change reflects a name change of the program responsibility within the Food and Drug Administration.
09-20-0089	"Study of Short-course Chemotherapy of Pulmonary Tuberculosis" is now "Studies of Treatment of Tuberculosis and other Mycobacterioses." The change reflects a consolidation of two other Privacy Act systems of records with this one.
09-20-0090	"Study of Tuberculin Testing" is now "Studies of Testing for Tuberculosis and other Mycobacterioses." The name has been changed for purposes of clarification; no new studies have been added.

3. Categories of records in the following system have been substantially reduced due to a change in statutory authority:

Number	
09-35-0042	"Transfer of U.S. Students in Foreign Medical Schools to U.S. Schools." The system now contains only names and addresses of students who originally contacted the Health Resources Administration (HRA) because they desired identification for transfer purpose. HRA provides this list as a stated Routine Use of medical schools recruiting to increase their enrollment in order to qualify for capitation grant eligibility.

4. A routine use unique to one system of records has been clarified by the Health Services Administration to reflect an opinion by the Office of the General Counsel that a requested disclosure is indeed permissible under that routine use:

09-15-0019	"Health and Medical Records Systems." The phrase "and to the Bureau of Indian Affairs and their contractors for the identification of American Indian and Alaskan Native handicapped children in support of Pub. L. 94-142, the Education for All Handicapped Children Act of 1975" has been added to the routine use beginning: "(Disclosures may be made to) Federal and non-Federal school systems which serve American Indian and Alaskan Native children for the purpose of student health maintenance."

5. A routine use which was published in the FEDERAL REGISTER for the following system of records on June 29, 1976, was inadvertently omitted from later republication. The Health Resources Administration is correcting the oversight at this time by reinserting the routine use.

09-35-0007	"Public Health Service Scholarship and National Health Service Corps Scholarship Program" (updated title). The routine use being reinstated reads: "(Disclosures may be made) to individuals and organizations deemed qualified by the Secretary to carry out specific research solely for the purpose of carrying out such research (45 CFR, Part 5b, Appendix B, Item 101)."

6. The categories of individuals section of one system notice has been revised to specify and clarify certain categories of individuals who have been included in the system from the beginning. No new categories of individuals are being added to the system at this time.

S E 2 0 7 8

Number	
09-20-0090	"Studies of Testing for Tuberculosis and other Mycobacterioses" (updated title). "Hospital employees" has been changed to read: "Patients, clientele, and employees of health departments, hospitals, and other institutions currently observing and/or treating cases of tuberculosis and other mycobacterial disease."

System notices which are being deleted from the 1978 annual republication were last published in the FEDERAL REGISTER, Vol. 42, No. 189, September 29, 1977. Page numbers in parentheses in the following summaries refer to this publication.

7. The following system notice has been deleted because administration of the system has been transferred from the Center for Disease Control to the National Institutes of Health, where it has been consolidated with and subsumed under system notice 09-25-0130 "Environmental Epidemiology Studies in Division of Cancer Cause and Prevention."

09-20-0111	"Machinists Exposed to Cutting Oil Mist 1938-1967" (page 52120).

8. The notices which follow have been deleted because the record systems to which they pertain, maintained by the Center for Disease Control, have been consolidated with, and subsumed under, other systems maintained by CDC, as indicated:

09-20-0033	"Vibration Laboratory Studies (Experimental Group)" (page 52071), and Occupational Vibration Field Studies Experimental Group)" (page 52071), have both been consolidated with 09-20-0118 "Study at Work-Sites where Agents Suspected of Being Occupational Hazards Exist."
09-20-0034	
09-20-0058	"Potential Grant Applicant File" (page 52089), has been consolidated with 09-20-0055 "Research/Demonstration, and Training Grants, Application files."
09-20-0071	"Determination of Normal Baseline Pulmonary Values" (page 52098) has been consolidated with 09-20-0117 "Medical and Test Record Results of Individuals Involved in NIOSH Laboratory Studies" (page 52124).
09-20-0091	"Rifampin in Initial Treatment of Pulmonary Tuberculosis (page 52111), and "Rifampin-Isoniazed in Initial Treatment of Pulmonary Tuberculosis" (page 52111), have been consolidated with 09-20-0089 "Studies of Treatment of Tuberculosis and other Mycobacterioses" (updated title).
09-20-0092	

9. The following system notices have been deleted because the authorized research studies to which they pertain were not conducted:

Number	Name	Page
09-20-0014	Respirable Insulation Fibers Study.	52055
09-20-0015	Bakers (White Lung) Study	52056
09-20-0018	Study of Bakers and Confection Workers, and Other Associated Industries.	52057
09-20-0043	Pre-test Cosmetology Convention Study.	52077
09-20-0046	Union Pacific Railroad Workers Carbon Monoxide Study.	52080
09-20-0060	Study of Metals Industry Workers.	52090
09-20-0085	Children's Pulmonary Function Study.	52107

11. One notice has been deleted because the system of records is no longer in use:

Number	Name	Page
09-35-0037	Dental Residency Program	52160

F. The SSA changes and deletions are as follows:

1. SSA clarified the Notification Procedures, Record Access Procedures, and Contesting Records Procedures sections in order to indicate to the public the information it should supply when requesting notification, access, and correction of its records.

2. SSA deleted four notices for the following reasons:

The records in one system, 09-60-0113, Supplemental Security Income Priority Correspondence Staff Files, have been destroyed and the system is no longer maintained; in two other systems, 09-60-0039, Court Docket and Card File HEW SSA OMA, and 09-60-0185, Service Officer Demonstration Project HEW SSA OEA, the records are not maintained by an individual identifier, thus, they do not meet the definition of a system of records ac-

cording to the Privacy Act. SSA last published the notices in the FEDERAL REGISTER on September 29, 1977, on pages 52292, 52257, and 52307 respectively. In addition, SSA deleted system entitled, "1978 Survey of Disabled and Nondisabled (Stat.)," because it was consolidated in another SSA notice. SSA last published this notice in the FEDERAL REGISTER on July 21, 1977, on page 37442.

3. Finally, SSA also deleted the following notices which they last published in the September 20, 1976 issue of the FEDERAL REGISTER. We have grouped the notices by reason for deletion. The page numbers are from the September 20, 1976, FEDERAL REGISTER in all cases.

3.1 SSA deleted the following notices because they should not have been identified as systems of records as defined in the Privacy Act.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

NEW MEXICO

Chief, Records Section, Division of Management Services, New Mexico State Office; Redelegation of Authority by State Director

Pursuant to the authority contained in § 1.1 of Bureau order No. 701 dated July 23, 1964, as amended, authority is hereby redelegated to the Chief, Records Section to take the below-listed actions under § 1.6(k) as to mining claim instruments filed for recordation with BLM under 43 CFR Part 3833:

(1) Accept and record instruments meeting recordation requirements;

(2) Notify owners to take curative actions to complete defective filings;

(3) Reject instruments and void claims not filed within the prescribed time periods;

(4) Reject filings and void claims located on lands not available for mineral location on dates of location; and

(5) Void claims when evidence of assessment work is not filed within the required time.

This delegation is effective October 1, 1978. The redelegation published February 10, 1978, FR document 78-3738 is revoked.

LARRY L. WOODARD,
Acting State Director.

[4310-84]

OUTER CONTINENTAL SHELF OIL AND GAS LEASE SALE NO. 48

Location and Date of Hearings Regarding Proposed Oil and Gas Lease Sale No. 48 Offshore Southern California

In accordance with 43 CFR 3301.4, public hearings will be held for the purpose of receiving comments and suggestions relating to a proposed oil and gas lease sale offshore southern California. The hearings will be held in Santa Barbara, Calif., on October 23 and 24, 1978, at the Lobrero Theater, 33 East Canon Perdido Street; in Long Beach, Calif., on October 26 and 27, 1978, in the California Room, Long Beach Convention Center, 300 East Ocean Boulevard; and, in San Diego, Calif., on October 31 and November 1, 1978, in the Copper Room, Convention and Performing Arts Center, 202 C Street. The hearings are scheduled to begin at 9 a.m. on each day. They will last until 5 p.m. each day or until those who have registered to testify or who have appeared to testify, have been heard.

The hearing will provide the Secretary with additional information from both public and private sectors to help evaluate fully the potential effects of the proposed offering of 217 tracts. Comments are solicited concerning effects on area marine, esthetic, recreation, and other resources and on the southern California environment as a whole, as a result of exploration, development, and production phases of the proposed OCS lease sale.

The hearings will also provide the Secretary, under section 102(2)(C) of the National Environmental Policy Act of 1969, with the opportunity to receive additional comments and views of interested State and local agencies.

A draft environmental statement concerning the proposed lease sale (OCS sale No. 48) was made available to the public on August 31, 1978. Copies of this statement can be obtained at the Pacific Outer Continental Shelf Office, Bureau of Land Management, 7663 Federal Building, 300 North Los Angeles Street, Los Angeles, Calif. 90012, and from the Office of Public Affairs, Bureau of Land Management (130), Washington, D.C. 20240.

Copies of the draft environmental statement are also available for review in public libraries througout the area (see FEDERAL REGISTER, vol. 43, No. 170, August 31, 1978, p. 38944).

Interested individuals, representatives of organizations, and public officials wishing to testify at the hearings are requested to contact the Manager, Pacific Continental Shelf Office, Bureau of Land Management, at the above address by 4 p.m., October 16, 1978. Written comments from those unable to attend the hearings should also be addressed to the Manager, Pacific Outer Continental Shelf Office, Bureau of Land Management, at the above address. The Department will accept written comments on the draft environmental statement until November 15, 1978. This should allow ample time for those unable to testify at the hearing to make their views and for the submission of supplemental materials by those presenting oral testimony. Time limitations make it necessary to limit the length of oral presentation to ten (10) minutes. An oral statement may be supplemented, however, by a more complete written statement which may be submitted to the Manager, Pacific Outer Continental Shelf Office, at the time of presentation of the oral statement. Written statements presented in person at the hearings will be considered for inclusion in the hearing record. To the extent that time is available after presentation of oral statements by those who have given advance notice, the hearing officer will give others present an opportunity to be heard.

After all testimony and comments have been received and analyzed, a final environmental statement will be prepared.

ARNOLD E. PETTY,
Acting Associate Director, Bureau of Land Management.

Approved: September 14, 1978.

Gary J. Wicks,
Deputy Assistant Secretary of the Interior.

INTERNATIONAL TRADE COMMISSION

[AA1921-183]

SORBATES FROM JAPAN

Determination of No Injury

SEPTEMBER 13, 1978.

On the basis of its investigation, the Commission has unanimously determined (Commissioners Ablondi and Minchew not participating) that an industry in the United States is not being and is not likely to be injured, and is not prevented from being established, by reason of the importation of sorbates from Japan that are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended.

On June 13, 1978, the United States International Trade Commission received advice from the Department of the Treasury (Treasury) that sorbates from Japan are being, or are likely to be, sold at less than fair value (LTFV) within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)). Treasury excluded from its LTFV determination sorbates produced by Chisso Corp. and Daicel, Ltd. on the basis of no margins and discontinued the investigation with respect to Ueno Fine Chemical Industries, Ltd. on the basis of minimal margins in relation to total sales. On June 16, 1978, the Commission instituted investigation No. AA1921-183 under section 201(a) of said act to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established by reason of the importation of such merchandise into the United States.

Notice of the institution of the investigation and of the public hearing held in connection therewith was published in the FEDERAL REGISTER of June 23, 1978 (43 FR 27252). On August 1, 1978, a hearing was held in Washington, D.C., at which all persons who requested the opportunity were permitted to appear in person or by counsel.

In arriving at its determination, the Commission gave due consideration to written submissions from interested parties and information adduced at the hearing as well as information obtained by the Commission's staff from questionnaires, personal interviews, and other sources.

VIEWS OF CHAIRMAN JOSEPH O., PARKER AND COMMISSIONERS BILL ALBERGER, GEORGE M. MOORE, AND CATHERINE BEDELL

In order for a Commissioner to make an affirmative determination in an investigation under the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)) it is necessary to find that an industry in the United States is being or is likely to be injured, or is prevented from being established, and the injury or likelihood thereof, or the prevention of establishment must be by reason of imports at less than fair value (LTFV).

DETERMINATION

On the basis of information obtained in this investigation, we determine that an industry in the United States is not being and is not likely to be injured, and is not prevented from being established, by reason of the importation of sorbates from Japan which are being or are likely to be sold at LTFV as determined by the Department of the Treasury (Treasury).

THE IMPORTED ARTICLE AND THE DOMESTIC INDUSTRY

Sorbates—sorbic acid and potassium sorbate—are free-flowing powders or granules which are used commercially as food preservatives. In this investigation we consider the relevant domestic industry to consist of the facilities in the United States used in the production of sorbates. Monsanto Co., which operates a sorbate production facility in Chocolate Bayou, Tex., is the sole U.S. producer of food grade sorbates.

LTFV SALES

Treasury investigated the sales of four Japanese producers, which account for nearly all of the sorbate imports from Japan, during the period from March 1, 1977 through August 31, 1977. A weighted average LTFV margin of 5.6 percent was found on the U.S. sales of Nippon Synthetic Chemical Industry Co., Ltd. (Nippon). No margins were found for two producers and the margin on another firm was so minimal in relation to its sales that Treasury discontinued its antidumping investigation of sorbates produced by that firm.

THE QUESTION OF INJURY OR LIKELIHOOD, OR PREVENTION OF ESTABLISHMENT BY REASON OF LTFV SALES

U.S. imports—From 1970 until June 1977 there was no domestic production of sorbates. During this period consumption was entirely supplied by imports from Japan and Germany. Although total Japanese exports of sorbates to the United States increased from 1974 to 1977, Nippon's share of those exports dropped by nearly 30 percent during the same time frame. At the same time Nippon's share of the U.S. market for sorbates was declining, its exports to the petitioner, Monsanto Co. (Monsanto), were increasing. During the period of Treasury's investigation, 63 percent of all the LTFV imports from Japan were entered for Monsanto's account.

Production and shipments—Monsanto began production at its sorbate facility in June 1977. After a small output in the April-June 1977 period, production jumped sharply in each succeeding quarter through April-June 1978. Shipments followed a similar pattern with domestically produced sorbates being relatively limited in 1977, but growing significantly both in actual terms and as a portion of U.S. consumption through the second quarter of 1978.

Capacity utilization—Monsanto's plant at Chocolate Bayou, Tex., is the

largest sorbates facility in the world. The decision to build a plant of such capacity was based on projections by increasing share of the U.S. market. While capacity utilization is not high, it is ahead of Monsanto's own projec-

reference in any construction permit application filed prior to such date.

A copy of Preliminary Design Ap-

V 43 / 183

largest sorbates facility in the world. The decision to build a plant of such capacity was based on projections by the company's market researchers that demand in the United States would increase rapidly between 1978 and 1985. Monsanto clearly understood that its additional capacity could not be obsorbed by the current market, and that it would be necesary to operate its facility at levels significantly below full capacity until the increased demand for sorbates materialized. Capacity utilization in January-June 1978 was in excess of the company's own projections.

Inventories—Inventories for both Monsanto and U.S. importers of sorbates have increased from 1975 through June 1978. This increase appears to be attributable in part to the building of stocks to supply an expanding market. An estimated additional 4 million pounds of sorbates a year will be required for use in bacon beginning in 1979. The recent growth in Monsanto's inventory is compounded by the fact that the company has continued to import significant quantities of sorbates.

Consumption—With the exception of the recessionary year of 1975, U.S. consumption showed a steady growth from 1974 through 1977 and continuing into 1978.

Profits—When Monsanto determined it would establish a sorbates production facility, its internal marketing reports forecast a period of several years before the facility would return significant profits. In the little more than a year the facility has operated, substantial losses have been experienced. These losses which were in part attributable to start-up expenses are diminishing as Monsanto continues to lower its cost per pound to produce sorbates.

Prices—While there has been some price depression, the evidence does not point to LTFV sales as a cause. In fact, since Monsanto began production, it has been the lowest priced supplier of sorbates in the U.S. market. Therefore, it appears Monsanto, as a new entrant in the industry, set its prices at a level to gain market share and establish itself as a major sorbates supplier.

Lost sales—The Commission was unable to verify that any of the instances cited by Monsanto where it either lost sales or was forced to lower its price to make a sale were attributable to sales by Nippon. On the contrary, the Commission did find cases where Nippon and a U.S. importer lost significant sales due to Monsanto's low prices.

Summary—Monsanto did not begin production of sorbates until June 1977. From that starting point to the present its production and shipments have made strong gains, taking an ever increasing share of the U.S. market. While capacity utilization is not high, it is ahead of Monsanto's own projections for this point in the life of its sorbates operation. Losses have been incurred, due largely to high start-up costs, but the financial picture should improve as Monsanto's costs of production go down and its market share continues to grow. Based on these factors we conclude that there is no injury to the domestic sorbates industry.

With respect to the issue of the likelihood of injury, we have concluded such likelihood does not exist. Production, shipments, capacity utilization, and consumption are following definite upward trends and employment has maintained a steady level since Monsanto entered the market as a producer of sorbates. Overall imports and inventories are up. In the case of imports, however, the one Japanese company selling at LTFV prices has reduced its imports sharply. With regard to inventories, they are up for both importers and Monsanto in response to a continuing increase in demand. Monsanto did not turn a profit in the first year of its sorbates operation, but as we stated earlier, a good deal of the loss was incurred by start-up costs. With its increasing market share a better financial performance appears to be in the offing for the domestic producer. These factors clearly do not indicate the likelihood of injury.

The issue of prevention of establishment of an industry by reason of LTFV imports has been raised by the petitioner.[1] Clearly, the domestic producer has been able to obtain a significant market share in the little over a year it has produced sorbates domestically. As the apparent price leader, it is gaining market share and is running ahead of its own projections for success in this industry. The technology for Monsanto's sorbates plant came from the only Japanese firm found to be making LTFV sales, a major percentage of which were made to Monsanto. It is clear that Monsanto has been aided by Nippon, and they also benefited from the LTFV sales. Monsanto is certainly not being prevented from establishing a domestic sorbates industry by reason of LTFV sales from Japan.

[1]Commissioner George M. Moore notes that the criteria for an affirmative determination based on the prevention of the establishment of an industry in the United States (see Regenerative Blower/Pumps from West Germany, Investigation No. AA1921-140, USITC Publication 676, (1974), p. 10) have not been satisfied in this investigation, in that the evidence does not support the contention that LTFV sales have frustrated or forestalled the development of a stable and viable U.S. industry.

Issued: September 14, 1978.

KENNETH R. MASON,
Secretary.

[FR Doc. 78-26448 Filed 9-19-78; 8:45 am]

[7590-01]

NUCLEAR REGULATORY COMMISSION

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS

Meeting

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the Advisory Committee on Reactor Safeguards will hold a meeting on October 5-7, 1978, in Room 1046, 1717 H Street NW., Washington, D.C.

The agenda for the subject meeting will be as follows:

THURSDAY, OCTOBER 5, 1978

8:30 a.m.-8:45 a.m.: Executive Session (Open)—The Committee will hear and discuss the report of the ACRS Chairman regarding miscellaneous matters relating to ACRS activities.

8:30 a.m.-12:30 p.m. and 1:30 p.m.-5 p.m.: Anticipated Transients Without Scram (Open)—The Committee will meet with representatives of the Nuclear Regulatory Commission (NRC) staff and the nuclear and utility industry to hear and discuss presentations regarding provisions to mitigate the consequences of Anticipated Transients Without Scram in Light-Water Reactors.

Portions of this session will be closed as required to discuss proprietary information applicable to this matter.

5 p.m.-8:30 p.m.: Fast Flux Test Facility (Open)—The Committee will hear and discuss presentations by representatives of the NRC staff, the Department of Energy and their contractors regarding proposed operation of the Fast Flux Test Facility.

FRIDAY, OCTOBER 6, 1978

8:30 a.m.-9:45 a.m.: Meeting with the Director, Office of Nuclear Reactor Regulation (Open)—The Committee will hear and discuss information regarding the priorities being assigned to generic Task Action Plans by Office of Nuclear Reactor Regulation. The anticipated schedule for future Committee activites will also be discussed.

9:45 a.m.-12:30 p.m. and 1:30 p.m.-5:45 p.m.: Reactor Safety Research (Open)—The Committee will hear presentations from and hold discussions with representatives of the NRC staff, the nuclear and utility industry, and the Department of Energy regarding proposed reactor safety research programs related to advanced reactor designs, radioactive waste management and disposal and emergency core cooling systems as well as the priorities for the accomplishment of these and other reactor safety research work.

Portions of this session will be closed if necesssary to discuss proprietary information related to these matters.

5:45 p.m.-6:30 p.m.: Executive Session (Open)—The Committee will discuss its proposed report to NRC regarding the Fast Flux Test Facility.

SATURDAY, OCTOBER 7, 1978

8:30 a.m.-2:30 p.m.: Executive Session (Open)—The Committee will complete its report to the NRC regarding proposed operation of the Fast Flux Test Facility and will discuss its position regarding other matters considered during this meeting.

The Committee will also hear and discuss reports of its Subcommittees on regulatory activities and proposed revisions to NRC Regulatory Guides.

The Committee will also discuss the qualification of candidates for appointment to the ACRS.

A portion of this session will be closed to protect information the release of which would represent an unwarranted invasion of personal privacy.

Procedures for the conduct of and participation in ACRS meetings were outlined in the FEDERAL REGISTER on October 31, 1977, page 56972. In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

I have determined in accordance with Pub. L. 92-463 that it is necessary to close portions of this meeting as noted above to protect proprietary information (5 U.S.C. 552b(c)(4)), and to protect information the release of which would represent an unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)).

Background information concerning items to be considered during this meeting can be found in documents on file and available for public inspection as appropriate in the NRC's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 202-634-3265), between 8:15 a.m. and 5 p.m. e.d.t.

Dated: September 15, 1978.

JOHN C. HOYLE,
Advisory Committee Management Officer.

[FR Doc. 78-26388 Filed 9-19-78; 8:45 am]

[7590-01]

[Docket No. STN 50-532]

C. F. BRAUN & CO.

Standard Safety Analysis Report for BRAUN SAR Turbine Island Standard Design and Its Relationship to GESSAR-238 Nuclear Island Standard Design and Issuance of Amendment to Preliminary Design Approval

Notice is hereby given that the staff of the Nuclear Regulatory Commission has issued Amendment No. 1 to Preliminary Design Approval No. PDA-5, dated September 8, 1978, for the reference system design for the turbine island portion of a boiling water reactor nuclear power plant utilizing the General Electric Co. GESSAR-238 nuclear island design, and as described in the application by C. F. Braun & Co. (BRAUN SAR). Preliminary Design Approval No. PDA-5 was issued by the staff of the Nuclear Regulatory Commission on May 7, 1976.

The amendment extends the expiration date for Preliminary Design Approval No. PDA-5 from December 22, 1978 to May 7, 1979. This change was made as a result of the Nuclear Regulatory Commission's August 1978 policy statement on standardization, which provided for administrative extensions of Preliminary Design Approvals for balance of plant designs to 3 years from the date of issuance. Previously, all preliminary design approvals issued for balance of plant designs were set to terminate 3 years after issuance of the preliminary design approval for the mating nuclear steam supply system, even if this resulted in a relatively short lifetime for the balance of plant preliminary design approval. As noted in the Commission's policy statement, this requirement was considered to be an unnecessary penalty.

Amendment No. 1 to PDA-5 is effective as of its date of issuance and shall expire on May 7, 1979, unless earlier superseded by issuance of a final design approval for the BRAUN SAR design, or unless extended by the staff of the Nuclear Regulatory Commission. The expiration of PDA-5, Amendment No. 1 should not affect use of PDA-5, Amendment No. 1 for reference in any construction permit application filed prior to such date.

A copy of Preliminary Design Approval No. PDA-5, Amendment No. 1 dated September 8, 1978, is available for public inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C. 20555.

Dated at Bethesda, Md., this 8th day of September 1978.

For the Nuclear Regulatory Commission.

CLEMENS J. HELTEMES, Jr.,
Chief, Standardization Branch, Division of Project Management.

[FR Doc. 78-26390 Filed 9-19-78; 8:45 am]

[7590-01]

[Docket No. 50-325]

CAROLINA POWER & LIGHT CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 15 to Facility Operating License No. DPR-71, issued to Carolina Power & Light Co. (the licensee) for operation of the Brunswick Steam Electric Plant, Unit No. 1 (the facility), located in Brunswick County, N.C. The amendment is effective as of its date of issuance.

The amendment revises Table 4.7.5-1 Hydraulic Snubber Inspection Schedule to provide a one time extension for the inaccessible snubber inspection interval of ten days to September 24, 1978.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of the amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) and environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendment.

For further details with respect to this action, see (1) the application for amendment dated September 12, 1978, (2) Amendment No. 15 to License No. DPR-71, and (3) the Commission's related Safety Evaluation. These items

[Docket No. 50-254]

COMMONWEALTH EDISON CO. AND IOWA-ILLINOIS GAS AND ELECTRIC CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 47 to Facility Operating License No. DPR-29, issued to Commonwealth Edison Co. (acting for itself and on behalf of the Iowa-Illinois Gas and Electric Co.), which revised the license for operation of the Quad Cities Nuclear Power Station Unit No. 1 (the facility) located in Rock Island County, Ill. The amendment is effective as of its date of issuance.

The amendment authorizes operation of the reactor beyond the previously analyzed end-of-cycle scram reactivity conditions and is based upon new analyses.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) of the application for amendment dated August 10, 1978, (2) Amendment No. 47 to License No. DPR-29, and (3) the Com mission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Moline Public Library, 504 17th Street, Moline, Ill. 61265. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 11th day of September 1978.

[Docket No. 50-155]

CONSUMERS POWER CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 19 to Facility Operating License No. DPR-6, issued to Consumers Power Co. (the licensee), which revised technical specifications for operation of the Big Rock Point Plant (the facility) located in Charlevoix County, Mich. The amendment is effective as of its date of issuance.

The amendment modifies the technical specifications to delete obsolete and descriptive information related to various fuel types used in the facility.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated April 26, 1978, (2) Amendment No. 19 to License No. DPR-6, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Charlevoix Public Library, 107 Clinton Street, Charlevoix, Mich. 49720.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 1st day of September 1978.

[Docket No. 50-255]

CONSUMERS POWER CO.

Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued amendment No. 42 to provisional operating license No. DPR-20, issued to Consumers Power Co. (the licensee) for operation of the Palisades plant (the facility) located in Covert Township, Van Buren County, Mich. The amendment, which adds paragraph 3.E to the license, is effective as of its date of issuance.

The amendment incorporates a condition in the license relating to the completion of facility modifications to improve the fire protection program. Additional operating and surveillance requirements for the modifications being performed will be added to the technical specifications after the modifications are complete.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated March 31, 1977, and supplements thereto dated September 29, 1977, December 15, 1977, May 15, 1978, June 19, 1978, June 29, 1978, June 30, 1978, July 28, 1978, and July 31, 1978, (2) amendment No. 42 to license No. DPR-20, and (3) the Commission's related safety evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Kalamazoo Public Library, 315 South Rose Street, Kalamazoo, Mich. 49006. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

[Docket No. STN 50-560]

FLUOR-PIONEER, INC.

Reference Safety Analysis Report for BOPSSAR Balance of Plant Standard Design and its Relationship to the RESAR-41 Standard Design and Issuance of Amendment to Preliminary Design Approval

Notice is hereby given that the staff of the Nuclear Regulatory Commission has issued amendment No. 1 to preliminary design approval No. PDA—11, dated September 8, 1978, for the reference system design of a balance of plant protion of a pressurized water reactor nuclear powerplant utilizing the Westinghouse RESAR-41 nuclear steam supply system design, and as described in the application by Fluor-Pioneer, Inc. (BOPSSAR). Preliminary design approval No. PDA-11 was issued by the staff of the Nuclear Regulatory Commission on August 17, 1977.

The amendment extends the expiration date for preliminary design approval No. PDA-11 from December 31, 1978 to August 17, 1980. This change was made as a result of the Nuclear Regulatory Commission's August 1978 policy statement on standardization, which provided for administrative extensions of preliminary design approvals for balance of plant designs to 3 years from the date of issuance. Previously, all preliminary design approvals issued for balance of plant designs were set to terminate 3 years after issuance of the preliminary design approval for the mating nuclear steam supply system, even if this resulted in a relatively shory lifetime for the balance of plant preliminary design approval. As noted in the Commission's policy statement, this requirement was considered to be an unnecessary penalty.

Amendment No. 1 to PDA-11 is effective as of its date of issuance and shall expire on August 17, 1980, unless earlier superseded by issuance of a final design approval for the BOPSSAR/RESAR-41 design, or unless extended by the staff or the Nuclear Regulatory Commission. The expiration of PDA-11, amendment No. 1 should not affect use of PDA-11, amendment No. 1 for reference in any construction permit application filed prior to such date.

A copy of preliminary design approval No. PDA-11, amendment No. 1 dated September 8, 1978, is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555.

Dated at Bethesda, Md., this 8th day of September 1978.

For The Nuclear Regulatory Commission.

CLEMENS J. HELTEMES, Jr.,
Chief, Standardization Branch, Division of Project Management.

[Docket No. 50-333]

POWER AUTHORITY OF THE STATE OF NEW YORK

Notice of Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued amendment No. 39 to facility operating license No. DPR-59, issued to power authority of the State of New York (the licensee), which revised technical specifications for operation of the James A. FitzPatrick Nuclear Power Plant (the facility) located in Oswego County, NY. The amendment is effective as of its date of issuance.

This amendment revises the technical specifications relating to the operation and testing of emergency diesel generators during periods of reactor operation when all emergency AC power sources are not available.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment submitted by letter dated December 27, 1976, (2) amendment No. 39 to license No. DPR-59, and (3) the Commission's related safety evalution. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Oswego County Office Building, 46 East Bridge Street, Oswego NY. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

public inspection at the Commission's public document room at 1717 H Street NW., Washington, D.C. 20555.

in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for

tioned proceedings is available for inspection by the public in the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Tulsa City County Library, 400 Civic Center, Tulsa, Okla.

The order modified in certain respects the partial initial decision authorizing limited work authorization issued by the Board on July 24, 1978 (43 FR 35762) which had modified the contents of the final environmental statement prepared by the Commission's Office of Nuclear Reactor Regulation relating to the proposed construction of the Black Fox Station, unit Nos. 1 and 2.

Pursuant to the provisions of § 51.52(b)(3) of 10 CFR Part 51, the final environmental statement is deemed modified to the extent that the Board order of August 24, 1978, and the findings and conclusions contained in the partial initial decision of July 24, 1978, differ from those contained in the final environmental statement. As required by § 51.52(b)(3) of 10 CFR Part 51, a copy of the Board order has been transmitted to the Environmental Protection Agency and other interested agencies and persons in accordance with § 51.26(c) of CFR Part 51.

The Board order, the partial initial decision, and the final environmental statement are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., and at the Tulsa City County Library, 400 Civic Center, Tulsa, Okla. Copies of the final environmental statement (document No. NUREG-0176) may be purchased, at $12 for printed copies and $3 for microfiche, from the National Technical Information Center, Springfield, Va. 22161.

Dated at Bethesda, Md., this 13th day of September 1978.

STONE & WEBSTER ENGINEERING CORP.

Reference Safety Analysis Report for SWESSAR-P1 Balance of Plant Standard Design and its Relationship to the RESAR-41 Standard Design and Issuance of Amendment to Preliminary Design Approval

Notice is hereby given that the staff of the Nuclear Regulatory Commission has issued amendment No. 1 to preliminary design approval No. PDA-4, dated September 8, 1978, for the reference system design of a balance of plant portion of a pressurized water reactor nuclear powerplant utilizing the Westinghouse RESAR-41 nuclear steam supply system design, and as described in the application by Stone & Webster Engineering Corp. (SWESSAR-P1). Preliminary design approval No. PDA-4 was issued by the staff of the Nuclear Regulatory Commission on May 5, 1976.

The amendment extends the expiration date for preliminary design approval No. PDA-4 from December 31, 1978, to May 5, 1979. This change was made as a result of the Nuclear Regulatory Commission's August 1978 policy statement on standardization, which provided for administrative extensions of preliminary design approvals for balance of plant designs to 3 years from the date of issuance. Previously, all preliminary design approvals issued for balance of plant designs were set to terminate 3 years after issuance of the preliminary design approval for the mating nuclear steam supply system, even if this resulted in a relatively short lifetime for the balance of plant preliminary design approval. As noted in the Commission's policy statement, this requirement was considered to be an unnecessary penalty.

Amendment No. 1 to PDA-4 is effective as of its date of issuance and shall expire on May 5, 1979, unless earlier superseded by issuance of a final design approval for the SWESSAR/RESAR-41 design, or unless extended by the staff of the Nuclear Regulatory Commission. The expiration of PDA-4, amendment No. 1 should not affect use of PDA-4, amendment No. 1 for reference in any construction permit application filed prior to such date.

A copy of preliminary design approval No. PDA-4, amendment No. 1, dated September 8, 1978, is available for public inspection at the Commission's public document room at 1717 H Street NW., Washington, D.C. 20555.

STONE & WEBSTER ENGINEERING CORP.

Reference Safety Analysis Report for Swessar-P1 Balance of Plant Standard Design and its Relationship to the Cessar Standard Design and Notice of Issuance of Amendment to Preliminary Design Approval

Notice is hereby given that the staff of the Nuclear Regulatory Commission has issued amendment No. 1 to preliminary design approval No. PDA-6, dated September 8, 1978, for the reference system design of a balance of plant portion of a pressurized water reactor nuclear powerplant utilizing the Combustion Engineering CESSAR nuclear steam supply system design, and as described in the application by Stone & Webster Engineering Corp. (SWESSAR-P1). Preliminary design approval No. PDA-6 was issued by the staff of the Nuclear Regulatory Commission on August 18, 1976.

The amendment extends the expiration date for preliminary design approval No. PDA-6 from December 31, 1978, to August 18, 1979. This change was made as a result of the Nuclear Regulatory Commission's August 1978 policy statement on standardization, which provided for administrative extensions of preliminary design approvals for balance of plant designs to 3 years from the date of issuance. Previously, all preliminary design approvals issued for balance of plant designs were set to terminate 3 years after issuance of the preliminary design approval for the mating nuclear steam supply system, even if this resulted in a relatively short lifetime for the balance of plant preliminary design approval. As noted in the Commission's policy statement, this requirement was considered to be an unnecessary penalty.

Amendment No. 1 to PDA-6 is effective as of its date of issuance and shall expire on August 18, 1979, unless earlier superseded by issuance of a final design approval for the SWESSAR/CESSAR design, or unless extended by the staff of the Nuclear Regulatory Commission. The expiration of PDA-6, amendment No. 1 should not affect use of PDA-6, amendment No. 1 for reference in any construction permit application filed prior to such date.

A copy of preliminary design approval No. PDA-6, amendment No. 1, dated September 8, 1978, is available for public inspection at the Commission's public document room at 1717 H Street NW., Washington, D.C. 20555.

[Docket No. STN 50-495]

STONE & WEBSTER ENGINEERING CORP.

Reference Safety Analysis Report for SWESSAR-P1 Balance of Plant Standard Design and its Relationship to the RESAR-3S Standard Design and Issuance of Amendment to Preliminary Design Approval

Notice is hereby given that the staff of the Nuclear Regulatory Commission has issued amendment No. 1 to preliminary design approval No. PDA-8, dated September 8, 1978, for the reference system design of a balance of plant portion of a pressurized water reactor nuclear powerplant utilizing the Westinghouse RESAR-3S nuclear steam supply system design, and as described in the application by Stone & Webster Engineering Corp. (SWESSAR-P1). Preliminary design approval No. PDA-8 was issued by the staff of the Nuclear Regulatory Commission on March 31, 1977.

The amendment extends the expiration date for preliminary design approval No. PDA-8 from December 30, 1979, to March 31, 1980. This change was made as a result of the Nuclear Regulatory Commission's August 1978 policy statement on standardization, which provided for administrative extensions of preliminary design approvals for balance of plant designs to 3 years from the date of issuance. Previously, all pulmonary design approval issued for balance of plant designs were set to terminate 3 years after issuance of the preliminary design approval for the mating nuclear supply system, even if this resulted in relatively short lifetime for the balance of plant preliminary design approval. As noted in the Commission's policy statement, this requirement was considered to be an unnecessary penalty.

Amendment No. 1 to PDA-8 is effective as of its date of issuance and shall expire on March 31, 1980, unless earlier superseded by issuance of a final design approval for the SWESSAR/RESAR-3S design, or unless extended by the staff of the Nuclear Regulatory Commission. The expiration of PDA-8, amendment No. 1 should not affect use of PDA-8, amendment No. 1 for reference in any construction permit application filed prior to such date.

A copy of preliminary design approval No. PDA-8, amendment No. 1 dated September 8, 1978, is available for public inspection at the Commission's public document room at 1717 H Street NW., Washington, D.C. 20555.

[Docket No. 50-296]

TENNESSEE VALLEY AUTHORITY

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued amendment No. 15 to facility operating license No. DPR-68 issued to Tennessee Valley Authority (the Licensee), which revised technical specifications for operation of the Browns Ferry nuclear plant, unit No. 3, located in Limestone County, Ala. The amendment is effective as of the date of issuance.

This amendment changes the technical specifications to clarify that the reactor protection system instrument channels must be operable only when there is fuel in the reactor. In addition, the change removes the requirement for a minimum countrate on the source range monitors when all the fuel is being removed from the reactor provided that all control rods are fully inserted and rendered electrically inoperable. The change authorized by this amendment is identical to the changes authorized by amendment No. 33 to DPR-33 and amendment No. 30 to DPR-52 for Browns Ferry units Nos. 1 and 2, respectively, issued with the Commission's letter of September 13, 1977.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated September 8, 1978, (2) amendment No. 15 to license No. DPR-68, and (3) the Commission's related safety evaluation. All of these items are available for public inspection at the Commission's public document room, 1717 H Street NW., Washington, D.C., and at the Athens Public Library, South and Forrest, Athens, Ala. 35611. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 12th day of September 1978.

[Docket Nos. 50-500 and 50-501]

TOLEDO EDISON CO., ET AL., DAVIS-BESSE NUCLEAR POWER STATION, UNIT NOS. 2 AND 3

Issuance of Limited Work Authorization (LWA-2)

Pursuant to the provisions of 10 CFR 50.10(e) of the Nuclear Regulatory Commission's (Commission) regulations, the Commission has authorized the Toledo Edison Co. to conduct certain additional activities in connection with the Davis-Besse nuclear power station, units Nos. 2 and 3, prior to a decision regarding the issuance of construction permits.

An initial decision on matters relating to the National Environmental Policy Act and site suitability was issued by the Atomic Safety and Licensing Board in the above captioned proceeding on December 31, 1975. A limited work authorization (LWA-1) was issued to the Toledo Edison Co. on that date, the notice of issuance of which was published in the FEDERAL REGISTER on January 7, 1976 (41 FR 1337).

By letter of May 25, 1978, as amended by a letter of June 6, 1978, the applicant requested additional activities. The activities which the Atomic Safety and Licensing Board has determined may now be authorized are within the scope of those authorized by 10 CFR 50.10(e)(3) and include the following:

perform bedrock rock verification program, including exploratory drilling and remedial

grouting in the containment, auxiliary building, and turbine building areas.

Any activities undertaken pursuant to this limited work authorization are entirely at the risk of the applicant and the grant of such authorization will not preclude the issuance of any subsequent order or decision by the Commission or any of its duly authorized officials to require that such activities be terminated or modified to achieve conformance with any decision or action of the Commission which may be made in this proceeding.

Dated at Bethesda, Md., this 13th day of September 1978.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

grouting in the containment, auxiliary building, and turbine building areas.

Any activities undertaken pursuant to this additional authorization are entirely at the risk of the Toledo Edison Co. and, except as to matters determined under §50.10 (e)(2) and (e)(3)(ii), the grant of the authorization has no bearing on the issuance of construction permits with respect to the requirements of the Atomic Energy Act of 1954, as amended, and rules, regulations, or orders promulgated pursuant thereto.

A supplemental partial initial decision on matters relating to certain safety related activities was issued by the Atomic Safety and Licensing Board in the above captioned proceeding on August 30, 1978. A copy of: (1) The supplemental partial initial decision; (2) the partial initial decision dated December 31, 1975; (3) the applicant's preliminary safety analysis report and amendments thereto; (4) the applicant's environmental report and amendments thereto; (5) the staff's final environmental statement dated September 1975; and (6) the Commission's letter of authorization, dated September 13, 1978, are available for public inspection at the Commission's public document room at 1717 H Street NW., Washington, D.C., and at the Ida Rupp Public Library, 310 Madison Street, Port Clinton, Ohio.

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a guide in its regulatory guide series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.75, Revision 2, "Physical Independence of Electric Systems," describes a method acceptable to the NRC staff of complying with the Commission's regulations with respect to the physical independence of the circuits and electric equipment comprising or associated with the class 1E power system, the protection system, systems actuated or controlled by the protection system, and auxillary or supporting systems that must be operable for the protection system and the systems it actuates to perform their safety-related functions. This guide was revised to incorporate some minor editorial changes that clarify its applicability with respect to defense against the effects of fires.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a).)

Dated at Rockville, Md., this 11th day of September 1978.

For the Nuclear Regulatory Commission.

ROBERT B. MINOGUE,
Director,
Office of Standards Development.

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 20707, 70-6165]

AMERICAN ELECTRIC POWER CO., INC., ET AL.

Proposed Procurement of Letter of Credit by Holding Company for Benefit of Subsidiaries

SEPTEMBER 13, 1978.

American Electric Power Co., Inc. ("AEP"), 2 Broadway, New York, New York 10004, a registered holding Company, and seven of its indirect subsidiary coal companies, Cedar Coal Co. ("CEDAR"), Central Appalachian Coal Co. ("CACO"), Central Coal Co. ("CCO"), Southern Appalachian Coal Co. ("SACO"), 301 Virginia Street, East, Charleston, W. Va. 25327, Central Ohio Coal Co. ("COCO"), Southern Ohio Coal Co. ("SOCO") and Windsor Power House Coal Co. ("Windsor") (collectively "Coal Companies"), 301 Cleveland Avenue SW., Canton, Ohio 44702, have filed a declaration with this Commission pursuant to the Public Utility Holding Act of 1935 ("Act"), designating sections 12(b) and 12(f) of the Act and rule 45 promulgated thereunder as applicable to the proposal. All interested persons are referred to the declaration, which

is summarized below, for a complete statement of the proposal.

AEP requests approval for a letter of credit for $1,534,300 which it procured on behalf of the Coal Companies in accordance with requirements of the negotiated settlement of a coal miner's strike. The letter of credit was procured by AEP on April 7, 1978, pursuant to the emergency provision of rule 45(b)(3) under the Act.

The Coal Companies are members of the Bituminous Coal Operators Association, Inc. ("BCOA"). On March 27, 1978, BCOA entered into the National Bituminous Coal Wage Agreement of 1978 ("Agreement") with the United Mine Workers of America ("UMWA"), ending a prolonged strike. Section (h) of Article XX of the Agreement provides that the BCOA employers shall fully guarantee the health and benefits afforded to the miners by the various existing pension and benefit funds which are administered jointly by the employers and the UMWA.

On April 5, 1978, BCOA advised its members that in order to satisfy the requirements of said section (h) of article XX of the agreement, each member would be called upon to guarantee on a pro rata basis a loan in the amount of $62,000,000, from Citibank, N.A., to the trustees of the Mine Workers Pension fund. Such loan was to enable trustees to pay omitted pensions to retirees during the period of the coal strike. Each BCOA member's pro rata share of such guarantee was determined on the basis of its average contribution to the pension fund during the last 5 years. The Coal Companies' pro rata share of the required guarantee was 2.4747 percent, or a guarantee of $1,534,000, and they were directed to provide a letter of credit in this amount to Citibank, N.A., on April 7, 1978.

On April 7, 1978, it became necessary for AEP to procure the letter of credit on behalf of the Coal Companies in accordance with BCOA requirements. It was so procured by AEP pursuant to the emergency provisions of rule 45(b)(3) of the Act. Emergency circumstances had developed because of the immediate need to provide the guarantee under the agreement, which gave the Coal Companies only 3 days to obtain the specified letter of credit. The Coal Companies were unable to do so on the basis of their own resources.

The letter of credit will cost ¼ percent per annum and is required to remain in effect until October 31, 1980, by which time the loan to the pension trustees is expected to be repaid from future contractual contributions to the fund. It is proposed that the costs of the letter of credit and associated costs will be billed by AEP to the Coal Companies on the same basis as the Coal Companies share in the required guarantees. On this basis, i.e., on the basis of their average contributions to the pension fund during the last 5 years, the percentage of the cost of the letter of credit attributable to each of the seven Coal Companies would be:

CEDAR—14.4 percent.
CACO—8.2 percent.
CCO—2.0 percent.
SACO—7.6 percent.
COCO—27.3 percent.
SOCO—32.3 percent.
Windsor—8.2 percent.

The fees and expenses to be incurred in connection with the proposal are estimated at $11,590. It is stated that no state or federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than October 11, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to convert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarants at the above-stated addresses and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 20708; 70-6143]

AMERICAN ELECTRIC POWER CO., INC.

Proposal That Holding Company Act as Surety for Subsidiary

SEPTEMBER 13, 1978.

Notice is hereby given that American Electric Power Co., Inc. ("AEP"), 2 Broadway, New York, N.Y. 10004, a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Co. Act of 1935 ("Act"), designating sections 12(b) and 12(f) of the Act and rule 45 promulgated thereunder as applicable to the proposal. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposal.

AEP requests approval of a surety bond in the amount of $3,200,000 that was posted with the Public Service Commission of West Virginia ("State Commission") on March 28, 1978, by AEP as surety and Wheeling Electric Co. ("Wheeling") as principal pursuant to the provisions of rule 45(b)(3) under the Act.

On March 31, 1978, Wheeling filed with the State Commission for increased rates on electric service in West Virginia. The additional rate increases were to be effective subject to the posting by Wheeling of the required bond, which would assure the making of appropriate refunds to customers in the event the State Commission's final order should require refunds to be made. The State Commission has permitted AEP to act as surety for Wheeling in lieu of Wheeling's posting a commercial bond. It is expected that the amount of the bond for the new rates will not exceed $3,200,000, which is the estimated additional annual revenue that the new rates will provide. The bond includes a 9½ per annum interest rate as required by West Virginia statute.

The fees and expenses to be incurred in connection with the proposal are estimated at $2,500. The Public Service Commission at West Virginia has authorized the proposal. No other state commission and no federal commission, other than this Commission, has jurisdiction over the proposal.

Notice is further given that any interested person may, not later than October 11, 1978, request in writing that a hearing be held on such matter stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such re-

quest should be served personally or by mail upon the declarant at the above-stated address, and proof of

may be withheld from the public in accordance with the provisions of 5 U.S.C. 552) were made available to the

be examined at the Commission's Public Reference Section, 1100 L Street NW., Washington, D.C. 20549.

sion at 500 North Capitol Street NW., Washington, D.C. 20549.

Notice is further given that any in-

tember 11, 1978, seeking, to the extent necessary, and order pursuant to sections 26(b) and 11 of the Act approv-

owners. will include, among other things, a copy of the agreement and plan of reorganization as well as a cur-

quest should be served personally or by mail upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in rules 20(a) and 100 thereof or take such other actions as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereto.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 15163; SR-BSE-78-7]

BOSTON STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change

SEPTEMBER 14, 1978.

On June 29, 1978, the Boston Stock exchange, Inc. ("BSE") 53 State Street, Boston, Mass. 02109, filed with the Commission, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1943, 15 U.S.C. 78(s)(b)(1) (the "Act") and rule 19b-4 thereunder, copies of a proposed rule change which would amend chapter V, section 3 of the BSE rules to clarify that the rules of the registered clearing agency through which clearing and settlement are to take place govern the settlement of contracts for delivery of securities. The BSE's stated purpose of the rule filing is to eliminate a conflict concerning the size of delivery of stocks among clearing agencies through which clearing and settlement may take place.

Notice of the proposed rule change toghether with the terms of substance of the proposed rule change was given by publication of a Commission release (Securities Exchange Act release No. 34-14934, July 6, 1978) and by publication in the FEDERAL REGISTER (43 FR 35410, August 9, 1978). All written statements with respect to the proposed rule change which were filed with the Commission and all written communications relating to the proposed rule change between the Commisssion and any person were considered and (with the exception of those statements or communications which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552) were made available to the public at the Commission's public reference room.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered national securities exchanges, and in particular, the requirements of section 6 and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[File No. 81-3553]

BOURNS, INC.

Application and Opportunity for Hearing

SEPTEMBER 11, 1978.

Notice is hereby given that Bourns, Inc., ("Applicant") has filed an application pursuant to section 12(h) of the Securities Exchange Act of 1934, as amended, (the "31934 Act") seeking an exemption from the requirements to file reports pursuant to sections 13 and 15(d) of the Exchange Act.

The Applicant states, in part:

1. The Applicant is a California corp. subject to the reporting provisions of sections 13 and 15(d) of the 1934 Act.

2. On May 31, 1978, Applicant effected a reverse split of its outstanding Common Stock, as a result of which its public shareholdings were cancelled. The one shareholder of record is the trustee of various trusts which hold shares benefically owned by Marlan E. Bourns and members of his family.

In the absence of an exemption, Applicant would be required to file pursuant to sections 13 and 15(d) of the 1934 Act and the rules and regulations thereunder, the remaining quarterly reports on form 10-Q and annual report on form 10-K for the 1978 fiscal year. Applicant believes that its request for an order exempting it from the provisions of sections 13 and 15(d) of the 1934 Act is appropriate in view of the fact that the time, effort and expense involved in preparation of additional periodic reports would be disproportionate to any benefit to the public.

For a more detailed statement of the information presented, all persons are referred to said application which may be examined at the Commission's Public Reference Section, 1100 L Street NW., Washington, D.C. 20549.

Notice is further given that any interested person not later than October 5, 1978, may submit to the Commission in writing his views or any substantial facts bearing on this application or the desirability of a hearing thereon. Any such communication or request should be addressed to Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request, and the issues of fact and law raised by the application which he desires to controvert. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof. At any time after said date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc. 78-26380 Filed 9-19-78; 8:45 am]

[8010-01]

[File No. 81-380]

CULLIGAN INTERNATIONAL CO.

Application and Opportunity for Hearing

SEPTEMBER 11, 1978.

Notice is hereby given that Culligan International Co. ("Applicant") has filed an application pursuant to section 12(h) of the Securities Exchange Act of 1934, as amended (the "1934 Act"), for an order exempting Applicant from the provisions of sections 13 and 15(d) of the 1934 Act.

The Applicant states, in part:

1. On June 2, 1978, Applicant merged with and became a wholly-owned subsidiary of Beatrice Foods Co. As a result of the merger, Applicant no longer has any publicly owned common stock.

2. The Applicant has filed with the Commission its form 10-Q for the period ended January 31, 1978, and a form 8-K which reflects the merger.

Applicant argues that the granting of the exemption would not be inconsistent with the public interest or the protection of investors.

For a more detailed statement of the information presented, all persons are referred to said application which is on file in the offices of the Commission at 500 North Capitol Street NW., Washington, D.C. 20549.

Notice is further given that any interested person not later than October 5, 1978, may submit to the Commission in writing his views or any substantial facts bearing on this application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 500 North Capitol Street NW., Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request, and the issues of fact and law raised by the application which he desires to controvert. At any time after said date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 10399; 812-4342]

EDUCATORS LIFE INSURANCE CO. OF AMERICA ET AL.

Filing of Application for an Order Approving Substitution of Securities Held by Three Unit Investment Trusts and for an Order Exempting a Proposed Transaction and Permitting a Proposed Transaction

SEPTEMBER 13, 1978.

Notice is hereby given that Educators Life Insurance Co. of America ("Educators"), Depositor of Educators Life Insurance Co. Separate Account A ("Separate Account A"), a unit investment trust registered under the Investment Co. Act of 1940 ("Act"), Horace Mann Life Insurance Co. ("HM Life"), Depositor of Horace Mann Life Insurance Co. Separate Account B ("Separate Account B"), one Horace Mann Plaza, Springfield, Ill. 62715, a unit investment trust registered under the Act, Life Insurance Co. of North America ("LINA"), Depositor of Life Insurance Co. of North America Separate Account A ("LINA Separate Account"), 1500 Arch Street, Philadelphia, Pa. 19101, a unit investment trust registered under the Act, Horace Mann Fund, Inc. ("HMF"), an open-end management investment company registered under the Act, and NEA Mutual Fund, Inc. ("NEAMF"), 7900 Westpark Drive, McLean, Va. 22102, an open-end management investment company registered under the Act, filed and application on August 2, 1978, and amendments thereto on September 11, 1978, seeking, to the extent necessary, and order pursuant to sections 26(b) and 11 of the Act approving the substitution of the securities held by Separate Account A, Separate Account B and LINA Separate Account (collectively the "Separate Accounts") with respect to all contracts of the Separate Accounts whose underlying investment medium consists of shares of NEAMF. The application further seeks, to the extent necessary, an Order pursuant to section 17(b) of the Act for exemption from Section 17(a) of the Act and pursuant to section 17(d) of the Act and rule 17(d)-1 thereunder, to permit the purchase of assets of NEAMF by HMF in return for shares of HMF to be issued at net asset value. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Under a proposed agreement and plan of reorganization, HMF would acquire substantially all of the assets of NEAMF in return for shares of HMF issued at net asset value, and NEAMF would distrubute the HMF shares pro rata in return for its outstanding shares. NEAMF then expects to file for deregistration under the Act and dissolve.

Shares of NEAMF are held directly by members of the public and are also held by the Separate Accounts, each of which holds such shares to fund variable annuity contracts. Educators, HM Life and LINA, Depositors of the Separate Accounts, are under common control. HM Life is also the Depositor for HM Life Separate Account, which holds shares of HMF as the investment medium for variable annuity contracts issued by such separate account. Moreover, Separate Account A holds shares of both NEAMF and HMF as the investment medium for two classes of variable annuity contracts issued by Separate Account A. Separate Account A holds in excess of 5% of the outstanding voting shares of each of HMF and NEAMF.

Applicants state that the agreement and plan of reorganization between NEAMF and HMF is conditioned on, among other things, the approval of the proposed sale of assets by a majority of the shareholders of NEAMF at a special meeting called for the purpose of considering approval of the transaction. In additon, the substitution of HMF shares for NEAMF shares as the underlying funding medium of contracts issued by the Separate Accounts is subject to the approval of persons owning variable annuity contracts funded by such separate accounts.

Applicants state that the proxy materials being forwarded to all persons having an interest in NEAMF shares, including variable annuity contract owners. will include, among other things, a copy of the agreement and plan of reorganization as well as a current propectus of HMF. The assets of NEAMF to be sold to HMF will be valued on the basis set forth in rule 2a-4 under the Act, and the HMF shares will issued at net asset value also determined in accordance with said rule 2a-4. The HMF shares issued in consideration of the acquisition of NEAMF asstes will be distributed on a prorata basis to the NEAMF shareholders.

Applicants assert that the proposed transaction will benfit the shreholders of both HMF and NEAMF through increase of the investment aset base and that there is no overreaching or participation on terms less advantageous to any registered investment company.

SECTIONS 26 AND 11

In pertinent part, section 26(b) provides that it shall be unlawful for any depositor or trustee of a registered unit investment trust holding the security of a single issuer to substitute another security for such security unless the Commission shall have approved the substitution.

Section 11(a) of the Act provides that it shall be unlawful for any registered open-end company, or any principal underwriter for such a company, to make, or cause to be made, an offer to the holder of a security of such company, or of any other open-end investment company, to exchange his security for a security in the same or another such company on any basis other than the relative net asset values of the respective securities to be exchanged, unless the terms of the offer have first been submitted to and approved by the Commission. Section 11(c) provides that, irrespective of the basis of exchange, the provisions of subsection (a) shall be applicable to any type of offer of exhange of the securites of registered unit investment trusts for the securities of any other investment company.

If the proposed transaction is consummated, the Separate Accounts will, as shareholders of NEAMF, each receive a pro rata portion of the HMF shares issued in the transaction. While applicants assert that such a distribution and receipt is a succession of interest rather than a true substitution or exchange, the provisions of sections 26(b) and 11 are deemed relevant to the transaction.

Applicants represent that approval of the proposed substitution of shares incident to the proposed plan of reorganization would be in the best interest of the Separate Accounts' contractholders. NEAMF has experienced a significant and continuing decline in the sale of shares, as well as an increase in redemptions since 1974. Ap-

plicants further represent that it is reasonable to expect that the investment objectives of the contractholders under common control. Applicant Separate Accounts, Educators, HM Life and LINA therefore request an exemption

ports adhering to all the item requirements of form 10-K, 10-Q, and 8-K, as

1. Pursuant to a statutory merger effected on May 28, 1978, a wholly-owned subsidiary of Dayton-Hudson Corp. ("DHC") was merged with and

filed with the Commission, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act") and rule 19b-4

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,

plicants further represent that it is reasonable to expect that the investment objectives of the contractholders of separate Account B and of the NEA contracts issued by Separate Account A and LINA Separate Account ("the affected contractholders") would be best served through the integration of NEAMF with another fund, thus affording all NEAMF shareholders the economies of scale that generally accrue from a larger asset pool and a broader shareholder base. The above facts and representations form the basis of the Application for orders pursuant to sections 26(b) and 11 of the Act.

SECTION 17

Section 17(a) of the Act, in relevant part, makes it unlawful (unless and exemption is granted pursuant to section 17(b)) for any affiliated person or principal underwriter for a registered investment company or any affiliated person of such a person or principal underwriter, acting as principal, to sell property to or purchase property from such investment company unless the transaction involves certain exceptions. The contemplated transaction involves HMF and NEAMF, acting as principal, buying and selling securities or property to or from one another.

Section 17(b) of the Act states that the Commission shall grant an order exempting a proposed transaction from the provisions of section 17(a) of the Act where the evidence establishes that the proposed transaction is reasonable and fair, does not involve overreaching, is consistent with the policy of each registered investment company, and is consistent with the general purposes of the Act. Applicants assert that the proposed transaction meets all the criteria set forth in the Act.

Section 17(d) of the Act and rule 17d-1 thereunder, in pertinent part, prohibit an affiliated person or an affiliated person of an affiliated person of a registered investment company, acting as principal, from participating in or effecting a transaction in connection with any joint enterprise or joint arrangement in which such registered company is a participant unless the Commission has entered an order after application, permitting such transaction.

Separate Account A is an affiliated person of both HMF and NEAMF, so that the provisions of section 17(d) are applicable to the extent that the Separate Accounts, and the depositors thereof, included herein are principals participating in the transaction between HMF and NEAMF by virtue of ownership of the shares of the two investment companies by such separate accounts and, further, to the extent that insurance company depositors of such various separate accounts are under common control. Applicant Separate Accounts, Educators, HM Life and LINA therefore request an exemption from section 17(d) of the Act and rule 17d-1 thereunder to the extent necessary to permit the consummation of the transaction between HMF and NEAMF.

Notice is further given that any interested person may, not later than October 6, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the addresses stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request as provided by rule 0-5 of the rules and regulations promulgated under the Act. An order disposing of the application will be issued as of course following October 6, 1978, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[File No. 81-361]

GLENDALE FEDERAL SAVINGS & LOAN ASSOCIATION

Application and Opportunity for Hearing

SEPTEMBER 11, 1978.

Notice is hereby given that Glendale Federal Savings & Loan Association (the "Applicant"), has filed an application pursuant to section 12(h) of the Securities Exchange Act of 1934, as amended (the "1934 Act"), for exemption from certain reporting requirements under section 13 and the operation of section 16 of the 1934 Act.

The application states is part:

In the absence of an exemption, the Applicant would be required to file reports adhering to all the item requirements of form 10-K, 10-Q, and 8-K, as well as reports required pursuant to section 16 of the 1934 Act.

Applicant believes that the exemptive order requested by it is appropriate in view of the fact that form 10-Q and certain items of form 10-K, as well as reports required pursuant to section 16 of the 1934 Act are a inapplicable to the pass-through mortgage pool arrangement.

For a more detailed statement of the information presented, all persons are referred to said application which is on file in the office of the Commission at 500 North Capitol Street NW., Washington, D.C. 20549.

Notice is further given that any interested person not later than October 5, 1978, may submit to the Commission in writing his views on any substantial facts bearing on the application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 500 North Capitol Street NW., Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request, and the issues of fact and law raised by the application which he desires to controvert.

Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof. At any time after said date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[File No. 81-396]

MERVYN'S

Application and Opportunity for Hearing

SEPTEMBER 11, 1978.

Notice is hereby given that Mervyn's has filed an application pursuant to section 12(h) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), for an order exempting the company from filing the form 10-K for the fiscal year ending January 28, 1979, the interim forms 10-Q, and all other reports required under section 15(d) of the Exchange Act.

Mervyn's application discloses in part:

1. Pursuant to a statutory merger effected on May 28, 1978, a wholly-owned subsidiary of Dayton-Hudson Corp. ("DHC") was merged with and into Mervyn's, and each outstanding share of Mervyn's common stock was converted into 0.8 of a share of DHC. As a result of this merger, Mervyn's is now a wholly-owned subsidiary of DHC and no longer has any public stockholders.

2. Audited financial statements for Mervyn's have been presented as of the latest fiscal year ended January 29, 1978 in the proxy statement sent to Mervyn's shareholders in connection with the merger.

3. The common stock of DHC is registered with the Commission pursuant to section 12(b) of the 1934 Act. DHC files current, quarterly and annual reports pursuant to section 13 of such Act.

4. The results of Mervyn's operations will be reported by DHC in its periodic reports on a consolidated basis.

For a more detailed statement of the information presented, all persons are referred to said application which is on file in the offices of the Commission at 500 North Capitol Street NW., Washington, D.C. 20549.

Notice is further given that any interested person no later than October 5, 1978, may submit to the Commission in writing his view of any substantial facts bearing on this application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 500 North Capitol Street NW., Washington, D.C. 20549, and should state briefly the nature of the interest of the person submiting such information or requesting the hearing, the reasons for such request, and the issues of fact and law raised by the application which he desires to controvert. At any time after said date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[Release No. 15142; SR-NSCC-77-10]

NATIONAL SECURITIES CLEARING CORP.

Order Approving Proposed Rule Change

SEPTEMBER 13, 1978.

On November 9, 1977, National Securities Clearing Corp. ("NSCC"), 55 Water Street, New York, N.Y. 10041, filed with the Commission, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act") and rule 19b-4 thereunder, copies of a proposed rule change which amended the rules and procedures of NSCC's SCC division. Notice of the filing together with the terms of substance of the proposed rule change was given by publication of Securities Exchange Act release No. 34-14172 (Nov. 16, 1977), and by publication in the FEDERAL REGISTER (42 FR 60033, Nov. 23, 1977). Public comment was invited. No written comments were received. Certain nonsubstantive technical amendments were made by NSCC in letters received July 28, 1978, and September 8, 1978.

The purpose of the proposed rule change is to consolidate the SCC, ASECC, and NCC division rules and procedures in the SCC division. The proposed rule change is separate from NSCC's conversion to a single system offering one-account processing. That conversion can occur only after certain conditions set forth in the Commission's order of January 13, 1977, granting NSCC registration as a clearing agency are satisfied.

In considering SR-NSCC-77-10, the Commission has not conducted a de novo examination of the existing rules or procedures of the ASECC, SCC, and NCC divisions. Rather, the Commission's review is limited to the questions of: (i) Whether the consolidated rules in toto will provide adequate levels of service to participants in the SCC division and, (ii) whether the amendments to existing rules are consistent with the Act.[1] The Commission may find it appropriate to effect a de novo review of some or all of these rules at the time it adopts standards for the permanent registration of clearing agencies.[2]

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies and, in particular, the requirements of sections 17A and 19 of the Act and rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

[1] The proposed addition of rule 41, to provide a national institutional settlement system, is not approved by this order. That proposed change is the subject of a separate filing, SR-NSCC-77-7, filed Sept. 1, 1977, and will be considered under that caption. See Securities Exchange Act release No. 34-13969 (Sept. 19, 1977) and 42 FR 49537 (Sept. 27, 1977).

[2] See Securities Exchange Act of 1934 release No. 34-145531 (Mar 6, 1978).

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[File No. 1-6565]

RYAN HOMES, INC.

Application To Withdraw From Listing and Registration

SEPTEMBER 13, 1978.

The above-named issuer has filed an application with the Securities and Exchange Commission, pursuant to section 12(d) of the Securities Exchange Act of 1934 and rule 12d2-2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

The common stock of Ryan Homes, Inc. (the "Company"), has been listed for trading on the Amex since January 17, 1972. On May 25, 1978, the stock was also listed for trading on the New York Stock Exchange, Inc. ("NYSE"), and concurrently therewith, such stock was suspended from trading on the Amex. In making the decision to withdraw its common stock from listing and registration on the Amex, the Company considered the direct and indirect costs and expenses attendant on maintaining a dual listing on both exchanges. The Company does not see any particular advantage in the dual trading of its stock and believes that dual listing would fragment the market for such stock.

The application relates solely to the withdrawal from listing and registration on the Amex and shall have no effect on the continued listing of such common stock on the NYSE. The Amex has posed no objection in this matter.

Any interested person may, on or before October 13, 1978, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission will, on the basis of the application and any other information submitted to it, issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Washington, D.C. 20007, and its officers and directors will be:

fire which occurred on April 30, 1978. Eligible persons, firms, and organizations may file applications for loans

SMALL BUSINESS ADMINISTRATION

[License No. 03/04-0081]

CAPITAL INVESTMENT CO. OF WASHINGTON

Filing of Application for Transfer of Control of Licensed Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration pursuant to 13 CFR 107.701 (1978) for transfer of control of the Capital Investment Co. of Washington (CICW), a District of Columbia corporation, and a Federal licensee under the Small Business Investment Act of 1958, as amended (Act), with its office presently located at 1120 19th Street NW., Washington, D.C. 20036.

CICW was licensed on January 22, 1963. Psychiatric Institutes of America (PIA), 1010 Wisconsin Avenue NW., Suite 900, Washington, D.C. 20007, a portfolio concern of CICW, has made an offer to purchase all of CICW's outstanding shares of capital stock at $6 per share. Shareholders of approximately 80 percent of such shares have indicated a willingness to sell their shares to PIA. In addition, CICW is to issue an additional 20,000 shares of its capital stock for $6 per share, which shares will be offered to shareholders of record as of the date of consummation of the transfer of control of CICW on a pro-rata basis. PIA has agreed to purchase all offered shares that CICW's shareholders decline to purchase.

The shares of CICW's capital stock to be acquired by PIA will be held by its wholly owned subsidiary, Ionia Corp. (Ionia), a Delaware corporation, organized on June 26, 1978. The officers and directors of Ionia Corp. are:

Edward S. Fleming, President and Director.
Louis M. Kaplan, Vice President, Director.
John Petrou, Treasurer and Director.
Richard Wakefield, Vice President.

As a condition to approval of the proposed transfer of control, CICW will divest itself of $80,000 worth of debentures of PIA now held in its portfolio. It is anticipated that this divestiture will be accomplished by redemption by PIA of the debentures involved. Upon consummation of the foregoing transactions, private paid-in capital and paid-in surplus of CICW will total $502,097, its office will be moved to 1010 Wisconsin Avenue NW., Washington, D.C. 20007, and its officers and directors will be:

Edward S. Fleming, 5017 Tilden Street NW., Washington, D.C., President and Director.
Louis M. Kaplan, 7300 Brennon Lane, Chevy Chase, Md., Vice President and Director.
John Petrou, 7409 Arrowood Road, Bethesda, Md., Secretary, Treasurer and Director.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed new owner, and the probability of a successful operation of CICW under its control in accordance with the Act and regulations.

Notice is hereby given that any person may, not later than October 5, 1978, submit written comments on this application to The Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

A similar notice shall be published by PIA in a newspaper of general circulation in Washington, D.C.

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco, and Firearms

[Notice No. 78-15; Reference: ATF O 1100.96]

DELEGATION TO THE ASSISTANT DIRECTOR (REGULATORY ENFORCEMENT) OF AUTHORITIES OF THE DIRECTOR IN 27 CFR PART 18, PRODUCTION OF VOLATILE FRUIT-FLAVOR CONCENTRATES

Delegation Order

1. *Purpose.* This order delegates certain authorities, now vested in the Director by regulations in 27 CFR Part 18, to the Assistant Director (Regulatory Enforcement), and permits redelegation to regulatory enforcement personnel, headquarters and field.

2. Background. Under current regulations, the Director has authority to take final action on matters relating to the location, construction, arrangement, equipment, and qualification of plants for the manufacture of volatile fruit-flavor concentrates; and to the production, removal, sale, transportation, and use of such concentrates and of the fruit mash or juice from which such concentrates are produced. It has been administratively determined that certain authorities now vested in the Director by regulations in 27 CFR Part 18, Production of Volatile Fruit-Flavor Concentrates, belong at and should be delegated to a lower organizational level.

3. *Delegations.* Under the authority vested in the Director, Bureau of Alcohol, Tobacco, and Firearms, by Treasury Department order No. 221, dated June 6, 1972, and by 26 CFR 301.7701-9, there is hereby delegated to the Assistant Director (Regulatory Enforcement) the authority to take final action on the following matters relating to 27 CFR Part 18, Production of Volatile Fruit-Flavor Concentrates:

a. To prescribe all forms required by regulations, under 27 CFR 18.21.

b. To authorize and approve, pursuant to written application:

(1) The establishment of a concentrate plant on premises where fruit products, other than concentrates, are made, under 27 CFR 18.22(a) and 27 CFR 18.43.

(2) The use of the premises and equipment of a concentrate plant, or any portion thereof, for the carrying on of any business other than that of a manufacturer of concentrates (and activities incident thereto), under 27 CFR 18.22(b) and 27 CFR 18.42.

c. To approve, pursuant to written applications:

(1) Alternate or procedures including alternate construction or equipment in lieu of methods or procedures specifically prescribed in regulations, under 27 CFR 18.23(a).

(2) Emergency variations from specified requirements in regulations for construction, equipment; and methods of operations, under 27 CFR 18.23(b).

d. To withdraw authorization of any alternate method or procedure or of any variation, under 27 CFR 18.23.

e. To approve other materials and methods for plats and flow plans, under 27 CFR 18.62.

f. To approve processes for reproducing records and the types of records to be reproduced, under 27 CFR 18.142.

4. *Redelegation.* a. The authorities in paragraphs 3a and 3d above, may be redelegated to regulatory enforcement personnel in Bureau headquarters not lower than the position of branch chief.

b. The authorities in paragraph 3b, 3c, 3e, and 3f above, may be redelegated to regulatory enforcement personnel in Bureau headquarters not lower than the position of ATF specialist.

c. The authority in paragraph 3c(2) above to approve emergency variations and the authority in paragraph 3e above, may be redelegated to regional regulatory administrators, who may redelegate these authorities to regional regulatory enforcement personnel not lower than the position of chief, technical services, or area supervisor.

d. The authorities in paragraph 3b(2), 3c(1), and 3f above with respect to approval of a request for carrying on of such other businesses, the use of alternate methods or procedures, and the type of record for reproduction and the reproduction process may be redelegated to regional regulatory administrators whenever a request is of an identical type that has been previously approved by Bureau headquarters. Regional regulatory administrators may redelegate these authorities to regional regulatory enforcement personnel not lower than the position of chief, technical services, or area supervisor.

e. The authority in paragraph 3d above may be redelegated to regional regulatory administrators, who may redelegate this authority to regional regulatory enforcement personnel not lower than the position of chief, technical services, or area supervisor. Whenever an alternate method or procedure or variaton is withdrawn, the regional regulatory administrator will notify the Assistant Director (Regulatory Enforcement) of such withdrawal.

Effective date: This order becomes effective on September 13, 1978.

Signed: September 13, 1978.

JOHN G. KROGMAN,
Acting Director.

AMERICAN MANUFACTURER'S PETITION

Extension of Time for Comments Concerning American Manufacturer's Petition To Reclassify Certain Battery-Operated Clock Movements

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of extension of time for comments.

SUMMARY: This notice extends the period of time permitted for the submission of comments in response to a recent American manufacturer's petition to the Customs Service to reclassify certain battery-operated clock movements. This extension will permit the preparation and submission of more detailed comments by interested members of the public.

DATES: Comments must be received on or before October 17, 1978.

ADDRESS: Comments, preferably in triplicate, should be addressed to the Commissioner of Customs, Attention: Regulations and Legal Publications Division, Room 2335, U.S. Customs

Service, 1301 Constitution Avenue NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT:

Ms. Wanda Brasher, A:P:EE, 1111 Constitution Avenue NW., Room 706WB, Washington, D.C. 20224.

EFFECTIVE DATE: September 20, 1978.

FOR FURTHER INFORMATION CONTACT: it has been determined that the non grant within the meaning of the Act excessive remission of the commodity

Service, 1301 Constitution Avenue NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT:

Simon Cain, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202 566-5727.

SUPPLEMENTARY INFORMATION: On August 17, 1978, the Customs Service published in the FEDERAL REGISTER (43 FR 36548) a notice of receipt of an American manufacturer's petition, filed under section 516 of the Tariff Act of 1930, as amended (19 U.S.C. 1516). On the basis that the metal bearings used in the clock movements are substitutes for jewels and should be counted as jewels for tariff purposes, the petitioner has requested the reclassification of certain battery-operated clock movements under items 720.04 or 720.08, Tariff Schedules of the United States.

COMMENTS

Comments concerning the American manufacturer's petition were to have been received on or before September 18, 1978. However, the Customs Service has been requested to extend the period of time for submission of comments in order to allow additional time for the preparation of a response to the American manufacturer's petition. As a result, the period of time for submission of comments is extended to October 17, 1978.

[4810-22]

CERTAIN ELECTRICAL SOUND EQUIPMENT AND ELECTRONIC MUSICAL INSTRUMENTS FROM JAPAN

Final Countervailing Duty Determination

AGENCY: U.S. Customs Service, Treasury.

ACTION: Final countervailing duty determination.

SUMMARY: This is to advise the public that a countervailing duty investigation has resulted in a final determination that the Government of Japan has not given benefits considered to be bounties or grants within the meaning of the countervailing duty law on the manufacture or exportation of certain electrical sound equipment and electronic musical instruments.

EFFECTIVE DATE: September 20, 1978.

FOR FURTHER INFORMATION CONTACT:

Steve Garment, Operations Officer, Technical Branch, Duty assessment Division, Office of Operations, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone 202-566-5492.

SUPPLIMENTARY INFORMATION: On March 3, 1978, an "Initiation of Countervailing Duty Investigation and Preliminary Determination" was published in the FEDERAL REGISTER (43 FR 8898). That notice stated that it had preliminarily been determined that no benefits had been bestowed by the Government of Japan to manufacturers/exporters of certain electrical sound equipment and electronic musical instruments which constituted bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (19 U.S.C. 1303) (hereinafter referred to as "the Act").

The electrical sound equipment specified in the petition includes all types of audio frequency electric amplifiers (by themselves or in combination with RF amplifiers), Microphones, speakers (including, but not limited to, horns, drivers, and tweeters), speaker arrays or systems, mixers, public address systems, and sound amplifier sets, classifiable under items 684.70, 685.25, 685.32, 685.40, 685.50, and 688.40 of the Tariff Schedules of the United States Annotated (TSUSA). The electronic musical instruments specified in the petition are classifiable under items 725.46 and 725.47 of the TSUSA.

The preliminary determination stated in part:

> The only "bounty or grant" alleged by the petitioner to be countervailable is the forgiveness of the Japanese Commodity Tax upon the export of the subject merchandise. The Department has consistently held that the non-excessive rebate or remission of indirect taxes, directly related to an exported product, does not constitute a bounty or grant within the meaning of the law. The fact that imports into Japan of the subject merchandise are subject to duty does not, in itself, operate to make commodity tax rebates bounties or grants; and there is no evidence before the Department that the commodity tax rebates, either in themselves or in conjunction with Japanese import duties on similar merchandise, operate to confer bounties or grants on exports from Japan of the merchandise in question. (43 FR 8899.)

Upon investigation, no information has been presented which would indicate any excessive rebate or remission of the commodity tax. Since neither remission of the commodity tax on exports nor assessment of both the commodity tax and customs duties on imports, by itself, would constitute the payment or bestowal of a bounty or grant within the meaning of the Act it has been determined that the non excessive remission of the commodity tax, notwithstanding the conjunction of the practices alleged by the petitioner, similarly would not constitute a "bounty or grant." Support for such an interpretation has been provided by the Supreme Court in *Zenith Radio Corporation v. United States*, —— U.S. ——, 46 U.S.L.W. 4752 (June 21, 1978), wherein the court affirmed the Secretary's determination that the nonexcessive remission of an indirect tax (the Japanese commodity tax) did not constitute a bounty or grant within the meaning of the Act.

Therefore, it is determined that no bounty or grant is being paid or bestowed, directly or indirectly, within the meaning of section 303 of the Act (19 U.S.C. 1303), upon the manufacture, production, or exportation of certain electrical sound equipment and electronic musical instruments from Japan.

This notice is published pursuant to section 303(a), Tariff Act of 1930, as amended (19 U.S.C. 1303(a)).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department order 190 (revision 15), March 16, 1978, the provisions of Treasury Department order No. 165, revised, November 2, 1954, and § 159.47 of the Customs regulations (19 CFR 159.47), insofar as they pertain to the issuance of a final countervailing duty determination by the Commissioner of Customs, are hereby waived.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

J. S HENDERSON II,
Chief, Employment Branch, Personnel Division.

(1) The authority granted to the Commissioner of Internal Revenue by Treasury Department order No. 82 (revised Jan. 17, 1973), for performing the operating functions relating to Internal Revenue personnel security, including the granting of security clearances and the denial or termination of clearances based upon a determination that they are not required, is hereby delegated to:

(a) The Deputy Commissioner, as personnel security officer, to grant, deny, and terminate, top secret, secret, and confidential security clearances for officials and employees occupying critical-sensitive positions as defined in IRM 0736 or given critical-sensitive assignments, except top secret security clearances for:

(1) Presidential appointees requiring confirmation by the Senate;

(2) Occupants of executive level positions (Commissioner, Deputy Commissioner, and Chief Counsel);

(b) The Director, Security Standards and Evaluation Division, to grant, deny, and terminate secret or confidential security clearances for officials and employees occupying other than critical-sensitive positions or on other than critical-sensitive assignments.

(2) The authority granted in 1(a) may be redelegated to the Assistant to the Deputy Commissioner; the authority granted in 1(b) may not be redelegated.

(3) The authority to deny or terminate clearances granted in both 1(a) and 1(b) includes only the denial or termination of a clearance based upon the determination that the clearance is not required. The authority to terminate (deny or withdraw) clearances based upon security implications is not granted by this delegation order. Such authority is held by the Director of Personnel, Department of the Treasury, as delegated by the Secretary of the Treasury and the Assistant Secretary for Administration.

(4) Delegation order No. 133 (rev. 1), issued May 20, 1975, is superseded.

JEROME KURTZ,
Commissioner.

IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY-ELIMINATION OF GATEWAY LETTER NOTICES

Notice

SEPTEMBER 13, 1978.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's gateway elimination rules (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission within 10 days from the date of this publication. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

The following applicants seek to operate as a *common carrier*, by motor vehicles, over irregular routes.

MC 34631 (Sub-E2) (Correction), filed May 15, 1974, published in the FEDERAL REGISTER, issue of September 22, 1975, and partially republished, as corrected, this issue. Applicant: A. ARNOLD AND SON TRANSFER & STORAGE CO. INC., 2600 West Broadway, P.O. Box 11033, Louisville, KY 40211. Representative: A. F. Mirus (same as above). *Household goods*, as defined by the Commission, • • • (3) between points in Adair County, MO, on the one hand, and, on the other, points in Logan, Otero, Larimer, Arapahoe, Las Animas, Moffat, Mesa, and La Plata Counties, CO, and between St. Louis County, MO, on the one hand, and, on the other, points in Mesa and La Plata Counties, CO (KY*); • • • (17) between points in Camden County, NJ, on the one hand, and, on the other, points in Cabell County, WV (KY*) • • • (24) between points in Hamilton, Scioto, Darke, Franklin, Belmont, Williams, Lucas, Cuyahoga, and Trumbull Counties, OH, on the one hand, and, on the other, points in Logan, Otero, Denver, Moffat, and La Plata Counties, CO (KY*) • • • (35) between points in Hamilton and Scioto Counties, OH, on the one hand, and, on the other, points in Wood, Cabell, Mercer,

Greenbrier, Randolph, Monongalia, and Raleigh Counties, WV, and be-

the one hand, and, on the other, points in Plymouth, Hampden, and

(Chenoa, IL, Terre Haute, IN*); (15) from points in WI to points in MS (Bloomington, IL, Birdspoint, MO*).

Clinton, IL, or Arkansas City, KS*); (20) from points in NJ to points in WA (Philadelphia, PA, Steubenville, OH,

112304 (Sub-65) shall be of no further force and effect after August 9, 1980. (Gateway eliminated: Evansville, IN.)

nent parts, from Owensboro, KY, to points in WI. Limitation: The certificate in MC 112304 (Sub-65) shall be of

Greenbrier, Randolph, Monongalia, and Raleigh Counties, WV, and between points in Belmont and Trumbull Counties, OH, on the one hand, and, on the other, points in Cabell County, WV, and between points in Williams and Lucas Counties, OH, on the one hand, and, on the other, points in Cabell, Mercer, Greenbrier, and Raleigh Counties, WV, and between points in Darke County, OH, on the one hand, and, on the other, points in Cabell, Mercer, Greenbrier, Randolph, and Raleigh Counties, WV, and between points in Franklin County, OH, on the one hand, and, on the other, points in Cabell, Mercer, Greenbrier, and Raleigh Counties, WV, and between points in Cuyahoga County, OH, on the one hand, and, on the other, points in Cabell, Mercer, Greenbrier Counties WV, (KY*) * * * (53) between points in Washington, Pittsylvania, Roanoke, Fairfax, Nansemond, Henrico, and Frederick Counties, VA, on the one hand, and, on the other, points in Alcorn, Coahoma, Washington, Lowndes, Warren, Lauderdale, Hinds, Harrison, and Forest Counties, MS (KY*) * * * (107) between points in Greenwood County, SC, on the one hand, and, on the other, points in Adams, Clinton, Bradford, Somerset, McKean, and Butler Counties, PA, and between points in Anderson County, SC, on the one hand, and, on the other, points in Somerset and Butler Counties, PA, and between points in Richland County, SC, on the one hand, and, on the other, points in KcKean and Butler Counties, PA, and between points in Jasper County, SC, on the one hand, and, on the other, points in Clinton, Somerset, McKean, and Butler Counties, PA, and between points in Charleston County, SC, on the one hand, and, on the other, points in McKean and Butler Counties, PA (KY*) * * * (144) between points in Escanaba, Leon, Duval, Hillsborough, Polk, Brevard, Lee, Palm Beach, and Dade Counties, FL, on the one hand, and, on the other, points in Osage, Choctaw, Garfield, Canadian, Carter, Cimarron, Custer, Jackson, and Comanche Counties, OK (except between points in Escanaba County, FL, on the one hand, and, on the other, points in Osage, Choctaw, Garfield, Canadian, Carter, Custer, Jackson, Comanche Counties, OK), and between points in Leon County, FL, on the one hand, and, on the other, points in Choctaw and Carter Counties, OK (KY*) * * * (168) between points in Lake, Vigo, Vanderberg, Marion, Lawrence, Wayne, and Jefferson Counties, IN, on the one hand, and, on the other, points in Plymouth, Hampden, Berkshire, Franklin, and Middlesex Counties, MA, and between points in St. Joseph County, IN, on the one hand, and, on the other, points in Plymouth, Hampden, and Middlesex Counties, MA, and between points in Steuben County, IN, on the one hand, and, on the other, points in Plymouth County, MA (KY*) * * * (Gateways eliminated: noted by asterisks above.)

NOTE.—The purpose of this republication is to correct the territorial descriptions in the above-numbered sections. The remainder of the letter-notice remains as previously published.

MC 83539 (Sub-E373), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, TX 75222. Representative: Douglas Anderson (same as above). *Commodities*, the transportation of which, because of their size or weight, require the use of special equipment, and *related machinery*, between points in DE, on the one hand, and, on the other, points in MA. (Gateways eliminated: Philadelphia, PA and points in PA.)

MC 83539 (Sub-E380), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, TX 75222. Representative: Douglas Anderson (same as above). *Commodities*, the transportation of which, because of their size or weight, require the use of special equipment between DC, on the one hand, and, on the other, points in MA. (Gateway eliminated: Philadelphia, PA and points in PA.)

MC 83539 (Sub-E436), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, TX 75222. Representative: Douglas Anderson (same as above). *Commodities*, the transportation of which, because of their size or weight, require the use of special equipment, and *related machinery, parts, materials and supplies* when moving in connection with such commodities; between points in the State of CT, on the one hand, and, on the other, points in DC. (Gateways eliminated: Philadelphia, PA and points in PA.)

MC 88368 (Sub-E36)(correction), filed May 15, 1974, published in the FEDERAL REGISTER issue of August 25, 1975, and partially republished, as corrected, this issue. Applicant: CARTWRIGHT VAN LINES, INC., 1109 Cartwright Avenue, Grandview, MO 64030. points in VA on and south of a line beginning at the Chesapeake Bay on U.S. Hwy 460 to junction U.S. Hwy 58, then along U.S. Hwy 58 to the junction VA Hwy 70, then along VA Hwy 70 to the TN-VA State line; (4) between points in the PA counties of Bedford, Blair, Cambria, and Somerset Counties, on the one hand, and, on the other, points in AZ, CA, CO, FL, ID, LA, MN, MT, NV, NM, OR, TX, UT, WA, WY, and points in AL on and south of a line beginning at the AL-SC State line on U.S. Hwy 78 to junction U.S. Hwy 278, then along U.S. Hwy 278 to the AL-MS State line; points in AR on and south of a line beginning at the AR-MS State line on AR Hwy 8 to junction U.S. Hwy 82, then along U.S. Hwy 82 to the AR-TX State line; points in GA on and south of a line beginning at the GA-SC State line on U.S. Hwy 301 to junction GA Hwy 24, then along GA Hwy 24 to junction Interstate Hwy 20, then along Interstate Hwy 20 to junction U.S. Hwy 78, then along U.S. Hwy 78 to the AL-GA State line; points in KS on and west of a line beginning at the KS-OK State line on U.S. Hwy 281 to the KS-NE State line; points in MN on and west of a line beginning at the MN-ND State line on U.S. Hwy 10 to junction MN Hwy 34, then along MN Hwy 34 to junction MN Hwy 6, then along MN Hwy 6 to junction U.S. Hwy 71, then along U.S. Hwy 71 to the United States-Canadian border; points in MS on and south of MS Hwy 12; points in NE on and west of a line beginning at the KS-NE State line on U.S. Hwy 281 to the NE-SD State line; points in ND on and west of a line beginning at U.S. Hwy 281 to junction ND Hwy 11, then along ND Hwy 11 to the MN-ND State line; points in OK on and west of a line beginning at the AR-OK State line on U.S. Hwy 70 to junction OK Hwy 3, then along OK Hwy 3 to junction U.S. Hwy 270, then along U.S. Hwy 270 to junction OK Hwy 34, then along OK Hwy 34 to the KS-OK State line; SC points on and south of a line beginning at Charleston, SC, on U.S. Hwy 17 to junction SC Hwy 64, then along SC Hwy 64 to junction U.S. Hwy 301, then along U.S. Hwy 301 to the SC-GA State line; points in SD on and west of a line beginning at the SD-NE State line on U.S. Hwy 281 to the ND-SD State line; (5) between points in Indiana and Jefferson Counties, PA, on the one hand, and, on the other, points AZ, CA, CO, FL, ID, LA, MT, NV, NM, OR, TX, UT, WA, WY, and points in AL on and south of a line beginning at the AL-GA State line on U.S. Hwy 278 to junction Interstate Hwy 59, then along Interstate Hwy 59 to junction AL Hwy 14, then along AL Hwy 14 to junction AL Hwy 17, then along AL Hwy 17 to junction AL Hwy 32, then along AL Hwy 32 to the AL-MS State line; points in AR on and south of a line beginning at the AR-MS State line on AR Hwy 8 to junction U.S. Hwy 82, then along U.S. Hwy 82 to junction U.S. Hwy 71, then along U.S. Hwy 71 to junction AR Hwy 32, then along AR Hwy 32 to the AR-OK State line; points in CT on and east of a line beginning at New London, CT on CT Hwy 32 to junction CT Hwy 52, then along CT Hwy 52 to junction U.S. Hwy 6, then along U.S. Hwy 6 to the CT-RI State line; points in GA on and south of a line beginning at the GA-SC State line on Interstate Hwy 20 to junction U.S. Hwy 78, then along U.S. Hwy 78 to the AL-GA State line; points in KS on and west of a line beginning at the KS-OK State line on U.S. Hwy 283, then along U.S. Hwy 283 to junction Interstate Hwy 70, then along Interstate Hwy 70 to junction KS Hwy 25, then along KS Hwy 25 to junction U.S. Hwy 36, then along U.S. Hwy 36 to junction KS Hwy 161, then along KS Hwy 161 to the KS-NE State line; points in ME on and east of a line beginning at the ME-NH State line on U.S. Hwy 202 to junction ME Hwy 4, then along ME Hwy 4 to junction ME Hwy 27, then along ME Hwy 27 to the United States-Canadian border; points in MD east of the Chesapeake Bay in the counties of Dorchester, Somerset, Wicomico, Worcester; points in MA on and east of MA Hwy 123; points in MS on and south of a line beginning at the AL-MS State line on MS Hwy 14 to junction MS Hwy 12, then along MS Hwy 12 to the AR-MS State line; points in NE on and west of a line beginning at the KS-NE State line NE Hwy 61, then along NE Hwy 61 to junction NE Hwy 2, then along NE Hwy 2 to junction U.S. Hwy 385, then along U.S. Hwy 385 to the NE-SD State line; points in NH on and east of NH Hwy 125; points in NC on and south of a line beginning at the VA-NC State line on U.S. Hwy 501 to junction U.S. Hwy 1, then along U.S. Hwy 1 to the NC-SC

State line; points in ND on and west of a line beginning at the ND-SD State line on ND Hwy 49 to junction ND

junction U.S. Hwy 90, then along U.S. Hwy 90 to junction Interstate Hwy 10, then along Interstate Hwy 10 to the

junction of the York River and Chesapeake Bay, then along the south bank of the York River to junction VA Hwy

Hwy 91 to the ID-UT State line; points in VA in the counties of Accomack and Northampton; (9) between

ginning at the CA-OR State line along U.S. Hwy 97, then north along U.S. Hwy 97 to junction U.S. Hwy 197, then

points in OR on and northwest of U.S.

State line; points in ND on and west of a line beginning at the ND–SD State line on ND Hwy 49 to junction ND Hwy 200, then along ND Hwy 200 to junction U.S. Hwy 83, then along U.S. Hwy 83 to the United States-Canadian border; OK, points on and west of a line beginning at the AR–OK State line on U.S. Hwy 70 to junction U.S. Hwy 77, then along U.S. Hwy 77 to junction OK Hwy 19, then along OK Hwy 19 to junction U.S. Hwy 62, then along U.S. Hwy 62 to junction U.S. Hwy 281, then along U.S. Hwy 281 to junction U.S. Hwy 183, then along U.S. Hwy 183 to the KS–OK State line; points in RI on and south of U.S. Hwy 6; points in SC on and south of a line beginning at the NC–SC State line on U.S. Hwy 1 to juncton U.S. Hwy 378, then along U.S. Hwy 378 to junction at the GA–SC State line; points in SD on and west of a line beginning at the ND–SD State line on U.S. Hwy 385 to junction SD Hwy 79, then along SD Hwy 79 to junction U.S. Hwy 212, then along U.S. Hwy 212 to junction SD Hwy 73, then along SD Hwy 73 to the ND–SD State line; points in VA on and east of a line beginning at the NC–VA State line on U.S. Hwy 501 to junction U.S. Hwy 15, then along U.S. Hwy 15 to junction U.S. Hwy 360, then along U.S. Hwy 360 to junction U.S. Hwy 460, then along U.S. Hwy 460 to junction VA Hwy 36, then along VA Hwy 36 to the south bank of the James River, then along the James River to the Chesapeake Bay, including all points in Accomack and Northampton Counties; (6) between points in the PA counties of Butler, Lawrence, and Mercer, on the one hand, and, on the other, points in the States of CA, DE, OR, WA, and, points in AZ on and west of a line beginning at the AZ–NM State line on Interstate Hwy 10 to junction U.S. Hwy 666, then along U.S. Hwy 666 to junction U.S. Hwy 180, then along U.S. Hwy 180 to junction U.S. Hwy 89 to the AZ–UT State line; GA, points on and east of a line beginning at the GA–SC State line on U.S. Hwy 301 to junction U.S. Hwy 80, then along U.S. Hwy 80 to junction GA Hwy 56, then along GA Hwy 56 to junction U.S. Hwy 221, then along U.S. Hwy 221 to junction U.S. Hwy 280, then along U.S. Hwy 280 to junction U.S. Hwy 319, then along U.S. Hwy 319 to the AL–FL State line; FL, points on and east of U.S. Hwy 231; ID, points on and west of U.S. Hwy 93; MD, points east of the Susquehanna River and the Chesapeake Bay; MT, points on and west of U.S. Hwy 93; NV, points on and west of U.S. Hwy 93; NM, points on and south of U.S. Hwy 180; NC, points on and east of Interstate Hwy 95; SC, points on and east of U.S. Hwy 301; TX, points on and south of a line beginning at the Gulf of Mexico on U.S. Hwy 87 to junction U.S. Hwy 90, then along U.S. Hwy 90 to junction Interstate Hwy 10, then along Interstate Hwy 10 to the NM–TX State line; UT, points on and west of a line beginning at the UT–AZ State line on U.S. Hwy 89 to junction UT Hwy 20, then along UT Hwy 20 to junction U.S. Hwy 91, then along U.S. Hwy 91 to junction UT Hwy 21, then along UT Hwy 21 to the NV–UT State line; VA, points in Accomack and Northampton Counties and those south of the Chesapeake Bay and east of U.S. Hwy 13; (7) between points in the PA counties of Erie and Crawford, on the one hand, and, on the other, points in CA, FL, OR, WA, and points in AL on and south of a line beginning at the AL–GA State line on U.S. Hwy 80, then along U.S. Hwy 80 to junction U.S. Hwy 29, then along U.S. Hwy 29 to junction U.S. Hwy 84, then along U.S. Hwy 84 to junction Interstate Hwy 65, then along Interstate Hwy 65 to junction Interstate Hwy 10, then along Interstate Hwy 10 to the AL–MS State line; points in AZ on and west of a line beginning at the AZ–NM State line on U.S. Hwy 70, to junction AZ Hwy 75, then along AZ Hwy 75 to junction U.S. Hwy 666, then along U.S. Hwy 666 to junction U.S. Hwy 180, then along U.S. Hwy 180 to junction U.S. Hwy 89, then along U.S. Hwy 89 to the AZ–UT State line; points in GA on and east of a line beginning at the GA–SC State line on Interstate Hwy 20 to junction GA Hwy 22, then along GA Hwy 22 to the AL–GA State line; points in ID on and west of U.S. Hwy 93; points in MD in the counties of Dorchester, Somerset, Wicomico, and Worcester; points in MT on and west of U.S. Hwy 93; points in NV on and west of a line beginning at the NV–UT State line on U.S. Hwy 6 to junction U.S. Hwy 93, then along U.S. Hwy 93 to the ID–NV State line; points in NM on and south of a line beginning at the NM–TX State line along Interstate Hwy 10 to the AZ–NM State line; points in NC on and east of U.S. Hwy 501; points in SC on and east of U.S. Hwy 1; points in TX on and south of a line beginning at the LA–TX State line along Interstate Hwy 10 to junction TX Hwy 97, then along TX Hwy 97 to junction TX Hwy 140, then along TX Hwy 140 to junction U.S. Hwy 57, then along U.S. Hwy 57 to junction TX Hwy 117, then along TX Hwy 117 to junction U.S. Hwy 90, then along U.S. Hwy 90 to junction Interstate Hwy 10, then along Interstate Hwy 10 to the NM–TX State line; points in UT on and west of a line beginning at the AZ–UT State line on U.S. Hwy 89 to junction UT Hwy 26, then along UT Hwy 26 to junction U.S. Hwy 6, then along U.S. Hwy 6 to the NV–UT State line; points in VA in the counties of Accomack and Northampton, and on and south of a line beginning at the junction of the York River and Chesapeake Bay, then along the south bank of the York River to junction VA Hwy 33, then along VA Hwy 33 to junction U.S. Hwy 60, then along U.S. Hwy 60 to junction U.S. Hwy 360, then along U.S. Hwy 360 to junction U.S. Hwy 15, then along U.S. Hwy 15 to junction VA Hwy 304, then along VA Hwy 304 to junction U.S. Hwy 501, then along U.S. Hwy 501 to the NC–VA State line; (8) between points in the PA counties of Allegheny and Beaver, on the one hand, and, on the other, points in AZ, CA, DE, NV, OR, WA, and points in the following described States: points in AL on and south of a line beginning at the AL–GA State line on AL Hwy 10 to junction U.S. Hwy 51, then along U.S. Hwy 51 to junction U.S. Hwy 84, then along U.S. Hwy 84 to junction U.S. Hwy 331, then along U.S. Hwy 331 to the AL–FL State line; points in CO on and west of a line beginning at the CO–NM State line on U.S. Hwy 550 to junction U.S. Hwy 160, then along U.S. Hwy 160 to junction U.S. Hwy 666, then along U.S. Hwy 666 to the CO–UT State line; points in FL on and east of U.S. Hwy 331; points in GA on and south of a line beginning at the Atlantic Ocean on U.S. Hwy 84 to junction U.S. Hwy 82, then along U.S. Hwy 82 to the AL–GA State line; points in ID on and west of Interstate Hwy 15; points in MD east of the Susquehanna River and the Chesapeake Bay; points in MT on and west of Interstate Hwy 15; points in NM on and west of a line beginning at the NM–TX State line along Interstate Hwy 10 to junction Interstate Hwy 25, then along Interstate Hwy 25 to junction NM Hwy 6, then along NM Hwy 6 to junction U.S. Hwy 66, then along U.S. Hwy 66 to junction U.S. Hwy 666, then along U.S. Hwy 666 to the CO–NM State line; points in NC on and south of a line beginning at the NC–VA State line on U.S. Hwy 17 to junction U.S. Hwy 13, then along U.S. Hwy 13 to junction U.S. Hwy 301, then along U.S. Hwy 301 to the NC–SC State line; points in SC east of a line beginning at the NC–SC State line on U.S. Hwy 301 to junction U.S. Hwy 52; then along U.S. Hwy 52 to the Atlantic Ocean; points in TX on and south of a line beginning at the Gulf of Mexico on U.S. Hwy 87 to junction TX Hwy 97, then along TX Hwy 97 to junction TX Hwy 173, then along TX Hwy 173 to junction U.S. Hwy 90, then along U.S. Hwy 90 to junction Interstate Hwy 10, then along Interstate Hwy 10 to the TX–NM State line; points in UT on and west of a line beginning at the UT–CO State line on UT Hwy 46 to junction U.S. Hwy 163, then along U.S. Hwy 163 to junction U.S. Hwy 6, then along U.S. Hwy 6 to junction Interstate Hwy 15, then along Interstate Hwy 15 to junction U.S. Hwy 91, then along U.S.

Hwy 91 to the ID–UT State line; points in VA in the counties of Accomack and Northampton; (9) between the PA counties of Greene and Washington, on the one hand, and, on the other, points in the States of AZ, CA, NV, OR, UT, WA, and points in the following described States: FL, points on and south of FL Hwy 70; ID, points on and west of U.S. Hwy 91; MT, points on and west of a line beginning at the MT–WY State line on U.S. Hwy 89 to junction U.S. Hwy 91, then along U.S. Hwy 91 to the United States-Canada border; NM, points on and west of a line beginning at the United State-Mexico border on NM Hwy 11 to junction U.S. Hwy 180, then along U.S. Hwy 180 to the AZ–NM State line; TX, points on and south of a line beginning at the Gulf of Mexico on TX Hwy 44 to junction U.S. Hwy 59, then along U.S. Hwy 59 to the United States-Mexico border. (Gateways eliminated: Carlisle or Waynesboro, PA, and Lineboro, MD.)

MC 117574 (Sub-E119), filed July 16, 1975. Applicant: DAILY EXPRESS, INC., P.O. Box 39, Carlisle, PA 17013. Representative: E. S. Moore, Jr. (same as above). *Agriculatural implements, agricultural machinery, tractors,* with or without attachments, *cranes, industrial and processing machinery, and attachments, accessories, and parts of all of the above-described commodities,* which are also heavy machinery or contractors equipment, and are also machinery, *commodities* which, because of size or weight, require the use of special equipment or special handling (except boats), *or self-propelled articles,* each weighing 15,000 pounds or more (when transported on trailers): (1) Between points in the NC counties of Macon and Swain, on the one hand, and, on the other, points in WA on and north of a line beginning at Aberdeen along U.S. Hwy 12, then east along U.S. Hwy 12 to junction Interstate Hwy 5, then north along Interstate Hwy 5 to its termination at the WA-Canada border; (2) between points in the NC counties of Haywood, Jackson, and Transylvania, on the one hand, and, on the other, points in CA on and north and west of a line beginning at the Pacific Ocean along CA Hwy 116 to junction CA Hwy 12, then along CA Hwy 12 to junction CA Hwy 121, then along CA Hwy 121 to junction CA Hwy 29, then south along CA Hwy 29 to junction Interstate Hwy 80, then along Interstate Hwy 80 to junction CA Hwy 89, then north along CA Hwy 89 to junction CA Hwy 36, then north along CA Hwy 36 to junction U.S. Hwy 395, then north along U.S. Hwy 395 to junction CA Hwy 299 then north along CA Hwy 299 to junction CA Hwy 139, then north along CA Hwy 139 to the CA–OR State line; points in OR on and west of a line beginning at the CA–OR State line along U.S. Hwy 97, then north along U.S. Hwy 97 to junction U.S. Hwy 197, then north along U.S. Hwy 197 to the OR–WA State line; points in WA on and west of a line beginning at the OR–WA State line along U.S. Hwy 197 to junction WA Hwy 14, then along WA Hwy 14 to junction U.S. Hwy 97 then north along U.S. Hwy 97 to junction Interstate Hwy 82, then north along Interstate Hwy 82 to junction Interstate Hwy 90, then east along Interstate Hwy 90 to the WA–ID State line; points in ID west of a line beginning at the ID–WA State line along U.S. Hwy 95 to its termination at Canadian border; (3) between points in the State of NC counties of Buncombe, Henderson, and Madison, on the one hand, and, on the other, points in CA on and north and west of a line beginning at the Pacific Ocean along U.S. Hwy 101, then north along U.S. Hwy 101 to junction CA Hwy 20, then east along CA Hwy 20 to junction Interstate Hwy 80, then east along Interstate Hwy 80 to the CA–NV State line, then north along the CA–NV State line to junction U.S. Hwy 395, then north along U.S. Hwy 395 to the CA–OR State line; points in ID on and west of a line beginning at the WA–ID State line along U.S. Hwy 95, then north along U.S. Hwy 95 to the ID–Canadian border; points in OR on and north and west of a line beginning at the CA–OR State line along U.S. Hwy 395, then north along U.S. Hwy 395 to junction OR Hwy 11, then north along OR Hwy 11 to the OR–WA State line; points in WA on and north and west of a line beginning at the OR–WA State line along U.S. Hwy 395, then northeast along U.S. Hwy 395 to the WA–ID State line; (4) between points in the NC counties of McDowell, Polk, and Rutherford, on the one hand, and, on the other, points in CA on and north of a line beginning at the Pacific Ocean near Pismo Beach along U.S. Hwy 101 to junction CA Hwy 58, then along CA Hwy 58 to junction U.S. Hwy 395, then north along U.S. Hwy 395 to the CA–NV State line; points in ID on and northwest of a line beginning at the ID–OR State line along U.S. Hwy 95, then north along U.S. Hwy 95 to junction U.S. Hwy 12, then east along U.S. Hwy 12 to the ID–MT State line; points in MT on and west of a line beginning at the ID–MT State line along U.S. Hwy 95 to junction U.S. Hwy 12, then east along U.S. Hwy 12 to junction Interstate Hwy 15, then north along Interstate Hwy 15 to its termination at the MT-Canada border; points in NV on and west of a line beginning at the CA–NV State line along U.S. Hwy 395, then north along U.S. Hwy 395 to junction U.S. Hwy 40, then east along U.S. Hwy 40 to junction U.S. Hwy 95, then north along U.S. Hwy 95 to the NV–OR State line; points in OR on and northwest of U.S. Hwy 95; (5) between points in the NC counties of Yancey and Mitchell and Avery, on the one hand, and, on the other, points in CA on and west of a line beginning at San Francisco, CA, on the Pacific Ocean northeast along Interstate Hwy 80 to the CA–NV State line, then along the CA–NV State line to junction U.S. Hwy 395, then northeast along U.S. Hwy 395 to the CA–OR State line; points in ID on and north of a line beginning at the WA–ID State line, then along Interstate Hwy 90 to junction U.S. Hwy 95, then north along U.S. Hwy 95 to junction U.S. Hwy 2, then east along U.S. Hwy 2 to the ID–MT State line; points in MT on and west of a line beginning at the ID–MT State line along U.S. Hwy 2 to junction U.S. Hwy 93, then north along U.S. Hwy 93 to its termination at the Canadian border; Reno, NV; points in OR on and west of a line beginning at the OR–CA State line along U.S. Hwy 395 to junction OR Hwy 31, then northwest along OR Hwy 31 to junction U.S. Hwy 97, then north along U.S. Hwy 97 to junction Interstate Hwy 80, then east along Interstate Hwy 80 to junction U.S. Hwy 395, then along U.S. Hwy 395 to the OR–WA State line; points in WA on and north and west of a line beginning at the OR–WA State line north along U.S. Hwy 12 to junction WA Hwy 127, then along WA Hwy 127 to junction U.S. Hwy 195, then north along U.S. Hwy 195 to junction Interstate Hwy 90, then east along Interstate Hwy 90 to the WA–ID State line; (6) between points in the State of NC counties of Ashe and Watauga, on the one hand, and, on the other, points in OR and WA and points in CA on and north and west of a line beginning at the Pacific Ocean near Santa Cruz along CA Hwy 152, then east along CA Hwy 152 to junction CA Hwy 99, then south along CA Hwy 99 to junction CA Hwy 168, then east along CA Hwy 168 to the CA–NV State line; points in ID on and north and west of a line beginning at the NV–ID State line along U.S. Hwy 93, to junction Interstate Hwy 80, then east along Interstate Hwy 80 to junction U.S. Hwy 191, then north along U.S. Hwy 191 to the ID–MT State line; points in MT on and west of a line beginning at the ID–MT State line along U.S. Hwy 191, then north along U.S. Hwy 191 to junction U.S. Hwy 10, then east along U.S. Hwy 10 to junction MT Hwy 22, then along MT Hwy 22 to junction MT Hwy 200, then east along MT Hwy 200 to junction MT Hwy 24, then north along MT Hwy 24 to junction with Secondary State or County Hwy 247, then north along the Secondary State or County Hwy 247 to the MT-Canadian border; points in NV on and north and west of a line beginning at the CA–NV State

line along NV Hwy 3, then north along NV Hwy 3 to junction U.S. Hwy 6, NE–CO State line south along CO Hwy 71 to junction CO Hwy 14, then Hwy 285, then north along U.S. Hwy 285 to junction U.S. Hwy 85, then

on and north and west of a line beginning at the CA–NV State line along then southwest along U.S. Hwy 40 to junction KS Hwy 27, then south along OR, UT, WA, WY, and points in AZ on and northwest of a line beginning at the Mexico-AZ border along AZ Hwy

V 43 / 183 SEP 20 78 V 43

line along NV Hwy 3, then north along NV Hwy 3 to junction U.S. Hwy 6, then east along U.S. Hwy 6 to junction U.S. Hwy 93, then north along U.S. Hwy 93 to the NV-ID State line; (7) between points in the State of NC counties of Forsyth and Stokes, on the one hand, and, on the other, points in ID, MT, ND, OR, and WA; and points in CA described in (6) above; points in CO on and north of a line beginning at the UT-CO State line along U.S. Hwy 40, then east along U.S. Hwy 40 to junction CO Hwy 14, then north along CO Hwy 14 to the CO-WY State line; points in MN on and west of a line beginning at the SD-MN State line along MN Hwy 30, then east along MN Hwy 30 to junction U.S. Hwy 75 to Emerson, Canada; points in NV on and north and west of a line beginning at the CA-NV State line along NV Hwy 3, then north along NV Hwy 3 to junction U.S. Hwy 95, then south along U.S. Hwy 95 to junction Interstate Hwy 15, then north along Interstate Hwy 15 to the NV-UT State line; points in SD on and north and west of a line beginning at the WY-SD State line along U.S. Hwy 18, then east along U.S. Hwy 18 to junction U.S. Hwy 183, then north along U.S. Hwy 183 to junction Interstate Hwy 90, then east along Interstate Hwy 90 to junction U.S. Hwy 81, then north along U.S. Hwy 81 to junction SD Hwy 34, then east along SD Hwy 34 to the SD-MN State line; points in UT on and north and west of a line beginning at the AZ-UT State line along Interstate Hwy 15, then north along Interstate Hwy 15 to junction UT Hwy 4, then east along UT Hwy 4 to junction U.S. Hwy 89, then north along U.S. Hwy 89 to junction Interstate Hwy 70, then east along Interstate Hwy 70 to junction UT Hwy 10, then north along UT Hwy 10 to junction UT Hwy 33, then north along UT Hwy 33 to junction U.S. Hwy 40, then north along U.S. Hwy 40 to the UT-WY State line; points in WY on and north of a line beginning at the CO-WY State line WY Hwy 230, then north along WY Hwy 230 to junction Interstate Hwy 80, then east along Interstate Hwy 80 to junction U.S. Hwy 85, then north along U.S. 85 to the WY-SD State line; (8) between points in the NC counties of Anson, Stanley, and Union, on the one hand, and, on the other, points in the States of ID, MT, ND, OR, UT, WA, and WY, and points in CA on, north and west of a line beginning at the CA-NV State line southwest along Interstate Hwy 15 to junction U.S. Hwy 395, then south along U.S. Hwy 395 to junction Interstate Hwy 10, then southeast along Interstate Hwy 10 to junction CA Hwy 86, then southeast along CA Hwy 86 to the CA-Mexico border; points in CO on and north of a line beginning at the NE-CO State line south along CO Hwy 71 to junction CO Hwy 14, then west along CO Hwy 14 to junction U.S. Hwy 287, then south along U.S. Hwy 287 to junction CO Hwy 119, then southwest along CO Hwy 119 to junction U.S. Hwy 6, then west along U.S. Hwy 6 to the CO-UT State line, then in a clockwise direction to the AZ-NV State line; points in MI on and north of a line beginning at the Sault Ste. Marie southwest along U.S. Hwy 2 to junction MI Hwy 69, then northwest along MI Hwy 69 to junction U.S. Hwy 141, then northwest along U.S. Hwy 141 to junction U.S. Hwy 41, then northeast along U.S. Hwy 41 to its termination at Lake Superior; points in MN on and north of a line beginning at Duluth southwest along MN Hwy 23 to junction U.S. Hwy 16, then west along U.S. Hwy 16 to the MN-SD State line; points in NE on and north of a line beginning at the SD-NE State line south along U.S. Hwy 81 to junction NE Hwy 12, then northwest along NE Hwy 12 to junction NE Hwy 11, then southwest along NE Hwy 11 to junction U.S. Hwy 20, then northwest along U.S. Hwy 20 to junction U.S. Hwy 83, then south along U.S. Hwy 83 to junction NE Hwy 2, then west along NE Hwy 2 to junction U.S. Hwy 385, then south along U.S. Hwy 385 to junction Interstate Hwy 80, then west along Interstate Hwy 80 to junction NE Hwy 71, then south along NE Hwy 71 to junction NE-CO State line; points in NV on and north of Interstate Hwy 15; points in OH on and east of a line beginning at Lake Erie near Ashtabula in south along OH Hwy 11 to junction OH Hwy 82, then east along OH Hwy 82 to junction OH Hwy 193, then south along OH Hwy 193 to junction OH Hwy 7, then south along OH Hwy 7 to junction U.S. Hwy 224, then east along U.S. Hwy 224 to the OH-PA State line; points in SD on and west of a line beginning at the MN-SD State line west along U.S. Hwy 16 to junction U.S. Hwy 81, then south along U.S. Hwy 81 to the SD-NE State line;

(9) between points in NC counties of Montgomery, Moore, and Richmond, on the one hand, and, on the other, points in CA, ID, MT, NV, ND, OR, SD, UT, WA, WY, and points in AZ in Mohave and Yuma Counties, and points on and north of a line beginning at the Coconino-Mohave County line along U.S. Hwy 66 to junction U.S. Hwy 89, then north along U.S. Hwy 89 to junction U.S. Hwy 160, then east along U.S. Hwy 160 to the AZ-CO State line; points in CO on and north of a line beginning at the AZ-CO State line along U.S. Hwy 160, then east along U.S. Hwy 160 to junction U.S. Hwy 550, then north along U.S. Hwy 550 to junction U.S. Hwy 50, then east along U.S. Hwy 50 to junction U.S. Hwy 285, then north along U.S. Hwy 285 to junction U.S. Hwy 85, then north along U.S. Hwy 85 to junction U.S. Hwy 6, then east along U.S. Hwy 6 to junction U.S. Hwy 138, then northeast along U.S. Hwy 138 to the NE-IA State line; points in IA on and west of a line beginning at the NE-IA State line along U.S. Hwy 20, then east along U.S. Hwy 20 to junction U.S. Hwy 75, then north along U.S. Hwy 75 to the IA-MN State line; points in MN on and north of a line beginning at the IA-MN State line along U.S. Hwy 75, then north along U.S. Hwy 75 to junction U.S. Hwy 14, then east along U.S. Hwy 14 to junction U.S. Hwy 71, then north along U.S. Hwy 71 to junction U.S. Hwy 12, then east along U.S. Hwy 12 to junction U.S. Hwy 61, then north along U.S. Hwy 61 to junction U.S. Hwy 8, then east along U.S. Hwy 8 to the MN-WI State line; points in NE on and west of a line beginning at the CO-NE State line along U.S. Hwy 138, then north along U.S. Hwy 138 to junction U.S. Hwy 30, then east along U.S. Hwy 30 to junction U.S. Hwy 83, then north along U.S. Hwy 83 to junction NE Hwy 70, then northeast along NE Hwy 70 to junction U.S. Hwy 20, then east along U.S. Hwy 20 to the IA-NE State line; points in WI on and north of a line beginning at the MN-WI State line along U.S. Hwy 8, then east along U.S. Hwy 8 to junction U.S. Hwy 63, then northeast along U.S. Hwy 63 to its termination at Ashland, WI; (10) between points in the state of NC counties of Hoke, Robeson, Scotland, on the one hand, and, on the other, points in the states of ID, MT, ND, OR, WA, WY, and points in the following described states: points in CA on and north and west of a line beginning at San Diego along Interstate Hwy 8, then east along Interstate Hwy 8 to junction CA Hwy 86, then north along CA Hwy 86 to junction CA Hwy 78, then northeast along CA Hwy 78 to junction U.S. Hwy 95, then north along U.S. Hwy 95 to the CA-NV State line; points in CO on and north and west of a line beginning at the UT-CO State line along U.S. Hwy 666, then southeast along U.S. Hwy 666 to junction U.S. Hwy 160, then east along U.S. Hwy 160 to Junction Interstate Hwy 25, then north along Interstate Hwy 25 to junction Interstate Hwy 76, then east along Interstate Hwy 76 to the CO-NE State line; points in MN on and north and west of a line beginning at the SD-MN State line along MN Hwy 30, then east along MN Hwy 30 to junction MN Hwy 23, then northeast along MN Hwy 23 to Duluth, MN; points in NE on and north and west of a line beginning at the WY-NE State line along U.S. Hwy 30 to junction U.S. Hwy 81, then north along U.S. Hwy 81 to the NE-SD State line; points in NV

on and north and west of a line beginning at the CA-NV State line along U.S. Hwy 95, then north along U.S. Hwy 95 to junction U.S. Hwy 91, then along U.S. Hwy 91 to the NV-AZ State line; points in OH on and east of a line beginning at Lake Erie near Ashtabula, OH, along OH Hwy 45, then south along OH Hwy 45 to junction U.S. Hwy 422, then east along U.S. Hwy 422 to the OH-PA State line; points in SD on and north and west of a line beginning at the NE-SD State line along U.S. Hwy 81, then north along U.S. Hwy 81 to junction SD Hwy 34, then east along SD Hwy 34 to the SD-MN State line; points in UT on and north and west of a line beginning at the AZ-UT State line along U.S. Hwy 91, then north along U.S. Hwy 91 to junction UT Hwy 14, then east along UT Hwy 14 to junction U.S. Hwy 89, then north along U.S. Hwy 89 to junction UT Hwy 24, then east along UT Hwy 24 to junction UT Hwy 95, then southeast along UT Hwy 95 to junction U.S. Hwy 163, then north along U.S. Hwy 163 to junction U.S. Hwy 666, then east along U.S. Hwy 666 to the UT-CO State line; (11) between points in NC counties of Cumberland, Harnett, and Lee, on the one hand, and, on the other points in CA, ID, MT, ND, OR, UT, WA, WY, and points in AZ on and west of a line beginning at the AZ-NM State line southwest along U.S. Hwy 60 to junction AZ Hwy 77, then southwest along AZ Hwy 77 to junction U.S. Hwy 89, then south along U.S. Hwy 89 to the AZ-Mexico border; points in CO on and west of a line beginning at the KS-CO State line along KS Hwy 96 to junction U.S. Hwy 287, then south along U.S. Hwy 287 to junction U.S. Hwy 50, then west along U.S. Hwy 50 to junction CO Hwy 10, then southwest along CO Hwy 10 to Junction CO Hwy 160, then southwest along CO Hwy 160 to junction CO Hwy 159, then southwest along CO Hwy 159 to the CO-NM State line; points in IA on and west of a line beginning at the IA-MN State line south along U.S. Hwy 65 to junction U.S. Hwy 18, then west along U.S. Hwy 18 to junction IA Hwy 15, then southwest along IA Hwy 15 to junction IA Hwy 3, then west along IA Hwy 3 to junction U.S. Hwy 71, then south along U.S. Hwy 71 to junction IA Hwy 175, then west along IA Hwy 175 to junction IA Hwy 39, then southwest along IA Hwy 39 to junction U.S. Hwy 30, then southwest along U.S. Hwy 30 to junction U.S. Hwy 75, then south along U.S. Hwy 75 to the IA-NE State line; points in KS on and west of a line beginning at the NE-KS State line south along U.S. Hwy 183 to junction KS Hwy 9, then southwest along KS Hwy 9 to junction KS Hwy 23, then west along KS Hwy 23 to junction U.S. Hwy 83, then south along U.S. Hwy 83 to junction KS Hwy 40, then southwest along U.S. Hwy 40 to junction KS Hwy 27, then south along KS Hwy 27 to junction KS Hwy 96, then west along KS Hwy 96 to the KS-CO State line; points in MI on and north and west of a line beginning at Lake Michigan at Empire east along MI Hwy 72 to junction U.S. Hwy 131, then northeast along U.S. Hwy 131 to junction MI Hwy 32, then east along MI Hwy 32 to its termination at Lake Huron; points in MN on and west of a line beginning at the WI-MN State line southwest along MN Hwy 60 to junction U.S. Hwy 63, then south along U.S. Hwy 63 to junction Interstate Hwy 90, then southwest along Interstate Hwy 90 to junction U.S. Hwy 65, then south along U.S. Hwy 65 to the MN-IA State line; points in NE on and north of a line beginning at the NE-IA State line south along U.S. Hwy 75 to junction Interstate Hwy 80, then west along Interstate Hwy 80 to junction U.S. Hwy 183, then south along U.S. Hwy 183 to the NE-KS State line; points in NM on and west of a line beginning at the CO-NM State line south along NM Hwy 3 to junction NM Hwy 76, then southwest along NM Hwy 76 to junction of NM Hwy 4, then southwest along NM Hwy 4 to junction NM hwy 126, then northwest along NM Hwy 126 to junction NM Hwy 44, then northwest along NM Hwy 44 to junction NM Hwy 509, then southwest along NM Hwy 509 to junction NM Hwy 53, then southwest along NM Hwy 53 to junction NM Hwy 32, then south along NM Hwy 32 to junction U.S. Hwy 60, then west along U.S. Hwy 60 to the AZ-NM State line; points in OH on and east of a line beginning at Lake Erie near Ashtabula south along OH Hwy 45 to junction OH Hwy 87, then east along OH Hwy 87 to junction OH Hwy 193, then south along OH Hwy 193 to junction OH Hwy 7, then south along OH Hwy 7 to junction U.S. Hwy 224, then east along U.S. Hwy 224 to the OH-PA State line; points in WI on and north of a line beginning at the MI-WI State line near Iron Mountain, MI, northwest along U.S. Hwy 2 to junction WI Hwy 70, then west along WI Hwy 70 to junction WI Hwy 101, then southwest along WI Hwy 101 to junction U.S. Hwy 8, then southwest along U.S. Hwy 8 to junction WI Hwy 27, then south along WI Hwy 27 to junction WI Hwy 178, then southwest along WI Hwy 178 to junction U.S. Hwy 53, then south along U.S. Hwy 53 to junction Interstate Hwy 94, then west along Interstate Hwy 94 to junction WI Hwy 85, then southwest along WI Hwy 85 to junction WI Hwy 25, then south along WI Hwy 25 to the WI-MN State line.

(12) Between points in the NC counties of Guilford, Randolph, and Rockingham, on the one hand, and, on the other, points in CA, ID, MT, NV, ND, OR, UT, WA, WY, and points in AZ on and northwest of a line beginning at the Mexico-AZ border along AZ Hwy 85, then north along AZ Hwy 85 to junction U.S. Hwy 80, then east along U.S. Hwy 80 to junction Interstate Hwy 17, then north along Interstate Hwy 17 to Flagstaff and junction with U.S. Hwy 89, then north along U.S. Hwy 89 to junction U.S. Hwy 160, then northeast along U.S. Hwy 160 to junction unnamed hwy leading to NM Hwy 504, then along NM Hwy 504 to the AZ-NM State line; points in CO on and west of a line beginning at the CO-NM State line along U.S. Hwy 550 to junction U.S. Hwy 50, then east along U.S. Hwy 50 to junction CO Hwy 135, then north along CO Hwy 135 to junction CO Hwy 133, then north along CO Hwy 133 to junction CO Hwy 82, then north along CO Hwy 82 to junction U.S. Hwy 6, then east along U.S. Hwy 6 to the CO-NE State line; points in MN on and west of a line beginning at the MN-SD State line along U.S. Hwy 212 to junction U.S. Hwy 59, then north along U.S. Hwy 59 to junction MN Hwy 34, then along MN Hwy 34 to junction U.S. Hwy 71, then northeast along U.S. Hwy 71 to its termination at International Falls, MN, points in NE on and west of a line beginning at the NE-CO State line along U.S. Hwy 6 to junction U.S. Hwy 83, then north along U.S. Hwy 83 to the NE-SD State line; points in NM on and north of a line beginning at the AZ-NM State line along NM Hwy 504 to junction U.S. Hwy 550, then northeast along U.S. Hwy 550 to the NM-CO State line; points in SD on and northwest of a line beginning at the NE-SD State line north along U.S. Hwy 83 to junction U.S. Hwy 16, then east along U.S. Hwy 16 to junction U.S. Hwy 281, then north along U.S. Hwy 281 to junction U.S. Hwy 212, then east along U.S. Hwy 212 to the SD-MN State line; (13) between points in the state of NC counties of Alamance, Caswell, Chatham, and Orange, on the one hand, and, on the other, points in CA, ID, MT, NV, ND, OR, UT, WA, WY, and points in AZ on and north and west of a line beginning at Nogales, AZ, along U.S. Hwy 89, then north along U.S. Hwy 89 to junction AZ Hwy 77, then northeast along AZ Hwy 77 to junction AZ Hwy 61, then along AZ Hwy 61 to junction U.S. Hwy 666, then northeast along U.S. Hwy 666 to the AZ-NM State line; points in CO on and north and west of a line beginning at the NM-CO State line along U.S. Hwy 550, then north along U.S. Hwy 550 to junction U.S. Hwy 160, then east along U.S. Hwy 160 to junction U.S. Hwy 285, then north along U.S. Hwy 285 to junction Interstate Hwy 80, then northeast along Interstate Hwy 80 to the CO-NE State line·

points in MN on and north and west of a line beginning at the SD-MN State line along MN Hwy 30, then east along MN Hwy 30 to junction MN Hwy 23, then northeast along MN Hwy 23 to Duluth, MN; points in NE on and north and west of a line beginning at the WY-NE State line along U.S. Hwy 30, then east along U.S. Hwy 30 to junction U.S. Hwy 81, then north along U.S. Hwy 81 to the NE-SD State line; points in NM on and north and west of a line beginning at the AZ-NM State line along U.S. Hwy 666, then north along U.S. Hwy 666 to junction U.S. Hwy 550, then northeast along U.S. Hwy 550 to the NM-CO State line; points in OH, Ashtabula; points in SD on and north and west of a line beginning at the NE-SD State line along U.S. Hwy 81, then north along U.S. Hwy 81 to junction SD Hwy 34, then east along SD Hwy 34 to the SD-MT State line; (14) between points in the State of NC counties of Durham, Granville, and Person, on the one hand, and, on the other, points in CA, ID, MT, NV, OR, ND, UT, WA, WY, and points in CO on and northwest of a line beginning at the NM-CO State line along Interstate Hwy 25, then north along Interstate Hwy 25 to junction Interstate Hwy 80, then east along Interstate Hwy 80 to the CO-NE State line; points in NM on and northwest of a line beginning at the AZ-NM State line along Interstate Hwy 40, then east along Interstate Hwy 40 to junction U.S. Hwy 85, then northeast along U.S. Hwy 85 to junction U.S. Hwy 64, then northeast along U.S. Hwy 64 to junction Interstate Hwy 25, then north along Interstate Hwy 25 to the NM-CO State line; points in OH described in (10) above; points in AZ, MN, NE and SD described in (13) above.

(15) Between points in the NC counties of Greene, Pitt, Wayne, and Wilson, on the one hand, and, on the other, points in AZ, CA, CO, ID, MI, MN, NE, NV, ND, OR, SD, UT, WA, WI, WY, and points in IL on and north of U.S. Hwy 34; points in IA on, north and west of a line beginning at the MO-IA State line along U.S. Hwy 63, then north along U.S. Hwy 63 to junction U.S. Hwy 34, then east along U.S. Hwy 34 to the IL-IA State line; points in KS on, north and west of a line beginning at the OK-KS State line along U.S. Hwy 183 to junction U.S. Hwy 54, then east along U.S. Hwy 54 to junction Kansas Turnpike, then northeast along Kansas Turnpike to junction U.S. Hwy 59, then north along U.S. Hwy 59 to the KS-MO State line; points in MO on and north of a line beginning at the KS-MO State line along U.S. Hwy 59 to junction U.S. Hwy 169, then north along U.S. Hwy 169 to junction U.S. Hwy 136, then east along U.S. Hwy 136 to junction U.S. Hwy 63, then north along U.S. Hwy 63 to the MO-IA State line; points in NM on, north and west of a line beginning at the NM-Mexico border along NM Hwy 11 to junction NM Hwy 26, then northeast along NM Hwy 26 to junction Interstate Hwy 25, then north along Interstate Hwy 25 to junction U.S. Hwy 56, then east along U.S. Hwy 56 to the NM-OK State line; points in OH on and north of a line beginning at the OH-MI State line along OH Hwy 109 to junction U.S. Hwy 20, then east along U.S. Hwy 20 to junction U.S. Hwy 250, then southeast along U.S. Hwy 250 to the OH-WV State line; points in OK on and north of a line beginning at the NM-OK State line along U.S. Hwy 64 to junction U.S. Hwy 183, then north along U.S. Hwy 183 to the OK-KS State line; points in WV on and north of U.S. Hwy 40; (16) between points in NC counties of Edgecombe, Halifax, Nash, and Northampton, on the one hand, and, on the other, points in AZ, CA, CO, ID, IA, MI, MN, MT, NE, NV, ND, OR, SD, UT, WA, WI, WY, and points in IL on and north of a line beginning at the IL-MO State line east along U.S. Hwy 136 to junction U.S. Hwy 67, then north along U.S. Hwy 67 to junction U.S. Hwy 34, then northeast along U.S. Hwy 34 to junction Interstate Hwy 80, then east along Interstate Hwy 80 to the IL-IN State line; points in IN on and north of U.S. Hwy 6; points in KS on and north of a line beginning at the OK-KS State line northeast along U.S. Hwy 54 to junction U.S. Hwy 183, then north along U.S. Hwy 183 to junction U.S. Hwy 56, then east along U.S. Hwy 56 to junction U.S. Hwy 59, then north along U.S. Hwy 59 to the KS-MO State line; points in MO on and north of a line beginning at the KS-MO State line along U.S. Hwy 59 to junction U.S. Hwy 36, then east along U.S. Hwy 36 to junction U.S. Hwy 65, then north along U.S. Hwy 65 to junction U.S. Hwy 136, then east along U.S. Hwy 136 to the MO-IL State line; points in NM on, north and west of U.S. Hwy 54; points in OH on and north of a line beginning at the IN-OH State line east along U.S. Hwy 6 to junction OH Hwy 15, then southeast along OH Hwy 15 to junction OH Hwy 103, then east along OH Hwy 103 to junction U.S. Hwy 250, then southeast along U.S. Hwy 250 to the OH-WV State line; points in OK on and west of U.S. Hwy 54; points in TX on and north of U.S. Hwy 54; points in WV on and north of a line beginning at the OH-WV State line along U.S. Hwy 250 to junction U.S. Hwy 50, then east along U.S. Hwy 50 to the WV-MD State line; (17) between points in the NC counties of Bertie, Gates, and Martin, on the one hand, and, on the other, points in AZ, CA, CO, ID, IA, MI, MN, MT, NE, NV, ND, OR, SD, UT, WA, WI, WY, and points in IL on and north of a line beginning at the IN-IL State line west along Interstate Hwy 74 to junction Interstate Hwy 72, then southwest along Interstate Hwy 72 to junction IL Hwy 47, then southwest along IL Hwy 47 to junction U.S. Hwy 36, then west along U.S. Hwy 36 to junction U.S. Hwy 54, then southwest along U.S. Hwy 54 to the IL-MO State line; points in IN on and west of a line beginning at the IN-OH State line west along IN Hwy 127, to junction U.S. Hwy 24, then west along U.S. Hwy 24 to junction IN Hwy 25, then southwest along IN Hwy 25 to junction IN Hwy 28, then southwest along IN Hwy 28 to junction IN Hwy 63, then south along IN Hwy 63 to junction Interstate Hwy 74, then west along Interstate Hwy 74 to the IN-IL State line; points in KS on and west of a line beginning at the KS-MO State line southwest along U.S. Hwy 160 to junction U.S. Hwy 177, then south along U.S. Hwy 177 to the OK-KS State line; points in MO on and north of a line beginning at the IL-MO State line southwest along U.S. Hwy 54 to junction U.S. Hwy 71, then south along U.S. Hwy 71 to junction U.S. Hwy 160, then west along U.S. Hwy 160 to the KS-MO State line; points in NM on and west of a line beginning at the TX-NM State line west along U.S. Hwy 60 to junction U.S. Hwy 70, then southwest along U.S. Hwy 70 to junction U.S. Hwy 54, then southwest along U.S. Hwy 54 to the NM-TX State line; points in OH on and north of a line beginning at the OH-WV State line northwest along OH Hwy 43 to junction U.S. Hwy 30, then west along U.S. Hwy 30 to junction U.S. Hwy 30S, then southwest along U.S. Hwy 30S to junction OH Hwy 81, then west along OH Hwy 81 to the IN-OH State line; points in OK on and west of a line beginning at the OK-KS State line south along U.S. Hwy 177 to junction OK Hwy 33, then southwest along OK Hwy 33 to junction U.S. Hwy 183, then south along U.S. Hwy 183 to junction U.S. Hwy 66, then southwest along U.S. Hwy 66 to the OK-TX State line; points in TX on and north of a line beginning at the TX-OK State line southwest along U.S. Hwy 66 to junction U.S. Hwy 60, then southwest along U.S. Hwy 60 to the TX-NM State line, and points on and west of U.S. Hwy 54; points in WV on and north of U.S. Hwy 22.

(18) Between points in the NC counties of Camden, Chowan, Currituck, Gates, Pasquotank, and Perquimans, on the one hand, and, on the other, points in AZ, CA, CO, ID, IA, KS, MI, MN, MT, NE, NV, NM, ND, OR, SD, UT, WA, WI, WY, and points in AR on and west of a line beginning at the AR-MO State line south along U.S. Hwy 71 to junction U.S. Hwy 62, then west along U.S. Hwy 62 to the AR-OK State line; points in IL on and north of a line beginning at the IL-IN State line northwest along IL Hwy 33 to junction U.S. Hwy 40, then southwest along U.S. Hwy 40 to the IL-MO State line; points in IN on and north of a line beginning at the IN-OH State line southwest along U.S. Hwy 40 to junction IN Hwy 3, then south along IN Hwy 3 to junction IN Hwy 44, then southwest along IN Hwy 44 to junction IN Hwy 37, then southwest along IN Hwy 37 to junction IN Hwy 45, then southwest along IN Hwy 45 to junction IN Hwy 54, then west along IN Hwy 54 to the IL-IN State line; points in MO on and west of a line beginning at the IL-MO State line; southwest along U.S. Hwy 66 to junction U.S. Hwy 65, then south along U.S. Hwy 65 to junction U.S. Hwy 60, then southwest along U.S. Hwy 60 to junction U.S. Hwy 71, then south along U.S. Hwy 71 to the AR-MO State line; points in OH on and west of a line beginning at the OH-WV State line southwest along U.S. Hwy 22 to junction U.S. Hwy 40, then southwest along U.S. Hwy 40 to the IN-OH State line; points in OK on and west of a line beginning at the AR-OK State line southwest along U.S. Hwy 62 to junction OK Hwy 99, then south along OK Hwy 99 to junction OK Hwy 9, then southwest along OK Hwy 9 to junction U.S. Hwy 277, then south along U.S. Hwy 277 to junction U.S. Hwy 70, then west along U.S. Hwy 70 to junction U.S. Hwy 183, then south along U.S. Hwy 183 to the OK-TX State line; points in TX on and north and west of a line beginning at the OK-TX State line south along U.S. Hwy 183 to junction U.S. Hwy 82, then west along U.S. Hwy 82 to junction U.S. Hwy 62, then southwest along U.S. Hwy 62 to junction U.S. Hwy 385, then south along U.S. Hwy 385 to junction TX Road 170, then east along TX Road 170 to its termination at the TX-Mexico border; points in WV on and north of U.S. Hwy 22; (19) between points in the NC counties of Beaufort, Carteret, Craven, and Pamlico, on the one hand, and, on the other, points in AZ, CA, CO, ID, IA MI, MN, MT, NE, NV, ND, OR, SD, UT, WA, WI, WY, and points in IL on and north of a line beginning at the IL-MO State line along U.S. Hwy 54 to junction U.S. Hwy 36, then east along U.S. Hwy 36 to junction IL Hwy 54, then northeast along IL Hwy 54 to junction IL Hwy 9, then east along IL Hwy 9 to the IL-IN State line; points in IN on and north of IN Hwy 26; points in KS on, north and west of a line beginning at the OK-KS State line north along U.S. Hwy 75 to junction U.S. Hwy 54, then east along U.S. Hwy 54 to the KS-MO State line; points in MO on and north of U.S. Hwy 54; points in NM on, north and west of a line beginning at the TX-NM State line northeast along U.S. Hwy 54 to junction U.S. Hwy 70, then northeast along U.S. Hwy 70 to the TX-NM State line; points in OH on and north of a line beginning at the OH-IN State line east along OH Hwy 119 to junction Interstate Hwy 75, then north along Interstate Hwy 75 to junction U.S. Hwy 30S, then east along U.S. Hwy 30S to junction OH Hwy 95, then southeast along OH Hwy 95 to junction OH Hwy 13, then south along OH Hwy 13 to junction U.S. Hwy 36, then east along U.S. Hwy 36 to junction U.S. Hwy 250, then southeast along U.S. Hwy 250 to the OH-WV State line; points in OK on and west of a line beginning at the TX-OK State line east along U.S. Hwy 60 to junction U.S. Hwy 75, then north along U.S. Hwy 75 to the KS-OK State line; points in TX on and north of a line beginning at the TX-Mexico border north along U.S. Hwy 54 to junction with the TX-NM State line; then in a clockwise direction northeast along the TX-NM State line to junction U.S. Hwy 60 to the TX-OK State line; points in WV on and north of U.S. Hwy 40. (Gateways eliminated: Waynesboro and Stitz, PA.)

MC 117574 (Sub-E120), filed July 16, 1975. Applicant: DAILY EXPRESS, INC., P.O. Box 39, Carlisle, PA 17013. Representative: E. S. Moore, Jr. (same as above). *Agricultural implements, agricultural machinery, tractors, with or without attachments, cranes, industrial and processing machinery, and attachments, accessories, and parts of all of the above described commodities, which are also heavy machinery or contractors equipment, and, are also machinery, commodities which because of size or weight require the use of special equipment or special handling* (except boats), *or, self-propelled articles each weighing 15,000 pounds or more (when transported on trailers):* (1) Between points in Alleghany and Wilkes Counties, NC, on the one hand, and, on the other, points in ID, MT, OR, WA, and points in CA on and north of a line beginning at Monterey, CA, on the Pacific Ocean east along CA Hwy 152 to junction CA Hwy 99, then along CA Hwy 99 to junction CA Hwy 120, then along CA Hwy 120 to junction U.S. Hwy 395, then along U.S. Hwy 395 to junction US Hwy 6, then north along U.S. Hwy 6 to the CA-NV State line; points in NV on and north of a line beginning at the CA-NV State line northeast along U.S. Hwy 6 to junction U.S. Hwy 93, then north along U.S. Hwy 93 to junction U.S. Alternate Hwy 50, then northeast along U.S. Alternate Hwy 50 to the NV-UT State line; points in ND on and west of a line beginning at SD-ND State line north along ND Hwy 8 to junction ND Hwy 37, then east along ND Hwy 37 to junction U.S. Hwy 83, then along U.S. Hwy 83 to its termination at the Canadian border; points in SD on and north and west of a line beginning at the SD-WY State line northeast along U.S. Hwy 85 to junction U.S. Hwy 212, then northeast along U.S. Hwy 212 to junction SD Hwy 73, then north along SD Hwy 73 to the SD-ND State line; points in UT on and north and west of a line beginning at the NV-UT State line northeast along U.S. Hwy 40 to junction U.S. Hwy 89, then north along U.S. Hwy 89 to junction UT Hwy 30, then East along UT Hwy 30 to junction with the UT-WY State line; points in WY on and north of a line beginning at U.S. Hwy 189, then north along U.S. Hwy 189 to junction U.S. Hwy 187, then south along U.S. Hwy 187 to junction WY Hwy 28, then northeast along WY Hwy 28 to junction U.S. Hwy 287, then east along U.S. Hwy 287 to junction WY Hwy 220, then east along WY Hwy 220 to junction Interstate Hwy 25, then east along Interstate Hwy 25 to junction U.S. Hwy 18, then northeast along U.S. Hwy 18 to the WY-SD State line; (2) between points in the NC counties of Alexander, Catawba, and Iredell, on the one hand, and, on the other, points in OR, WA, and points in CA on and north of a line beginning at San Francisco along Interstate Hwy 80 to junction U.S. Hwy 50, then east along U.S. Hwy 50 to junction with the CA-NV State line; ID, points on and northwest of a line beginning at the NV-ID State line north along U.S. Hwy 93 to junction U.S. Hwy 30, then east along U.S. Hwy 30 to junction U.S. Hwy 30N, then east along U.S. Hwy 30N to the ID-WY State line; MT, points on and west of a line beginning at the WY-MT state line north along U.S. Hwy 87 to junction U.S. Hwy 10, then northeast along U.S. Hwy 10 to junction MT Hwy 16, then northeast along MT Hwy 16 to junction U.S. Hwy 2, then east along U.S. Hwy 2 to the MT-ND State line; NV, points on and north of a line beginning at the CA-NV State line east along U.S. Hwy 50 to junction NV Hwy 8A, then north along NV Hwy 8A to junction U.S. Hwy 40, then east along U.S. Hwy 40 to junction U.S. Hwy 93, then north along U.S. Hwy 93 to the ID-NV State line; ND, points on and west of a line beginning at the MT-ND State line along U.S. Hwy 2, then east along U.S. Hwy 2 to junction U.S. Hwy 85, then north along U.S. Hwy 85 to the ND-Canada border; WY, points on and west of a line beginning at the ID-WY State line east along U.S. Hwy 30N to junction with the Sweetwater County line, then in a clockwise direction along the Sweetwater County line to junction WY Hwy 28, then northeast along WY Hwy 28 to junction WY

Hwy 789, then northeast along WY Hwy 789 to junction U.S. Hwy 16, then east along U.S. Hwy 16 to junction U.S. Hwy 87, then north along U.S. Hwy 87 to the WY-MT state line; (3) between points in the NC counties of Cleveland, Gaston, Lincoln, on the one hand, and, on the other, points in ID, OR, WA, and points in CA on, north and west of a line beginning at Santa Cruz, CA, east along CA Hwy 152 to junction CA Hwy 99, then south along CA Hwy 99 to junction CA Hwy 168, then east along CA Hwy 168 to the CA-NV State line; MT, points on, north and west of a line beginning at the WY-MT State line north along U.S. Hwy 89 to junction U.S. Hwy 10, then east along U.S. Hwy 10 to junction MT Hwy 16, then north along MT Hwy 16 to junction MT Hwy 200, then north along MT Hwy 200 to the MT-ND State line; NV, points on, north and west of a line beginning at the CA-NV State line north along NV Hwy 3A to junction U.S. Hwy 6, then east along U.S. Hwy 6 to the NV-UT State line; ND, points on, and west of a line beginning at the MT-ND State line east along ND Hwy 200 to junction U.S. Hwy 85, then north along U.S. Hwy 85 to the ND State line-Canada border; UT, points on, north and west of a line beginning at the NV-UT State line east and north along U.S. Hwy 50 to junction Interstate Hwy 80, then east along Interstate Hwy 80 to the UT-WY State line; WY, points on and west of a line beginning at the UT-WY State line north along WY Hwy 89 to the WY-MT State line; (4) between points in the NC counties of Cabarrus, Mecklenburg, and Rowan, on the one hand, and, on the other, points in ID, MT, and points in CA on and west of a line beginning at the CA-NV State line southwest along U.S. Hwy 6 to junction U.S. Hwy 395, then south along U.S. Hwy 395 to junction CA Hwy 178, then southwest along CA Hwy 178 to junction CA Hwy 99, then south along CA Hwy 99 to junction CA Hwy 119, then southwest along CA Hwy 119 to junction CA Hwy 166, then northwest along CA Hwy 166 to its termination at the Pacific Ocean; points in NV on and north of a line beginning at the UT-NV State line northwest along NV Hwy 25 to junction U.S. Hwy 6, then southwest along U.S. Hwy 6 to the CA-NV State line; points in ND on and west of a line beginning at the ND-Canadian border south along ND Hwy 1 to junction ND Hwy 66, then west along ND Hwy 66 to junction ND Hwy 3, then south along ND Hwy 3 to junction U.S. Hwy 52, then northwest along U.S. Hwy 52 to junction ND Hwy 14, then south along ND Hwy 14 to junction U.S. Hwy 83, then south along U.S. Hwy 83 to the ND-SD State line; points in SD on and west of a line beginning at the ND-SD State line south along U.S. Hwy 83 to junction SD Hwy 20, then east along SD Hwy 20 to junction SD Hwy 47, then south along Hwy 47 to junction U.S. Hwy 212, then west along U.S. Hwy 212 to junction U.S. Hwy 83, then south along U.S. Hwy 83 to junction U.S. Hwy 14, then southwest along U.S. Hwy 14 to junction SD Hwy 79, then south along SD Hwy 79 to junction U.S. Hwy 18, then west along U.S. Hwy 18 to the SD-WY State line; points in UT on and west of a line beginning at the WY-UT State line southwest along Interstate Hwy 80 to junction U.S. Hwy 189, then south along U.S. Hwy 189 to junction U.S. Hwy 50, then southeast along U.S. Hwy 50 to junction UT Hwy 10, then south along UT Hwy 10 to junction UT Hwy 29, then west along UT Hwy 29 to junction U.S. Hwy 89, then southwest along U.S. Hwy 89 to junction UT Hwy 14, then west along UT Hwy 14 to junction UT Hwy 56, then northwest along UT Hwy 56 to the UT-NV State line; points in WY on and north of a line beginning at the SD-WY State line southwest along U.S. Hwy 18 to junction U.S. Hwy 26, then northwest along U.S. Hwy 26 to junction WY Hwy 789, then south along WY Hwy 789 to junction U.S. Hwy 287, then south along U.S. Hwy 287 to junction WY Hwy 28, then southwest along WY Hwy 28 to junction U.S. Hwy 187, then south along U.S. Hwy 187 to junction Interstate Hwy 80, then west along Interstate Hwy 80 to the WY-UT State line; (5) between points in the NC counties of Davie, Surry, and Yadkin, on the one hand, and, on the other, points in ID, MT, OR, WA, and points in CA on and north of a line beginning at the Pacific Ocean near Santa Ana northeast along CA Hwy 55 to junction CA Hwy 91, then east along CA Hwy 91 to junction U.S. Hwy 395, then north along U.S. Hwy 395 to junction U.S. Hwy 6, then east along U.S. Hwy 6 to the CA-NV State line; NV, points on and north of U.S. Hwy 6; ND, points on and west of a line beginning at the ND-SD State line north along ND Hwy 49 to junction Interstate Hwy 94, then east along Interstate Hwy 94 to junction ND Hwy 3, then north along ND Hwy 3 to junction ND Hwy 17, then east along ND Hwy 17 to junction ND Hwy 1, then north along ND Hwy 1 to its termination at the ND-Canada border; SD, points on and west of a line beginning at the WY-SD State line east along U.S. Hwy 18 to junction SD Hwy 73, then north along SD Hwy 73 to its termination near Lemmon, SD; UT, points on and northwest of a line beginning at the NV-UT State line east along U.S. Hwy 6 to junction U.S. Hwy 89, then north along U.S. Hwy 89 to junction U.S. Hwy 189, then northeast along U.S. Hwy 189 to the UT-WY State line; WY, points on and north of a line beginning at the WY-UT State line east along Interstate Hwy 80 to junction WY Hwy 789, then north along WY Hwy 789 to junction WY Hwy 220, then northeast along WY Hwy 220 to junction U.S. Hwy 20, then east along U.S. Hwy 20 to junction U.S. Hwy 18, then northeast along U.S. Hwy 18 to the WY-SD State line.

(6) Between points in the NC counties of Burke and Caldwell, on the one hand, and, on the other, points in OR, WA, and points in CA on and north of a line beginning at the CA-NV State line south along U.S. Hwy 6 to junction U.S. Hwy 395, then along U.S. Hwy 395 to juriction with CA Hwy 168, then southwest along CA Hwy 168 to junction CA Hwy 145, then west along CA Hwy 145 to junction CA Hwy 99, then north along CA Hwy 99 to junction CA Hwy 152, then west along CA Hwy 152 to its termination at the Pacific Ocean; points in ID on and west of a line beginning at the MT-ID State line south along U.S. Hwy 91 to junction U.S. Hwy 20, then southwest along U.S. Hwy 20 to junction U.S. Hwy 93, then south along U.S. Hwy 93 to the ID-NV State line; points in MT on and west of a line beginning at the MT-Canadian border south along MT Road 247 to junction U.S. Hwy 2, then west along U.S. Hwy 2 to junction U.S. Hwy 191, then southwest along U.S. Hwy 191 to junction Interstate Hwy 90, then west along Interstate Hwy 90 to junction U.S. Hwy 91, then south along U.S. Hwy 91 to the MT-ID State line; points in NV on and west of a line beginning at the ID-NV State line south along U.S. Hwy 93 to junction U.S. Hwy 6, then southwest along U.S. Hwy 6 to the CA-NV State line; (7) between points in NC counties of Franklin, Vance, and Warren, on the one hand, and, on the other, points in AZ, CA, CO, ID, IA, MI, MN, MT, NE, NV, ND, OR, SD, UT, WA, WI, WY, and points in IL on and north of a line beginning at the IL-IN State line southwest along IL Hwy 17 to junction IL Hwy 29, then south along IL Hwy 29 to junction IL Hwy 116, then west along IL Hwy 116 to junction IL Hwy 94, then southwest along IL Hwy 94 to junction U.S. Hwy 136, then west along U.S. Hwy 136 to the IL-IA State line; points in IN on and north of a line beginning at the IN-OH State line west along U.S. Hwy 6 to junction IN Hwy 2, then southwest along IN Hwy 2 to the IL-IN State line; points in KS on and west of a line beginning at the KS-MO State line southwest along U.S. Hwy 59 to junction KS Hwy 4, then southwest along KS Hwy 4 to junction U.S. Hwy 81, then south along U.S. Hwy 81 to junction KS Hwy 61, then southwest along KS Hwy 61 to junction U.S. Hwy 281, then south along U.S. Hwy 281 to the KS-OK State line; points in MO on and north of a line beginning at the IA-MO State line west along U.S. Hwy 136 to junction U.S. Hwy 63, then south along U.S. Hwy 63 to junction MO Hwy 6, then southwest along MO Hwy 6 to junction U.S. Hwy 36, then west along U.S. Hwy 36 to junction U.S. Hwy 59, then southwest along U.S. Hwy 59 to the KS-MO State line; points in NM on and west of a line beginning at the TX-NM State line west along U.S. Hwy 60 to junction U.S. Hwy 70, then southwest along U.S. Hwy 70 to junction NM Hwy 11, then south along NM Hwy 11 to the NM-Mexico border; points in OH on and north of a line beginning at the OH-WV State line west along U.S. Hwy 22 to junction U.S. Hwy 250, then northwest along U.S. Hwy 250 to junction U.S. Hwy 20, then northwest along U.S. Hwy 20 to junction U.S. Hwy 6, then west along U.S. Hwy 6 to the IN-OH State line; points in OK on and west of a line beginning at the KS-OK State line south along U.S. Hwy 281 to junction U.S. Hwy 60, then west along U.S. Hwy 60 to the OK-TX State line; points in TX on and west of a line beginning at the OK-TX State line southwest along U.S. Hwy 60 to junction TX Hwy 152, then northwest along TX Hwy 152 to junction TX Road 722, then southwest along TX Road 722 to junction U.S. Hwy 385, then south along U.S. Hwy 385 to junction U.S. Hwy 60, then southwest along U.S. Hwy 60 to the TX-NM State line; points in WV on and north of U.S. Hwy 22; (8) between points in the State of NC counties of Johnston and Wake, on the one hand, and, on the other, points in CA, CO, ID, MN, MT, NV, ND, OR, SD, UT, WA, WY, and points in AZ on, north, and west of a line beginning at Douglas, AZ, northeast along U.S. Hwy 80 to the AZ-NM State line; IA, points on and north and west of a line beginning at the NE-IA State line east along Interstate Hwy 80 to junction IA Hwy 150, then north along IA Hwy 150 to junction IA Hwy 9, then east along IA Hwy 9 to the IA-WI State line; points in KS on and north and west of a line beginning at the OK-KS State line northeast along U.S. Hwy 56 to junction U.S. Hwy 50, then northeast along U.S. Hwy 50 to junction U.S. Hwy 77, then north along U.S. Hwy 77 to junction with the KS-NE State line; NE, points on, north, and west of a line beginning at the KS-NE State line north along U.S. Hwy 77 to junction Interstate Hwy 80, then east along Interstate Hwy 80 to the NE-IA State line; NM, points on, north, and west of a line beginning at the AZ-NM State line north along U.S. Hwy 80 to junction Interstate Hwy 25, then north along Interstate Hwy 25 to junction U.S. Hwy 56, then east along U.S. Hwy 56 to the NM State line; OH, points on and east of a line beginning at Cleveland, OH, south along OH Hwy 21 to junction U.S. Hwy 30, then east along U.S. Hwy 30 to the OH-PA State line; OK, points on and north and west of a line beginning at the NM State line northeast along U.S. Hwy 56 to the OK-KS State line; WI, points on, north, and west of a line beginning at the IA-WI State line north along WI Hwy 35 to junction U.S. Hwy 16, then east along U.S. Hwy 16 to junction U.S. Hwy 151, then northeast along U.S. Hwy 151 to junction U.S. Hwy 141, then north along U.S. Hwy 141 to Iron Mountain, MI; (9) between points in the NC counties of Bladen and Samson on the one hand, and, on the other, points in CA, ID, MN, MT, NV, ND, OR, SD, UT, WA, WY, and points in AZ on and west of a line beginning at the AZ-Mexico border north along AZ Hwy 85 to junction U.S. Hwy 80, then east along U.S. Hwy 80 to junction U.S. Hwy 89, then northeast along U.S. Hwy 89 to junction U.S. Hwy 160, then along U.S. Hwy 160 to the AZ-CO State line; CO, points on and north of a line beginning at the AZ-CO State line east along U.S. Hwy 160 to junction U.S. Hwy 285, then north along U.S. Hwy 285 to junction U.S. Hwy 24, then east along U.S. Hwy 24 to the CO-KS State line; IA, points on a line beginning at the NE-IA State line east along U.S. Hwy 34 to junction U.S. Hwy 71, then north along U.S. Hwy 71 to junction IA Hwy 175, then east along IA Hwy 175 to junction U.S. Hwy 63, then north along U.S. Hwy 63 to junction U.S. Hwy 18, then east along U.S. Hwy 18 to the IA-WI State line; KS, points on and north of a line beginning at the CO-KS State line east along U.S. Hwy 24 to junction U.S. Hwy 183, then north along U.S. Hwy 183 to the KS-NE State line; MI, points on and north of a line beginning at Lake Michigan near Frankfort, southeast along MI Hwy 115 to junction U.S. Hwy 10, then southeast along U.S. Hwy 10 to junction MI Hwy 21, then east along MI Hwy 21 to Port Huron; NE, points on, north, and west of a line beginning at the KS-NE State line nortn along U.S. Hwy 183 to junction U.S. Hwy 34, then east along U.S. Hwy 34 to the NE-IA State line; OH, points on and north of a line beginning at Cleveland southeast along OH Hwy 14 to junction OH Hwy 44, then south along OH Hwy 44 to junction OH Hwy 43, then southeast along OH Hwy 43 to junction with Steubenville, OH; WV, points on and north of U.S. Hwy 22; WI, points on and north of a line beginning at the WI-IA State line east along U.S. Hwy 18 to junction U.S. Hwy 151, then northeast along U.S. Hwy 151 to junction U.S. Hwy 41, then northeast along U.S. Hwy 41 to Green Bay, WI; (10) between points in the NC counties of Brunswick and Columbus, on the one hand, and, on the other, points in CA, ID, MN, MT, NV, ND, OR, SD, UT, WA, WY, and points in CO, KS, MI, NE, OH, WV, WI, and AZ described in (9) above; (11) between points in the State of NC counties of New Hanover, Pender, and Duplin, on the one hand, and, on the other, points in CA, CO, ID, MT, NV, ND, OR, SD, UT, WA, WY, and points in AZ, IA, KS, NE, NM, OH, OK, and WI described in (8) above; (12) between points in the NC counties of Jones and Onslow, on the one hand, and, on the other, points in AZ, CA, CO, ID, IA, MI, MN, MT, NE, NV, ND, OR, SD, UT, WA, WI, WY, and points in IL on and north of a line beginning at the IN-IL west along IL Hwy 119 to junction U.S. Hwy 136, then south along U.S. Hwy 136 to junction Interstate Hwy 74, then northwest along Interstate Hwy 74 to junction U.S. Hwy 136, then west along U.S. Hwy 136 to junction U.S. Hwy 24, then southwest along U.S. Hwy 24 to the IL-MO State line; points in IN on and north of a line beginning at the OH-IN State line southwest along U.S. Hwy 24 to junction IN Hwy 25, then southwest along IN Hwy 25 to junction IN Hwy 28, then west along IN Hwy 28 to the IN-IL State line; points in KS on and west of a line beginning at the KS-MO State line west along U.S. Hwy 54 to junction KS Hwy 2, then southwest along KS Hwy 2 to junction U.S. Hwy 281, then south along U.S. Hwy 281 to the KS-OK State line; points in MO on and west of a line beginning at the IL-MO State line southwest along U.S. Hwy 24 to junction U.S. Hwy 65, then southwest along U.S. Hwy 65 to junction MO Hwy 52, then southwest along MO Hwy 52 to junction U.S. Hwy 71, then south along U.S. Hwy 71 to junction U.S. Hwy 54, then west along U.S. Hwy 54 to the KS-MO State line; points in NM on and west of a line beginning at the TX-NM State line west along U.S. Hwy 60 to junction U.S. Hwy 70, then southwest along U.S. Hwy 70 to junction NM Hwy 11, then south along NM Hwy 11 to the NM-Mexico border; points in OH on and north of a line beginning at the OH-WV State line northwest along U.S. Hwy 250 to junction U.S. Hwy 224, then west along U.S. Hwy 224 to junction OH Hwy 18, then northwest along OH Hwy 18 to junction U.S. Hwy 24, then southwest along U.S. Hwy 24 to the OH-IN State line; points in OK on and west of a line beginning at the KS-OK State line south along U.S. Hwy 281 to junction U.S. Hwy 60, then southwest along U.S. Hwy 60 to the OK-TX State line; points in TX on and north of U.S. Hwy 60; points in WV on and north of U.S. Hwy 40; (13)

[Disaster Decision No. 14]

SOUTHERN PACIFIC TRANSPORTATION CO.

Decided: September 14, 1978.

An application has been filed jointly by the Southern Pacific Transportation Co. (SP) and the Northwestern Pacific Railroad Co. (NWP) and concurred in by the Arcata and Mad River Rail Road Co. (AMR) seeking authority under section 22 of the Interstate Commerce Act to publish allowances in order to provide reduced rates for persons who would normally ship via the NWP and AMR but who cannot do so because of a fire in a tunnel on the NWP at mileage post 195 near Island Mountain, Calif.

It is ordered: The applicant carriers are authorized to publish and file allowances to afford reduced rates under section 22 of the Interstate Commerce Act in the manner prescribed in section 6 except that publication may be made effective on 1 day's notice instead of 30, and includes authority to publish in blanket supplements with relief from rule 9(e) of Tariff Circular 20 to publish in a separate noncounting supplement, all the authority granted herein to expire with December 12, 1978.

The class of persons entitled to such allowances are shippers or receivers via the NWP and the AMR who, because of the fire in the tunnel, assume the cost of transporting freight by highway to or from the SP at Kett or Redding, Calif., or to or from NWP stations from Willits to Schellville, Calif.

During the period in which any reduced rates authorized by this order are effective the carriers may, notwithstanding the provisions of section 4 of the Interstate Commerce Act, maintain higher rates to direct intermediate points and maintain through rates in excess of the aggregate of intermediate rates over the same routes if one or more of the factors of such aggregate of intermediate rates is a reduced rate established under authority of this order.

Any tariffs or tariff provisions published under this authority shall make

reference to this decision by number and date.

Notice to the affected railroads and

sunshine act meetings

V 43 / 183 SE 20 78

reference to this decision by number and date.

Notice to the affected railroads and the general public shall be given by depositing a copy of this decision in the office of the Acting Secretary of the Commission and by filing a copy with the Director, Office of the Federal Register. Copies will be mailed to the chairman of the Traffic Executive Association—Eastern Railroads, New York, N.Y.; the chairman of the Southern Freight Association, Atlanta, GA; the chairman of the Executive Committee, Western Railroad Traffic Association, Chicago, Ill., and the vice-president, Economics and Finance Department of the Association of American Railroads, Washington, D.C.

By the Commission, Betty Jo Christian, Vice Chairman.

H. G. HOMME, Jr.,
Acting Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION.

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors met in open session at 3 p.m. on Friday, September 15, 1978, to consider the matters listed below. Owing to clerical error, while this notice was posted timely, the earlier time requirement with respect to publication could not be complied with. The matters considered were as follows:

Disposition of minutes of previous meetings.
Applications for Federal deposit insurance:
Northern State Bank, a proposed new bank to be located at 218 Lakeside Street, Coeur d'Alene, Idaho, for Federal deposit insurance.
First Security State Bank of American Fork, a proposed new bank to be located at 600-700 East State Street, American Fork, Utah, for Federal deposit insurance.
Recommendation with respect to payment for legal services rendered and expenses incurred in connection with receivership and liquidation acitivities:
Bronson, Bronson & McKinnon, San Francisco, Calif., in connection with the receivership of United States National Bank, San Diego, Calif. (2 Memorandums).
Trager & Trager, Fairfield, Conn., in connection with the liquidation of the Monroe Bank & Trust Co., Monroe, Conn.
Kaye, Scholer, Fierman, Hays & Handler, New York, N.Y. in connection with the liquidation of Franklin National Bank, New York, N.Y.
J. Randolph Pelzer, P.A., North Charleston, S.C., in connection with the liquidation of American Bank & Trust, Orangeburg, S.C.

FEDERAL DEPOSIT INSURANCE CORPORATION.

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 3:30 p.m. on Friday, September 15, 1978, the Federal Deposit Insurance Corporation's Board of Directors met in closed session, by vote of the Board of Directors pursuant to sections 552b(c) (2), (6), (8), (9)(A)(ii), (9)(B), and (10) of title 5, United States Code, to consider the matters listed below. Owing to clerical error, while this notice was posted timely, the early time requirement with respect to publication could not be complied with. The matters considered were as follows:

Disposition of minutes of previous meetings.
Applications for consent to establish branches:
ComBank/Fairvilla, Fairvilla, Fla., for consent to establish a branch at 2420 East Colonial Drive and a drive-in facility at the northeast corner of Livingston Street and Bumby Avenue, both locations in Orlando, Fla.
The National Savings Bank of the city of Albany, Albany, N.Y., for consent to establish a branch at the Troy Plaza, 13th and Hoosick Streets, Rensselaer County, N.Y.
Requests pursuant to section 19 of the Federal Deposit Insurance Act for consent to service of persons convicted of offenses involving dishonesty or a breach of trust as directors, officers, or employees of insured banks:
Names of persons and of banks authorized to be exempt from disclosure pursuant to the provisions of subsection (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6)).
Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assests:
Case No. 43,624-L (Amended)—Franklin National Bank, New York, N.Y.
Case No. 43,645-L—The Bank of Bloomfield, Bloomfield, N.J.
Memorandum re Surety Bank & Trust Co., Wakefield, Mass.
Recommendations with respect to the initiation or termination of cease-and-desist proceedings, termination-of-insurance proceedings, or suspension or removal proceedings against certain insured banks or officers or directors thereof:
Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(6), (c)(8), and (c)(9)(A)(ii)).
Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:
Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (C)(6) of the "Government in the Sunshine Act" (5 U.S.C 552b (c)(2) and (c)(6)).

The meeting was held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street NW., Washington, D.C.

Requests for information concerning the meeting may be directed to Mr. Alan R. Miller, Executive Secretary of the Corporation, at 202-389-4446.

Dated: September 15, 1978.

DEPARTMENT OF DEFENSE

Privacy Act Issuances

Notice of Incorporation by Reference

Agency: Department of Defense (DoD).

Summary: Federal agencies are required by the Privacy Act of 1974 to give annual notice of certain records they maintain. The notices published last year were compiled by the Office of the Federal Register into "Privacy Act Issuances—1977 Compilation." The purpose of this document is to incorporate by reference the notices that appear in "Privacy Act Issuances—1977 Compilation" and to publish in full those record systems of the DoD Components that have been added or amended since then. Also listed, by title and citation, are those record systems that have since been revoked and therefore deleted.

Dates: This document fulfills the annual notice requirement of the Privacy Act for 1978.

For Further Information Contact: Lt Col Aurelio Nepa, Jr., USAF, Staff Director, Defense Privacy Board, ODASD(A), Room 5H-023, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20314, 202-693-0987.

Supplementary Information: This document gives public notice that the Department of Defense is issuing its annual publication for 1978 of record systems notices in Federal Register as required by 5 U.S.C. 552a(e)(4) of the Privacy Act of 1978 (Public Law 93-579).

Location of Notices in 1977 Compilation

The DoD Privacy Act Issuances—1977 Compilation was published in the Federal Register, FR Doc. 77-28255, on September 28, 1977 at 42 FR 50365.

Availability of 1977 Compilation

"Privacy Act Issuances—1977 Compilation" is available from Regional Depository Libraries at 50 locations around the country and can be examined at these libraries free of charge. The 1977 Compilation is also available at the General Services Administration Federal Information Centers, which are located at 30 central points around the country and may be examined at the central headquarters of the Department of Defense components. It is also available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Upon request, the Office of the Federal Register will furnish a photocopy of the full text of a particular records system published in the 1977 Compilation for a nominal fee.

Approval of the Director

The notices of systems of records of the DoD "Privacy Act Issuances—1977 Compilation" are incorporated by reference. The Director of the Office of the Federal Register granted approval to incorporate by reference these Privacy Act issuances on July 13, 1978. This 1978 compilation sets forth those systems of records for each DoD Component that have been added, amended or deleted since the 1977 compilation published on September 28, 1977 up to and including the August 7, 1978 issue of the Federal Register. No systems have been added, amended or deleted which were not previously published as a notice in the Federal Register for public comment. Accordingly, this listing supersedes all previously published listings of system notices for the DoD since the 1977 DoD compilation published on September 28, 1977 (42 FR 50365) through and including 43 FR 34936 of August 7, 1978. This 1978 DoD annual Privacy Act Issuances compilation, which includes the 1977 DoD Privacy Act Issuances incorporated by reference, shall serve as a new base line of reference for any future additions, amendments or deletions of record system notices in the Federal Register for the DoD until the next annual compilation in 1979.

Department of Defense Components

The systems of records in the DoD which are subject to the Privacy Act are maintained by the Components of the Department. These Components are:

U.S. Army.
Defense Mapping Agency.
Defense Civil Preparedness Agency.
Office of the Secretary of Defense.
Defense Advanced Research Projects Agency.
Department of the Air Force.
National Security Agency.
Defense Nuclear Agency.
Organization of the Joint Chiefs of Staff.
Defense Communications Agency.
Defense Intelligence Agency.
Department of the Navy/U.S. Marine Corps.
Defense Contract Audit Agency.
Defense Logistics Agency.
Defense Security Assistance Agency.
Defense Investigative Service.
Uniformed Services University of the Health Sciences.

The Defense Security Assistance Agency has no system of records which requires publication under the Privacy Act. The system notices which follow contain listings of all other Components of the Department of Defense. Taken together, the Component listings constitute the total systems of records in the Department which are required to be published.

DEPARTMENT OF DEFENSE COMPONENT IDENTIFIERS

Each published system of records is preceded by a code identifier. The first letter of the code represents the appropriate Component identifier. Following is a list of identifiers for the Department of Defense and its Components assigned by the Office of the Federal Register.

IDENTIFIER	COMPONENT
A	Department of the Army (DA)
B	Defense Mapping Agency (DMA)
C	Defense Civil Preparedness Agency (DCPA)
D	Office of the Secretary of Defense (OSD)
E	Defense Advanced Research Projects Agency (DARPA)
F	Department of the Air Force (AF)
G	National Security Agency (NSA)
H	Defense Nuclear Agency (DNA)
J	Organization of the Joint Chiefs of Staff (JCS)
K	Defense Communications Agency (DCA)
L	Defense Intelligence Agency (DIA)
M	U.S. Marine Corps (USMC)
N	Department of the Navy (DON)
R	Defense Contract Audit Agency (DCAA)
S	Defense Logistics Agency (DLA)
T	Defense Security Assistance Agency (DSAA)
V	Defense Investigative Service (DIS)
W	Uniformed Services University of the Health Sciences (USUHS)

SUMMARY OF DOD SYSTEM NOTICES

Department of the Army

The U.S. Army Privacy Act Issuances—1977 Compilation, hereby incorporated by reference, was published in the Federal Register on September 28, 1977, at 42 FR 50367. Set forth immediately below are those record systems that have since been revoked and therefore deleted from the Army inventory of record system notices. Published further below, in full text and in sequence order, under a separate Army heading are those systems of records that the Department of the Army has added or amended since publication of the 1977 Compilation, as of August 7, 1978.

Deletions—System Identification, System Name, and FR Citation and Date

UNITED STATES ARMY

AAFES0307.01

System name:

0307.01 Carpooling Program

System location:

Headquarters Army and Air Force Exchange Service (HQ AAFES), Administrative Services Division, Headquarters Personnel Branch (AD-P), Dallas, TX 75222.

Categories of individuals covered by the system:

All HQ AAFES personnel who voluntarily participate in carpool program.

Categories of records in the system:

Name, duty address and phone number, hours of duty, residence address and phone number, and any other information necessary for carpool arrangements which may include map coordinates of home or nearby reference points, working hours, etc.

Authority for maintenance of the system:

10 U.S.C. 3012 and 8012 which identify the powers and duties delegated by the Secretary of the Army and the Secretary of the Air Force, respectively, each of whom is responsible for and has the authority necessary to conduct all affairs of his respective department, including functions necessary or appropriate for administration.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Internal use: To assist HQ AAFES personnel who desire to form carpools.

External use: To the City of Dallas, TX for inclusion in its Ride-sharing Program.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders.

Retrievability:

Alphabetically by employee name.

Safeguards:

Information is retained in file cabinets. Work and storage area is within a controlled building, access to which is limited to assigned personnel.

Retention and disposal:

Retained until such time as individual's employment with HQ AAFES is terminated, after which record is destroyed.

System manager(s) and address:

Director, Administrator Services Division, HQ AAFES, Dallas, TX 75222.

Notification procedure:

Information may be obtained from:
HQ AAFES (AD-P)
Dallas, TX 75222
Telephone: Area Code 214/330-3871

Record access procedures:

Requests from individuals should be addressed to: HQ AAFES, ATTN: AD-P, Dallas, TX 75222.

Written requests for information should contain the full name of the individual, social security number, and duty phone number.

Personal visits may be made to the Administrative Services Division, HQ AAFES. Individual should be able to provide acceptable identification such as a valid driver's license.

Contesting record procedures:

The agency's rules for access to records and for contesting contents and appealing initial determinations by individuals concerned are contained in Army Regulation 340-21.

Record source categories:

Provided by individual interested in carpool program.

Employee Skills Survey (AAFES Form 1200-61), submitted by eligible RFT and RPT HPP employees and intermittent (regularly

Employee Career Development Plan (AAFES Form 1200-62), submitted by interested/eligible RFT and RPT HPP employees and intermittent (regularly scheduled) employees.

Requests from individuals should be addressed to HQ AAFES, Comptroller Division, CM-G, Dallas, TX 75222.

Contesting record procedures:

Record source categories:

Provided by individual interested in carpool program.

Systems exempted from certain provisions of the act:

None.

AAFES0406.12a

System name:

0406.12a Skills Bank File (Employee Skills Survey)

System location:

Headquarters Army and Air Force Exchange Service (HQ AAFES), Dallas, TX; HQ AAFES-Europe; HQ AAFES-Pacific: HQ AAFES-Alaska; all regional offices; base and post exchange offices within the Army and the Air Force.

Categories of individuals covered by the system:

All AAFES regular full time (RFT) and regular part-time (RPT) hourly pay plan (HPP) employees and intermittent (regularly scheduled) employees.

Categories of records in the system:

Name, social security number (SSN), current job title, grade, duty phone, job location, date of Skills Survey (AAFES Form 1200-61), education/training courses completed, skills/experience acquired, skills used in daily work, and those identified as needed.

Authority for maintenance of the system:

10 U.S.C. 3012 and 8012 which identify the powers and duties delegated by the Secretary of the Army and the Secretary of the Air Force, respectively, each of whom is responsible for and has the authority necessary to conduct all affairs of his respective department, including functions necessary or appropriate for the training operations and administration.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

To aid servicing personnel office in identifying and referring qualified employees for vacant positions. A skills bank for HQ AAFES employees is established/maintained from Employee Skills Survey, AAFES Form 1200-61. The completed forms are filed alphabetically by employee name.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders.

Retrievability:

Alphabetically by employee name.

Safeguards:

Files are maintained in locked file cabinets.

Retention and disposal:

Retained until such time as employee retires, resigns, or is otherwise separated, at which time record is destroyed. Upon employee's transfer to another AAFES location file is forwarded to gaining personnel office.

System manager(s) and address:

Director, Administrative Services Division, HQ AAFES, Dallas, TX 75222.

Notification procedure:

Information may be obtained from:
HQ AAFES (AD-P)
Dallas, TX 75222
Telephone: Area Code 214/330-3871

Record access procedures:

Requests from individuals should be addressed to: HQ AAFES, ATTN: AD-P, Dallas, TX 75222.

Written requests for information should contain the full name of the individual, SSN, duty phone, and job location.

Personal visits may be made to the Administrative Services Division. Individuals should provide acceptable identification such as a valid driver's license.

Contesting record procedures:

The agency's rules for access to records and for contesting contents and appealing initial determinations by individuals concerned are contained in Army Regulation 340-21.

Record source categories:

Employee Skills Survey (AAFES Form 1200-61), submitted by eligible RFT and RPT HPP employees and intermittent (regularly scheduled) employees.

Systems exempted from certain provisions of the act:

None.

AAFES0406.12b

System name:

0406.12b Employee Career Development Plan File

System location:

Headquarters Army and Air Force Exchange Service (HQ AAFES), Dallas, TX; HQ AAFES-Europe; HQ AAFES-Pacific; HQ AAFES-Alaska; all regional offices; base and post exchange offices within the Army and the Air Force.

Categories of individuals covered by the system:

All AAFES regular full time (RFT) and regular part-time (RPT) hourly pay plan (HPP) employees and intermittent (regularly scheduled) employees.

Categories of records in the system:

Name, social security number (SSN), current job title, grade, duty phone, job location, career goals as identified on AAFES Form 1200-62 and progress in achieving goals, career appraisals, and employee/supervisor comments.

Authority for maintenance of the system:

10 U.S.C. 3012 and 8012 which identify the powers and duties delegated by the Secretary of the Army and the Secretary of the Air Force, respectively, each of whom is responsible for and has the authority necessary to conduct all affairs of his respective department, including functions necessary or appropriate for the training operations and administration.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

To provide HQ AAFES Personnel Branch (AD-P) a central reference of identifiable employees who have devised a career development plan, or who have attained eligiblity for referral consideration to vacant HPP positions. File also provides a source of information from which referral rosters of HPP employees for junior/middle management positions may be compiled.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders.

Retrievability:

Alphabetically by employee name.

Safeguards:

Files are maintained in locked file cabinets.

Retention and disposal:

Retained until such time as employee retires, resigns, or is otherwise separated, at which time record is destroyed. Upon employee's transfer to another AAFES location, file is forwarded to gaining personnel office.

System manager(s) and address:

Director, Administrative Services Division, HQ AAFES, Dallas, TX 75222.

Notification procedure:

Information may be obtained from:
HQ AAFES (AD-P)
Dallas, TX 75222
Telephone: Area Code 214/330-3871

Record access procedures:

Requests from individuals should be addressed to: HQ AAFES, ATTN: AD-P, Dallas, TX 75222.

Written requests for information should contain the full name of the individual, SSN, duty phone and job location.

Personal visits may be made to the Administrative Services Division. Individuals should provide acceptable identification such as a valid driver's license.

Contesting record procedures:

The agency's rules for access to records and for contesting contents and appealing initial determinations by individuals concerned are contained in Army Regulation 340-21.

Record source categories:

Employee Career Development Plan (AAFES Form 1200-62), submitted by interested/eligible RFT and RPT HPP employees and intermittent (regularly scheduled) employees.

Systems exempted from certain provisions of the act:

None.

AAFES0702.22

System name:

0702.22 Check-Cashing Privileges Suspense Files Consolidation

System location:

HQ AAFES, Comptroller Division, Dallas, Texas 75222. In CONUS: AAFES Exchange Regions, Area Exchanges and Installation Exchanges. Overseas: HQ AAFES-Alaska, Anchorage, Alaska; HQ AAFES-Europe, Munich, Germany; HQ AAFES-Pacific, Honolulu, Hawaii, and Exchange Regions.

Categories of individuals covered by the system:

All eligible exchange customers and authorized patrons.

Categories of records in the system:

File contains alphanumeric: Customer name and social security number, amounts of checks not paid by bank and category (military, dependents, retirees, etc).

Authority for maintenance of the system:

Title 10 USC Sections 3012 and 8012

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

To ascertain if an individual's check cashing privileges have been suspended; to determine the number of checks and the amount thereof of unpaid dishonored checks held by a user; and to determine if an individual is eligible to encash a personal check.

The record is in the form of a listing of customer name or social security number at those locations where mechanical device is not available. Where a mechanical device is used the device will indicate eligibility to cash a check by displaying a colored light, and, on some devices, the installation number which last reported dishonored check activity, number and amount of unredeemed dishonored checks and code for present check cashing privilege if customer had previously been entered into the system.

Routine users also include personnel of the U.S. Coast Guard exchanges who have a need for the record in the performance of their duties.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Computer disc and computer paper print-outs.

Retrievability:

By social security number

Safeguards:

Computer print-out usually covered by pressboard binder and is located in office accessible only by personnel authorized to cash checks. Computer discs maintained by Computer Processing Branch, Data Systems Division, HQ AAFES and work and storage area is controlled and limited to assigned personnel only.

Retention and disposal:

Listings are current until superseded. Upon being superseded the listing is mutilated and disposed of with other paper waste. Mechanized data are electronically purged upon supersession.

System manager(s) and address:

HQ AAFES, Comptroller Division, General Accounting Branch, Dallas, TX 75222.

Notification procedure:

Information may be obtained from:
HQ AAFES
Comptroller Division, General Accounting Branch
Dallas, TX 75222
Telephone: Area Code 214/330-2631

Written requests for information should contain the full name of the individual, current address, and social security number. Personal visits may be made to HQ AAFES, exchange regions, or area exchanges.

For personal visits, the individual should be able to provide some acceptable identification, i.e., driver's license, social security card, military identification card.

Record access procedures:

Requests from individuals should be addressed to HQ AAFES, Comptroller Division, CM-G, Dallas, TX 75222.

Contesting record procedures:

The agency's rules for access to records and for contesting contents and appealing initial determinations by individual concerned may be obtained from the SYSMANAGER.

Record source categories:

Checks cashed by customers and not paid by the bank; debt memos from banks advising of charges for checks unpaid; notification from other users or installation commanders of the suspension of check cashing privilege.

Systems exempted from certain provisions of the act:

None

AAFES1203.03

System name:

1203.03 Appointment of Contracting Officers

System location:

Procurement Management Office, Headquarters Army and Air Force Exchange Service (HQ AAFES); HQ AAFES-Europe; HQ AAFES-Pacific; HQ AAFES-Alaska; all regional offices within the Continental United States.

Categories of individuals covered by the system:

All civilian employees and/or military personnel assigned to AAFES who are appointed as contracting officers.

Categories of records in the system:

Name, social security number (SSN), job title and grade; qualifications, training and experience; request for appointment as contracting officer; copy of Certificate of Appointment, and other correspondence and documents relating to the individual's qualifications to act as a contracting officer.

Authority for maintenance of the system:

10 U.S.C. 5012 and 8012 which identify the powers and duties delegated by the Secretary of the Army and the Secretary of the Air Force, respectively, each of whom is responsible for and has the authority necessary to conduct all affairs of his respective department, including functions necessary or appropriate for the training operations and administration.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Used by AAFES contracting officer appointing authority to ascertain an individual's qualifications to be appointed as contracting officer, to determine if limitations on procurement authority are appropriate; and to complete the Certificate of Appointment.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders.

Retrievability:

Alphabetically by employee name.

Safeguards:

Information is retained in filing cabinets. Both the working and storage areas are within a controlled building, the entrance to which is limited to personnel assigned to AAFES.

Retention and disposal:

Records in this system are retained only so long as individual's appointment as contracting officer is valid. Upon termination of this appointment, records are destroyed.

System manager(s) and address:

Director, Procurement Management Office, HQ AAFES, Dallas, TX 75222.

Notification procedure:

Information may be obtained from:
HQ AAFES
ATTN: Procurement Management Office
Dallas, TX 75222
Telephone: Area Code 214/330-3761

Record access procedures:

Requests from individuals should be addressed to HQ AAFES, ATTN: Procurement Management Office, Dallas, TX 75222.

Written requests for information should contain the full name of the individual and activity to which assigned.

Personal visits may be made to HQ AAFES, or to an AAFES regional office, as appropriate. Individual should provide acceptable identification such as a valid driver's license, military identification

Record access procedures:

Written requests for information should contain the full name of the requester, SSN, current or former military status and appropriate

Retrievability:

Filed by social security number, alphabetically by name, and subidentifying document number. Conventional indexing is used to re-

marital status, physical descriptions, criminal history, expertise, talents, actions taken and other related personal data.

Authority for maintenance of the system:

Personal visits may be made to HQ AAFES, or to an AAFES regional office, as appropriate. Individual should provide acceptable identification such as a valid driver's license, military identification card, or SSN.

Contesting record procedures:

The Army's rules for access to records and for contesting contents and appealing initial determinations by individuals concerned are contained in Army Regulation 340-21.

Record source categories:

The individual concerned, personnel records, former employers, educational institutions.

Systems exempted from certain provisions of the act:

None.

A0225.11fDAPC

System name:

225.11 Enlisted Year Group Management File/RETAIN

System location:

Department of the Army, United States (US) Army Military Personnel Center (DAPC-EP)

Categories of individuals covered by the system:

Active duty members of the US Army in enlisted grades of E1 thru E9 and former military personnel who are applicants for enlistment.

Categories of records in the system:

AUTOMATED: File contains control number, reclassification/ enlistment action, type of enlistment, social security number (SSN), pay grade, race, sex, basic active service date, estimated termination of service, reenlistment date, civilian education, career management field, primary military occupational specialty (PMOS), PMOS evaluation score, new career management file (CMF), new PMOS, date of award of new PMOS, source of new PMOS, personnel charged to school code, status of application, assignment code, date of last status change, current location, year group; name, Security Investigation Status (SIS), terms reenlisted.

MANUAL: File contains name, control number, reclassification/ enlistment action, type of enlistment, SSN, pay grade, race, sex, basic active service date, estimated termination of service, Armed Forces Qualification Test Score, civilian education, promotion list status, reenlistment bonus status, security clearance, marital status, reenlistment date, physical profile status with code, career counselor with location, pay entry basic date, current/last oversea area, date eligible to return from overseas, date departed United States, waiver required, citizenship status, aptitude area scores, school/assignments requested, assignment confirmation, orders information.

Authority for maintenance of the system:

Title 5 U.S.C., Section 301.
Title 10 U.S.C.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Department of the Army-Records are used for personnel management, year group management and manpower management.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records are stored on computer magnetic tapes and disk and as paper records in file folders.

Retrievability:

Normal access is by name, SSN, control number or other individual characteristics.

Safeguards:

Physical security devices, guards, computer hardware and software safeguard features and personnel clearances for individuals working with the system.

Retention and disposal:

Computer tapes are cut off annually, and are retained up to 5 years; hard copy files are cut off annually and retained up to 2 years.

System manager(s) and address:

Commander, US Army Military Personnel Center, 200 Stovall Street, Alexandria, VA 22332.

Notification procedure:

Information may be obtained from Headquarters, Department of the Army, US Army Military Personnel Center (DAPC-EP), Hoffman Bldg. 1, 2461 Eisenhower Avenue, Alexandria, VA 22331.

Record access procedures:

Written requests for information should contain the full name of the requester, SSN, current or former military status and appropriate return address. Personal visits may be made to the US Army Military Personnel Center; individuals should be able to provide their military service identification and DD Form 2A for active duty personnel, or other commonly acceptable means of identification used in normal transaction of business.

Contesting record procedures:

The department rules for contesting contents and appealing initial determinations may be obtained from US Army Military Personnel Center (DAPC-MSO), 200 Stovall Street, Alexandria, VA 22332.

Record source categories:

Information is obtained from the applicant, Department of the Army personnel records, computer reports and from other Department of the Army organizations and stations.

Systems exempted from certain provisions of the act:

None

A0305.10aDACA

System name:

305.10 Joint Uniform Military Pay System-Active Army (JUMPS-AA)

System location:

Primary System-United States Army Finance and Accounting Center (USAFAC), Indianapolis, IN 46249.

Decentralized Segments-Approximately 122 Army Finance Offices and Finance and Accounting Offices (FAO) world-wide.

Categories of individuals covered by the system:

All active duty military personnel.

Categories of records in the system:

Records include individual military pay records, casual payment receipts, substantiating documents, temporary pay records, transmittal letters, locator files, financial data record folders (FDRF), miscellaneous military pay files, and personal financial records (PFR).

Authority for maintenance of the system:

Title 37 U.S.C., Section 101 and following (Pay and Allowances of the Uniformed Services).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

USAFAC-Purpose is to provide a basis for establishment of computation of each active member's military pay entitlement, to provide a history of pay transactions, and to answer inquiries or claims pertaining to such entitlements. This information is also used to provide necessary data to the Treasury Department, the Social Security Administration, the US Army Military Personnel Center, the Veterans Administration, those states and cities which have an agreement with the Department of the Army to receive taxable earnings information, the American Red Cross and the Department of Health, Education and Welfare.

Treasury Department-To record check and bond issue data and to record taxable earnings and taxes witheld from military personnel.

Social Security Administration: To record earned wages by member under the Federal Insurance Contributions Act (FICA).

US Army Military Personnel Center (MILPERCEN): To compare military personnel identification with the Social Security Administration for purpose of correction and to compare and correct common data elements with USAFAC.

Veterans Administration: To record the collection of premiums for National Service Life Insurance and to transfer contributions to Post-Vietnam Era Veterans Education Account.

States and Cities: To verify tax liability against members' state and city income tax returns.

American Red Cross: To assist military personnel and their dependents in determining the status of monthly pay, dependents allotments, loans, and related financial transactions.

Department of Health, Education and Welfare: Disclose the name, rank and social security account number of each member of the Armed Services on active duty to the Inspector General of that Department only for comparison with appropriate rolls reflecting recipients of Aid to Families with Dependent Children (AFDC).

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders and in bulk storage, card files, computer magnetic tapes, computer paper printout, and microfiche.

Retrievability:

Filed by social security number, alphabetically by name, and substantiating document number. Conventional indexing is used to retrieve data.

Safeguards:

USAFAC-Buildings employ security guards. An employee badge and visitor registration system is utilized. Records are maintained in areas accessible only to authorized personnel that are properly screened, cleared and trained. Access to computer magnetic tape files is restricted to the members' servicing finance and accounting officer. Computer equipment and files are located in a separate secured area.

World-Wide Finance and Accounting Offices-Records are maintained in areas accessible only to authorized personnel that are properly screened, cleared and trained.

Retention and disposal:

Individual military pay records- Records are converted to microfiche which are retained for 56 years. Destruction is by shredding.

Other records: Retention periods vary according to category of record but total retention periods do not exceed 56 years. Disposition is to federal records centers and destruction thereafter is by burning or salvage as waste paper.

System manager(s) and address:

Commander, USAFAC, Indianapolis, IN 46249

Finance and Accounting Officer, United States Army Financing and Accounting Offices, world-wide.

Notification procedure:

Information may be obtained from:
Commander, USAFAC
Attention: FINCP
Indianapolis, IN 46249

Individuals may also contact Finance and Accounting Officers at United States Army Finance and Accounting Offices, world-wide.

Individual must provide full name, social security number and military status.

Record access procedures:

Requests from individuals should be addressed to: Commander, USAFAC, ATTN: FINCP, Indianapolis, IN 46249; or Finance and Accounting Officers at United States Army Finance and Accounting Offices, world-wide.

Written requests for information should also contain full name, social security number, military status and current address.

Information may be obtained by telephone: Area Code 317/542-2891

Contesting record procedures:

The Army's rules for access to records, contesting contents and appealing initial determinations may be obtained from the SYSMANAGER

Record source categories:

A0508.07aUSACIDC

System name:

508.07 Criminal Investigation Accreditation Files

System location:

Primary System: Accreditation Division, Directorate of Personnel and Administration, Headquarters (HQ), US Army Criminal Investigation Command (USACIDC), 5611 Columbia Pike, Falls Church, VA 22041

Decentralized Segments: Crime Records Directorate, USACIDC, 2301 Chesapeake Avenue, Baltimore, MD 21222; Washington National Records Center, GSA, Suitland, MD.

Categories of individuals covered by the system:

Any person who makes an application to the USACIDC for acceptance into the USACIDC program as an apprentice special agent; for a warrant officer appointment in USACIDC; for USACIDC supervisor credentials; for the USACIDC officer specialty program; or for USACIDC laboratory technician credentials.

Categories of records in the system:

Files contain the individual's application to USACIDC, a statement of personal history, personal identifiers, photographs, fingerprint cards, qualifications record, biography, information pertaining to assignment capability or location, letters of recommendation, educational documents, character investigation data, reclassification orders, reassignment orders, commander's inquiry data, reports of investigation, reasons for withdrawal from the program, reason for denying the application, date of acceptance into the program, date appointed (if an officer or warrant officer), date of accreditation, badge number, credential number polygraph certificate number (if a certified polygraph examiner), agent sequence number, assignment, date assigned, marital status, and other data pertaining to the accreditation function, polygraph examiner performance and evaluation data, physical profile, date of last physical, assignment preference, humanitarian transfer restrictions, current job title, date current security clearance authorized, date of last background investigation; primary, secondary, tertiary foreign language capability, special qualifications, service agreement, spouse's place of birth and citizenship, agent's place of birth, agent's last ten assignments, agent's hobbies, and agent's private licenses.

Authority for maintenance of the system:

Title 10 U.S.C., Section 3012(g).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Staff elements of USACIDC with a need-to-know: to determine an applicant's initial acceptance or non-acceptance into the USACIDC program, and if accepted the individual's continued eligibility, placement or standing within the USACIDC program.

U.S. Army Intelligence Security Command, for storage and utilization in determining security classifications.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Alpha file: paper records in file folders.
Criminal Investigator Information Data Card: vertical card file.
Machine Punch Card System: vertical card file.
Automated data files are maintained on magnetic tapes.

Retrievability:

Alpha Card File, Criminal Information Card, and Machine Punch Card Systems are all retrievable by last name of the individual, agent Sequence number SSN, badge number, credential number and polygraph number.

Safeguards:

HQ USACIDC buildings employ security guards, material is stored in locked containers during non-duty hours, and is accessible only by authorized personnel.

Crime Records Directorate building employs security guards, data is stored within a locked wire enclosure, and is accessible only by authorized personnel.

Washington National Records Center: buildings employ security guards during non-duty hours, 24 hour intrusion alarms, and locked external doors, and is accessible only by authorized personnel.

Automated records are maintained in a building employing security guards, room and data are accessible only by authorized personnel.

Retention and disposal:

Alpha files; files of approved applicants are retained in the active file until the individual retires, is released from active duty, or is voluntarily or involuntarily removed from the USACIDC program; the file is placed in an inactive storage at HQ USACIDC for the remainder of that year plus two additional years; it is then transferred to the Washington National Records Center where it is stored for eight additional years and then destroyed; files of personnel not accepted into the USACIDC program are retained in inactive storage at HQ USACIDC for the remainder of that year plus one additional year and then destroyed.

Criminal Investigation Information Data Cards are maintained permanently.

Machine Punch Cards are maintained only during such time as the individual is currently in the USACIDC program and are destroyed upon cessation of that status.

Automated data on individuals are maintained while the individual is serving as an investigator and for 90 days after he or she leaves the program.

investigation; ROI number; type of ROI; offense codes for the ROI; the number of days the ROI covered; determination of whether or not the number of days the ROI covered was justified; name of the field office reviewer; name of the field office approver; disposition status of the ROI; location of the incident; i.e., on post, off post or combination; determination of case difficulty; determination of the special agent's investigative effort; type of administrative deficiencies, if any; and type of investigative deficiencies, if any.

Authority for maintenance of the system:

Title 10 U.S.C., Section 3012(g).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Personnel of HQ USACIDC and all USACIDC subordinate elements with an official need-to-know, to accomplish various management functions such as statistical compilations, quality control, and special agent investigative and administative evaluations.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders and computer paper printouts.

Retrievability:

Information is retrievable by the name of the individual or other identifier.

Safeguards:

HQ USACIDC buildings employ security guards, information is stored in locked containers or rooms during non-duty hours and access is limited to authorized personnel. Buildings of subordinate elements of USACIDC generally employ 24 hour duty officers, store the information in locked containers or rooms, and access is limited to authorized personnel.

Retention and disposal:

Files are retained for an indefinite period, as the disposition policy has not yet been determined.

System manager(s) and address:

Commander, US Army Criminal Investigation Command, 5611 Columbia Pike, Falls Church, VA 22041.

Notification procedure:

Information may be obtained from:
Commander
USACIDC
ATTN: Dir Opns
5611 Columbia Pike
Falls Church, VA 22041

Record access procedures:

Requests from individuals should be addressed to: Commander, USACIDC, ATTN: Dir, Opns, 5611 Columbia Pike, Falls Church, VA 22041

Written requests for information should contain the full name, address, and date of birth. Personnel visits should be made to: Director of Operations, USACIDC, 5611 Columbia Pike, Falls Church, VA 22041.

For personal visits, the requesting individuals must present positive identification, such as a driver's license or other identification card with a photograph in addition to the information required in written requests.

Contesting record procedures:

The Army's rules for contesting contents and appealing initial determinations are contained in Army Regulation (AR) 340-21.

Record source categories:

The completed ROI, with all attachments and inclosures, and the objective and subjective analysis by the reviewers.

Systems exempted from certain provisions of the act:

None

A0508.25aUSACIDC

System name:

508.25a Index to Criminal Investigative Case Files

System location:

Criminal Records Directorate, United States (US) Army Criminal Investigation Command (USACIDC), 2301 Chesapeake Avenue, Baltimore, MD 21222.

Categories of individuals covered by the system:

Any individual, civilian or military, involved or suspected of being involved in criminal activity affecting the US Army's interests, property, and/or personnel.

Categories of records in the system:

Indices contain codes for type of crime and location of investigation, year, date of crime, names and personnel identifiers of offenders and victims of crime and report number.

Authority for maintenance of the system:

Title 10 U.S.C., Section 3012(g)

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

To afford index to Criminal Investigation Case Files and Military Police (MP) Reporting Files that are not indexed by any other activity. These records are utilized to develop investigative leads during the conduct of ongoing Army criminal investigations. These data are released only for US Army CID and MP investigative purposes. Statistics generated by these data are also utilized as a management tool to determine crime trends, frequency and rates. In the event that information maintained in this system of records indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation, or order issued pursuant thereto.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper card size 3x5 and computer punch cards.

Retrievability:

By name of offender, suspect or victim.

Safeguards:

Contained in a secure area; protected by a locked wire inclosure under 24 hour guard. Access to the files area is controlled through a photograph/badge ID System. No visitors are authorized access to the area, except under escort; files do not afford 'For Official Use Only' protection and release of information data is recorded on a permanent log.

Retention and disposal: Permanent; 40 years.

System manager(s) and address:

Commander, USACIDC, Crime Records Directorate, 5611 Columbia Pike, Falls Church, VA 22041.

Notification procedure:

Information may be obtained from:
Commander
USACIDC
ATTN: CIJA-RI
5611 Columbia Pike
Falls Church, VA 22041

Record access procedures:

Requests from individuals should be addressed to: Commander, USACIDC, ATTN: CIJA-RI, 5611 Columbia Pike, Falls Church, VA 22041.

Written requests for information should contain the full name, address, and date of birth. Personal visits should be made at: Office of the Staff Judge Advocate - Release of Information, USACIDC, 5611 Columbia Pike, Falls Church, VA 22041.

For personal visits, the requesting individuals must present positive identification, such as a driver's license or other identification card with a photograph in addition to the information required in written request.

Contesting record procedures:

The Army's rules for contesting contents and appealing initial determinations are contained in Army Regulation 340-21.

Record source categories:

Suspects, victims, USACIDC special agents and other personnel, informants; various Department of Defense, Federal, State, and local investigative agencies; departments or agencies of foreign governments; and any other individual or organization which may supply pertinent information.

Systems exempted from certain provisions of the act:

Parts of this system may be exempt under 5 USC 552a(j) or (k) as applicable. For additional information, contact the System Manager.

A0509.19aDAPE

System name:

509.19a Military Police Investigator Certification Files

System location:

Primary System: Record files pertaining to individual certification actions are maintained at US Army Military Personnel Center (DAPC-EPM-L), 200 Stovall Street, Alexandria, Virginia 22332.

Decentralized copies: Correspondence relating to certification is maintained at the installation initiating request and at respective major Army commands. Official mailing addresses are in the Department of Defense (DOD) directory in the appendix.

Categories of individuals covered by the system:

Any individual who has been nominated by a commander for certification as a Military Police Investigator.

Categories of records in the system:

Files contain: requests, name checks, background checks, approvals, disapprovals, appeals, rebuttals, and related documents.

Authority for maintenance of the system:

Title 10 U.S.C., Section 3012(g).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Information is collected to establish eligibility and suitability of individuals to be certified as Military Police Investigators. Information is not disclosed outside of the agency, and within the agency access to records containing adverse suitability information is restricted by use of protective markings.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folder and card indexes.

Retrievability:

Filed alphabetically by name.

Safeguards:

Building employs security guards and controls access. Distribution and access to files based on strict need-to-know. Files contained in locked cabinets when not under personal supervision of authorized personnel.

Retention and disposal:

Destroyed upon individual's release from active service or 3 years after involuntary withdrawal of certification.

System manager(s) and address:

Deputy Chief of Staff for Personnel, Headquarters, Department of the Army, Washington, DC 20310.

Notification procedure:

Requests should be addressed to Deputy Chief of Staff for Personnel, HQDA, (DAPE-HRE) Washington, DC 20310

Record access procedures:

Requests should be addressed to Commander, US Army Military Personnel Center (DAPC-EPM-L), 200 Stovall St., Alexandria, VA 22332

Contesting record procedures:

Requests should be addressed to Deputy Chief of Staff for Personnel, HQDA, (DAPE-HRE), Washingotn, DC 20310

Record source categories:

Subjects, witnesses, victims, Military Police and United States Army Criminal Investigations Command personnel and agents, informants, various DOD, Federal, State and local investigative and law enforcement agencies, departments or agencies of foreign governments; and any other individuals or organizations which may supply pertinent information.

Systems exempted from certain provisions of the act:

Parts of this system may be exempt under 5 USC 552a (j) or (k) as applicable. For additional information, contact the SYSMANAGER.

A0609.01aDASG

System name:

609.01 Individual Radiation Protection Files

System location:

Primary System - Army installations/activities which possess, use, or store radiation producing devices or radioactive materials.

Decentralized Segment - Nucleonics Section, Quality Assurance Division, Lexington Blue Grass Depot Activity, Lexington, KY.

Categories of individuals covered by the system:

All Army personnel, civilian and military, occupationally exposed to hazards of ionizing radiation and occasionally exposed and monitored visitors.

Categories of records in the system:

Installation personnel and Radiation Protection Committee files contain documents, DD Forms 1952, DD Forms 1141, DA Forms 3484, exposed dosimetry film, and related papers reflecting the training, experience, and certification of individual radiation workers to handle specific sources of ionizing radiation; summary listings of certified individuals; external exposures to ionizing radiation, including personnel dosimetry results and reports of film badge readings; and internal exposures to radioactive materials, including analysis of biological specimens and whole-body counts.

Lexington Blue Grass Depot Activity automated dosimetry file contains data elements reflecting individual name, social security number, film badge number, coded cross-reference to place of assignment at time of exposure, from-to dates of exposure and radiation dose, cumulative quarterly, annual and life-time dose, type of measuring device, and coded cross-reference to qualifying data regarding exposure readings.

Authority for maintenance of the system:

10 CFR 35; 10 CFR 20; Title 44 U.S.C., Section 3101; Title 5 U.S.C., Section 301.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

To insure individual qualifications to handle radioactive materials; to monitor, evaluate, and control the risks of individual exposures to ionizing radiation or radioactive materials by comparison of both current (short-term) and long-term exposures; to provide radiation data to other Federal agencies, academic institutions, and non-governmental agencies, such as the National Council on Radiation Protection and Measurement and the National Research Council, authorized to conduct radiation research, evaluation, and monitorship.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

File folders, film packets, magnetic tape/disk.

Retrievability:

Filed alphabetically by name; automated data retrievable by name, social security number, or automatic data processing parameters.

Safeguards:

Buildings employs security guards. Records are maintained in areas accessible only to authorized personnel who are properly screened and trained; access to computer operations room is controlled by card key system, which requires positive identification and authorization.

Retention and disposal:

Certified user listing files - Retained 5 years after reassignment, transfer or separation of individual.

Personnel Dosimetry files - Permanent. Processed film indicating normal exposure is retained 5 years after evaluation and recorded on permanent records.

Personnel Bioassay files - Permanent medical records.

System manager(s) and address:

The Surgeon General, Headquarters, Department of the Army (HQDA), The Pentagon, Washington, DC 20310.

Notification procedure:

Information may be obtained by written request to:
HQDA (DASG-PSP)
Room 2D453
The Pentagon
Washington, DC 20310

Record access procedures:

Requests should be addressed to: Office of The Surgeon General, HQDA (DASG-PSP), Room 2D453, The Pentagon, Washington, DC 20310.

All requests should be written since files are not stored in HQDA. If telephone conversation is desired, at the expense of the inquirer, area code and telephone number will be furnished.

Personal visits by the individual requesting access may be arranged only with the official assigned to respond to a written request.

Contesting record procedures:

The Army's rules for contesting content and appealing initial determination may be obtained from the SYSMANAGER.

Paper records are maintained in file folders. Selected items of information are on computer paper printouts, magnetic tapes, computer punch cards, and control cards.

Authority for maintenance of the system:

Title 10 U.S.C., Chapter 103, Section 2101-2111.

Ft Monroe, VA 23651
Telephone: Area Code 804/727-3077

Contesting record procedures:

The Army's rules for contesting content and appealing initial determination may be obtained from the SYSMANAGER.

Record source categories:

Monitored individuals and exposed dosimetry film.

Systems exempted from certain provisions of the act:

None

A0702.08aDASG

System name:

702.08 Army Medical Procurement Applicant Files

System location:

Primary System: Procurement Division, Army Medical Department (AMEDD) Personnel Support Agency, Headquarters, Department of the Army (HQDA) (SGPE-PD), Forrestal Building, Washington, DC, 20314.

Decentralized Segments: AMEDD Procurement Counselor Field Offices in the following locations: Cutler Army Hospital, Ft. Devens, MA 01433; US Post Office Building, 135 High St., Hartford, CT 06103; Room 1271, Federal Building, 100 South Clinton St., Syracuse, NY 13202; 160 North Franklin St., Hempstead, NY 11550; Building 5515, Room 309 and 316, Ft. Dix, NJ 08640; Federal Office Building, 1000 Liberty Avenue, Pittsburgh, PA 15222; Forest Glen Section, Walter Reed Army Medical Center, Washington, DC 20012; Federal Office Building, 400 North 8th St., Richmond, VA 23240; 3555 Maguire Blvd., Bennington Building, Suite 250, Orlando, FL 32803; Federal Building, 310 New Bern Avenue, Suite 310, Post Office Box 27524, Raleigh, NC 27611; 200 East Liberty St., Ann Arbor, MI 48107; Building 67, Columbus Support Facility, 530 Buckingham St., Columbus, OH 43215; HQ US Army Forces Command, Ft. McPherson, GA 30330; Building 142, Room 345, Ft. Sheridan, IL 60037; 144 Elk Place, Suite 1504, New Orleans, LA 70112; Federal Office Building, 515 Rusk Ave., Room 5122, Houston, TX 77002; Brooke Army Medical Center, ATTN: AFZG-MDZ-PP, Ft. Sam Houston, TX 78234; Federal Office Building, 1100 Commerce Street, Dallas, TX 75202; US Army Recruiting Main Station, 12th & Spruce Streets, St. Louis, MO 63102; US Army Medical Department Activity, Building 268 (Dodge Hall), Ft. Leavenworth, KS 66027; American Red Cross Building, Box 327, Fitzsimons Army Medical Center, Denver, CO 80240; Building 5, Ft. Douglas, UT 84110; Building 138, Room 116, Naval Support Activity (Sand Point), Seattle, WA 98115; Building 654, Presidio of San Francisco, San Francisco, CA 94129; 1600 N. Broadway, Suite 210, Santa Ana, CA 92706; US Army Medical Command, Europe, APO New York 09102; Tripler Army Medical Center, ATTN: HSCT-PD-P, TAMC, Hawaii 96859.

Categories of individuals covered by the system:

Potential applicants and applicants for the AMEDD procurement programs, to include applicants for appointment in the Regular Army and US Army Reserve.

Categories of records in the system:

Interview sheets; counselor evaluations; letters of recommendation; selection/ nonselection letters; Special Orders; all correspondence to and from applicant; correspondence received concerning applicant; Selection Board/Committee results; Statement of Interests; Objectives and Motivation; US Army Reserve Components Personnel and Administration Center Transcript; Officer Procurement Data System coding Sheet.

Authority for maintenance of the system:

Title 10 U.S.C., Sections 3012 and 4301, and Executive Order 9397.

Routine uses of records maintained in the system, including categories of users and the purpoees of such uses:

Procurement Division: To evaluate an applicant's acceptability and potential for appointment in a component of the AMEDD, to evaluate qualifications for assignment to various career areas; to determine educational and experience background for award of constructive service credit; to determine dates of service and seniority; to document service agreement with the US Army; to provide statistical information for effective management of the AMEDD Personnel Procurement Program.

AMEDD Procurement Counselor Field Offices: To assist applicants in completion of their applications; to counsel applicants in their potential for selection for procurement programs and/or for appointment in the AMEDD.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records are maintained in file folders. Selected items of information are on computer paper printouts, magnetic tapes, computer punch cards, and control cards.

Retrievability:

File folders and control cards are filed alphabetically by last name of applicant. Computer printouts are printed alphabetically and by program code/social security number (SSN), by program and/or by special category. Individual records on magnetic tape are retrieved by program code and SSN. Computer punch cards are filed alphabetically by program code/SSN, and/or by special category.

Safeguards:

File folders, control cards, computer paper printouts and computer punch cards are maintained in areas accessible only to authorized personnel. Magnetic tapes are protected by a user identification and password convention.

Retention and disposal:

File folders and control cards are maintained until the end of the year in which all actions pertaining to the individual are completed, plus one year, and destroyed. Computer paper printouts and computer punch cards are destroyed upon replacement by updated information and/or until applicable cyclical program is completed and printouts/punch cards are of no further value, whichever is later. Magnetic tapes are permanent.

System manager(s) and address:

The Surgeon General, Headquarters, Department of the Army (HQDA), The Pentagon, Washington, DC 20310.

Notification procedure:

Information may be obtained from:

Commander, AMEDD Personnel Support Agency
Officer Procurement Division
Room 7BO54, Forrestal Building
Washington, DC 20314
Telephone: 202/693-5120

Record access procedures:

Requests should be addressed to: HQDA (SGPE-PD), Forrestal Building, Room 7BO54, Washington, DC 20314.

Contesting record procedures:

The Army's rules for access to records and for contesting contents and appealing initial determinations may be obtained from Commander, AMEDD Personnel Support Agency.

Record source categories:

Transcripts from post secondary schools; employer evaluations; faculty evaluations; AMEDD counselor evaluations; interviews; military supervisor evaluations; medical information from medical examination facilities; American Testing Program; Educational Testing Service; Selection Board/committees; prior military service records; Department of Defense (DD) Form 214 (Report of Separation from Active Duty); application and related forms from individual.

Systems exempted from certain provisions of the act:

Parts of this system may be exempt under 5 USC 552a, Section (j) or (k), as applicable. For additional information, contact the SYSMANAGER.

A0704.06bTRADOC

System name:

704.06b Army Reserve Officers' Training Corps (ROTC) LEADS Referral Card System

System location:

Primary System - LCS Industries, 10 Pelham Parkway, Pelham Manor, NY 10803.

Decentralized Segments - Ayer Direct, 1345 Avenue of the Americas, New York, NY 10019; Office of the Deputy Chief of Staff for ROTC (ODCSROTC), Headquarters (HQ), United States Army Training and Doctrine Command (TRADOC), Ft Monroe, VA 23651; United States (US) Army ROTC Region (ROTCR) HQ, and ROTC Instructor Group Staffs.

Categories of individuals covered by the system:

Any US citizen who can reasonably be assumed to be a potential enrollee in the Senior ROTG (SROTC) program.

Categories of records in the system:

System contains individual names, addresses, telephone numbers, social security numbers, high school graduation dates, colleges planning to attend, and enrollment information following recruitment follow-up actions.

Authority for maintenance of the system:

Title 10 U.S.C., Chapter 103, Section 2101-2111.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

LCS Industries - To establish and maintain a central computerized master file of prospective SROTC enrollees; to generate SROTC prospect LEADS cards and recruitment management information reports.

ROTC Instructor Group Staffs - To recruit individual SROTC prospects for possible enrollment and to maintain a future reference and follow-up suspense file of prospective enrollees.

HQ, TRADOC; HQ, ROTC; and Ayer Direct - To analyze SROTC advertising program effectiveness and recruitment activitites.

United States Army Recruiting Command (USAREC); United States Army Reserve (USAR); and Army National Guard (ARNG) - To recruit individual prospects for enlistment purposes when the individual has specifically requested transfer of his/her name from the SROTC prospect file to the USAREC, USAR, or ARNG.

Admissions/Registrars Offices - To provide prospective enrollees who have indicated a desire to attend a particular host or cross-enrolled institution with catalogs or other information concerning that school.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

LCS Industries stores information on magnetic tape and magnetic disk in a film library secured by a controlled access roster.

Ayer Direct stores computer print-outs in standard file containers.

HQ, TRADOC and ROTCR store computer print-outs in standard file containers.

ROTC Instructor Groupd Staffs store LEADS cards in file folders or in standard card index files.

Admissions/Resistrars Offices store individual referral data in standard file containers.

Retrievability:

LCS Industires - Filed alphabetically by last name of prospect and by ROTCR.

HQ, TRADOC, ROTCR, and Ayer Direct - Print-out reports are alphabetized by last name of prospect and by ROTCR. Reports are filed chronologically by month.

ROTC Instructor Group Staffs - LEADS cards are filed alphabetically by last name of prospect.

Admissions/Registrars Offices - Filed alphabetically by last name of prospect.

Safeguards:

LCS Industries - Building and offices are locked in the evening. Keys are controlled. Records are maintained in areas accessible only to authorized personnel who are properly screened and trained.

Ayer Direct - Building employs security guard. Employees carry passes. Records are maintained in areas accessible only to authorized personnel who are properly screened, cleared, and trained.

HQ, TRADOC and ROTCR - Buildings are located on military reservations. Records are maintained in areas accessible only to authorized personnel who are properly screened, cleared, and trained.

ROTC Instructor Group Staffs and Admissions/Registrars Offices - Buildings are located on college campuses guarded by college security officials. Records are maintained in areas accessible only to authorized personnel who are properly screened, cleared, and trained.

Retention and disposal:

LCS Industries - Records are retained in active file until the end of the fiscal year in which the data is recieved, held in an inactive file until expiration of contract.

Ayer Direct - Records are retained in an active file for up to two years and then destroyed.

HQ, TRADOC and HQ, ROTCR - Records are retained in an active file for up to two years and then destroyed.

ROTC Instructor Group Staffs and Admissions/Registrars Offices - Records are retained for as long as it is deemed necessary for appropriate follow-up action and then destroyed.

System manager(s) and address:

The Deputy Chief of Staff for ROTC, Headquarters, United States Army Training and Doctrine Command, Ft Monroe, VA 23651.

Notification procedure:

Information may be obtained from:

HQ, TRADOC
ODCSROTC (ATRO-AM)
Ft Monroe, VA 23651
Telephone: Area Code 804/727-3077

Record access procedures:

Request from individuals should be addressed to: Headquarters, United States Army Training and Doctrine Command, Office of the Deputy Chief of Staff for ROTC (ATRO-AM), Ft Monroe, VA 23651.

Written requests for information should contain the full name of the individual, current address, and telephone number. Visits are limited to the Office of the Deputy Chief of Staff for ROTC, HQ, TRADOC (ATRO-AM), Ft Monroe, VA 23651.

For personal visits, the individual should be able to provide some acceptable identification; e.g., driver's license or employing office's identification card.

Contesting record procedures:

The Army's rules for contesting contents and appealing initial determinations are contained in Army Regulation 340-21.

Record source categories:

Magazine, newspaper, and poster advertising coupons; mailback reply cards; letters; walk-ins; referrals from parents, relatives, counselors, teachers, coaches, friends, associates, college registrars, dormitory directors, national testing organizations, honor societies, Boys' Clubs, Boy Scout organizations, Future Farmers of America, minority and civil rights organizations, fraternal and chruch organizations, neighborhood youth centers, YMCA, YWCA, social clubs, athletic clubs, Boy's State/Boys' Nation, scholarship organizations, previous employers, trade organizations and other agencies and commands within the Department of Defense.

Systems exempted from certain provisions of the act:

None

A0704.10bMEPCOM

System name:

704.10 ASVAB Institutional Test Scoring and Reporting System

System location:

Primary System: Plans/Program/Test Scoring Division, Testing Directorate, United States Military Enlistment Processing Command (MEPCOM), FT. Sheridan, IL 60037.

Decentralized Segments: Armed Forces Examining and Entrance Stations (AFEES); participating school systems; state departments of education/testing agencies; Air Force Human Resources Laboratory, Brooks Air Force Base, TX 78236; Defense Manpower Data Center, Monterey, CA 93940; all service recruiters/recruiting commands.

Categories of individuals covered by the system:

High School, job corps, college, and other students who have been administered the institutional version of the Armed Services Vocational Aptitude Battery (ASVAB).

Categories of records in the system:

File contains individual's name, social security number (SSN), address, telephone number, date of birth, sex, ethnic group identification, grade, booklet number of ASVAB test, individual's plans after graduation, and individual item responses to each of the 12 ASVAB tests.

Authority for maintenance of the system:

Title 44 U.S.C., Section 3101; Title 10 U.S.C., Sections 133 and 3012.

Executive Order 9397, 'Numbering Systems for Federal Accounts Relating to Individual Personnel.'

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Plans/Program/Test Scoring: To compute and furnish test score products for career/vocational guidance and group assessment of aptitude test performance; for research use by selected government contractors.

Armed Forces Examining and Entrance Stations: To establish eligibility for enlistment and verify enlistment and placement scores and retest eligibility.

School Systems: For vocational/career counseling, curriculum planning, and group assessment.

Air Force Human Resources Laboratory: For future test development, test validation, and related statistical purposes.

Defense Manpower Data Center: For marketing evaluation, assessment of manpower trends, and characteristics.

Recruiters/Recruiting Commands: For recruitment, enlistment, and placement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Plans/Program/Test Scoring Division: Microfiche, optical mark sense cards, and computer magnetic tapes.

AFEES: Microfiche.

School Systems: Computer paper printout and magnetic tapes.

Air Force Human Resources Laboratory: Magnetic tapes.

Defense Manpower Data Center: Magnetic tapes.

Recruiter/Recruiting Commands: Computer paper printout and cards.

Retrievability:

Data are first accessed by date tested, then by high school name, and then alphabetically by student name.

Safeguards:

Records are maintained in areas (locked rooms or filing cabinets) accessible only to authorized personnel who are properly screened, cleared, and trained in accordance with governing regulations. Magnetic tapes are protected by user identification and manual controls.

Retention and disposal:

Plans/Program/Test Scoring Division: Primary records (mark sense data cards) are retained 4 months after which they are destroyed. Magnetic tapes are retained for 1 year; microfiche retained for 2 years. Research data retained by contractors for more than 2 years require segregation of personal identifying information and test score data, with analyses performed using only summary statistics.

AFEES: Records retained for 2 years after which they are destroyed.

School Systems: Records released to students; counselors retain scores with student master records.

Air Force Human Resources Laboratory: Records are retained indefinitely or as long as the system is operational. Files maintained after 2 years are purged to delete each student's personal identifying information.

Defense Manpower Data Center: Data maintained for 2 years, at which time personal identifying information is erased from this system.

Recruiter/Recruiting Commands: Records are maintained for 2 years from date ASVAB are administered, then destroyed.

System manager(s) and address:

Commander, United States Military Enlistment Processing Command, Ft. Sheridan, IL 60037.

Notification procedure:

Information may be obtained from:
Commander
United States Military Enlistment Processing Command
Testing Directorate
Ft. Sheridan, IL 60037 Telephone: Area Code 312/926-2366

Record access procedures:

Requests from individuals should be addressed to Commander, United States Military Enlistment Processing Command, Testing Directorate, Ft. Sheridan, IL 60037.

Written requests for information should contain the correct name and full address of the high school, date tested, full name of individual tested, SSN, and address at the time of testing.

Contesting record procedures:

The Army's rules for contesting contents and appealing initial determinations are contained in Army Regulation 340-21.

Record source categories:

Students who are tested with ASVAB.

Systems exempted from certain provisions of the act:

Parts of this system may be exempt under 5 USC 552a(k)(6). For additional information contact the SYSMANAGER.

A0715.01aDAPC

System name:

715.01 Personnel Data Card

System location:

Decentralized: Each active Army unit furnishing personnel and strength data to the Department of the Army (DA).

Categories of individuals covered by the system:

Active duty members of the United States Army (Commissioned, warrant, and enlisted service members).

Categories of records in the system:

File contains a personnel data form (DA Form 2475-2) which includes organization, unit, station, name, social security number (SSN), grade and pay group, blood type, duty assignment, duty phone local address, local phone number, name and address of next-of-kin, home of record, place of birth, awards, military occupational specialty evaluation data, and the unit commander's grade and name. File is augmented by change reports transmitted to higher echelons of the Army to support automated data stored on computer magnetic tapes and discs.

Authority for maintenance of the system:

Title 5 U.S.C., Section 301; Title 10 U.S.C.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Active Army reporting unit: To account for and maintain data relating to each assigned and/or attached active military person under the military jurisdiction of the company/detachment/Army element for use in personnel management; to support the accounting of and reporting function incident to the maintenance of the Officer Master File (OMF)/ Enlisted Master File (EMF), the Military Personnel Records Jacket file (MPRJ), and the Official Military Personnel File (OMPF).

Department of the Army commands/organizations/elements and staff agencies: To perform relevant military functions/requirements/ action consistent with their respective mission.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders.

Retrievability:

Alphabetically by name.

Safeguards:

Records filed in areas accessible only to authorized personnel who are trained, cleared, and assigned the functional duty of unit level personnel administration.

Retention and disposal:

Records are retained in the reporting unit for 8 years following the date of the last entry appearing on the individual personnel data card.

System manager(s) and address:

Commander, US Army Military Personnel Center, 200 Stovall Street, Alexandria, VA 22332.

Notification procedure:

Information may be obtained from the reporting unit of assignment/attachment of the individual concerned.

Record access procedures:

Request from individual should be addressed to the appropriate military unit.

Written requests for information should contain the full name, grade, service identification number, and unit of assignment/attachment.

Personal visits may be made to the unit of assignment; identification of visitors will be established by suitable military identification or other means normally accepted in the transaction of business.

Contesting record procedures:

The Army's rules for contesting contents and appealing initial determinations may be obtained from Headquarters, Department of the Army, (DAPC-POO), 200 Stovall Street, Alexandria, VA 22332.

Record source categories:

Enlistment Record (Department of Defense (DD Form 4)); Report of Separation (DD Form 214) for reenlistees; Extention of enlistment (DA Form 1695); Special Orders issued by enlistment/reenlistment authorities; personal information furnished by the individual concerned; documents/records/reports/ forms originated within the reporting unit.

Systems exempted from certain provisions of the act:

A0715.06aDAPC

System name:

715.06a Field Military Personnel Information System - SIDPERS

System location:

Each Army installation and other organizational elements maintaining a segment of the Standard Installation/Division Personnel System (SIDPERS). The official mailing addresses are in the Department of Defense Directory in the Appendix.

Categories of individuals covered by the system:

All active Army military personnel and personnel attached from the National Guard or United States Army Reserve based upon local option.

Categories of records in the system:

The categories of information stored include: name, social security number (SSN), sex, race, citizenship, status, religious denomination, marital status, number of dependents, date of birth, physical profile, ethnic group, grade and date of rank, term of service for enlisted personnel, service agreement for non-regular officers, service data and dates, unit of assignment, military occupation specialty, additional skill identifiers, civilian military education level, language, assignment eligibility and availability and termination date thereof, security status, special pay and bonus, suspense termination date thereof, suspension of favorable personnel action indicator, Privacy Act disputed record indicator.

Authority for maintenance of the system:

Title 5 U.S.C., Section 301; Title 10 U.S.C.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Department of Army: Records are used for personnel management, strength accounting, and manpower management.

Department of Defense: Records are used for interdepartmental actions and personnel management.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records are stored on computer magnetic tapes and disks and computer punch cards.

Retrievability:

Access is by SSN, name, or other individual identifying characteristics.

Safeguards:

Physical security devices, guards, computer hardware and software features, and personnel clearances for individuals working with the system.

Retention and disposal:

Records are destroyed 90 days after the individual is no longer active.

System manager(s) and address:

Commander, US Army Military Personnel Center, (USAMILPERCEN), 200 Stovall Street, Alexandria, VA 22332.

Notification procedure:

Information may be obtained from the commander of the organization to which the service member is assigned.

Record access procedures:

Written requests for information should include the full name, service identification number, and current address. Visits should be made to the servicing military personnel office (MILPO) or headquarters of the organization/station of the service member.

For personal visits, the requester should provide acceptable identification, i.e., military identification card or other identification normally acceptable in the transaction of business.

Contesting record procedures:

The Army's rules for contesting contents and appealing initial determinations may be obtained from USAMILPERCEN (DAPC-MSO), 200 Stovall Street, Alexandria, VA 22332.

Record source categories:

Information is obtained in documented and other computer readable form from other Department of Army organizations/stations and other federal agencies.

Systems exempted from certain provisions of the act:

None

A0715.07cUSFK

System name:

715.07 Command Unique Personnel Information Data System (CUPIDS)

System location:

Primary System: Office of the Assistant Chief of Staff, Personnel Directorate (J1), Headquarters (HQ) United Nations Command (UNC)/United States (US) Forces, Korea (USFK)/Eighth US Army (EUSA), ATTN: AJ-PER-DM, Army Post Office San Francisco (APO SF) 96301.

Decentralized Segments: US Army Yongsan Data Processing Center Korea, APO SF 96301; HQ UNC/USFK/EUSA, ATTN: PMJ-O, APO SF 96301; HQ UNC/USFK/EUSA, ATTN: DJ-SP, APO SF 96301; and HQ UNC/USFK/EUSA, ATTN: GCT, APO SF 96301.

Categories of individuals covered by the system:

All members of UNC/USFK/EUSA who are authorized duty-free privileges in the Republic of Korea (ROK) as well as US Embassy personnel, contract personnel, technical representatives, and authorized potential noncombatant evacuees living in the ROK.

Categories of records in the system:

The CUPIDS data base includes the individual's name, social security number (SSN), date and place of birth, sex, rotation date, citizenship, passport number, date arrived in the ROK, previous tours in the ROK, service component, pay grade/position status, marital status, dependent status, and religion. The following dependent information is maintained: spouse's name, date and place of birth, date arrived in the ROK, passport number, citizenship, sex, date and place of marriage, local address, and religion. Applicable information is extracted from this central data base to provide a noncombatant report, contractor and technical representative listing, religious preference listing, and dependent information roster.

An individual purchase record is maintained for those personnel authorized duty-free privileges. It consists of a record of exchange catalog sales and purchases made by authorized shoppers in the exchange system, Class VI stores, and commissaries in the ROK.

Authority for maintenance of the system:

Title 5 U.S.C., Section 301 and the Status of Forces Agreement, United States of America (USA) and the ROK.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Record the number and location of contractor and technical representatives in the ROK for reporting to the Korean Government in accordance with the USA-ROK Status of Forces Agreement.

Identify and locate noncombatant evacuees in case of emergency. Provide Department of Defense (DOD) information pertaining to the number of dependents in the ROK.

Obtain a religious profile to determine a realistic distribution of Chaplain assets throughout the command.

Produce list of suspected violators of the ration control authorizations set for retail facilities in the ROK. Produce a list of exchange catalog sales shipped into the ROK. Information is provided the Provost Marshal, US Army Criminal Investigation Command, US Department of State, Office of Special Investigation, Customs Officials, law enforcement authorities of the ROK and commanders for investigative action where appropriate and/or administrative or judicial disposition.

Provide listing of dependents in Korea to the Comptroller for verification of housing dollar authorizations.

Maintain file of selected controlled item purchases made in retail facilities.

Provide management data pertaining to expenditures by grade and family size. This information is used to determine if authorizations are sufficient.

Provide a dependent profile throughout the command for management purposes.

Produce ration control plates for authorized individuals for use in recording purchases in retail facilities.

Produce medical cards which are used for identification in medical facilities.

Provide retail sales information to the USA-ROK Status of Forces Ad Hoc Committee on black marketing activities.

Provide list by date eligible for return from overseas (DEROS) for transportation forecasting requirements.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Magnetic tape in tape library.
Microfiche in file library and user level.
Paper printout at user location.

Retrievability:

Noncombatants listing by area and geographical sub-area is alphabetic by last name.

All other records by SSN sequence.

Safeguards:

The records area is accessible only to authorized personnel. During off duty hours, the facility is locked and secured by sound activated alarm.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Accessed by name and social security number (SSN).

Safeguards:

direct jurisdiction of the Department of Justice or carried out as the legal representative of the Executive Branch agencies.

Federal, state or local governmental agencies when it is deemed

The records area is accessible only to authorized personnel. During off duty hours, the facility is locked and secured by sound activated alarm.

Retention and disposal:

The command profile, sales profile, and individual sales file are retained for 1 year. Individual violations are retained until the end of the tour of the concerned individual.

Regular card sales are destroyed monthly unless retained for evidence.

Controlled items sales records are maintained for duration of individual tour.

The data base account is retained for the duration of individual tour plus one month.

All other information is eliminated at termination of tour or employment.

System manager(s) and address:

Assistant Chief of Staff, J1, HQ UNC/USFK/EUSA, APO SF 96301.

Notification procedure:

Information may be obtained from:
HQ UNC/USFK/EUSA (AJ-PER-DM)
Building 2402A
Yongsan/Seoul Korea
Telephone: 293-3585

Record access procedures:

Requests from individuals should be addressed to: HQ, UNC/USFK/EUSA (AJ-PER-DM), APO SF 96301.

Written requests for information should contain the full name of the individual, current address and telephone number, SSN.

For personal visits, the individual should provide a military identification card and ration control plate if issued, or other acceptable identification such as a valid vehicle operator's license.

Contesting record procedures:

The Army's rules for access to records and for contesting contents and appealing initial determinations may be obtained from the SYSMANAGER.

Record source categories:

Application for ration control; recorded sales made with ration control plate at retail US military facilities throughout the ROK; orders made through exchange catalog sales.

Systems exempted from certain provisions of the act:

None

A0728.01DAAG

System name:

728.01 Retired Personnel Data File

System location:

Primary System: The Adjutant General Center, 1000 Independence Avenue SW, Washington, DC 20314.

Decentralized segments: United States Army Military Personnel Center (USAMILPERCEN), 200 Stovall Street, Alexandria, VA 22332; Army commands/installations operating retiree councils and/or service activities.

Categories of individuals covered by the system:

All retired Army personnel.

Categories of records in the system:

File contains name, grade codes, retirement class, social security number, branch of service, date of birth, date of retirement, component, years of service, percentage of disability, sex, retired pay codes, address codes, and retirement codes. File is maintained on magnetic tape for output to microfiche for manual video use.

Authority for maintenance of the system:

Title 10 U.S.C., Section 3966.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The Adjutant General Center: To fulfill statutory requirement for listing of retired personnel; to accomplish a continuing contact with the retired person with respect to their entitlements, envolvements, and status as a retired military member; to provide listings, geographically, for use by commands/installations operating retiree councils and/or service activities; and for locator use.

General Services Administration: To obtain printing services for volume III, Army Registers.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Microfiche and magnetic tapes.

Retrievability:

Record accessed by name.

Safeguards:

Microfiche maintained in areas accessible only to authorized personnel who are trained and cleared for duty in the retired activities branch; magnetic tape is maintained in areas accessible only to personnel who are trained and cleared for computer duties.

Retention and disposal:

Magnetic tape updated through input of new retiree, address change, and death; individual data record retained until death.

System manager(s) and address:

Commander, The Adjutant Genral Center, 1000 Independence Avenue SW, Washington, DC 20314.

Notification procedure:

Information may be obtained from:
Commander
The Adjutant General Center
1000 Independence Avenue SW
Washington, DC 20314

Record access procedures:

Requests from individuals should be addressed to: Headquarters, Department of the Army (HQDA) (DAAG-PER), 1000 Independence Avenue SW, Washington, DC 20314.

Written requests for information should contain the full name of the requester, service identification number, and current address.

Personal visits may be made to the Adjutant General Center. Individuals should be able to provide their military service identification card or other commonly acceptable means of identification used in the normal transaction of business.

Contesting record procedures:

The Army's rules for contesting contents and appealing initial determinations may be obtained from HQDA (DAAG-AMR), 1000 Independence Avenue SW, Washington, DC 20314.

Record source categories:

Retirement order and documents; retiree input of address change data; death notifications.

Systems exempted from certain provisions of the act:

None

A0810.10aDAEN

System name:

810.10 Military Construction Training Files

System location:

Construction Training, Construction Support Branch, Construction Division, Directorate of Military Construction, Office of the Chief of Engineers (COE), Washington, DC 20314.

Categories of individuals covered by the system:

Any participant in the annual Chief of Engineers Construction Training Program.

Categories of records in the system:

File contains individual's grade, occupational code, district or division employed by, and age.

Authority for maintenance of the system:

Government Employees Training Act of 7 Jul 58, 72 Stat 327 (Pub. L. 85-507).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Provides an historical record of training and source of data for statistical reports; serves as basis for developing additional courses and evaluating the effectiveness of training; and provides data for cost accounting and developing budget estimates for the training program.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Magnetic tape, disk, and computer printouts.

Retrievability:

Accessed by name and social security number (SSN).

Safeguards:

Computer 'Fail Safe' System.

Retention and disposal:

Information on individuals is deleted from the system upon termination of employment.

System manager(s) and address:

Chief of Engineers, Department of the Army (DA), Forrestal Building, Washington, DC 20314.

Notification procedure:

Information may be obtained from:
Chief of Engineers
ATTN: DAEN-MCC-E
Department of the Army
Washington, DC 20314
Telephone: Area Code 202/693-1310

Record access procedures:

Requests from individuals should be addressed to Chief of Engineers, DA, ATTN: DAEN-MCC-ET, Washington, DC 20314.

Written requests for information should contain, as a minimum, the individual's full name and SSN.

For personal visits, the individual should be able to provide employing office's identification card or other suitable identification such as a passport or driver's license with photograph.

Contesting record procedures:

The Army's rules for access to records and for contesting contents and appealing initial determinations are contained in Army Regulation 340-21.

Record source categories:

Information is submitted by the individual student.

Systems exempted from certain provisions of the act:

A0917.10aDAAG

System name:

917.10 Child Protection Case Management Files

System location:

Primary System: Commander, United States (US) Army Health Services Command, ATTN: HSOP-PR, Ft Sam Houston, TX 78234.

Decentralized Segments: Office of The Surgeon General, ATTN: DASG-HCC-G, Washington, DC 20310; US Army medical treatment facility and/or child protection and case management team office on post, camp, or station where file was initiated or, in some cases, subsequently transferred upon reassignment of military member.

Categories of individuals covered by the system:

All children entitled to care at Army medical and dental facilities whose abuse or neglect is brought to the attention of appropriate authorities and all persons suspected of abusing or neglecting such children.

Categories of records in the system:

Medical records of suspected and established cases of child abuse or neglect, investigative reports, correspondence, child protection case management team reports, follow-up and evaluative reports, and other supportive data assembled relevant to individual child protection case management.

Authority for maintenance of the system:

Title 5 U.S.C., Section 301; Title 10 U.S.C., Section 3012.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Officials and employees of the Department of the Army in the performance of their official duties relating to health and medical treatment of members and former members of the uniformed services, civilians and dependents receiving medical care under Army auspices; performance of research studies and compilation of statistical data.

Officials and employees of other components of the Department of Defense and other Departments and agencies of the Executive Branch of government in the performance of their official duties relating to the coordination of child advocacy programs, medical care and research concerning child abuse and neglect.

The Attorney General of the United States or his authorized representatives in connection with litigation or other matters under the direct jurisdiction of the Department of Justice or carried out as the legal representative of the Executive Branch agencies.

Federal, state or local governmental agencies when it is deemed appropriate to utilize civilian resources in the counseling and treatment of individuals or families involved in child abuse or neglect, or when it is deemed appropriate or necessary to refer a case to civilian authorities for civil or criminal law enforcement.

Authorized officials and employees of the National Academy of Sciences, private organizations and individuals for health research in the interest of the Federal government and the public; and authorized surveying bodies for professional certification and accreditation.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records may be stored in file folders, microfilm or magnetic tape, punched cards, machine lists, disks, and other computerized or machine readable media.

Retrievability:

Filed by name of the suspected abused child and the name and/or social security number (SSN) of the military sponsor, with no index by the name and/or SSN of any other person not an Army employee (including the spouse of the military sponsor).

Safeguards:

Records are maintained in various kinds of filing equipment in specified monitored or controlled access rooms or areas. Public access is not permitted. Records are accessible only to authorized personnel that are properly screened and trained, and on a need-to-know basis only. Computer terminals are located in supervised areas with access controlled by password or other user code system.

Retention and disposal:

Records are retained in decentralized office files for 5 years after the end of the year in which the case was closed and are then destroyed. Records are retained in the central file until the minor child is age 22 and are then destroyed.

System manager(s) and address:

The Surgeon General, Headquarters, Department of the Army; Commander, US Army Health Services Command; commanders of medical centers and hospitals.

Notification procedure:

Information on specific cases may be obtained from the commander of the medical center or hospital where treatment was received. Official mailing addresses are in the Department of Defense Directory in the Appendix to Army system notices.

Information in central files may be obtained from:
Commander
US Army Health Services Command
ATTN: HSOP-PR
Ft Sam Houston, TX 78234

Record access procedures:

Requests from individuals should be addressed to the commander of the medical center or hospital where treatment was received; or to Commander, US Army Health Services Command, ATTN: HSOP-PR, Ft Sam Houston, TX 78234.

Written requests for information should contain the full name of the individual, SSN, current address and telephone number. Visits are limited to the commander of the medical center or hospital where treatment was received; and to the Office of The Surgeon General (DASG-HCC-G), Room 2D528, The Pentagon, Washington, DC 20310.

For personal visits, the individual should be able to give sufficient identification, and provide some verbal information that can be verified from his/her file.

Contesting record procedures:

The Army's rules for access to records and for contesting contents and appealing initial determinations are contained in 32 CFR Part 505 (Army Regulation 340-21).

Record source categories:

Information obtained from educational institutions, medical institutions, police and investigating officers, state and local government agencies, witnesses, and source documents (i.e., reports) prepared on behalf of the Army by boards, committees, panels, auditors, etc. Information may also be from interviews, personal history statements, and observations of behavior by various professionals (i.e., social workers; physicians, to include psychiatrists and pediatricians; psychologists; nurses and lawyers).

Systems exempted from certain provisions of the act:

A1012.03iDLI

System name:

1012.03 Standardized Student Records System

System location:

Defense Language Institute, Foreign Language Center (DLIFLC), ATTN: Academic Records Office, Fresidio of Monterey, CA 93940.

Categories of individuals covered by the system:

Any person who has ever been enrolled for foreign language training at any facility of the DLIFLC.

Categories of records in the system:

File contains individual's name, social security number (SSN), and military administrative data, together with academic data generated at DLIFLC.

Authority for maintenance of the system:

Title 10 U.S.C., Section 3012.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Supplies data to DLIFLC for dividing students among class sections, selecting section monitors, preparing rosters and academic bulletins, preparing summaries of training activity used in managing current operations and reporting workload, establishing a permanent student record used for issuing official grade transcripts and preparing statistical studies used to improve training and testing methods.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Remote computer magnetic tape and disk.

Retrievability:

Files accessed by remote terminals with records filed by SSN.

Safeguards:

Records are accessible via remote terminal only by authorized personnel citing established user identifier and password.

Retention and disposal:

Records are permanent. They are retained in active file (on-line) until the student departs; then retired to a history tape.

System manager(s) and address:

The Commandant, DLIFLC, Presidio of Monterey, CA 93940.

Notification procedure:

Information may be obtained from:
Defense Language Institute
Foreign Language Center
ATTN: Academic Records Office
Presidio of Monterey, CA 93940
Telephone: Area Code 408/242-8221

Record access procedures:

Request from individuals should be addressed to: Defense Language Institute, Foreign Language Center, ATTN: Academic Records Office, Presidio of Monterey, CA 93940.

Written requests for information should contain the full name and current address of the individual, SSN, class attended and year graduated.

For personal visits to the Academic Records Office, the individual should be able to provide positive identification, such as, valid driver's license, employing office identification card, etc.

Contesting record procedures:

The Army's rules for access to records and for contesting contents and appealing initial determinations are contained in Army Regulation 340-21.

Record source categories:

Student registration form (DLIFLC FORM 90) prepared by student upon enrollment and various local forms containing academic data.

Systems exempted from certain provisions of the act:

None

A1511.01aDAPE

System name:

1511.01 Army Housing Files

System location:

Director, Industrial Operations (DIO), Deputy Chief of Staff for Logistics (DCSLOG), Housing Manager (HM), at Army installations, world- wide.

Categories of individuals covered by the system:

Military personnel, members of the uniformed services, Department of Defense (DOD) or other key civilian personnel, service members' dependents assigned or attached to an installation for on or off post housing support.

Categories of records in the system:

Records include housing correspondence files, troop housing files, housing project tenancy files, housing cost control files, housing leasing files, housing rental rate files, housing referral service files, off post rental housing reporting files, and housing complaint and investigation files.

Records contain, as appropriate, names, service or social security number (SSN), rank or grade, date of rank or grade, length of service, organization, home telephone number, date expected to return from overseas, dependency data, address of quarters, number of bedrooms, adequacy code, and rental cost of economy quarters.

Files contain documents such as permanent change of station (PCS) orders, authorization for travel of dependents, locator cards, applications for Government or off post housing, status of housing availability, housing assignment and termination letters, utilization and occupancy information, private sales/rental listings, notification of off post housing selection, authorization for Government furniture, furniture hand receipts, General Officer Quarters Cost Report, guest houses/visiting quarters registers and occupancy state- ments, rental deduction notices or cancellations, applications for and certificates of civilian employee eligibility to obtain loan to purchase housing, and letters of complaints (includes discrimination) and investigations.

Authority for maintenance of the system:

Department of Defense Instruction (DODI) 4165.44; DODI 4165.47; DODI 4165.51; DODI1100.16; DODI 4165.27; DODI 4165.43; DODI 4165.34; Annual Military Construction Authorization Acts; Section 515 of Public Law 84-161 as amended (Title 10 U.S.C., Section 2674); Title 10 U.S.C., Section 133; Army Regulation (AR) 210-50 (Family Housing); AR 210-16 (Bachelor Housing); AR 210-2 (Guest Houses); AR 230-1 (Nonappropriated Funds and Oversea Transient Facilities); AR 210-6 (Furniture); AR 210-12 (Rental Rates for Quarters); AR 405-10 (Real Estate Acquisition); AR 600-18 (Equal Opportunity in Off Post Housing).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The purposes for which the system is collected are as follows:

To provide information relating to the overall program of providing necessary housing for military personnel, dependents of military personnel, and qualified civilian employees, but exclusive of specific files described herein.

Documents relating to the housing and billeting of military personnel involving such matters as the adequacy and suitability of housing. Included are memoranda on housing, strength and housing capacity reports, housing schedules, and similar papers.

Documents accumulated in offices of housing project directors and relating to rental of units. Included are applications for quarters, character reference letters, rental deduction notices, property inventories, cancellation of rental deduction notices, and similar documents.

Documents relating to the control of costs for alteration and repair of housing units to insure that amounts expended comply with limitations set by law. Included are cumulative cost cards, copies of job orders, copies of work orders, copies of contracts, copies of issue slips, and copies of similar documents reflecting expenditures.

Documents relating to the leasing of housing to provide necessary quarters for qualified personnel. Included are requests for approval to lease, authorizations to lease, leasing and rental surveys, and similar or related docu- ments.

Documents relating to the establishment of rental rates for housing units. Included are surveys, schedules, statistical data, and similar or related documents.

Documents relating to providing guidance and referral service on available housing. Included are requests for counseling or guidance in connection with purchase or rental of housing; listings of housing available for purchase or rent; liaison with real estate boards, realtors, brokers, and other Government agencies; and similar or related documents.

Documents relating to reports reflecting conditions affecting off post rental housing. Included are off post housing census reports, DOD off post housing survey reports, status of housing assets reports, similar reports, and related documents.

Documents relating to complaints and investigations in connection with off post housing. Included are complaints (includes discrimination) from military personnel and owners or operators of housing facilities, investigative data, fact statements, acceptance statements, withdrawal notices, and similar documents.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders.
File cards.
Computer tapes.
Computer printouts.
Punched cards.

Retrievability:

Filed alphabetically by last name, facility name, or facility number.

Safeguards:

Records are maintained in room accessible only to authorized personnel.

Retention and disposal:

Housing correspondence files: Maintained in office performing Army-wide staff responsibility for 10 years, then retired to the Washington National Records Center, Washington, DC for retention until accessioned by the National Archives and Records Service, Washington, DC. Files in other offices are destroyed after 5 years.

Installation troop housing files: Destroyed after 3 years or on discontinuance, whichever is first.

Installation housing project tenancy files: Destroyed 3 years after termination of quarters occupancy or on discontinuance, whichever is first.

Family housing cost control files: Cards reflecting cumu- lative costs are destroyed 11 years after last entry on card. Other files are destroyed after posting to the cumulative cost card, except that copies of work orders used for posting to the cumulative cost card will be destroyed 1 month after completion of work, or earlier.

Family housing leasing files and family housing rental rate files: Destroyed after 10 years.

Housing referral service files: Destroyed after 5 years.

Off post rental housing reporting files: Files maintained in office performing Army-wide staff responsibility are destroyed after 5 years. Files in other offices are destroyed after 3 years.

Off post housing complaint and investigation files: Files maintained in offices performing Army-wide staff responsibility are destroyed 5 years after completion. Other files are destroyed 2 years after completion.

System manager(s) and address:

Chief of Engineers, Headquarters, Department of the Army, Washington, DC 20314.

Deputy Chief of Staff for Personnel, Headquarters, Department of the Army, Washington, DC 20310.

Notification procedure:

Information may be obtained from the Director of Industrial Operations (or his counterpart) at Army installations world-wide.

Record access procedures:

Requests from individuals should be addressed to the Director of Industrial Operations at the appropriate installation.

Written requests for information should contain the full name of the individual, current address, and location of last assignment.

For personal visits, the individual should be able to pro- vide some acceptable identification such as a driver's license or military identification card.

Contesting record procedures:

The Army's rules for contesting and appealing initial determination are contained in Army Regulation 340-21 which may be obtained from the SYSMANAGER.

Record source categories:

Automated systems interfaces.
Individuals' personnel records.
Tenant/landlords and realty activities.
Information provided by the individual.
Financial institutions.
Previous commanders or employers.

OFFICE OF THE SECRETARY OF DEFENSE

DAS 01

System name:

Defense Audit Service Management Information System (DAS/MIS)

System location:

Defense Audit Service, Audit Management Division (DAS-AM), Arlington, Virginia. The system utilizes the Computer Science Corporation's INFONET System, 1616 North Fort Myer Drive, Arlington, Virginia 22209.

Categories of individuals covered by the system:

All active personnel employed by the Defense Audit Service with history data including previous employees maintained for two years.

Categories of records in the system:

Data on the individual's current position, current employement status, travel, audit experience training, and the following specific personal data: name, Social Security Account Number (SSAN), date of birth (DOB), service computation date (SCD), career status, experience, address, assigned station, job series, clearance, education, and evaluation due date.

Authority for maintenance of the system:

Title 10, United States Code, section 136(b), and Department of Defense Directive 5105.48, 'Defense Audit Service,' October 14, 1976, conveys the authority for maintenance of a system of records to the Director of the Defense Audit Service in support of the DAS mission.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

There are no external uses. Internally, information is used as follows:

Security Clearance notification alert; provided to all audited activities in advance of visits by DAS audit personnel. Information provided in Alert is name, SSAN, Office of Assignment, and the security clearance for each auditor.

(2) Time and Attendance Reporting; provided to DAS Main Office by 9 CONUS Regional Offices and 3 Overseas Regional Offices. Time and Attendance Reports are used by various managers to track Temporary Duty Travel frequency and duration, to accrue manhour data on assigned audit projects, to categorize indirect time for end of year reporting, to provide time and attendance data to the centralized payroll system at the Main Office. Information included in Time and Attendance Reports are SSAN, Name, Grade, Assigned Office, Hours Present for Duty, Annual Leave Hours, Sick Leave Hours, Other Leave Hours and Type, TDY Location, and TDY Duration.

(3) Planned Annual Leave Reporting, utilized by various managers for workload planning and travel scheduling. Information included is Name, Assigned Office, and dates of planned annual leave.

(4) Audit Status and Auditor Assignment Reporting; used by managers to control audits and auditors, and to maximize effectiveness of manpower resources. Included information is Audit Number, Audit Requestor Code, Title, Milestone Dates, Audit Cost Summary, Personnel Assigned/Release Dates, and Personnel Manhours Expended.

(5) As Requred Prsonnel Reporting; used by the Staff Manager to determine training needs, promotional eligibility, education and background, professional organization participation, and performance evaluation. Information included is Name, Assigned Offices, Education, Professional Activities Training History (Course Title, Dates Attended), Performance Evaluation, Date of Birth, and Service Computation Date.

(6) Travel Reporting; used by managers to control Temporary Duty Travel, travel costs, and issuances of Blanket Travel Orders.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Active Records are stored on immediate access disk and magetic tape maintained within the computer center. Inactive records are maintained on magnetic tape within the computer center. Hard copy records are stored in file cabinets under the control of functional users.

Retrievability:

Records are internally stored by employee SSAN and are selectively retrievable by all data elements as specified in the Categories of Records in the System.

Executive Order 11246/11375, 'Equal Employment Opportunity,' as amended by EO 11478, 'Equal Employment Opportunities in the Federal Government'.

Retrievability:

By Social Security Number

Safeguards:

Record access procedures:

Procedures for gaining access should be directed to:
Office of Research and Administration, Assistant to the

Records are internally stored by employee SSAN and are selectively retrievable by all data elements as specified in the Categories of Records in the System.

Safeguards:

All records reside in a 'private library' which is not accessible by any other user. All system files are backed up upon creation and upon any update action. A 'Master ID' with unrestricted access to all records in the private library is available only to Main Office MIS Management Personnel. A 'Subordinate ID' which has restricted access, only to pertinent records, is used by field offices. Password protection is afforded at the session and file level. All user ID's are protected by separate password validation. Any attempt to circumvent the password validation initiates immediate 'log-off'. Physical control includes limiting password to only authorized personnel. Master ID is located in a secure environment, within the Main Office, and access to the terminal facility is restricted to MIS Management employees who work within the area. Access to records containing personal data is restricted to those who require the records in the performance of their official duties and to the individual who is subject of the record (or his authorized representative). Tape files are maintained in an environmentally secure vault area when not in use. Computer Science Corporation has been cleared to process personal data for Government agencies by General Services Administration on December 11, 1975.

Retention and disposal:

Machine resident records are maintained for 2 years after they become inactive. All inactive records are afforded the same safeguards as active records and are maintained on magnetic tape within the computer center. Machine resident records are destroyed at the end of the 2 year period. Hard copy records are retained until the records are replaced or become obsolete.

System manager(s) and address:

Director, Defense Audit Service, Suite 1200, Commonwealth Building, 1300 Wilson Boulevard, Arlington, Va. 22209. Telephone: 202-697-9108.

Notification procedure:

Written or personal requests for information should be addressed to the System Manager.

Record access procedures:

Procedures for gaining access by an employee/previous employee to his/her records may be obtained from the System Manager. Written request for information should contain the full name of the employee/past employee and Social Security Account Number. For personal visits, the employee should be able to identify himself/herself with Defense Audit Service Identification Card. Past employees should be able to identify himself/herself with Social Security Card and one other corroborating personal identification.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

Official Personnel Folder and other personnel documents, activity supervisors, applications and forms completed by the individual.

Systems exempted from certain provisions of the act:

None

The location is identified as a secure area; access is through electrically controlled doors and cypher locks; tapes are stored in a vault when not in use.

Retention and disposal:

Records are updated once per year for all individuals in the system or as new employees are hired. No historic records are maintained.

System manager(s) and address:

Director of Employment and Career Development, Office of the Deputy Assistant Secretary of Defense (Civilian Personnel Policy) Room 3D281, The Pentagon, Washington, D.C. 20301.

Notification procedure:

Information may be obtained from:

Director of Employment and Career Development
Office of the Deputy Assistant Secretary of Defense (Civilian Personnel Policy)
Room 3D281
The Pentagon
Washington, D.C. 20301
Telephone: 202-695-0813

Record access procedures:

Written requests from individuals should be addressed to Director, Central Automated Inventory & Referral Center, Defense Electronics Supply Center, 1507 Wilmington Pike, Dayton, Ohio 45444.

For personal visits, the individual should be able to provide some acceptable identification, such as driver's license or other ID card.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

Data are obtained from the individual himself, from his official personnel folder (201 file), from his SF-171, and from supervisory appraisals.

Systems exempted from certain provisions of the act:

None

DMRA&L 09.0

System name:

Defense Race Relations Institute (DRRI) Student File

System location:

Primary Location - Bldg. 986(MU811) Patrick AFB, FL 32925

Hard copy back-up file for students in active status, location is Tests and Measurement Division, Defense Race Relations Institute, Patrick AFB, Fla. 32925.

Hard copy back-up file for former students, the location is Research and Evaluation Division, Defense Race Relations Institute, Patrick AFB, Fla. 32925.

Categories of individuals covered by the system:

All current or former students at the Defense Race Relations Institute.

Categories of records in the system:

Life history summary, name, race, age, military organization, test and examination scores and forms, peer group and instructor ratings, advisor progress reports.

Authority for maintenance of the system:

10 USC 136

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The purpose of the file is to evaluate the progress of students enrolled at the Defense Race Relations Institute and to create a permanent record of academic accomplishment.

The Defense Race Relations Institute - used by advisors in counseling students; to verify attendance and grades to colleges and universities; to select instructors; to make decisions to release students from the program.

Used by students to evaluate their programs.

Any individual records in the system may be transferred to any component of the Department of Defense having the need to know in the performance of official business.

Records may be disclosed to law enforcement or investigatory authorities for investigations and possible criminal prosecution, civil court action, or regulatory order.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Primary file is magnetic computer tape.
Back-up files are paper records in file folders.

Retrievability:

Files are sequenced alphabetically by last name by class.

Safeguards:

Primary location is a controlled access area.
Back-up files - storage is in locked file cabinets. Only authorized personnel have access to files.

Retention and disposal:

Permanent

System manager(s) and address:

Director, Defense Race Relations Institute, Patrick AFB, Fla. 32925

Notification procedure:

Information can be obtained from:
Director, Defense Race Relations Institute
Patrick AFB, Fla. 32925
Telephone: 305-494-6976

Record access procedures:

Requests from individuals should be addressed to the Director, Defense Race Relations Institute, Patrick AFB, Fla. 32925

Written requests for information should contain the full name, current address and telephone number, and class of the individual.

For personal visits, the individual should be able to provide some acceptable identification, such as military ID card or driver's license.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned

V4

are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Information contained in the file is obtained from the individual or someone acting on his behalf, from the Services' investigation of the complaints.

Office of the Deputy Assistant Secretary of Defense (Reserve Affairs)

Retention and disposal:

No current criteria for disposition of reports.

are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

DMRA&L 12.0

System name:

Reserve Components Common Personnel Data System (RCCPDS)

System location:

Air Force Data Service Center, Room 1D167, The Pentagon, Washington, D. C. 20330.

Back-up locations for processing: U.S. Army Management Systems Support Agency, Room BD972, The Pentagon, Washington, D. C. 20310.

W.R. Church Computer Center, Naval Postgraduate School, Monterey, CA 93940.

National Military Command System Support Center, Room BE685, The Pentagon, Washington, D. C. 20331.

Categories of individuals covered by the system:

Any individual currently a member of any Reserve or National Guard component, and retired reservists.

Categories of records in the system:

File contains individual's Social Security Account Number, component, and other personnel information such as race, sex, rank, age, and length of service.

Authority for maintenance of the system:

10 U.S.C. 136.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The purpose of the file is to generate official statistics concerning Reserve Forces' strength, gains, losses and characteristics of the force.

Office of the Deputy Assistant Secretary of Defense (Reserve Affairs) - used to generate and disseminate official statistics. Individual records are used to provide aggregate statistical data.

Any individual record contained in the system may be transferred to any other Department of Defense Component having the need-to-know in the performance of official business.

Records may be disclosed to law enforcement or investigatory authorities for investigation and possible criminal prosecution, civil court action, or regulatory order.

Records of Federal civilian employees who are reservists may be disclosed to Federal agencies for use in emergency mobilization planning. Records may be disclosed to the Civil Service Commission concerning pay benefits, retirement deductions, and other information necessary for the Commission to carry out its Government-wide personnel management functions.

Records may be disclosed to the Director, Selective Service System upon official request.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Magnetic computer tape.

Retrievability:

Records are retrievable by component, rank, age, sex, location, or other attributes, including Social Security Account Number.

Safeguards:

The primary location is a TOP SECRET facility. The U.S. Army Management Systems Support Agency is a TOP SECRET facility. The National Military Command Systems Support Center is a TOP SECRET facility. Tapes located at the W.R. Church Computer Center, Monterey, CA. are stored in a locked cage in machine room, which is a controlled access area; tapes can be physically accessed only by computer center personnel and can be mounted for processing only if the appropriate security code is provided.

Retention and disposal:

Inventory files are current; quarterly history files for the master and transaction files are maintained on a permanent basis.

System manager(s) and address:

Deputy Assistant Secretary of Defense (Reserve Affairs), Room 3C980, The Pentagon, Washington, D. C. 20301.

Assistant Director, Reserve Personnel Program
Office of the Deputy Assistant Secretary of Defense (Reserve Affairs)
Room 3C980
The Pentagon
Washington, D. C. 20301.
Telephone: 202-697-0624.

Record access procedures:

Requests from individuals should be addressed to: Assistant Director, Reserve Personnel Program, Office of the Deputy Assistant Secretary of Defense (Reserve Affairs), Room 3C980, The Pentagon, Washington, D. C. 20301.

Written requests for information should contain the full name, Social Security Account Number, component, and current address and telephone number of the individual.

For personal visits, the individual should be able to provide some acceptable identification such as driver's license, or military or other ID card.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

Data records are obtained from the six Reserve components.

Systems exempted from certain provisions of the act:

None

DMRA&L 15.0

System name:

Reports of Defense Related Employment.

System location:

Office of the Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics), Pentagon, Washington, D.C. 20301.

Categories of individuals covered by the system:

Retired or former military officers in grades of major or lieutenant commander or above and former civilian officers and employees of the Department of Defense employed at or above the minimum salary of GS-13, who, during any of the first three years after termination of service or employment with the Department of Defense, are employed at fifteen thousand dollars or more per year by a Defense contractor who, during that year, was awarded contracts by the Department of Defense totaling ten million dollars. Also covered are current officers and employees of the Department of Defense employed at or above the minimum salary level of GS-13, who within the preceding three years were employed by such a Defense contractor.

Categories of records in the system:

Copies of report DD Form 1787 completed by individuals covered by the system and forwarded to the Department of Defense describing their employment with the Department of Defense and with the Defense contractor and a listing showing the names of individuals who submitted completed DD Form 1787.

Authority for maintenance of the system:

The system was established and is maintained as required by Public Law 91-121, section 410, approved November 19, 1969.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The records are available for public inspection in accordance with the specific terms of section 410(f) of Public Law 91-121. There is no limitation or restriction on use by the public of the information contained in the report.

Section 410 (d) of Public Law 91-121 requires the submission to the President of the Senate and Speaker of the House of Representatives by December 31 of each year of information in the reports submitted by individuals during the preceding Fiscal Year.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

In metal file cabinet.

Retrievability:

Alphabetical by name of individual.

Safeguards:

Maintained in unlocked file cabinet when not in use.

Retention and disposal:

No current criteria for disposition of reports.

System manager(s) and address:

The Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics), Pentagon, Washington, D.C. 20301.

Notification procedure:

Any individual who desires to know whether a report DD Form 1787 submitted by him is on file may address a letter inquiry to the SYSMANAGER, Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics), Pentagon, Washington, D.C. 20301. Inasmuch as the reports are available for public inspection no proof of identity is required.

Record access procedures:

On request of any individual the reports on file are made available for inspection in the office of the SYSMANAGER, Room 3C980, Pentagon, Washington, D.C.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

The individual submitting the DD Form 1787.

Systems exempted from certain provisions of the act:

None

DMRA&L 16.0

System name:

Retired Personnel Master File

System location:

Air Force Data Services Center, Room 1D167, Pentagon, Washington, D. C. 20330.

Categories of individuals covered by the system:

All retired military personnel and survivor beneficiaries, and reservists drawing retainer pay.

Categories of records in the system:

SSAN, birth date, retirement date, pay grade at retirement, amount of retired, survivor, or retainer pay, type of retirment, date of death (in cases of survivor beneficiary records), pension and benefits system elected, Service, years of active service.

Authority for maintenance of the system:

10 USC 136

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Actuary, Office of the Deputy Assistant Secretary of Defense (Military Personnel Policy), used for statistical purposes in estimating retired pay budgets, future retired populations, trends in retirement rates, costs or increases in retired pay; answer Congressional inquiries. U.S. Civil Service Commission to identify accurately retired military personnel who are Federal civilian employees; any individual record in the system may be transferred to any component of the Department of Defense having need to know in performance of official business.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Magnetic tape

Retrievability:

Records can be retrieved by SSAN, Service, age, etc.

Safeguards:

The Air Force Data Services Center is a TOP SECRET facility.

Retention and disposal:

Records are retained for eight weeks. Aggregated records produced from the individual record file are retained indefinitely.

Categories of individuals covered by the system:

Eligible beneficiaries of the Civilian Health and Medical Program of the Uniformed Services (Dependents of Active Duty Members of the Uniformed Services, retired members of the Uniformed Services and dependents of retired or deceased members of the Uniformed Services) eligible beneficiaries of the Civilian Health and Medical Program of the Veterans Administration (spouse or child of a veteran who has a total disability, permanent in nature, resulting from a service-connected disability or surviving spouse or child of a veteran who has died as a result of a service-connected disability) who received benefits under the provisions of the program.

All individuals who seek health care under the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) and the Civilian Health and Medical Program-Veterans Administration (CHAMPVA).

Categories of records in the system:

File contains sponsor's Social Security Account Number/Service Number, branch of service, status (active duty, retired or deceased), beneficiary's last name, initials, age, sex, relationship to sponsor, type of costs and date of medical care provided, provider of care identification, and appeals and hearing case files consisting of hearing transcripts and/or other documentation pertaining to reconsiderations or appeals of adverse determinations of benefits under CHAMPUS.

Authority for maintenance of the system:

Title 44, United States Code 3101; Title 41, Code of Federal Regulations, Parts 101-1100 et. seq.; Chapter 55, Title 10, United States Code.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The Office of the Civilian Health and Medical Program of the Uniformed Services and CHAMPUS contractors use the information to control and process medical claims for payment; for control and approval of medical treatments and interface with providers of health care; to control and accomplish reviews of utilization; for review of claims related to possible third party liability cases and initiation of recovery actions; for referral to Peer Review Committees or similar professional review organizations to control and review providers of health care; for disclosure to third party contacts without the consent of the individual to whom the information pertains in situations where the party to be contacted has, or is expected to have, information necessary to establish the validity of evidence or to verify the accuracy of information presented by the individual concerning the individual's egibility to benefits under CHAMPUS/CHAMPVA, the amount of benefit payments, any review of suspected abuse or fraud, or any concern for program integrity or quality appraisal; for the issuance of deductible certificates, to respond to inquiries from congressional officies made at the request of the individual covered by the system; for referral to the Secretary of the Department of Health, Education and Welfare and/or the Administrator of the Veterans Administration consistent with their statutory administrative responsibilities under CHAMPUS/CHAMPVA; for referral to the Department of Justice and/or foreign law enforcement agencies for investigation and possible criminal prosecution; and, for referral to the Department of Justice for representation of the Secretary of Defense in civil actions.

SEP 20 1978

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records are maintained on magnetic tape and disc.

Retrievability:

Information is retrieved by sponsor's Social Security Account Number (SSAN), beneficiaries last name, classification of medical diagnosis or procedure codes or geographical location of care provided and selected utilization limits.

Safeguards:

Records are maintained in areas accessible to authorized personnel. Records are maintained on magnetic tape readable through the medium of OCHAMPUS prepared computer programs. Military Policy Security and manned 24 hours daily.

Retention and disposal:

Records are permanent. They are maintained on magnetic tape as individual annual files.

System manager(s) and address:

Director, Office for the Civilian Health and Medical Program of the Uniformed Services, ATTN: Director of Management Information Services, Denver, Colorado 80240.

Notification procedure:

Information may be obtained from:

Director of Management Information Services
Office for the Civilian Health and Medical Program of the Uniformed Services
Denver, Colorado 80240
Telephone: 303-341-8005

Record access procedures:

Requests from individual should be addressed to: Director, Office for the Civilian Health and Medical Program of the Uniformed Services, ATTN: Director of Management Information Services, Denver, Colorado 80240.

Written requests for information should contain full name of individual, sponsor's Social Security Account Number and personal visits are limited to Director of Management Information Services, OCHAMPUS, Denver, Colorado 80240. Written requests for information from medical records shall include the name and address of a physician who would be willing to receive the medical record and, at the physician's discretion, inform the individual covered by the system of the contents of that medical record.

For personal visits, the individual should be able to provide a Uniformed Services Identification Card and a driver's license or other positive identification.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

CHAMPUS Medical Claims Forms, private physicians, hospitals, and other sources of care.

Systems exempted from certain provisions of the act:

None

DOCHA 08

System name:

DOD Health Services Enrollment/Eligibility System.

System location:

Tri-Service Medical Information System (TRIMIS) Project Office, Pentagon, Washington, D.C. 20301, and various contractual facilities.

Categories of individuals covered by the system:

Active duty Armed Forces personnel and their dependents; retired Armed Forces personnel and their dependents; surviving dependents of deceased active duty or retired personnel; Coast Guard personnel and their dependents; Public Health Service (PHS) personnel (Commissioned Corps) and their dependents; and National Oceanic and Atmospheric Administration (NOAA) employees (Commissioned Corps) and their dependents.

Categories of records in the system:

File contains beneficiary's name, Service Number of sponsor, enrollment number, relationship of beneficiary to sponsor, residence address if beneficiary (includes zip code), date of birth of beneficiary, sex of beneficiary, branch of service of sponsor, dates of eligibility, marital status and dates of beneficiary, number of dependents of sponsor, primary unit duty location of sponsor, race and ethnic origin of beneficiary, occupation of beneficiary, rank/pay grade of sponsor.

Authority for maintenance of the system:

Chapter IV, Title 10, United States Code, Section 136: 1969 Pub. L. 91-121, section 404(A) (2), 'Establishment of the Assistant Secretary of Defense for Health Affairs'; the Presidentially Commissioned Department of Defense, Department of Health, Education and Welfare, Office of Management and Budget Report of the Health Care Study (completed December 1975); Memorandum; 'Establishment of DOD Health Council,' dated December 28, 1976, and the DOD Appropriations Bill for FY 1976.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Offices of the Surgeons General of the Army, Navy and Air Force for determination of eligibility to receive health care benefits from the Uniformed Health Services Delivery System.

Office of Civilian Health and Medical Program of the Uniformed services (OCHAMPUS), for determination of eligibility to receive health care benefits and to receive reimbursement for health care services claimed under CHAMPUS.

Office of the Assistant Secretary of Defense (Health Affairs) and the Offices of Surgeons General of the Army, Navy and Air Force, for the conduct of health care studies and research on a longitudinal basis, and for planning, management and allocation of medical resources.

Offices of the Surgeons General of the Army, Navy and Air Force, and OCHAMPUS for dissemination of health care information.

Department of Health, Education and Welfare; Veterans Administration; Federal Preparedness Agency and Commerce Department for the conduct of health care studies and for the planning and allocation of medical resources. Data will be provided to State and local government health planning agencies to assist in the determination and allocation of health resources. The data will include summary data on ages, sex, residence, and other demographic parameters.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records are maintained on magnetic tapes and discs housed in a controlled computer media library.

Retrievability:

Records about individuals are retrieved by an algorithm to be determined by contractor which uses name, enrollment number, which is not Social Security Number, date of birth, rank and duty location as possible inputs.

Retrievals are made on a summary basis by geographic location and demographic characteristics. Information about individuals will not be distinguishable in such summary retrievals.

Retrievals for the purposes of generating address lists for direct mail distribution of health care information may be made using selection criteria based on geographic and demographic keys.

Safeguards:

Computerized records are maintained in a controlled area accessible only to authorized personnel. Entry to these areas shall be restricted to those personnel with a valid requirement and authorization to enter. Physician entry shall be restricted by the use of locks, guards, administrative procedures (e.g., fire protection regulations). Exits used solely for emergency situations shall be secured to prevent unauthorized intrusion.

Personal data stored at a separate location for backup purposes shall be afforded protection at least comparable to the protection provided at the primary location.

Requirements for protection of information are binding on contractors or their representative and are subject to the following minimum standards:

Restrict access to personal information to those who require the records in the performance of their official duties, and to the individual who is the subject of the record or authorized representative. Access to personal information shall be restricted by the use of passwords which are changed periodically.

Insure that all whose official duties require access to, or processing and maintenance of, personal information are trained in the proper safeguarding and use of such information.

Retention and disposal:

Computerized records on an individual are maintaimed as long as the individual is legally eligible to receive health care benefits from the Uniformed Health Services Delivery System. The records are maintained for two (2) years after termination of eligibility.

Records may be disposed of or destroyed only in accordance with DoD Component record management regulations which conform to the controlling disposition of such material as set forth in 44 U.S.C. 3301-3314. Non-record material containing personal information and other material of similar temporary nature, shall be destroyed as soon as its intended purpose has been served under procedures established by the Head of the DoD Component consistent with the following requirement. Such material shall be destroyed by tearing, burning, melting, chemical decomposition, pulping, pulverizing, shredding, or mutilation sufficient to preclude recongition or reconstruction of the information.

System manager(s) and address:

Director, Health Systems Planning, Office of the Assistant Secretary of Defense (Health Affairs), Room 3D200, Pentagon, Washington, D.C. 20301.

Notification procedure:

Information may be obtained from Director, Tri-Service Medical Information System Program Office, Office of the Assistant Secretary of Defense (Health Affairs), Room 3E182, Pentagon, Washington, D.C. 20301.

Record access procedures:

Requests from individuals should be addressed to: Director, Tri-Service Medical Information System Program Office, Office of the Assistant Secretary of Defense (Health Affairs), Room 3E182, Pentagon, Washington, D.C. 20301.

Written requests for the information should contain full name of individual and sponsor if applicable and other attributes required by previously mentioned search algorithm.

Visits are limited to: Director, Tri-Service Medical Information System Program Office, Office of the Assistant Secretary of Defense (Health Affairs), Room 3E182, Pentagon, Washington, D.C. 20301.

For personal visits the individual should be able to provide a data element required to satisfy the previously mentioned algorithm.

Identification should be corroborated with a driver's license or other positive identification.

Contesting record procedures:

The Agency's rules for contesting contents and appealing initial determination by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

Military Department's personnel and financial pay systems.

DPA DFOLA 05

System name:

Freedom of Information Program Case Files

System location:

Primary system: Directorate for Freedom of Information and Security Review, Office of Assistant Secretary of Defense (Public Affairs)

Decentralized segments: Under Secretaries of Defense, Assistant Secretaries of Defense, Assistants to the Secretary of Defense, or equivalent, the Organization of the Joint Chiefs of Staff, and other activities assigned to Office Secretary of Defense for administrative support.

Categories of individuals covered by the system:

Any citizen who makes a request for records under the Freedom of Information Program to the Office of the Secretary of Defense, Organization of the Joint Chiefs of Staff, or activity assigned to Office Secretary of Defense for administrative support.

Categories of records in the system:

Name, firm, address of individual requester, identification of records requested, dates and summaries of action taken, and documents for establishing collectable fees and processing cost to the government.

Names, titles or positions of each person primarily responsible for an initial or final denial on appeal of a request for a record.

The results of any disciplimary proceeding, including an explanation of a decision not to discipline, that was initiated against an officer or employee because a court determined arbitrary of capricious action.

Authority for maintenance of the system:

Title 5, United States Code, Section 552, The Freedom of Information Act, as amended by Public Law 93-502.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Primary system and decentralized segments are used by officials in the locations described above to administratively control requests to insure compliance with Public Law 93-502, and to research historical data on release of records so as to facilitate conformity in subsequent actions.

Primary system used for development of annual report data required by Public Law 93-502 and to compute processing costs to the government, and other management data such as, but not limited to number of requests, type or category of records requested, average processing time, average cost to requester, percentage of denials, and number of denials by exemption.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Computer magnetic disks, computer paper printout, index file cards, and paper records in file folders.

Retrievability:

Filed by request number and retrieval by name, subject material (to include dates) and request number using conventional indices.

Safeguards:

Paper records are maintained in security containers with access only to officials whose access is based on requirements of assigned duties. Computer access is by verification of Identification codes; one for search and another for maintenance.

Retention and disposal:

Annual departmental reports are permanent records. All other reports and files, other than appeal and control files, may be destroyed two to five years after reply, depending on document status. Appeal files are destroyed four years after final determination, or three years after final adjudication, whichever is later. FOIA control files are destroyed five years after date of last entry. Official file copies of records are disposed of in accordance with approved departmental disposition instructions or with related FOIA request, whichever provides the later disposal date.

System manager(s) and address:

Assistant Secretary of Defense (Public Affairs), the Pentagon, Washington, D. C. 20301

DSMC-02

System name:

Defense Systems Management College (DSMC) Student Files

System location:

Office of the Registrar, Defense Systems Management College (DSMC), Building 202, Ft. Belvoir, Va. 22060.

Categories of individuals covered by the system:

All current, former, and nominated students of the Defense Systems Management College (DSMC).

Categories of records in the system:

Data includes name, dependent data, SSAN, career brief application form, security clearance, college transcripts, correspondence, DSMC grades, instructor and advisor evaluations, education reports, official orders, current address, and individual's photograph.

Authority for maintenance of the system:

10 USC 136, and Department of Defense Directive 5160.55, 'Defense Systems Management College,' January 5, 1977.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The purpose of the file is to provide for the administration of and a record of academic performance of current, former and nominated students.

Used by College officials to verify attendance and grades; to select instructors; to make decisions to admit students to programs and to release students from programs; to serve as basis for studies to determine improved criteria for selecting students; to develop statistics relating to duty assignments and qualifications.

Preparation by the Registrar of locator directories of current and former students which are disseminated to students, former students and other appropriate individuals and agencies for purpose of administration.

Preparation by College officials of student biographical booklets, student rosters, and press releases of student graduations.

Information contained may be reported to any agency of the Department of Defense having an official requirement for the information.

Records may be disclosed to law enforcement or investigatory authorities for investigations and possible criminal prosecution, civil court action, or regulatory order.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders.

Retrievability:

Files are sequenced alphabetically by last name by class and course. Locator cards are filed alphabetically in two categories: active students (by course) and former students.

Safeguards:

Records are maintained in locked cabinets, in an area accessible only to authorized personnel. Building is locked during non-business hours.

Only individuals designated as having a need for access to files by the System Manager are authorized access to information in the files.

Retention and disposal:

Records are permanent.

All current and former students of the Defense Systems Management College (DSMC).

Categories of records in the system:

Files contain name, SSAN, marital status, sex, date of birth, nickname, professional society membership, spouse's name, children's names, accompanied status, years of service, promotion history, job or assignment history, current years of service, current assignment code, military or civilian occupational code, DSMC assignment status, security clearance, current business telephone numbers, retirement status, educational history, class at DSMC, Grade Point Average (GPA), functional course grades, graduation status, individual survey responses, awards and recognition.

Authority for maintenance of the system:

10 USC 136, and Department of Defense Directive 5160.55, 'Defense Systems Management College,' January 5, 1977.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The purposes of the system are to assemble career information on current and former students of DSMC in order to provide data to enable DSMC to monitor utilization of former students; to enable DSMC to perform research to assist in refinement of student selection criteria; to provide a data base to research for the improvement of program management; to provide a system for generating student transcripts; and to provide a data base for the DSMC Mailing List System, student and graduate registers.

The Defense Systems Management College - Used in assessing incoming student experience and educational levels; to produce student registers; to monitor utilization of former students by DoD Components; to verify and consolidate measures of student performance, to produce student transcripts which may be required by former students in her/his later educational process; to perform research into the success of former students; to provide input into the DSMC Mailing List System in order to mail surveys, newsletters and other items of interest to former students including graduate registers; to perform research to improve program management.

Computer Sciences Corporation - mounts tapes and disc packs which contain files and operates the system; does not maintain the system.

Individual records in a system of records might be transferred to any component of the Department of Defense (except GPA, functional course grades and individual survey responses).

Individual records of civilian industry students or former students might be transferred to the corporation sponsoring the individual (except GPA, functional course grades and individual survey responses).

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Primary file is magnetic disc.

Back-up files are magnetic computer tape and punched cards.

Hard copy back-up files are paper records in file folders.

Retrievability:

Files are sequenced by Social Security Account Number.

Safeguards:

Primary location is a controlled access area.

Operator personnel are screened and cleared in accordance with Government Services Administration contract procedures.

Access to magnetic disc and computer tapes requires computer phone number, user ID, password and project code which are only accessible to personnel authorized by the System Manager.

Back-up file storage is in a building which is locked during non-business hours and is located on a military installation.

Only individuals designated as having a need for access to files by the Systems Manager are authorized access to information in the files.

Retention and disposal:

Records are permanent.

System manager(s) and address:

Director, Department of Plans and Curriculum Development, Defense Systems Management College, Building 202, Ft. Belvoir, Va. 22060.

Notification procedure:

Information may be obtained from the SYSMANAGER. Telephone: 703-664-2017.

Record access procedures:

Requests from individuals should be addressed to: Commandant, Defense Systems Management College, ATTN: Chief, Administration Division, Building 202, Ft. Belvoir, Va. 22060.

Written requests for information should contain the full name, current address and telephone number, and course and class of individual.

For personal visits, the individual must provide acceptable identification, such as ID card or driver's license.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

Information is provided by the individual, supervisors, employers, instructors, advisors, examinations, and official military records.

Systems exempted from certain provisions of the act:

None

DSMC-04

System name:

Defense Systems Management College (DSMC) Publications Mailing List

System location:

Primary Location - Computer Sciences Corporation, Information Network Division, 650 North Sepulveda Bouvelard, El Segundo, Ca. 90245.

Hard copy back-up files and punched card back-up files located in Systems Management Department, Defense Systems Management College, Building 202, Ft. Belvoir, Va. 22060.

Categories of individuals covered by the system:

Individuals who have requested publications from the Defense Systems Management College (DSMC).

Categories of records in the system:

Files contain name, SSAN, marital status, sex, date of birth, nickname, professional society membership, spouse's name, children's names, accompanied status, years of service, promotion history, job or assignment history, current years of service, current assignment code, military or civilian occupational code, DSMC assignment status, security clearance, current business telephone numbers, retirement status, educational history, class at DSMC, Grade Point Average (GPA), functional course grades, graduation status, individual survey responses, awards and recognition.

Authority for maintenance of the system:

10 USC 136, and Department of Defense Directive 5160.55, 'Defense Systems Management College,' January 5, 1977.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The purposes of the system are to assemble career information on current and former students of DSMC in order to provide data to enable DSMC to monitor utilization of former students; to enable DSMC to perform research to assist in refinement of student selection criteria; to provide a data base to research for the improvement of program management; to provide a system for generating student transcripts; and to provide a data base for the DSMC Mailing List System, student and graduate registers.

The Defense Systems Management College - Used in assessing incoming student experience and educational levels; to produce student registers; to monitor utilization of former students by DoD Components; to verify and consolidate measures of student performance, to produce student transcripts which may be required by former students in her/his later educational process; to perform research into the success of former students; to provide input into the DSMC Mailing List System in order to mail surveys, newsletters and other items of interest to former students including graduate registers; to perform research to improve program management.

Computer Sciences Corporation - mounts tapes and disc packs which contain files and operates the system; does not maintain the system.

Individual records in a system of records might be transferred to any component of the Department of Defense (except GPA, functional course grades and individual survey responses).

Individual records of civilian industry students or former students might be transferred to the corporation sponsoring the individual (except GPA, functional course grades and individual survey responses).

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Computer Science Corporation - Mounts tapes and disc packs which contain files and operates the system; does not maintain the system.

Any individual records in a system of records might be transferred

Requests from individuals should be addressed to: Commandant, Defense Systems Management College, ATTN: Chief, Administration Division, Building 202, Ft. Belvoir, Va. 22060.

Written requests for information should contain the full name of the individual, SSAN, current address and telephone number.

For personal visits, the individual must contact the Chief, Administration Division, Building 202, Ft. Belvoir, Va. 22060, and provide acceptable identification, such as, military or other ID card, driver's license.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

Information is provided by the individual, employer, staff and faculty of DSMC, each DoD Component, and the U. S. Civil Service Commission (including their automated personnel systems).

Systems exempted from certain provisions of the act:

None

DSMC-04

System name:

Defense Systems Management Collge (DSMC) Academic Analysis System

System location:

Primary Location-Office of the Commandant, Defense Systems Management College (DSMC), Ft. Belvoir, Va. 22060.

Back-up Data File-Dept of Systems Management, Defense Systems Management College, Ft. Belvoir, Va. 22060.

Categories of individuals covered by the system:

All current and former Program Management Course (PMC) students and participants in DSMC Cooperative Graduate Programs.

Categories of records in the system:

File contains individual's name, SSAN, sex, date of birth, service affiliation, affiliation status, years of service, promotion history, job or assignment history, current assignment code, military or civilian occupation code, educational history, class at DSMC, DSMC class standing, DSMC grade point average, DSMC functional course grades, graduation status, pre-and post-test scores, Miller Analogies Test scores, Graduate Record Exam scores, individual survey responses, and course enrollment data and course grades in DSMC Cooperative Graduate Programs.

Authority for maintenance of the system:

10 USC 136, and Department of Defense Directive 5160.55, 'Defense Systems Management College,' January 5, 1977.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The purposes of this system are: To provide a research data base for improvement of the PMC academic program and its integration with DSMC Cooperative Graduate Programs, to provide a research data base for evaluating the quality and performance of current and former PMC students as well as DSMC Cooperative Graduate Program participants, and to facilitate administration of DSMC Cooperative Graduate Programs.

DSMC officials designated by the Commandant-Used to determine areas for improvement of the PMC academic program and its integration with DSMC Cooperative Graduate Programs; used to evaluate the quality and performance of current and former PMC students as well as participants in DSMC Cooperative Graduate Programs; used to administer DSMC Cooperative Graduate Programs; used for monitoring participation in DSMC Cooperative Graduate Programs and for counseling PMC students regarding participation; used to furnish DSMC Cooperative Graduate Program enrollment data for PMC student academic evaluation reports.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Primary file is paper records in file folders.
Back-up data file is punched cards.

Retrievability:

Filed by class alphabetically by last name of PMC student and participant in Cooperative Graduate Programs.

Safeguards:

Primary file is in a locked cabinet.

Back-up data file is in a building which is locked during nonbusiness hours and is located on a military installation.

Only individuals designated as having a need for access to files by the System Manager are authorized access to information in the files.

Retention and disposal:

Records are permanent.

System manager(s) and address:

Commandant, Defense Systems Management College, Building 202, Ft. Belvoir, Va. 22060.

Notification procedure:

Information may be obtained from the SYSMANAGER. Telephone: 703-664-2017.

Record access procedures:

Requests from individuals should be addressed to: Commandant, Defense Systems Management College, ATTN: Chief, Administration Division, Building 202, Ft. Belvoir, Va. 22060.

Written requests for information should contain the full name of the individual, SSAN, current address and telephone number.

For personal visits, the individual must contact the Chief, Administration Division, Building 202, Ft. Belvoir, Va. 22060, and provide some acceptable identification, such as military or other identification card, driver's license.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administration Instruction No. 81.

Record source categories:

Information is provided by the individual, staff and faculty of DSMC, each DOD Component and the U. S. Civil Service Commission (including their automated personnel systems), educational institutions and testing services.

Systems exempted from certain provisions of the act:

DSMC-05

System name:

Biographical Record System

System location:

Program Manager Biographies-Department of Research and Publications, Defense Systems Management College.

Board of Visitor Biographies, Department of Plans and Curriculum Development, Defense Systems Management College.

Program Management Course Guest Lecturer Biographies-Department of Program Management, Defense Systems Management College.

Executive Course Guest Lecturer Biographies-Department of Executive Management, Defense Systems Management College.

Categories of individuals covered by the system:

Key governmental officials.

Guest Lecturers at the Defense Systems Management College.

Present and past members of the Board of Visitors and Policy Guidance Council.

Categories of records in the system:

Files contain official biographic data, such as: individual's position, title, current business affiliation, record of past experience and education, awards and honors, memberships, addresses, phone numbers, photographs, etc.

Authority for maintenance of the system:

10 USC 136, and Department of Defense Directive 5160.55, 'Defense Systems Management College, ' January 5, 1977.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Purpose is to provide information for selection and introduction of guest lecturers and to perform research.

Department of Plans and Curriculum Development-To develop statistical data on Department of Defense Program Management Offices; to present data to Policy Guidance Council to determine worthiness of nominees to serve on Board of Visitors.

Department of Program Management-To provide the credentials of guest lecturer to the students prior to the presentation.

Department of Executive Management-To present the credentials of guest lecturer to the students prior to the presentation.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders.

Retrievability:

Filed alphabetically by last name, except program manager/deputy program manager files which are filed by organization titles.

Safeguards:

Records are maintained in areas accessible only to authorized personnel.

Retention and disposal:

Records are permanent.

System manager(s) and address:

Director, Department of Research and Publications, Defense Systems Management College, Ft. Belvoir, Va. 22060.

Notification procedure:

Information may be obtained from the SYSMANAGER. Telephone: 703-664-5783.

Record access procedures:

Requests from individuals should be addressed to: Commandant, Defense Systems Management College, ATTN: Chief, Administration Division, Building 202, Ft. Belvoir, Va. 22060.

Written requests for information should contain full name of the individual, current position and affiliation.

Visits are limited to the departments at the school where the information is filed. For personal visits, the individual must provide acceptable identification.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

Key official data from official Governmental files.

Board of Visitors nominee data from Policy Guidance Council members, present Board of Visitors members, DSMC Commandant and 'Who's Who.'

Guest Lecturer data from guest lecturers themselves, from their offices, or from Agency Public Affairs Offices.

Systems exempted from certain provisions of the act:

None

DSMC-06

System name:

Defense Systems Management College (DSMC) Mailing List

System location:

Primary location-Computer Sciences Corporation, Information Network Division, 650 North Sepulveda Boulevard, El Segundo, Ca. 90245.

Hard copy back-up files and punched card back-up files located in Systems Management Department, Defense Systems Management College, Building 202, Fort Belvoir, Va. 22060.

Categories of individuals covered by the system:

All former students of the Defense Systems Management College (DSMC); members of the DSMC Policy Guidance Council and Board of Visitors; program managers associated with defense systems acquisition programs; key acquisition managers throughout Department of Defense; former staff and faculty members of the DSMC and individuals desiring to be included in the system.

Categories of records in the system:

File contains name, SSAN, Class at DSMC, job code, mailing address, rank or grade, position and professional title and affiliation.

Authority for maintenance of the system:

10 USC 136, and Department of Defense Directive 5160.55, 'Defense Systems Management College,' January 5, 1977.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The purpose of the system is to provide a mailing list for distribution of newsletters, surveys, graduate registers and other information relating to acquisition management which is of interest to individuals included in the system.

DSMC - Used to disseminate newsletters, surveys, graduate registers and other information relating to acquisition management which is of interest to individuals on the DSMC mailing list; to prepare registers of former graduates; to prepare lists of Department of Defense Program Managers.

Computer Science Corporation - Mounts tapes and disc packs which contain files and operates the system; does not maintain the system.

Any individual records in a system of records might be transferred to any component of the Department of Defense or other Government agency.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Primary file is magnetic disc.
Back-up files are magnetic computer tape and punched cards.
Hard copy back-up files are paper records in file folders.

Retrievability:

Files are retrievable by name, SSAN, class, job code and zip code.

Safeguards:

Primary location is a controlled access area.

Operator personnel are screened and cleared in accordance with Government Services Administration contract procedures.

Access to magnetic disc and computer tapes requires computer phone number, user ID, password and project code which are only accessible to personnel authorized by the System Manager.

Back-up file storage is in a building which is locked during nonbusiness hours and is located on a military installation.

Only individuals designated as having a need for access to files by the Systems Manager are authorized access to information in the files.

DUSDRE 02

System name:

OUSDRE Personnel Administration Files

System location:

Office of the Under Secretary of Defense for Research and Engineering (OUSDRE), Office Secretary of Defense, Room 3E1006, Pentagon, Washington, D. C. 20301.

Categories of individuals covered by the system:

All employees assigned to or considered for positions in OUSDRE including civilian and military personnel and consultants.

Categories of records in the system:

These files contain position descriptions; biographical resumes, qualification statements, (SD 171, SD 173, SD 398, SF 161, etc.); Confidential Statement of Affiliations and Financial Interests, Department of Defense Personnel (DD Form 1555); requests for personnel actions (SD 52, 108); notification of Personal Action (SD 50); appointments affidavits (SF 61, 61B); award recommendations; appraisals

and efficiency reports; time and attendance records (SF 1135); travel orders and vouchers; and security clearance information.

Categories of records in the system:

These files contain correspondence with individuals concerning

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Individuals assigned to OSD/OJCS components authorized to research files to collect appropriate data to fulfill missions of compo-

and efficiency reports; time and attendance records (SF 1135); travel orders and vouchers; and security clearance information.

Authority for maintenance of the system:

10 USC 133

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

These files are used primarily for internal personnel and administrative management. Specific uses include: Determining eligibility for appointment to positions; reviewing financial interest and background of individual applying for appointments; comparing individuals resumes with job requirements. Used to keep accounting of time worked; travel performed; orders issued awards given to personnel and security clearance granted. The information contained in these personnel files is used by the office manager, supervisory personnel and the Under Secretary of Defense for Research and Engineering in the management of his organization.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders.

Retrievability:

Filed alphabetically by last name of the individual concerned.

Safeguards:

Building guards and locked file containers. Records are maintained in areas accessible only to authorized personnel.

Retention and disposal:

Records are temporary in nature and are destroyed after individuals leave employment of OUSDRE or are no longer under consideration for employment.

System manager(s) and address:

Executive Assistant to USDRE, Office of the Secretary of Defense, Washington, D. C. 20301.

Notification procedure:

Information may be obtained from:
Personnel Assistant
Office of the Executive Assistant to USDRE
Room 3E1006, Pentagon
Washington, D. C. 20301
Telpehone: 202-695-6556

Written requests for information should contain the full name of the individual, current address, telephone number, and any other information which would help in identifying the desired information.

For personal visits, the individual must be able to provide acceptable identification, that is, driver's license, employing office's identification card, and give verbal information that could be vertified with his 'case folder'.

Record access procedures:

Request should be addressed to SYSMANAGER as shown above.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

Information is provided by the Directorate for Personnel and Security, Security Division, Washington Headquarters Services, Department of Defense, individuals concerned, travel vouchers, security forms, travel orders, individual's supervisors, and time and attendance clerks.

Systems exempted from certain provisions of the act:

None

DUSDRE 03

System name:

Office of the Under Secretary of Defense for Research and Engineering (OUSDRE), Inventor's File.

System location:

Office of the Under Secretary of Defense for Research and Engineering (OUSDRE), Office Secretary of Defense, Room 3E1006, Pentagon, Washington, D.C. 20301

Categories of individuals covered by the system:

All persons who have submitted inventions, ideas, and proposals for consideration by the Department of Defense.

Categories of records in the system:

These files contain correspondence with individuals concerning their inventions, ideas, and proposals submitted to the Department of Defense; evaluations by government employees of those inventions, ideas, and proposals.

Authority for maintenance of the system:

10 USC 133

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The information in this file is primarily collected to give consideration to the inventions, ideas, and proposals submitted by the public. These files are used to reply to correspondence and inquiries from the public and other government agencies. The information contained in these files is used by the staff of OUSDRE.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders.

Retrievability:

Filed alphabetically by last name.

Safeguards:

Building guards and locked file containers. Records are maintained in areas accessible only to authorized personnel.

Retention and disposal:

Retained in active files for a period of five years and then transferred to the Washington National Records Center, Suitland, Maryland, 20409.

System manager(s) and address:

Director, Program Control and Administration, Office of the Secretary of Defense, Washington, D.C. 20301.

Notification procedure:

Information may be obtained from:
Assistant Director, Program Control and Administration
Room 3E1030, Pentagon
Washington, D.C. 20301
Telephone: 202-697-4994

Written requests for information should contain the full name of the individual, current address and telephone number and any other information which would help in identifying the desired information.

For personal visits, the individual must be able to provide acceptable identification, that is, driver's license, employing office's identification card, and give verbal information that could be verified with his 'case folder'.

Record access procedures:

Request should be addressed to SYSMANAGER as shown above.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

Information is provided by individuals who send their inventions, ideas, and proposals to the Department of Defense and government employees who evaluate the inventions, ideas, and proposals.

Systems exempted from certain provisions of the act:

None

DUSDRE 04

System name:

Requests for Two-year Foreign Residence Waiver Files

System location:

Security Policy and Review Division-Office of the Director Program Control and Administration, Office of the Under Secretary of Defense for Research and Engineering, Office of the Secretary of Defense.

Categories of individuals covered by the system:

Any foreigner applying for a Waiver of Foreign Residency.

Categories of records in the system:

Files contain requests for waiver of foreign residency.

Authority for maintenance of the system:

Mutual Educational and Cultural Exchange Act of 1961 (75 Stat. 535).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Security Policy and Review Division-To evaluate requests for Waivers.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper Records in file folders.

Retrievability:

Filed alphabetically by last name of individual

Safeguards:

Records are located in a facility guarded by Military and GSA Guards 24 hours a day seven days a week. Records are maintained in an area accessible only to authorized personnel.

Retention and disposal:

Records are permanent. Retained in active file for ten years.

System manager(s) and address:

Director, Program Control and Administration, OUSDRE, Office of the Secretary of Defense, Pentagon Building, Washington, D. C.

Notification procedure:

Information may be obtained from:
Security Policy and Review Division
Room 3D1067
Pentagon Building
Washington, D. C. 20301
Telephone: 202-697-3459

Record access procedures:

Requests from individuals should be addressed to: Under Secretary of Defense for Research and Engineering, Office of the Secretary of Defense, Pentagon Building, Washington, D. C. 20301

Written requests for information should contain full name of individual, current address and telephone number and approximate date of waiver request.

For personal visits individual should be able to provide appropriate identification

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81

Application and related correspondence from sponsor and individual requesting waiver.

Systems exempted from certain provisions of the act:

None

DWHS BF01

System name:

Travel Files

System location:

Directorate for Budget and Finance, Travel Branch, Washington Headquarters Services (WHS), Department of Defense (DoD), Pentagon, Washington, D.C. 20301.

Categories of individuals covered by the system:

Personnel assigned to the Office of the Secretary of Defense and the Organization of the Joint Chiefs of Staff who perform travel; includes military, civilian and WOC/WAE consultants.

Categories of records in the system:

File contains copy of travel orders, paid travel claims, airline schedule and copy of Government Transportation Requests (GTRs) issued.

Authority for maintenance of the system:

10 USC 136(b)

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Determination of the costs of trips performed by OSD and OJCS personnel

Find out if travelers have filed their vouchers after completion of trips.

Determine indebtedness to the Government if per diem payments do not liquidate travel advances.

Individuals assigned to OSD/OJCS components authorized to research files to collect appropriate data to fulfill missions of component.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders.

Retrievability:

Filed alphabetically by last name of individual.

Safeguards:

Building employs security guards. Records kept in unlocked file cabinets.

Retention and disposal:

Records maintained by fiscal year, current and previous fiscal year on hand, subsequently retired to Washington National Records Center.

Disposal in accordance with OSD Administrative Instruction No. 15.

System manager(s) and address:

Chief, Travel Branch, Directorate for Budget and Finance, Washington Headquarters Services, Department of Defense, Pentagon, Washington, D.C. 20301.

Notification procedure:

Information may be obtained from:
Chief, Travel Branch
Director for Budget and Finance
Washington Headquarters Services
Department of Defense
Room 3B279, Pentagon
Washington, D.C. 20301
Telephone: 202-697-1269

Record access procedures:

Requests from individuals should be addressed to: Chief, Travel Branch, Directorate for Budget and Finance, Washington Headquarters Services, Department of Defense, Room 3B279, Pentagon, Washington, D.C. 20301.

Written requests for information should contain the full name of individual with notarized signature, current address and telephone number, and include fiscal year of travel.

Visits are limited to Travel Branch, Directorate for Budget and Finance, Washington Headquarters Services, Department of Defense, Pentagon, Washington, D.C. 20301.

For personal visits the individuals should be able to provide some acceptable identification, that is, driver's license, employing office's identification card, and give some verbal information that can be verified with his folder.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

Travel orders, travel vouchers, airline schedules, copy of GTRs.

Systems exempted from certain provisions of the act:

None

DWHS CD01

System name:

OSD General Correspondence Files

System location:

Correspondence Control Division, Directorate for Correspondence and Directives, Washington Headquarters Services (WHS), Department of Defense (DoD), Room 3A948, Pentagon, Washington, D. C. 20301

Categories of individuals covered by the system:

Individuals who address a variety of subjects to the Office of the Secretary of Defense, and those who address Defense-related matters to the White House.

Categories of records in the system:

Includes general correspondence addressed to and emanating from the Office of the Secretary and the Deputy Secretary of Defense, and correspondence addressed to White House officials and, because the subject matter, referred to DoD for reply

Authority for maintenance of the system:

5 USC 301

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Reference material for follow-up actions and responses to additional inquiries from the same persons.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Microfiche with hard-copy backup in file folders.

Retrievability:

Filed by subject matter with alphabetical sub-system.

Safeguards:

Building protected by security guards. Records are maintained in a secure area accessible only to authorized personnel.

Retention and disposal:

Records are retained in active file until end of the calendar year, held one additional year in inactive file and subsequently transferred to the the National Records Center, where records are destroyed or permanently preserved in accordance with records disposal authority as dictated by subject matter.

System manager(s) and address:

Chief, Correspondence and Control Division, Directorate for Correspondence and Directives, Washington Headquarters Services, Department of Defense, Room 3A948, Pentagon, Washington, D. C. 20301.

Notification procedure:

Information may be obtained from:
Director for Correspondence and Directives, Washington Headquarters Services,
Department of Defense
Room 3B946
Pentagon
Washington, D.C. 20301
Telephone: 202-697-8261

Record access procedures:

Requests from individuals should be addressed to: Director for Correspondence and Directives, Washington Headquarters Services, Department of Defense, Room 3B946, Pentagon Washington, D.C. 20301.

Written requests for information should contain the full name of the individual, current address and telephone number, a brief description of the subject matter, and the approximate date of the communication, if known.

For personal visits, the individual should be able to provide some acceptable identification such as driver's license or employing office's identification card.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

Correspondence originating with the individual, DoD agencies, and other Federal agencies.

Systems exempted from certain provisions of the act:

None.

DWHS CD02

System name:

Cable Division Personnel Administration Files

System location:

Cable Division, Directorate for Correspondence and Directives, Washington Headquarters Services (WHS), Department of Defense (DoD), Room 3E925, Pentagon, Washington, D.C. 20301.

Categories of individuals covered by the system:

All individuals employed or military assigned to the Cable Division.

Categories of records in the system:

These files contain position descriptions; qualification statements, (SF 171, SF 172, OP 8, SD 295, SD 37, etc.); Confidential Statement of Affiliations and Financial Interests Department of Defense Personnel (DD Form 1555); requests for personnel actions (SD 52); notification of Personnel Action (SD 50); award recommendations; appraisals and efficiency reports; security clearance information DD Forms 398, DD Forms 1584, CS 8.

Authority for maintenance of the system:

10 USC 133

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

These files are used primarily for internal personnel and administrative management. Specific uses include: Determining eligibility for assignment to positions; comparing individual's resumes with job requirements; used to keep abreast of performance, awards given to personnel and security clearances granted. The information contained in these personnel files is used by the office manager and supervisory personnel in the Cable Division.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders.

Retrievability:

Filed alphabetically by last name and Social Security Number of individual concerned.

Safeguards:

Building guards. Records are maintained in a secure area accessible only to authorized personnel.

Retention and disposal:

Records are retained in active file until military reassignment or individual leaves employment of the Cable Division; and in an inactive file until no longer under consideration for reemployment.

System manager(s) and address:

Director for Correspondence and Directives, Washington Headquarters Services (WHS), Department of Defense, Pentagon, Washington, D. C. 20301.

Notification procedure:

Information may be obtained from:
Chief, Cable Division
Directorate for Correspondence and Directives, Washington Headquarters Services, Department of Defense.
Room 3E925, Pentagon
Washington, D.C. 20301
Telephone: 202-697-8151

Written requests for information from individuals should be addressed to Directorate for Correspondence and Directives, Cable Division, Washington Headquarters Services, Department of Defense, Room 3E925, Pentagon, Washington, D.C. 20301.

Written requests for information should contain the full name of the individual, current address and telephone number and any other information which would help in identifying the desired information.

For personal visits, the individual must be able to provide acceptable identification; that is, driver's license, employing office's identification card, give verbal information that could be verified with his/her 'case folder'.

Record access procedures:

Request should be addressed to SYSMANAGER as shown above.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

Information is provided by the Directorate for Personnel and Security, WHS, the individual concerned, and the individual's supervisors.

Systems exempted from certain provisions of the act:

None

DWHS P29

System name:

Employee Assistance Program Case Record Systems

System location:

Directorate for Personnel and Security, Washington Headquarters Services (WHS), Department of Defense, Room 3B347, Pentagon, Washington, D. C. 20301.

Categories of individuals covered by the system:

All civilian employees who are referred by management for, or voluntarily request, counseling assistance.

Categories of records in the system:

Systems are comprised of case records on employees which are maintained by counselors and consist of information on condition, current status, and progress of employees who have alcohol, drug, emotional, or other job performance problems.

Authority for maintenance of the system:

Drug Abuse Office and Treatment Act of 1972, as amended by Public Law 93-282 (21 U.S.C. 1175); Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970, as amended by Public Law 93-282 (42 U.S.C. 4582); Subchapter A of Chapter I, Title 42, Code of Federal Regulations; Chapter 43 of Title 5, U.S.C.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Used by the counselor in the execution of his/her counseling function as it applies to the individual employee. With specific, written authority of the employee, selected information may be provided to and used by other counselors or medical personnel, research personnel, employers, representatives such as legal counsel, and to the other agencies or individuals when disclosure is to the employee's benefit, such as for processing retirement applications.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Case records are stored in paper file folders.

Retrievability:

By employee name or by locally assigned identifying number.

Safeguards:

all records are stored under strict control. They are maintained in spaces normally accessible only to authorized persons, normally in locked cabinets.

Retention and disposal:

Records are purged of identifying information within five years after termination of counseling or destroyed when they are no longer useful.

System manager(s) and address:

Director for Personnel and Security, Washington Headquarters Services (WSH), Department of Defense, Room 3B347, Pentagon, Washington, D. C. 20301.

Notification procedure:

Information may be obtained from Directorate for Personnel and Security, Washington Headquarters Services (WHS), Department of Defense, Room 3B347, Pentagon, Washington, D. C. 20301. Telephone: 202-697-3305.

Record access procedures:

Requests from individuals should be addressed to the above SYSMANAGER.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

Counselors, other officials, individuals or practitioners, and other agencies both in and outside of Government.

Systems exempted from certain provisions of the act:

None

DWHS P30

System name:

Labor Management Relations Records Systems

System location:

Directorate for Personnel and Security, Washington Headquarters Services (WHS), Department of Defense, Room 3B347, Pentagon, Washington, D. C. 20301.

Categories of individuals covered by the system:

Civilian employees who are involved in a grievance which has been referred to an arbitrator for resolution; civilian employees involved in the filing of an Unfair Labor Practice complaint which has been referred to the Assistant Secretary of Labor-Management Relations; union officials, union stewards; and representatives.

Categories of records in the system:

Records comprise: Manual files, maintained in paper folders, manually filed by type of case and case number (not individual). Folder contains all information pertaining to a specific arbitration case or specific Unfair Labor Practice with whom OSD has dealings: field activities maintain manual roster of local union officials and union stewards.

Authority for maintenance of the system:

Executive Order 11491, as amended 'Labor-Management Relations in the Federal Service.'

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Officials and employees of the Department of Defense (to include Army, Navy, Air Force, and other DoD agencies) in the performance of their official duties related to the Labor-Management Relations Program, e.g., Administration implementation of arbitration awards; interpretation of the Executive Order through third party case decisions; National consultation and other dealings with the recognized unions. Representatives of the U.S. Civil Service Commission on matters relating to the inspection, survey, audit, or evaluation of Civilian Personnel Management Programs. The Comptroller General or any of his authorized representatives, in the course of the performance of duties of the General Accounting Office relating to the Labor Management Relations Program. Officials and employees of other components of the Department of Defense in the performance of their official duties related to the administration of the Labor Management Relations Program. A duly appointed hearing examiner or arbitrator for the purpose of conducting a hearing in connection with an employee's grievance.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Manual records are stored in paper folders.

Retrievability:

Manual records are retrieved by case subject, case number, and/or individual employee names.

Safeguards:

All manual files are accessible only to authorized personnel having a need to know.

Retention and disposal:

Case files are permanently maintained. Union official rosters are normally destroyed after a new roster has been established.

System manager(s) and address:

Director for Personnel and Security, Washington Headquarters Services (WHS), Department of Defense, Room 3B347, The Pentagon, Washington, D. C. 20301.

Notification procedure:

Information may be obtained from Directorate for Personnel and Security, Washington Headquarters Services (WHS), Department of Defense, Room 3B347, The Pentagon, Washington, D. C. 20301. Telephone: 202-697-3305.

Record access procedures:

Request for access to records may be obtained from the SYSMANAGER.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

Arbitrator's office; Office of the Assistant Secretary of Labor for Labor-Management Relations; union headquarters officers.

Systems exempted from certain provisions of the act:

None.

DWHS P31

System name:

Department of Defense Superior Service Medal

System location:

Directorate for Personnel and Security, Washington Headquarters Services, Department of Defense. Room 3B347, Pentagon, Washington, D. C. 20301.

DWHS P34

System name:

Non-Career Personnel Job Files

Record source categories:

Personnel files are compiled in the Office of the Director for Personnel and Security, Washington Headquarters Services (WHS), Department of Defense, with information that has been obtained

Individuals who have been alleged to have violated the Department of Defense Standards of Conduct or the conflict of interest statutes.

Categories of records in the system:

Files in the Office of the Director for Personnel and Security, WHS, which are used in the performance of the functions of the office. The files contain information about individuals in regard to allegations of violations of the Department of Defense Standards of Conduct or the conflicts of interest statutes.

Authority for maintenance of the system:

Title 10, U.S. Code, Section 137/EO 11222

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Routine use of the files is by the professional personnel in the Office of the Director for Personnel and Security, WHS, and Office of the General Counsel, Office of the Secretary of Defense, Department of Justice and DoD Components. Purpose of the files is to provide information for professional personnel in the Office of the Director for Personnel and Security, WHS, and Office of General Counsel to resolve various standards of conduct problems.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders.

Retrievability:

Filed by name.

Safeguards:

Stored in metal filing cabinets with locking devices and metal combination safes depending on classification.

Retention and disposal:

Files are retained as long as there is official interest in the case; then destroyed or retired to the Federal Records Center, Suitland, Maryland.

System manager(s) and address:

Director for Personnel and Security, Washington Headquarters Services (WHS), Department of Defense, Room 3B347, Pentagon, Washington, D. C. 20301.

Notification procedure:

Written request for information should be addressed to the System Manager, Director for Personnel and Security, Washington Headquarters Services (WHS), Department of Defense, Room 3B347, Pentagon, Washington, D. C. 20301. Telephone: 202-697-3305. Valid proof of identity is required.

Record access procedures:

Requests from individuals should be addressed to the above SYSMANAGER.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

Information contained in files is obtained from various sources including correspondence, press releases, investigations performed by the Department of Defense and other agencies and congressional committees, and other systems of records in the Department of Defense.

Systems exempted from certain provisions of the act:

This system of records is exempt under the authority of (k)(2) and (5) of Title 5, U.S.C. Section 552a from subsections (c)(3) and (d) of that statute which would require the disclosure of: (a) investigatory material compiled for law enforcement purposes. However, if any individual is denied any right, privilege, or benefit that he would otherwise be entitled by Federal law, or otherwise be eligible, as a result of the maintenance of such material, the material shall be provided to that individual, except to the extent that its disclosure would reveal the identity of a source who furnished information to the Government under an express promise or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence, or; (b) investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, or Federal contracts, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence.

At the time of the request for a record, a determination will be made concerning whether a right, privilege, or benefit is denied or the specific information which would reveal the identity of a source.

F03003 DPMSC A

System name:

03003 DPMSC A Casualty Files

System location:

Air Force Military Personnel Center, Randolph Air Force Base, TX 78148. Headquarters United States Air Force, Washington DC 20330. National Personnel Records Center, Military Personnel Records, 9700 Page Boulevard, St. Louis, MO 63132. At headquarters of major commands and at bases of assignment of casualty or which provide casualty assistance to next of kin.

Categories of individuals covered by the system:

Any United States Air Force (USAF) member who is or might become a casualty.

Categories of records in the system:

Record of Casualty. This pertains to all personnel on active duty, to Air force Academy cadets, Air Force Reserve and Air National Guard personnel performing authorized inactive duty for training or traveling directly to or from such place of duty, and Air Force Reserve Officers Training Corps (AFROTC) applicants or members on annual training duty for 14 days or more or who are traveling to or from the designated place of such duty who become very seriously ill or injured (VSI), seriously ill or injured (SI), or suffer from an incapacitating illness or injury (III), or who become missing, missing in action, interned, captured or detained by a foreign power. These records pertain to certain civilian employees of the Air Force paid from appropriated funds who become missing, missing in action, interned, captured or detained by a foreign power while assigned overseas or who are on temporary duty from the Continental United States (CONUS) to overseas or who are traveling to or from the designated place of such duty under competent authority, certain unique situations on civilian employees and dependents of military personnel who become missing, missing in action, interned, captured or detained by a foreign power in mishaps while traveling aboard Military Airlift Command (MAC) or MAC-chartered flights or by other means of MAC oversea travel, and certain civilian employees in the CONUS when their missing status was the proximate result of their employment. Casualty Case File. These files pertain to all officers and airmen on active duty or extended active duty (including personnel in absent without leave, desertion, or dropped from the rolls status). The files also pertain to Air Force Academy cadets, all Air Force Reserve and Air National Guard officers and airmen performing authorized inactive duty for training or traveling directly to or from such place of duty, all AFROTC applicants or members on annual training duty for 14 days or more or traveling to or from the designated place of such duty, and certain civilian employees of the Air Force paid from appropriated funds who become missing, missing in action, interned, captured or detained by a foreign power while assigned overseas or who are on temporary duty (TDY) from CONUS to overseas or who are traveling to or from the designated place of such duty under competent authority. They pertain to certain civilian employees and dependents of military personnel who become missing, missing in action, interned, captured or detained by a foreign power in mishaps while traveling aboard MAC or MAC-chartered flights or by other means of MAC overseas travel and certain foreign nationals and certain employees in the CONUS when their missing status was the proximate result of their employment. A casualty is defined as any member of the armed forces or certain civilians who are lost to their organization by reason of having been declared missing, missing in action, wounded, injured, or diseased. The casualty case file is comprised of messages pertaining to the member; a copy of the Record of Emergency Data, Department of Defense Form 93 or Air Force Form 246; Air Force Military Personnel Center Form 238, CONUS Death/Missing, Report of Casualty, Department of Defense Form 1300; copy of assignment of assistance responsibility letter; Servicemen's Group-Life Insurance Election, Veterans Administration (VA) Form 29-8286; correspondence from the base/AFMPC to/from the next of kin (NOK); Acknowledgement and/or Transfer of Casualty Assistance Case, Air Force Form 92; Statement of Service, Department of Defense Form 13; copy of notification message; Western Union messages; and other related correspondence and forms which pertain to the file. Record of Emergency Data being maintained on all Air Force personnel on extended active duty (EAD) and Air Force Academy cadets. Missing Persons Case Files. Reports submitted on United States Air Force (USAF) personnel who become missing as defined in 37 USC 551. Conveninnce rosters of those persons, copies of communications from and to next of kin, items received through news media, and some films.

Authority for maintenance of the system:

Chapter 31, Title 44, United States Code (USC) 3101-3107, Records Management by Federal Agencies; Chapter 33, Title 44, USC 3301-3314, Disposal of Records; Title 10, USC 2771, Armed Forces - Accountability and Responsibility; ; Sections 555 and 556, Chapter

known, its title, description, number, date and issuing authority. For personal visits, the individual must provide some acceptable identification; that is, drivers license, identification card, or give some verbal information that can be verified in the case folder.

System manager(s) and address:

Commander Air Reserve Personnel Center (ARPC), 7300 East First Avenue, Denver, CO 80280.

Requests from individuals should be addresed to the System Manager.

Record access procedures:

Individual can obtain assistance from the System Manager.

Chapter 31, Title 44, United States Code (USC) 3101-3107, Records Management by Federal Agencies; Chapter 33, Title 44, USC 3301-3314, Disposal of Records; Title 10, USC 2771, Armed Forces - Accountability and Responsibility; ; Sections 555 and 556, Chapter 10, Title 37, United States Code, Pay and Allowances of the Uniformed Services, Payments to Missing Persons.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Support of the Casualty Services Program. The information is used to assist the Air Force in effecting expeditious reporting, dignified and humane notifications, and efficient and thorough assistance to the next of kin of all casualties as previously defined. Primary user is the Office of the Assistant for Casualty Matters Major Commands (MAJCOMs),bases of assignment and/or reporting installation and bases providing casualty assistance. Records contain histories of all known data surrounding the missing statuses, recording dealings with next of kin, and reflecting efforts to obtain all possible information through normal and intelligence channels as well as the results of those efforts. Contain record of personnel actions taken which involve the missing persons as well as actions taken in accordance with public law. Rosters are maintained for convenience of completing many actions. Primary users are personnel in the Office of the Assistant for Casualty MaForce Military Personnel Center. Decentralized segment is maintained for rapid response to queries by high-level personnel in the Washington, District of Columbia (DC) area. The Record of Emergency Data is used to show the names and addresses of service member's spouse, children, parents and other persons the member wants notified should he/she become a casualty. Serves as an official document required by law (Title 10, United States Code (USC) 2771) for designating beneficiaries for death gratuity and unpaid pay and allowances. Also used to designate a person to receive an allotment of pay if the member becomes missing, captured or interned. Primary user is the Office of the Assistant for Casua

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in visible file binders, cabinets, and film cannisters.

Retrievability:

Filed by Name. Filed by Social Security Number (SSN).

Safeguards:

Casualty records are accessible only to authorized personnel assigned to the Office of the Assistant for Casualty Matters. Personnel are on duty 7 days per week, 24 hours a day. Also, access to the building after duty hours is controlled by Security Police personnel.

Retention and disposal:

Records may be temporary or permanent or supplemental in nature. They are retained in active file until the member's status is changed to deceased or returned to military control or no longer considered VSI, SI or III. One year after that time, selected temporary records are destroyed and all permanent records are retired to the National Personnel Records Center. Remaining temporary records are destroyed ten years after date of death or return to military control. Records of Casualty and casualty case files are permanent records. They are retained in active file until application or receipt of all allowable benefits, then forwarded to the National Personnel Records Center, 9700 Page Boulevard, St. Louis, Missouri 63132. Case files pertaining to civilians; foreign nationals; very seriously ill or seriously ill persons; and dependents of military personnel are destroyed 90 days after administrative closing of the case. Records of Emergency Data are retained until the member is relieved from active duty, then destroyed. Destroyed by shredding, burning, or by tearing into pieces.

System manager(s) and address:

Assistant Deputy Chief of Staff, Personnel for Military Personnel, Air Force Military Personnel Center, Randolph Air Force Base, Texas 78148.

Notification procedure:

Requests from individuals should be addressed to the Systems Manager.

Record access procedures:

Requests from individuals should be addressed to: Air Force Military Personnel Center/Office of the Assistant for Casualty Matters (AFMPC/DPMC), Randolph Air Force Base, Texas 781have been retired, the request will be forwarded to National Personnel Records Center (NPRC). Written requests should contain the full name and Social Security Account Number of the member as well as an indentification as complete as possible of the desired material including, if known, its title, description, number, date and issuing authority. For personal visits, the individual must provide some acceptable identification; that is, drivers license, identification card, or give some verbal information that can be verified in the case folder.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Information provided by next of kin, organization of assignment, information extracted from Master Personnel Records, documents generated within the Casualty Division, Air Force Military Personnel Center, correspondence produced in providing casualty notification/assistance/processing.

F03501 DP 3

System name:

03501 DP 3 Unit Assigned Personnel Information File

System location:

Air Force Units. Headquarters United States Air Force and major command headquarters. Headquarters of major commands and at all levels down to and including Air Force installations.

Categories of individuals covered by the system:

Active duty military personnel. Air Force Reserve and Air National Guard personnel.

Categories of records in the system:

File copies of separation actions, newcomers briefing letters, line of duty determinations, assignment actions, retirement actions, in and out processing checklists, promotion orders, credit unition authorization, disciplinary actions, favorable/unfavorable communications, record of counselings, appointment notification letters, duty status changes, applications for off duty employment, applications and allocations for school training, professional military and civilian education data, private weapons storage records, locator information including names of dependents, home address, phone number, training and experience data, special recognition nominations, and other personnel documents.

Authority for maintenance of the system:

10 United States Code 8012.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Provides information to unit commanders/supervisors for required actions related to personnel administration and counseling, promotion, training, separation, retirement, reenlistment, medical examination, testing, assignment, sponsor program, duty rosters, and off duty activities.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in file folders, note books/binders, and card files.

Retrievability:

Filed by Name and Social Security Number (SSN).

Safeguards:

Records are accessed by custodian of the record system and by person(s) responsible for servicing the record system in performance of their official duties who are properly screened and cleared for need-to-know. Records are stored in locked cabinets or rooms.

Retention and disposal:

Retained in office files until reassignment or separation; most records are transient in nature and are maintained only as long as required to fulfill their management purpose or until superseded, then given to the individual or destroyed by shredding, pulping, macerating or burning.

System manager(s) and address:

Deputy Chief of Staff/Personnel, Headquarters United States Air Force. Washington D.C. 20330

Notification procedure:

Inquries from individuals should be addressed to the respective unit commander or supervisor who maintains the records in order to exercise their rights under the Act.

Record access procedures:

Requests from individuals should be addressed to the respective unit commander or supervisor who maintains the records in order to exercise their rights under the Act. Mailing addresses are contained in the Department of Defense Directory in the appendix to the Air Force's Systems Notice.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Information obtained from the individual concerned, financial institutions, educational institutionemployees, medical institutions, police and investigating officers, bureau of motor vehicles, witnesses, reports prepared on behalf of the agency, standard Air Force forms, personnel management actions, extracts from the Advanced Personnel Data System (ADPS) and records of personal actions submitted to or originated within the organization.

Systems exempted from certain provisions of the act:

NONE

F03501 DPMAKEI

System name:

03501 DPMAKEI Absentee and Deserter Information Files

System location:

Absentee and deserter documents are maintained in the Unit Personnel Record Group at consolidated base personnel offices. Information files are maintained at major commands of the parent unit of assignement. Official mailing addresses for consolidated base personnel offices and major commands are in the Department of Defense directory in the appendix to the Air force's system notice. Case files are maintained at the Air Force Military Personnel Center, Randolph Air Force Base, TX 78148. Permanently retained documents are located at the National Personnel Records Center, Military Personnel Branch, 9700 Page Bolulevard, St. Louis, MO 63132 and the Air Reserve Personnel Center, 7300 East First Avenue, Denver, CO 80280.

Categories of individuals covered by the system:

All active duty and inactive duty Air Force personnel who are or have been reported absent without leave or who have been administratively classified as a deserter.

Categories of records in the system:

Duty status change forms; Absentee Wanted by the Armed Forces forms;; copy of unit commander's initial and follow-on Report of

System location:

At Air Force Military Personnel Center, Randolph Air Force

Headquarters United States Air Force, Washington DC 20330. Air Force Military Personnel Center, Randolph Air Force Base, TX 78148. Air Reserve Personnel Center, 7300 East First Avenue,

Force personnel management within the agency for actions/processes related to procurement, education and training, classification, assignment, career development, evaluation, promotion, compensation, sus-

Duty status change forms; Absentee Wanted by the Armed Forces forms;; copy of unit commander's initial and follow-on Report of Inquiry. Includes information concerning circumstances surrounding the unauthorized absence and attempts to locate the individual; copy of notification letter to next of kin stating that member is considered in an administrative status of an unauthorized absentee or deserter; Federal Bureau of Investigation (FBI) and Office of Special Investigations (OSI) reports or extracts therefrom are included in some case files; correspondence administratively classifying the individual as a deserter, if appropriate; Report of Return of Absentee Wanted by the Armed Forces forms.

Authority for maintenance of the system:

Title 10, United States Code (USC) Armed Forces - Chapter 47 - Uniform Code of Military Justice, Sections 885, 886 and 887.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Provides documentation and reference source for the administration of individuals absent without leave and individuals administratively classified as deserters. Used as basis for preparing statistical reports required by DOD for reports provided managers of unauthorized absentee programs, e.g., Major Commanders, and for promptly reporting changes in individual's status to military federal and civil law enforcement agencies to facilitate apprehension.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in visible file binders/cabinets.

Retrievability:

Filed alphabetically by last name.

Safeguards:

Records are accessed by the custodian of the record system, persons responsible for servicing the records system in the performance of their official duties, and by authorized personnel who are properly screened and cleared for need-to-know. These records are stored in file cabinets in buildings that are either locked or have controlled access entry requirements.

Retention and disposal:

Documents originated at base level are maintained in the Military Personnel Records System. Major command files are maintained as temporary general correspondence files and destroyed by shredding one year after the calendar year in which the member returned to military control. Case files maintained at the Air Force Military Personnel Center (AFMPC/DPMAKE) are destroyed six months after the member is returned to military control; however, If additional accountable disclosures are made during that six month period the files are transferred to the Military Personnel Records System and retained permanently.

System manager(s) and address:

Assistant Deputy Chief of Staff Personnel for Military Personnel, Randolph Air Force Base, Texas 78148.

Notification procedure:

During the period of unauthorized absence, no procedures exist for notifying individuals that an Absent Without Leave (AWOL)/Deserter file is maintained on them unless address provided by requestor. Subsequent to the member's return to military control individuals can contact the system manager or visit the locations identified above. Requests from individuals should be addressed to the Systems Manager.

Record access procedures:

Contact the system manager or visit the locations identified above.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Unit Commanders, Consolidated Base Personnel Office representatives, military and civilian law enforcement officials, and anyone who may report information concerning an absentee wanted by the Armed Forces.

Systems exempted from certain provisions of the act:

NONE

F03501 DPMAR

System name:

03501 DPMAR Disability/Non-Disability Retirements Records

System location:

At Air Force Military Personnel Center, Randolph Air Force Base, TX 78148.

Categories of individuals covered by the system:

Officers and airmen currently on the Temporary Disability Retired List (TDRL); officers and airmen who have requested voluntary retirement other than those whos applications were automatically approved.

Categories of records in the system:

TDRL punch card data files, retirement applications, and associated documents biographical data.

Authority for maintenance of the system:

10 USC Chapter 33, Appointments in Regular Components Section 564; Chapter 59, Separation, Sections 1164 and 1166; Chapter 61, Retirement or 10 USC Chapter 33, Appointments in Regular Components Separation for Physical Disability; Chapter 63, Retirement for Age, Section 1263; Chapter 65, Retirement for Length of Service, Sections 1293 and 1303; Chapter 835, Appointments in the Regular Air Force, Section 8303; Chapter 859, Separation from Regular Air Force for Failure to Meet Standards, Sections 8786 and 8796; Chapter 865, Retirement for Age, Sections 8883, 8884, 8885, 8886; Chapter 867, Retirement for Length of Service, Sections 8911, 8913, 8915, 8916, 8918, 8921, 8922, 8923 and 8924.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Used to provide information on retirement cases and to allow appropriate case processing; used to control TDRL actions; diagnostic information may be provided to attending physicians of TDRL members to obtain current status of originally disabling conditions.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in visible file binders/cabinets.

Retrievability:

Filed by Name by Social Security Number (SSN).

Safeguards:

Records are accessed by custodian of the record system and by person(s) responsible for servicing the record system in performance of their official duties who are properly screened and cleared for need-to-know. Stored in secure building.

Retention and disposal:

Correspondence files are retained for two years after end of year case was closed or inquiry responded to; disability retain files are retained for 90 days after case is finalized; case files are retired to Master Personnel Records Group when service retirement action has been completed; TDRL punch cards destroyed when member is removed from TDRL. Disposal is by shredding or burning.

System manager(s) and address:

Assistant Deputy Chief of Staff Personnel for Military Personnel, Randolph Air Force Base,TX.

Notification procedure:

Requests from individuals should be addressed to the Systems Manager.

Record access procedures:

Individual can obtain-assistance in gaining access from the Systems Manager.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Correspondence and forms generated in Retirements Division (AFMPC/DPMAR), military hospitals, HQ USAF Surgeon General (HQ USAF/SG), Consolidated Base Personnel offices and Major Air Commands, by the members themselves, and by the general public on retirement related matters.

Authority for maintenance of the system:

Title 44, United States Code, Section 3101: Records Management by Federal Agencies; Records Management by agency heads; general duties; E.O. 9397.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

In addition to satisfying the Title 44 requirement for records retention, Military Personnel Records are utilized at all levels of Air Force personnel management within the agency for actions/processes related to procurement, education and training, classification, assignment, career development, evaluation, promotion, compensation, sustentation, separation and retirement. Military Personnel Records are routinely utilized outside the Air Force for actions/processes related to assignment or transfer to other services or joint service organizations; compensation claims submitted to Veterans Administration Regional Offices; dependents and survivors requesting issuance or determination of eligibility for identification card privileges; Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) eligibility and benefits requests - copies are provided to CHAMPUS, Denver, Colorado; Immigration and Naturalization - copies are provided to respective local Immigration Office; Unemployment Compensation Requests - verification of service related information provided to State Unemployment Compensation (UCX) Office; Vietnam State Bonus - information provided to respective local State offices; Civil Service requests for verification of military service for benfits; leave or Reduction in Force (RIF) purposes - copies provided to local Civilian Personnel Office; National Cemetary Burial/Headstone cases - copies provided to Superintendent National Cemetary, Army Quartermaster Corps, Virginia; Worldwide locator inquiries - response provided to legitimate requests in accordance with the Freedom of Information Act; Dual compensation cases involving former officers - provided to establish Civil Service employee tenure and leave accrual rate; Social Security Retirement Credit Verification - verification of service data provided to substantiate applicant's credit for Social Security compensation; Soldiers and Sailors Civil Relief Act requests - verification of service - related information provided to State courts in civil actions; Litigation - in event the United States, its officers or employees are involved. Changes in member's official records regarding name, Social Security Account Number, date or place of birth or home of record - required information provided to Director of Selective Service, Federal Bureau of Investigation, and Personnel Research Division of the Air Force Human Resources Laboratory at Lackland Air Force Base, Texas. Secretary of the Air Force Legislative Liaison releases when authorized by individual concerned. US Department of Agriculture for investigative and audit procedures US Department of the Treasury for Secret Service investigations, Coast Guard Activities Bureaus of Customs, Narcotics, Engraving and Printing and Internal Revenue Service for official activities; US State Department, Federal Aviation Agency for background investigations of employment applicants; Central Intelligence Agency for Investigations, US Postal Service for Official Postal Inspector Duties, General Services Administration for Investigation of Incumbant Employees; Department of Justice for Investigations conducted by the Federal Bureau of Investigation and Immigraton and Naturalization Small Business Administration for Investigations concerning Loans, National Security Agency Review of Records for Security Investigations United States Information Agency for Review of Records for Background Investigations. United States Civil Service Commission to conduct investigations either by personal investigations or written inquiry to determine suitability, eligibility, or qualifications of individuals for Federal employment, Federal contracts, or access to classified information or restricted areas. Separation information provided to the Veteran's Administration and Selective Service Agencies. American National Red Cross - information to local Red Cross offices for emergency assistance to military members, dependents, relatives or other persons if conditions are compelling. Drug Enforcement Administration. Department of Labor: Bureau of Employees' compensation - medical information for claims of civilian employees formerly in military services; Employment and Training Administration - verification of service-related information for unemployment compensation claims; Labor Management Services Administration for investigations of possible violations of labor laws and pre-employment investigations; National Research Council - for medical research purposes; U.S. Soldiers' and Airman's Home - service information to determine eligibility.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in file folders placed in metal file containers or on open shelves. Microfiche placed in rotary power files; computer disk resident data file consists of Social Security Account Number (SSN) and disk location of the associated image inderecord which includes document data describing document type, date, location, and number of pages in each document.

Retrievability:

Information in the system is retrieved by last name, first name, middle initial and Social Security Number (SSN). Records stored at

National Personnel Records Center Center are retrieved by registry number, last name, first name, middle initial and SSN. Information

Documentary support of tour applications; approval/disapproval; initiation, termination and extension of statutory tours; historical ref-

and termination of employment; hiring checklist; AFROTC Form O-217, Change in AFJROTC Instructor Status; AFROTC Form O-214, AFJROTC Instructor Contract Card; AFROTC Instructor certifi-

clearance; statements of personal history; LPT scores; drug abuse certificates; small arms marksmanship training data; personnel data sheet; cadet biographical data; cadet personnel information; state-

National Personnel Records Center Center are retrieved by registry number, last name, first name, middle initial and SSN. Information can be displayed via closed circuit television subsystem, produced on a duplicate microfiche, or paper reproduction.

Safeguards:

The prescribing directive for the Military Personnel Records System requires those records to be stored (after duty hours) in a locked building, room or filing cabinets. Access is specifically limited to those personnel designated by the Consolidated Base Personnel Office (CBPO) Chief and those provisions for access and release of information contained in Air Force Regulation 31-6.

Retention and disposal:

Users who are granted access to the microfiche files are screened by computer software. Those documents designated as Temporary in the prescribing directive remain in the records until their obsolescence (superseded, member terminates his status, or retires) when they are removed and provided to the individual data subject. Those documents designated as Permanent remain in the military personnel records system permanently and are retired with the master personnel record group.

System manager(s) and address:

Assistant Deputy Chief of Staff Personnel for Military Personnel, Randolph Air Force Base, Texas 78148 is the official responsible for the system of records. Individuals in categories included above may deal directly with agency officials at the respective records location to exercise their rights under the Act.

Notification procedure:

The individual data subject may be notified that a record exists on him by submitting a request to or appearing in person at the responsible official's office or the respective repository for records for personnel in his particular category during normal duty hours any day except Saturday, Sunday or national and local holidays. The Saturday and Sunday exception does not apply to Reserve and National Guard units during periods of training. Response to written requests will be provided not later than ten days following receipt of request. The System Manager has the right to waive these requirements for personnel located in areas designated as Hostile Fire Pay areas.

Record access procedures:

The same written notification or personal visit procedures which apply to notification also apply to access.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Sources of information contained in the system include data subject's applications, requests, personal history statements, supervisors' evaluations, correspondence generated within the agency in the conduct of official business, medical treatment records, educational institutions, civil authorities, other service departments, and interface with the Advanced Personnel Data System.

Systems exempted from certain provisions of the act:

NONE

F03501 REP A

System name:

F03503 ATC RSL

System name:

03503 ATC RSL Basic Trainee Interview Record

System location:

United States Air Force Recruiting Service Liaison Office (RSL), Lackland Air Force Base, Texas 78236.

Categories of individuals covered by the system:

United States Air Force Basic Trainees who register complaints concerning their enlistment in the United States Air Force.

Categories of records in the system:

Records resulting from personal interviews with basic trainees who file complaints about their enlistment, including, but not limited to, investigations on each complaint, conclusions and recommendations.

Authority for maintenance of the system:

10 USC 503, enlistments; recruiting campaigns. Executive Order 9397, 22 November 1943, Number System for Accounts Relating to Individual Persons.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Data is collected in order to have a written record of interviews with basic trainees who register complaints about the enlistment procedure. The data is used by the Recruiting Service Liaison Office to investigate the complaints and keep the Commander, United States Air Force Recruiting Service advised of the nature of complaints being received. It is also used as the basis for making procedural changes in the United States Air Force Recruiting Service when a trend develops in a specific area.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in file folders.

Retrievability:

Filed by name or social security number.

Safeguards:

Records are accessed by person(s) responsible for servicing the record system in the performance of their official duties and by those who are properly screened and cleared for need-to-know. As a physical safeguard these records are stored in a secured building and locked office.

Retention and disposal:

Records are cut off at the end of each calendar year, held for one additional year, then destroyed by shredding.

System manager(s) and address:

Superintendent, United States Air Force Recruiting Service Liaison Office, Lackland AFB TX 78236.

Notification procedure:

Individuals may contact the Superintendent, United States Air Force Recruiting Service Liaison Office, Lackland AFB TX 78236. Requests must contain full name, and current mailing address.

Record access procedures:

Same as procedures for notification.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Records contain specific complaints/allegations made by the individual and responses to the complaints/allegations by appropriate Air Force Recruiting Service personnel.

Systems exempted from certain provisions of the act:

NONE

F03503 ATC RSM

System name:

03503 ATC RSM Recruiting Activities Management Support System (RAMSS)

System location:

HQ United States Air Force Recruiting Service, Marketing and Analysis Directorate (RSM), Randolph AFB TX 78148.

Categories of individuals covered by the system:

Air Force enlisted personnel entering active duty. Individuals tested and processed for Air Force enlistment. Potential Air Force enlistees qualified through the Armed Services Vocational Aptitude Battery (ASVAB) high school testing program. Other military services Delayed Enlistment Program (DEP) and active duty enlistees. Applicants for the Officer Training School (in-service commissioning program). Air Force enlisted personnel on recruiting duty.

Categories of records in the system:

Air Force enlistment processing records showing name, SSN, scores on all qualification tests, physical job qualifications, job preferences, jobs offered, jobs accepted, other personal data relevant to jobs offered, recruiting and processing locations, education data, and dates of processing. Airman trainee history records containing name, SSN, and other personnel data for assignment from basic military training, revised job preferences, security clearance investigations, dependent data, education, test scores, grade and promotions, biographical history, physical information, drug abuse history, enlistment personal and guaranteed training enlistee program data, separation data, classification data, service dates, technical school eliminations, separations, honor graduates, and Article 15/ courts-martial actions. Records for high school seniors who are ASVAB tested and meet the basic Air Force enlistment criteria showing name, mailing address, test scores, and high school where tested. Enlistment processing records for other military services showing SSN, name, state and county of residence, test scores, educational level, physical profile, processing date and location, prior service, and other personal data such as age, sex, race, martial status, and number of dependents. Officer Training School (OTS) applicant records showing SSN, name, and other educational and personal data necessary for the determination and selection of attendees at OTS and subsequent commissioning as an Air Force officer. Air Force enlisted recruiter individual records showing such items as SSN, name recruiting office assigned, and date assigned to Recruiting Service.

Authority for maintenance of the system:

10 USC 503, Enlistments: recruiting campaigns. Executive Order 9397, 22 November 1943, Number System for Accounts Relating to individual persons.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

To furnish leads to the field recruiters derived from the high school ASVAB testing program, evaluate Air Force recruiters on

effectiveness of screening out potential under/overweight applicants, evaluate recruiter's and job counselor's activity and efficiency levels, analyze preenlistment job cancellations for common denominators (reasons), analyze post-enlistment training pipeline attritions for common denominators (reasons), evaluate Air Force job reservation pool and past enlistments for effect of potential changes in enlistment policies in areas such as mental qualifications and physical qualifications, evaluate interservice recruiting performance, screen other service enlistees from Air Force advertising lead files, determine pass/fail rates for mental and physical testing, track training performance of Air Force enlistees, study the correlation of job held with performance on the job, study correlation of quality indicators with post-enlistment performance, feedback to field recruiters of individual records on all training attritions, and analyze advertising responses. Used by the personnel record maintenance activity to cross-check file completeness and accuracy. Individual records are aggregated into various statistical analyses for all levels to ascertain recruiting and seasonal procurement trends, to predict future potential developments, and to assist in the development of procurement, classification, and assignment policies for Air Force military personnel.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records are stored on computer magnetic tapes, computer magnetic disks and computer paper printouts.

Retrievability:

Filed by name, SSN, or non-personal identifier.

Safeguards:

Records are accessed through computer run scheduling arrangements by persons responsible for servicing the system in performance of their official duties. Computer paper printouts are distributed only to authorized users. Records are physically safeguarded by controlled access to the computer facility, secured buildings and locked rooms.

Retention and disposal:

Enlistment processing records are retained until no longer needed for recruiting purposes; recruiter records are retained for one year after individual is removed from recruiter production status; ASVAB testing lead information is retained for 60 days. These retentions are built into the computer system program with automatic software controlled deletions from the machine-readable record.

System manager(s) and address:

Director, Marketing and Analysis Directorate (RSM), HQ United States Air Force Recruiting Service, Randolph AFB, TX 78148.

Notification procedure:

F03505 DPMAO B

System name:

03505 DPMAO B Personnel Action File (Digest File)

System location:

At Air Force Military Personnel Center, Randolph Air Force Base, TX 78148 for active duty officers and Air Reserve Personnel Center, 7300 East First Ave. Denver CO 80280. for nonactive duty USAFR officers.

Categories of individuals covered by the system:

Air Force active duty officer personnel and nonactive duty USAFR officers.

Categories of records in the system:

Composed largely of sumaries/extracts or notices of the Air Force Office of Special Investigations (AFOSI) Reports of Investigation (ROIs). The system may also contain other official records or documents which reflect relevant derogatory information about officers, e.g., notice of involuntary separation proceedings, notice of Special Security File, reports of AWOL/Desertion status, administrative inquiries and investigations, Inspector General (IG) reports, and reports of violations of public trust in contract, procurement, and other matters. Additionally, a file will contain a statement regarding the subject matter from the officer if one is made, plus any comments and recommendations by the member's commander. Finally, a Digest File will contain copies of documentation used to notify the individual and the commander of the file and a record of the Officer Personnel Records Review Board (OPRRB) decision to retain the file. The system of records also includes letters of notification when digest files are destroyed.

Authority for maintenance of the system:

10 U.S.C. 8012.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Digest Files are reviewed by career management officials and Central Selection Boards at AFMPC or ARPC, as appropriate, to insure the propriety of personnel decisions finalized at those levels regarding promotion, assignment, mobilization, recall to extended active duty, selection, utilization and separation. The purpose of such review is to insure that individual career management decisions enhance the quality of professionalism in the Air Force.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in visible file binders/cabinets.

Retrievability:

Filed alphabetically by name.

Safeguards:

Records are accessed by persons responsbile for servicing the record system and by other personnel whose names appear on an authorized access list indicating they have a need to know in the performance of their official duties. Records are stored in locked cabinets.

Retention and disposal:

Disposition is pending approval under 44 U.S.C. 3303(3).

System manager(s) and address:

Chief, Special Control and Records Review Group (AFMPC/DPMAO), Randolph AFB TX 78148 for active duty officers and Commander, Air Reserve Personnel Center (ARPC), 7300 East First Ave. Denver CO 80280 for non-active duty USAFR officers.

Notification procedure:

Requests from individuals should be addressed to the Systems Manager. Written requests should contain the member's full name, rank, and SSN. Information may also be obtained by personal visit with the appropriate Systems Requests from individuals should be addressed to the Chief, Special Control and Records Review Group (AFMPC/DPMAO), Randolph AFB TX 78148 for active duty officers or the Documentation Management Officer (ARPC/DADP), 7300 East First Avenue, Denver CO 80280 for nonactive duty USAFR officers. Written request(s) for information should contain full name of individual, rank and SSN (Social Security Number). Nonactive duty USAFR officers should also include current address and the case (control) number shown on any correspondence received from the Center. Information may be obtained by active duty officers by personal visit with the System Manager upon verification of the identification data required for written requests. Nonactive duty USAFR officers may review records in Records Review Room (2-B18-2) ARPC, 7300 East First Avenue, Denver CO 80280, between 8:00 A.M. and 3:00 P.M. on normal work days. For personal visits, the individual should provide current Reserve ID cards and/or drivers license and present some verbal information that could verify their identity from their record.

Record access procedures:

Individuals can obtain access to their own Digest Files by following the procedures described above.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Digest File information is obtained from AFOSI, Commanders, Consolidated Base Personnel Offices, FBI, MAJCOMs, HQ USAF/IG and from official records, reports or documents prepared on behalf of the Air Force by boards, committees, panels, and investigating officers.

Systems exempted from certain provisions of the act:

Systems exempted from certain provisions of the act:

NONE

F04501 0KPNQSA

System name:

04501 0KPNQSA Cadet records.

System location:

AFROTC/SDA, Maxwell AFB, AL. 36112 and AFROTC detachments. Official mailing addresses of the detachments are in the Department of Defense directory in the appendix to the Air Force:s system notice.

Categories of individuals covered by the system:

AFROTC cadets applying for/enrolled or previously enrolled (within the past three years) in the professional Officers course or the general military course, if the latter participation was in a scholarship status.

Categories of records in the system:

Applications for enrollment in the Air Force reserve Officer corps (AFROTC) courses, applications for the AFROTC scholarship program, substantiation documents of qualification for the courses or programs, acceptances of applications, awards of scholarships, documents attesting to medical, academic, moral and civic qualifications, documents recording progress in flying instruction, academic curriculum and leadership training, counseling summaries, records of disenrollment from other Officer candidate training; records of separation or discharge from Officer candidate training; records of separation or discharge of prior servicemen; financial record data, certification of degree requirements; documents tendering and accepting commissions, documents verifying national agency checks or background investigations, documents required or proffered during investications for disenrollment, legal opinions, letters of recommendations, corroboration by civil authorities, awards, citations; and allied papers.

Authority for maintenance of the system:

Title 10 U.S.C., chapter 103; military selective service act of 1967,section 6 (50 U.S.C. App 456); 10 USC 8012.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Information collected is for the purpose of recruiting and qualifying a candidate for acdeptance as an AFROTC cadet, continuing the cadet in the program and awarding an Air Force commission. Each detachment, located at its host institution, is the routine user for the members in its particular program. AFROTC, Maxwell AFB, AL, is a user by exception, that is, data is requested from the routine user if there is an aberration in the qualification of an individual for acceptance, continuation or graduation from the ROTC program. AFROTC execises waiver authority that enables deserving individuals to remain in the program on a conditional basis if they perform below standards. AFROTC also requests data for disenrollments, changes in categories and graduation dates. Additionally, AFROTC requests data from the routine user for congressional inquiries, special projects, awards, honors and inter-service ROTC transfers. Air University (AU), as a Major Command, supervises execution of laws, plans and policies relating to AFROTC, as such, AU requires information in exercising its Command and Control function, i.e., Major Command inspections, waiver authority, and data reporting to superior agencies.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

The life-cycle of the records begins with the application and testing of the candidate. Documents establishing qualification and satisfaction of criteria along with contracts and allied documents establish the cadet record. Progress documents, counseling sheets and performance records are maintained until graduation and commissioning. Finally, the records are destroyed one year after commissioning. An exception to the one year retention is the record of a disenrolee, one who does not complete the program nor receive a commission. Under these circumstances, the cadet record is maintained for three years. Further disposal of records is by burning, pulping or tearing into pieces.

Retrievability:

Records are retrieved by name, social security number and detachment number as paper records in file folders.

Safeguards:

Safeguards are storage in file cabinets that are accessible to the detachment staff and the individual concerned. AFROTC employs a locked rotary diebold power file and file cabinets accessible to the staff.

Retention and disposal:

Records are destroyed by standard means one year after a cadet is commissioned. Disenrolled cadets: records are retained for three

years and then destroyed by tearing into pieces, mascerating, or burning.

reschedule cadets and establish criteria for resectioning cadets in their courses during the academic year. (3) Utilized in assigning

mation. Include Roster S: of squadron teams, cadet participation in high school, intercollegiate sports, athletic questionnaire, physical educa- tion grades, test scores, participation absentee and injury rec-

retired Air Force military personnel who have attended a training course conducted by an ATC activity. Employees of Air Force contractors receiving training at USAF schools.

years and then destroyed by tearing into pieces, mascerating, or burning.

System manager(s) and address:

Director of senior program, Air Force Reserve Officer Training corps Maxwell AFB, AL 36112; and detachment Commander of the appropriate AFROTC detachment.

Notification procedure:

Requests from individuals should be addressed to the detachment Commanders of their particular AFROTC detachment indicating their name and social security number. However, if their request for information involves an investigation for disenrollment, the addressee is AFROTC/SDA, Maxwell AFB, AL 36112, both addresses may be visited by the requester.

Record access procedures:

Requests from individuals should be addressed to the detachment Commanders of their particualr AFROTC detachment,indicating their name and social security number. However, if their request for information involves an investigation for disenrollment, the addressee is AFROTC/SDA, Maxwell AFB, AL 36112, both addresses may be visited by the requester.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Sources of records in the system are educational institutions, secondary and higher learning; government agencies; civilian authorities; financial institutions; previous employers; individual recommendations, interviewing Officers; and civilian medical authorities.

F05002X0J ED A

System name:

05002X0J ED A Community College of the Air Force Student Record System

System location:

The system is centrally administered by the Community College of the Air Force (CCAF), Lackland AFB TX 78236. Computer processing for the system is furnished by the Air Training Command Directorate of Data Automation (HQ ATC/ACD), Randolph AFB TX 78236 Microfiche for the system are created by the USAF Security Service (HQ USAFSS/DADS) Kelly Air Force Base, TX 78243

Categories of individuals covered by the system:

The system may have a record for any person who has a social security number and who has since 1 January 1968 completed a formal course of instruction conducted by one of the Air Force schools identified in the current Community College of the Air Force General Catalog. (Note: Such courses do not include pre-commissioning courses and courses conducted exclusively for officers or their civilian counterparts.) The system also includes records reflecting Air Force courses completed before 1968 and other educational accomplishments for persons who as enlisted members of the Air Force registered in programs of study leading to credentials awarded by the college. (Note: Both here and where appropriate below, the general term Air Force should be understood as including the regular Air Force, the Air Force reserve, and the Air National Guard.)

Categories of records in the system:

The college originates and maintains individual academic records and, where necessary to serve Airmen registered in study programs leading to credentials awarded by the college, maintains a variety of source or substantiating records such as copies of registration applications and document control records derived from such applications; civilian college transcripts; college level examination program score reports; copies of educational records originated by other Air Force and non-Air Force agencies external to the college (such as the Federal Aviation Agency, the United States Armed Forces Institute, and the Defense Activity for Non-traditional Education Support); copies of a variety of Air Force personnel records (such as documents derived from master records maintained by the USAF Military Personnel Center and microfiche records of locator data); and records of credentials awarded to graduates. As necessary to manage the day-to-day operations and to plan development of the record system the college also maintains copies and related records of communications from, to, or regarding persons interested in the college, its educational programs, its student record system, and related matters. Copies of and statistical records derived from individual responses to surveys, questionnaires, and similar instruments authorized by HQ USAF may also be maintained as needed for managerial evaluation and planning by officers of the college.

Authority for maintenance of the system:

44 USC 3101.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Records originated in the system serve the purpose of documenting, in terms of credit awarded or accepted in transfer by the college, individual educational accomplishments which satisfy curricular requirements of study programs leading to credentials offered by the college. Transcripts of records originated in the college are at the written request of persons concerned furnished to any recipient(s) designated in such requests. Such recipients typically include Air Force Education Services Centers, other offices where Air Force personnel are stationed, educational institutions, and potential or current employers. CCAF transcripts and copies of other records originated in the college are typically used to support educational and occupational counselling, planning, and development; admission to other colleges; and related individual affairs. Other disclosures of personal records originated in or maintained by the college may without the knowledge or written consent of persons concerned be made to Air Force officers, enlisted personnel, and civilian employees directly involved in administering or supporting the educational programs offered or records managed by the college; other Air Force officers, enlisted personnel, and civilian employees who provide educational and related services to Air Force personnel; officers and employees of other agencies as may be necessary to comply with proper requests for records under the Freedom of Information Act (5 USC 552, as amended by Public Law 93-502); and to officers and employees of other agencies as may be necessary to overcome extended interruptions in normal computer processing. Similar incidental disclosures of information recorded in the system may be made to employees of Honeywell, Inc., and other civilian contractors who may be engaged by the Air Force to to provide services which directly or indirectly support the record system.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Permanent student records are maintained on and reproduced as necessary from microfiche created by computer processing. Microfiche are maintained in special filing stands and in special three-ring

binders. Computer records are maintained on and as necessary reproduced from magnetic media (tape and disk) which when not in use are filed in special cabinets and racks in a library facility. Paper records are maintained in file folders, card files, and conventional cabinets, and in special binders and cabinets designed for computer listings.

Retrievability:

Computer records are retrievable by a combination of social security number (SSN) and certain letters of last name. Microfiche records are retrievable by SSN exclusively. Paper records are retrievable by either SSN or name. Note as may be necessary to support managerial studies by the college staff, computer records may also be retrieved in groups where such records bear common information.

Safeguards:

Records maintained in the college are normally disclosed only upon written request from the persons whose records are to be disclosed or upon written request from an Air Force officer or employee responsible to provide educational or related services to Air Force personnel. Disclosures to non-Air Force agencies not requested by the individual are made only with consent of an officer of the college and as consistent with the Privacy Act of 1974 and the Freedom of Information Act. Except for disclosures within the college as may be necessary to its operations, requests by telephone and other unwritten means will not be honored unless in the judgment of a responsible member of the college staff the requestor is a member or employee of the Air Force acting on behalf of, or is, the person whose record is requested. Special care is exercised to ensure complete identification of the requestor, the person whose record is to be disclosed, and intended use. Other systematic safeguards to ensure integrity of records include secure storage of successive generations of computer master files, existence and long term retention in other Air Force agencies of records which would be needed to rebuild the entire system in the event of catastrophe, and traditional measures to ensure the security of Air Force facilities. All records in the system are during duty hours attended by responsible Air Force personnel and during non-duty hours stored in locked facilities under constant or periodic surveillance by Air Force security police or comparable civilian guards.

Retention and disposal:

Retained in office files until superseded, obsolete, no longer needed for reference, or on inactivation, then destroyed by tearing into pieces, shredding, pulping, macerating, or burning. Rules for retention of permanent microfiche and corresponding magnetic tape records have not yet been determined. It is anticipated that such records may need be retained for not less than 30 and not more than 50 years beyond the latest entries on each such record. Transitory computer records (such as input transaction records and records on successive generations of master files) are typically retained only so long as they may be useful, which may be as little as 48 hours or as much as 60 days. Active master file records are by their nature evolutionary and are typically retired within 180 days of a person's separation or retirement or five years after the most recent entry on a given record. (The last rule applies to persons who were not enlisted Air Force members when the last entries on their records were made.) Paper records maintained to serve students registered in study programs are retained so long as a registrant remains active in his or her program. Such records are destroyed one year after a registrant completes his or her study program or three years after the most recent communication from an airman whose program has not been completed. Other records are retained only so long as they may serve a useful purpose, which is typically between 30 and 90 days. No rule has yet been established for retaining records which verify awards of credentials by the college, but it is expected that such records will need be archival.

System manager(s) and address:

Deputy Chief of Staff/Personnel, Headquarters United States Air Force. System Manager and President, Community College of the Air Force (CCAF/CC) Lackland AFB, TX 78236.

Notification procedure:

Address inquiries to Chief, Student Records Branch (CCAF/RRR) Lackland AFB, TX 78236. Such inquiries will need include the full name (and former names if appropriate), SSN, and birthdate of the inquirer, and should include a full return address (including zip code). Visits to the college are welcomed, and visitors seeking information about personal records should first visit the Office of the Registrar.

Record access procedures:

Individual can obtain assistance in gaining access from the Systems Manager. and from addresses listed above.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Information obtained from educational institutions, from automated system interfaces. and from source documents submitted to the college by or at the request of individuals concerned, or by other Air Force agencies acting on behalf of individuals concerned.

Authority for maintenance of the system:

10 USC 8012, Secretary of the Air Force: powers and duties; delegation by.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The purpose of the system is to accumulate labor costs for various workloads accomplished within the maintenance activity. Actual labor rates used within the system are obtained (via the Social Security Number) from the Civilian Payroll System and Military Payroll System.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Disk packs for principle storage medium with back-up maintained on magnetic tape.

Retrievability:

Retrieved by Foreman Code, Military/Civilian Code, Resource Control Center.

Safeguards:

All personnel authorized to add, change, or delete records from these files will be issued individually coded badges which are required for submission of transactions. Maintenance activity managers requiring access to update files must request information through the Data Automation Branch. All products containing Privacy Act information bear a notice at the top of each sheet, 'PERSONAL DATA - PRIVACY ACT OF 1974 (PL93-579) FOR OFFICIAL USE ONLY.' Products are controlled by manual distribution to requesting managers.

Retention and disposal:

All Privacy Act information contained in this system is deleted (1) in the case of the Employee Assignment Master File, at the end of the biweekly pay period following termination of an individual's assignment to a maintenance activity, and (2) in the case of files containing loan data, at the end of fifteen months following termination of an employee loan.

System manager(s) and address:

Directorate of ADP Resources Office of DCS/Comptroller, Headquarters, Air Force Logistics Command, Wright-Patterson AFB, OH 45433.

Notification procedure:

Information may be obtained from the Air Logistics Center where an individual is employed: Chief, Cost Accounting Branch, Accounting and Finance Division, Comptroller, at Oklahoma City Air Logistics Center, Tinker AFB, OK 73145; Ogden Air Logistics Center, Hill AFB, UT 84406; Sacramento Air Logistics Center, McClellan AFB, CA 95652; San Antonio Air Logistics Center, Kelly AFB, TX 78241; or Warner Robins Air Logistics Center, Robins AFB, GA 31093.

Record access procedures:

Requests from individuals should be submitted to the maintenance activity at the Air Logistics Center where employed. Written requests should contain the full name, social security number, address, telephone number, and current assignment within the maintenance activity of the requestor, and should be addressed to Director of Maintenance at: Oklahoma City Air Logistics Center, Tinker AFB, OK 73145; Ogden Air Logistics Center, Hill AFB, UT 84406; Sacramento Air Logistics Center, McClellan AFB, CA 95652; San Antonio Air Logistics Center, Kelly AFB, TX 78214; or Warner Robins Air Logistics Center, Robins AFB, GA 31093. Request may also be made by personal contact between requestor and his/her supervisor within the maintenance activity.

Contesting record procedures:

The Air Force's rules for access to records and for contesting contents and appealing initial determinations by individuals concerned may be obtained from the systems manager.

Record source categories:

Information obtained from Civil Service Commission Standard Form 50 accompanying an employee into a maintenance activity, and from the Civilian Payroll System and Military Payroll System.

Systems exempted from certain provisions of the act:

None

F06608 SAC A

System name:

06608 SAC A ICBM Maintenance Standardization and Evaluation Program.

System location:

Headquarters Strategic Air Command (SAC), Eighth and Fifteenth Air Force; all SAC missile wings/divisions; 3901 Strategic Missile Evaluation Squadron. Official mailing addresses are in the Department of Defense directory in the Appendix to the Air Force's systems notice.

Categories of individuals covered by the system:

Intercontinental Ballistics Missile maintenance personnel assigned to Missile Maintenance, Munitions, Communications, and Civil Engineering who have been designated by local maintenance managers as being in the evaluation program.

Categories of records in the system:

Evaluation records on technical proficiency, including manual and automated summaries of task performance. Administrative records of Evaluation Review Panels, including comments on substandard task performance, required corrective action or training, and follow-up actions.

Authority for maintenance of the system:

10 USC 8012, Secretary of the Air Force: powers and duties; delegation by.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

To record individuals maintenance task performance results. This information is used by SAC to determine, rate, and evaluate individual maintenance performance as it contributes to the unit maintenance

10 USC 8012, Secretary of the Air Force: powers and duties; delegation by and Executive Order 9397, 22 November 1943, Number System for Accounts Relating to Individual Persons.

passenger name record is a complete listing of all transportation related administrative actions related to individual passengers.

Authority for maintenance of the system:

Aerospace Medical Division(AMD) Brooks Air Force Base, TX 78235.

Categories of individuals covered by the system:

To record individuals maintenance task performance results. This information is used by SAC to determine, rate, and evaluate individual maintenance performance as it contributes to the unit maintenance effort.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in file folders, card files, computer magnetic tapes, and computer paper print-outs.

Retrievability:

Filed and retrieved by name, team number, team type, date.

Safeguards:

Records are accessed by person(s) in performance of official duties. Records are stored in locked rooms or cabinets. Records are controlled by computer system software.

Retention and disposal:

Retained on file until superseded, obsolete, or no longer needed for reference. Destroyed when individual permanently leaves duties assigned in evaluation program. Current records may be forwarded to gaining unit if assigned to another SAC unit. Computerized evaluation records are forwarded periodically to 3901 Strategic Missile Evaluation Squadron. Destroyed by tearing into pieces, shredding, pulping, burning or macerating.

System manager(s) and address:

Director of Missile Maintenance, Headquarters Strategic Air Command, Offutt Air Force Base, Nebraska 68113. Functional Area Managers in addition to Director of Missile Maintenance are: Director of Facilities, Director of Munitions and Director of Communications-Electronics. Field evaluation and statistical analysis of evaluation results are performed by 3901 Strategic Missile Evaluation Squadron, Vandenberg Air Force Base, California 93437. System Managers at installation level are: Chief of Maintenance in Missile Maintenance, Communications, Munitions and Civil Engineering Squadrons.

Notification procedure:

Requests for individuals should be addressed to the system manager of unit to which assigned. Request information by name, grade, and unit of assignment.

Record access procedures:

Individual can obtain access from the system manager of unit to which assigned.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Information obtained from source documents (such as forms and reports) prepared by or on behalf of the Air Force by boards, committees, panels, auditors, instructors, inspectors, evaluators, and so forth.

Systems exempted from certain provisions of the act:

NONE

F06711 AFSC A

System name:

06711 AFSC A Equipment Maintenance Management Program (EMMP).

System location:

Aeronautical Systems Division, Computer Center, Wright-Patterson AFB, OH.

Categories of individuals covered by the system:

Military and civilian personnel in Aeronautical Systems Division, Air Force Avionics Laboratory, Air Force Flight Dynamics Laboratory, Air Force Aero Propulsion Laboratory, Air Force Materials Laboratory, Air Force Human Resources Laboratory and Aerospace Medical Research Laboratory at Wright-Patterson AFB having custody of high value precision measurement equipment.

Categories of records in the system:

Equipment maintenance management data on equipment signed out to individuals by equipment item number, model number, date checked out, office symbol, calibration due date, user social security number and name.

Authority for maintenance of the system:

10 USC 8012, Secretary of the Air Force: powers and duties; delegation by and Executive Order 9397, 22 November 1943, Number System for Accounts Relating to Individual Persons.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Maintain maintenance and management control of high value equipment including issuance, security and storage, and recalibration.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained on computer magnetic tapes and computer paper printouts.

Retrievability:

Records may be retrieved by custodian name and social security number or by equipment ID number and manufacturer.

Safeguards:

Computer records are maintained under systems software with password control. Printouts are kept in locked cabinets and desks. Offices and buildings are locked after duty hours.

Retention and disposal:

Printouts are kept up to a two weeks maximum and then destroyed by tearing into pieces.

System manager(s) and address:

Air Force Wright Aeronautical Laboratory, Logistics Office, Assistant for Operations, Wright-Patterson AFB, OH 45433.

Notification procedure:

Requests from individuals should be addressed to the system manager. Requesting individuals will be required to supply full name and office symbol or name of immediate supervisor for telephone requests; full name, driver's license or base ID card for personal visits.

Record access procedures:

Individual can obtain assistance in gaining access from the System Manager, telephone area code (513) 255-4522.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Individuals and automated systems interface.

Systems exempted from certain provisions of the act:

NONE

F07601 MAC A

System name:

07601 MAC A Passenger Reservation and Movement System.

System location:

Headquarters Military Airlift Command (MAC), Scott AFB, Illinois; Aerial Ports of Embarkation and Debarkation, military airfields or installations (all Services), certificated air carriers at civil (commercial) airports, and any activity or agency responsible for initiating or receiving a request for the movement of personnel and their baggage; manifesting, tracing and billing actions; and statistical data collection. Official mailing addresses are in the Department of Defense directory or the current United States Government manual. Commercial air carrier addresses are listed in the Official Airlines Guide.

Categories of individuals covered by the system:

Military, civilian, statutory, congressional and others sponsored by the Secretary of Defense or Military Service Secretaries. The Executive Office, Executive departments, independent agencies, Legislative Branch and the Judicial Branch.

Categories of records in the system:

Travel order, transportation authorizations, and passenger name records. Categories of information in the passenger name record include but are not limited to: name, grade, seats required; reservation identification code (RIC) which is assigned by a requesting activity or individual passengers and is the social security number or other unique identifier; origin, destination, requested travel dates, routing indicator (identifies the activity/installation requesting the reservation), cancellation and type standby codes (identifies the reason the passenger did not depart as scheduled); flight number, departure date and reporting time, and other administrative codings as determined by a Service activity or MAC to facilitate the completion of travel to include baggage tracer and billing actions. The

passenger name record is a complete listing of all transportation related administrative actions related to individual passengers.

Authority for maintenance of the system:

10 USC 8012, Secretary of the Air Force: powers and duties; delegation by.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Passenger name records are used to prepare aircraft manifests for passenger identification processing and movement on military aircraft, commercial contract (charter) aircraft, and on seats reserved (blocked) on regularly scheduled commercial aircraft at military and civilian airports. Records in this system are also used to: (a) develop billing data to the user Military Services or other organizations; (b) determine passenger movement trends; (c) forecast future travel requirements; and (d) identify, research, and resolve transportation related problems. In addition, records may also be used as the basis of disciplinary action initiated by the requesting activity; and the conduct of official investigations. Records from the system are routinely disclosed to other Federal agencies and offices provided transportation, and to civilian airlines and airports for transportation services.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in file folders, notebooks/ binders, card files, computer paper printouts, computer magnetic tapes, disks, microfiche or rolled microfilm.

Retrievability:

Records on this system may be retrieved by any of the following means: by name - RIC (SSN) channel, flight number, movement channel, type transaction, type travel, special passenger category, type standby code, passenger cancellation reason code.

Safeguards:

Records are stored in locked cabinets, rooms or buildings. Records are accessed by the custodian and person(s) responsible for servicing the record system in performance of their official duties. Access controlled by the manager and restricted to authorized personnel and, executive software sign on procedures control access to the computer data base.

Retention and disposal:

Transportation authorizations and orders are retained in office files for two years after the annual cut-off, then destroyed. Other records in the system are retained in office files until superseded, obsolete, no longer needed for reference, or on inactivation, then destroyed. These records are destroyed by one of the following means: by tearing into pieces, shredding, pulping, macerating, burning, or degaussing in the case of magnetic computer media.

System manager(s) and address:

Director of Terminal Operations, Deputy Chief of Staff, Air Transportation, Headquarters Military Airlift Command, Scott AFB, Illinois 62225.

Notification procedure:

Requests from individuals should be addressed to the Systems Manager. Full name, reservation identification code, and movement channel are required for inquiries.

Record access procedures:

Individuals can obtain assistance in gaining access from the Systems Manager. Mailing addresses are in the Department of Defense directory in the appendix to the Air Force's systems notice.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Information obtained from military transportation and personnel activities, individuals requesting air travel or from other agencies designated to arrange air passenger reservations.

Systems exempted from certain provisions of the act:

NONE

F08003 0HCNBCA

System name:

08003 0HCNBCA Aeromedical Research Data.

System location:

Aerospace Medical Division(AMD) Brooks Air Force Base, TX 78235.

Categories of individuals covered by the system:

Personnel receiving medical evaluations from Department of Defense medical facilities. Participants in epidemiologic studies sponsored by agencies of the Department of Defense, Federal Aviation Administration, Veterans Administration, The National Institute of Health, National Research Council, and Occupational Safety and Health Administration.

Categories of records in the system:

Medical evaluations, Demographic and mortality data.

Authority for maintenance of the system:

10 US Code 8012.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Individually identifiable records are used by medical authorities and consultants of the Department of Defense and Federal Aviation Administration to determine that individual's fitness for duty. Data on foreign personnel are used by the corresponding authority in that individuals country to determine his fitness for duty. An individual's record is used by medical personnel to deliver medical care to that patient. Aeromedical research data are used by scientists working with agencies of the Department of Defense, Federal Aviation Administration, Veterans Administration, The National Institute of Health, National Research Council, and Occupational Safety and Health Administration to determine medical criteria for duty, and to develop methods to prevent disease and disability.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in microfilm jackets, in paper files, on analog and digital magnetic tape, and on disks.

Retrievability:

Filed by Name, by Social Security Number (SSAN), by other identification numbers and patient characteristics. by Social Security Number "SSN",

Safeguards:

Computerized patient records retrievablle from remote terminals are protected from unauthorized access or alteration by a data management system which requires a password for allowing access to the authorized subset of data. When appropriate for research purposes, the data base management system permits scientists to examinpatient records without revealing the unique patient identifiers. All of the data is accessed only by the custodian of the record system, and released only to medical personnel and scientists who are properly screened and cleared for need to know.

Retention and disposal:

Destroy paper and microfilm files when no longer needed or after 25 years by tearing, shredding, pulping, macerating or burning. Magnetically stored date is destroyed by erasure.

System manager(s) and address:

Commander Aerospace Medical Division, Brooks Air Force Base, TX 78235.

Notification procedure:

Requests from individuals should be addressed to the Systems Manager.

Record access procedures:

Individual can obtain assistance in gaining access from the Systems Manager.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Information from military personnel records.

Systems exempted from certain provisions of the act:

NONE

F10010 AFCS A

Appoint MARS officials and Base MARS Directors.

Systems exempted from certain provisions of the act:

NONE

F11001 JAG A

System name:

11001 JAG A Litigation Records (Except Patents).

System location:

At Headquarters United States Air Force, Washington, DC 20330. At Headquarters of Major Commands and all levels down to and including Air Force installations worldwide. Official mailing addresses are in the Department of Defense directory in the appendix to the Air Force's systems notice.

Categories of individuals covered by the system:

All individuals who have brought suit against, or been involved in litigation with, the United States or its officers or employees concerning matters related to the Department of the Air Force; or persons against whom litigation has been filed under 28 USC 134b, 46 USC 741-52, 4781-90, 31 USC 71, 951-3, 42 USC 2651-3.

Categories of records in the system:

Pleadings, motions, interrogatories, orders, letters, messages, forms, reports, surveys, contracts, bids, photographs, legal opinions, answers, complaints, memoranda; personnel, finance, medical, business records; audits, summons, English translations of foreign documents, other evidentiary material, court orders and rulings; other documents including but not limited to: Environmental Impact Statements, contract determinations, witness statements, law enforcement agency investigative reports, administrative reports, engineering and technical reports and surveys; some records may be security classified.

Authority for maintenance of the system:

10 USC 8012, Secretary of the Air Force: powers and duties; delegation by. Routine uses of records maintained in the delegation by.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Used by USAF personnel tasked with supervisory and reporting responsibilities in connection with civil litigation; to enable the United States and its officers, employees, members, and parties to the litigation upon which suits at law can be prosecuted or defended in civil domestic or foreign litigation; used by Department of Justice and its officers and employees in the actual litigation of cases involving matters concerning the Department of the Air Force and in some instances the Department of Defense; 9to provide to Congress information upon which a reply to 9Congressional inquiries can be made; used by the Veteran's Administration and its officers and employees to adjudicate claims; to obtain from the Surgeon General and the military 9and civilian medical consultants thereto medical opinions 9upon which litigation decisions can be made by The Judge Advocate General and the Department of Justice; to provide information to the Court of Claims on legislative referral of private relief bills; used by law enforcement agencies, such as the Federal Bureau of Investigation, and their officers and employees in the conduct of background investigations and criminal investigations; used by the Air Force Audit Agency in conducting audits; used by the Board for 9the Correct of Military Records; used by the Air Force Accounting and Finance Center and its officers and employees 9for the adjudication of claims; when the Department of 9Defense or a military department is involved, civil liti9gation files are provided to any agency of the Department of Defense having a need for such files; provide litigation files to the legal staffs of the armed forces for the purpose 9of training of legal, paralegal and administrative personnel.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in file folders.

Retrievability:

Filed by name of litigant and year of litigation.

Safeguards:

Records are accessed by authorized personnel in the course of their duties. Records are stored in locked containers or rooms and controlled by personnel screening.

Retention and disposal:

Files at the Claims Tort Litigation Division, Office of the Judge Advocate General, HQ USAF, are retired permanently at Washington National Records center, Washington, DC 2040, other levels destroy after two years upon completion of agency action; destroy after two years if files under 42 USC 2651-3. Destroy by tearing into pieces, shredding, macerating, pulping, or burning. Other records are retained in office files for two years after annual cut-off, then retired to Washington National Records Center, Washington, DC 2040, for permanent retention.

System manager(s) and address:

The Judge Advocate General, Headquarters United States Air Force, Washington DC 20330. Subsystems Managers are the Staff Judge Advocate at concerned subordinate command or installation for foreign civil litigation records.

Notification procedure:

Requests from individuals should be addressed to the Systems Manager or Subsystems Manager as appropriate.

Record access procedures:

Individual can obtain assistance in gaining access from the Systems Manager or Subsystems Manager as appropriate.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Court records, correspondence initiated by parties to litigation, reports prepared by or on behalf of the Air Force, reports of Federal, state, local or foreign government agencies and information obtained from the individual.

Systems exempted from certain provisions of the act:

F12001 DPX B

System name:

12001 DPX B Investigation/Complaint Files

System location:

At Headquarters United States Air Force and at headquarters of major commands and all levels down to and including Air Force Installations. Official mailing addresses are in the Department of Defense directory in the appendix to the Air Force's systems notice.

Categories of individuals covered by the system:

Any individual specified in a formal complaint action.

Categories of records in the system:

The records maintained provide circumstances of a Service member's allegation of discriminatory treatment and the results of any inquiry/investigation related to the allegation. Such complaints may originate as Congressional/White House inquiries, Inspector General complaints, letters to the Air Force or Office of the Secretary of Defense (OSD) authorities, or complaints presented through equal opportunity channels. Records are manual.

Authority for maintenance of the system:

10 USC 8012 and 8032.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Routine use of investigation/complaint records is to provide information to commanders or complaints in the resolution of complainant's grievances. Principal purpose of the information is to document the circumstances and resolution of a particular allegation handled by Equal Opportunity personnel. All or a portion of the information contained in the files may be disclosed, upon request, to alleged discriminators.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in visible file binders/cabinets.

Retrievability:

Filed by name, by category.

Safeguards:

Records are accessed by custodian of the record system and person(s) responsible for servicing the record system in performance of their official duties who are properly screened and cleared for need-to-know. Records are stored in safes, locked cabinets or rooms.

Retention and disposal:

Retained for two years after end of year in which the case was closed, then destroyed by tearing into pieces, shredding, pulping, macerating, or burning.

System manager(s) and address:

Chief, Equal Opportunity, and Treatment Branch, Social Actions Division, Deputy Chief of Staff Personnel, HQ USAF; and Chief of Social Actions at major command headquarters down to and including Air Force installations.

Notification procedure:

Requests from individuals should be addressed to Systems Manager at the appropriate level. Individuals should identify full name, military status, dates of service, unit of last or present assignment, Social Security Number (SSN), and type of record involved. For personal visits, the requester may present proof of identity to include full name from driver's license or military identification card.

Record access procedures:

Individual can obtain assistance in gaining access from the Systems Manager. Requests for information regarding individual persons should identify full name, military status, dates of service, unit of last or present assignment, Social Security Number (SSN), and type of record involved. For personal visits, the requester may present proof of identity to include full name from driver's license or military identification card.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Records are manually compiled from complaints filed, Congressional correspondence, OSD correspondence and chief of Staff, United States Air Force correspondence.

Systems exempted from certain provisions of the act:

F16001 AFA A

System name:

16001 AFA A Cadet Hospital/Clinic Records.

System location:

At USAF Academy CO 80840.

Categories of individuals covered by the system:

AF Academy Cadets.

Categories of records in the system:

Daily roster of cadets hospitalized and report of cadet visits to the cadet clinic.

Authority for maintenance of the system:

10 USC 8012, Secretary of the Air Force: powers and duties; delegation by.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

(1) Information collected for purpose of notifying concerned individuals of status of cadets hospitalized. Users include: Superintendent, Commandant of Cadets and Hospital Commander. Information used to provide Superintendent daily report of number and status of cadets hospitalized; provide Hospital Commander and staff daily report of status of cadets hospitalized; provide Commandant and staff daily report of number and status of cadets hospitalized; provide information to Air Officer Commanding so that he may notify parents as required when their child is hospitalized more than three days; concerned personnel can note trends in hospitalization in terms of numbers of cadets hospitalized, length of hospital stay, and nature of medical problems being treated. (2) Report of visits to cadet clinics; record the time a cadet enters the clinic, what his complaint is and explanation of excusals and time he exited the clinic. Distribution of this info is made to Cadet Safety, Athletics and individual concerned. Cadet Safety uses it to monitor cadet activity for ground safety program. Athletics uses to monitor excusals from physical education and to evaluate injury rates. The individual uses it to justify time away from classes.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in file folders.

Retrievability:

Filed by name.

Safeguards:

(1) Records are accessed by the custodian, person(s) responsible for servicing the record system, and authorized personnel who are properly screened and have a need-to-know. Records are stored in locked cabinets or rooms. (2) Clinic copy is under the direct control of Non-Commissioned Office in Charge (NCOIC) of Administrative Services. Distribution is made only to acknowledged representatives of Cadet Wing Safety and Athletics.

Retention and disposal:

Retained in office files for one year after annual cut-off then destroyed by tearing into pieces, shredding, pulping, macerating, or burning.

System manager(s) and address:

Commander, USAF Academy Hospital, USAF Academy, CO 80840.

Notification procedure:

Requests should be addressed to the Registrar, USAF Academy Hospital Cadet Liaison, and should include full name, and date of hospital admission.

Record access procedures:

Individual can obtain assistance in gaining access from the System Manager.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

F16001 SGPC A

System name:

16001 SGPC A Medical Professional Staffing Records

System location:

At Air Force medical centers, hospitals, and clinics. All health facilities where graduate health education programs are conducted.

Categories of individuals covered by the system:

Practitioners, who are, or have been, members of the USAF Medical Service or Civil Service Employees (including civilian consultants who engage in direct patient care) and who are assigned to, employed by, or practice in the Air Force medical facility for the purpose of providing health services for eligible beneficiaries; United States Air Force Medical Service personnel pursuing graduate health education programs.

Categories of records in the system:

(1) Credential review files: Contains curriculum vitae, training reports, journals of patients managed, summaries of ambulatory experience, letters of evaluation, summaries of special activities or other information furnished or solicited in order to fully evaluate the professional qualifications of individuals. (2) Health education records: applications for training, training reports, Faculty Board reports, photograph or negative, and personnel documents related to training.

Authority for maintenance of the system:

10 USC 8012.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The information contained in credential review files are used to award inpatient and ambulatory clinical privileges to all categories of health practitioners. They may also be used as background data to respond to applications submitted by individual, admission to professional medical societies, employment, for medical privileges at civilian institutions. Health education records are used to permit evaluation of individuals in training, by program directors, in managing the individual in training; by the record maintenance personnel, to document changes to the individual's personnel record maintained by the servicing Consolidated Base Personnel Office (CBPO).

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in file folders. Maintained in visible file binders/cabinets.

Retrievability:

Filed by Name.

Safeguards:

Records are accessed by custodian of the record system. Records are accessed by person(s) responsible for servicing the record system in performance of their official duties. By commanders of USAF medical centers hospitals and clinics (credential review files); by program directors, trainees and personnel managers with the need to know (health education records).

Retention and disposal:

(1) credential review files are retained in the office files of the medical facility the practitioner is assigned or employed. Following separation, resignation, or retirement, the files are retained at the location of the last duty assignment for a period of 3 years and then are destroyed. (2) Health education files are retained by the director of health education until training is completed, files are then kept by the health facility for 30 years and then destroyed by tearing into pieces, shredding, pulping, macerating, or burning; if facility is deactivated, the records are retired to the Washington National Records Center, Washington, DC 20409 to be retained until the 30-year period has expired at which time they will be destroyed.

System manager(s) and address:

For credential review files: The Surgeon General, Headquarters, United States Air Force; Commanders of medical centers, hospitals, clinics; Director, Washington National Records Center, Washington, DC 20409. For health education records, individuals should give full name, military status, social security number, when they entered training and completed training, and what corps within the medical service they are a member. Individuals may visit either the health

facility main- taining the records or the Office of the Surgeon, Air Force Military Personnel Center, Randolph Air Force Base, Texas to learn if the record system contains their records. When visiting either of these locations, the individual must provide a valid drivers license or equivalent identification containing a photograph to establish identity.

Notification procedure:

Requests from individuals should be addressed to the Systems Manager.

Record access procedures:

For credential review files, individual may obtain assistance in gaining access from the Systems Manager. For health education records, individual may obtain assistance by writing or presenting themselves in person to the health facility where the records are maintained. Official mailing addresses are in the Depart- ment of the Air Force Directory in the appendix to the Department of the Air Force system notices.

Coutesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Credential review files: Basic information submitted by the practitioner. Additional information may be solicited from other sources in order to permit the credentials committee to best judge the capabilities of the practitioner. Health education records: Previous employer, educational institutions, master personnel record, information provided by the individual concerned.

F17708 0EACYVD

System name:

17708 0EACYVD Indebtedness and claims

System location:

Air Force Accounting and Finance Center, Lowry AFB, Denver, CO 80279. Denver Federal Archives and Record Center Bldg 48 Denver Federal Center, Denver, Colorado 80225.

Categories of individuals covered by the system:

Active duty military personnel. Air Force civilian employees. Former Air Force civilian employees. Air Force Reserve and Air National Guard personnel. Retired Air Force military personnel. Air Force Academy cadets. Dependents of military personnel. Exchange Officers. Foreign nationals.

Categories of records in the system:

Records of current and former military members and civilian employees pay accounts showing entitlements, deductions, payments made, and any indebtedness resulting from deductions and payments exceeding entitlements. These records include, but are not limited to, individual military pay records, substantiating documents such as military pay orders, pay adjustment authorizations, military master pay account print out from Joint Uniform Military Pay System (JUMPS), records of travel payments, financial record data folders, miscellaneous vouchers, personal financial records, credit reports, promissory notes, individual financial statements, and correspondence. Applications for waiver of erroneous payments or for remission of indebtedness with supporting documents, including but not limited to, statements of financial status (personal income and expenses), statements of commanders, statements of Accounting and Finance Officers, correspondence with members and employees. Claims of individuals requesting additional payments for services rendered with supporting documents including, but not limited to, time and attendance reports, leave and earnings statements, travel orders, travel vouchers, statements of non-availability of quarters and mess, paid receipts, and correspondence with members and employees. Delinquent accounts receivable from base Accounting and Finance Officers including, but not limited to, returned checks, medical services billings, collection records, and summaries of the Air Force Office of Special Investigation and Federal Bureau of Investigation reports. Reports from probate courts regarding estates of deceased debtors. Reports from bankruptcy courts regarding claims of the US against debtors.

Authority for maintenance of the system:

31 USC 951-953; 10 USC 2774; 10 USC 9837 (d); 5 USC 5584; 12 USC 1715m.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The information is collected to determine eligibility for waiver of erroneous payments and remission of indebtedness or additional payments for services rendered. Also, information is required to attempt collection of all claims of the United States for money or property arising out of the activities of the United States Air Force. Claims of the United States may be compromised, terminated, or suspended when warranted by information collected. The records are used by, but not limited to, Air Force Accounting and Finance Center (AFAFC) Director of Accounting and Finance and Deputy Director of Accounting and Finance (HQ USAF/ACF), Assistant Secretary of the Air Force for Manpower and Reserve Personnel (SAF/MR), United States Air Force Comptroller (HQ USAF/AC), and the Comptroller General. AFAFC/CC uses the information to make final determinations or recommendations to SAF/MR, HQ USAF/AC, or the Comptroller General; to furnish legal advice to operating officials; to establish debts and respond to letters received from individuals. After action is completed, files are closed and filed in individual records. SAF/MR, HQ USAF/AC and the Comptroller General use the files for making final determinations. Disclosures made pursuant to the Freedom of Information Act. Disclosures to the Department of justice for criminal prosecution, civil litigation or investigation.

37 USC 101 et seq.; 10 USC 265, 8033, 8496; 10 USC 9837 (d); 32 USC 708; E.O. 9397.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The purposes of these records are to accurately and timely pay members of the Air Force, provide members periodic comprehensive statements of their accounts, and to respond to inquiries concerning their accounts at any time. US Air Force components such as Headquarters, Air Force Accounting and Finance Center, Major Commands and Air Force installations use these records to determine pay due military members, to verify pay affecting information, to collect overpayments made to military members, to provide accrual accounting for each covered entitlement of military pay and allowances, and to provide fund manager reports, internal manager reports and external reports. Other users include but are not limited to other components of Department of Defense such as Army and Navy which may pay Air Force members and initiate claims; other federal agencies such as the Internal Revenue Service for tax information on members, Social Security Administration for information regarding Federal Insurance Contribution Act tax deducted from members, Veterans Administration for information regarding premiums on serviceman's group life insurance, the General Accounting Office for audits, opinions, and fact-finding information, state and local governments for tax and welfare information, US and state courts for civil litigation and criminal prosecution purposes, members of Congress for complaints from constituents and for inquiries not generated by constituents, insurance companies for allotments made to them by military members, financial institutions for deposits (checks-to-banks) and/or payments (including release of information to computer service centers and other accounting services when such centers and services act as authorized agents of financial ospecified by the member to receive monies due him). The American Red Cross and the Air Force Aid Society. Records may be disclosed to law enforcement agencies such as but not limited to office of Special Investigations, United States Air Force; Federal Bureau of Investigation; city and state authorities for violations of law, for investigation and possible criminal prosecution, civil court action or regulatory processes. Disclosures made pursuant to the Freedom of Information Act. Disclosures to the Department of Justice for criminal prosecution, civil litigation, or for investigatory purposes. American Red Cross uses this information to determine needs of a member or his dependents in emergency situations. The Air Force Aid Society uses this information to determine needs of a member or his dependents in emergency situations and for verification of loan applications.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in file folders/ note books/binders/bisible file binders/ cabinets/card files, computer magnetic tapes and maintained on computer paper printouts, and on roll mircrofilm and microfiche.

Retrievability:

Filed by Name. Social Security Number (SSN), or Military Service Number

Safeguards:

Records are accessed by custodian of the record system and by person(s) responsible for servicing the record system in performance of their official duties who are properly screened and cleared for need-to-know. Records are stored in security file containers/cabinets/ locked cabinets or rooms, protected by guards, and controlled by personnel screening, visitor registers and computer system software.

Retention and disposal:

local retention varies from 3 to 6 years. At expiration of local retention, records are either destroyed by tearing, shredding, pulping, macerating or burning or transferred by the Air Force Accounting and Finance Center to the Denver Federal Archives and Records Center for varying retention periods up to 56 years. Destroyed by shredding. Back-up records for emergency reconstruction in the event of primary record destruction are retained by the Federal Records Center Annex GSA at Neosho MO. Destruction is by shredding.

System manager(s) and address:

Comptroller of the Air Force, Headquarters United States Air Force.

Notification procedure:

Information as to whether the record system contains information on an individual may be obtained from AFAFC/DAD, Lowry AFB, Denver, CO, 80279, telephone (303) 320-7553. Information pertaining to geographically dispersed elements of the record system may be obtained from Documentation Managers at the applicable Air Force component listed in the Department of Defense Directory in the appendix to the Air Force system notice. Requester should be able to provide sufficient proof of identity, such as name, social security account number, military status, duty status or place of employment or other information verifiable from the record itself.

Record access procedures:

Request from individuals should be addressed to AFAFC/DAD, Lowry AFB, Denver, CO, 80279, telephone (303) 320-7553. Requests pertaining to geographically dispersed elements of the record system may be obtained from Documentation Managers at the applicable Air Force component listed in the Department of Defense Directory in the appendix to the Air Force system notice. Requester should be able to provide sufficient proof of identity, such as name, social security account number, military status, duty status or place of employment or other information verifiable from the record itself.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Information obtained from financial institutions, automated system interfaces; a state or local government; source documents (such as reports) prepared on behalf of the Air Force by boards, committees, panels, auditors, and so forth, military pay information originating from telephone inquiries, telegraph messages and correspondence; information from federal agencies and other DoD components; and information from Air Force installations, Major Commands and USAF Headquarters.

ments, deductions, collections and allotments. Supporting documents include but are not limited to the following Retirement Orders, retirement pay orders, gross pay statements, statements of employment, employees: withholding exemption certificates, records of emergency data, retired pay allotment authorizations, retirees: United States savings bond authorizations, Air Reserve Forces retirement credit summaries, divorce decrees, computation of retired pay, death certificates, claims for unpaid pay and allowances of deceased members, marriage certificates, adoption papers, guardian papers, birth certificates, election certificates for retired servicemans: family protection plan (RSFPP), election certificates for survivor benefit plan (SBP), documents pertaining to status of childrens: schooling, and income tax withholding statements. Also included are listings of bonds, allotments, retired pay and annuitant pay checks, debts owed the government and direct remittances made by retirees for the costs of the RSFPP and SBP plans, records from dependents of retired military personnel, correspondence related to retirement entitlements such as reports from hospitals and medical review boards, print-outs of members: active duty military pay accounts from the joint uniform military pay system.

Authority for maintenance of the system:

10 USC Chapters 61, 63, 65, 67, 69, 71, 73 and 79; 5 USC Chapter 83. 37 USC 101 et. Seq.; 38 USC 410

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

the purpose of these records is to accurately and timely pay the retired members of the Air Force and their survivors; provide members periodic statements of pay; document and account for all disbursements and collections; and to respond to inquiries concerning the retiree and annuitant accounts. Records are used to establish, maintain and close retiree and annuitant pay accounts and prepare related reports; compute retired and annuitant pay and initiate actions for monthly pay and allotment transactions; casualty cases are established upon the death of a member and arrears of pay are computed and disbursed to survivors; upon the death of a retired member, RSFPP and/or SBP accounts are established and survival annuities are paid. Users of system record data include Headquarters US Air Force and the USAF Military Personnel Center for routine and special reports which are generally statistical in nature, but occasionally include lists of retirees with related pay data. Other users include, but are not limited to, any component of the Department of Defense for inquiries, audit and document utilization; other federal agencies such as the Internal Revenue Service for normal wage and tax withholding reporting, accounting, tax audits and levies; Comptroller General and the General Accounting Office for legal interpretations and audits. Disclosures are made to the Department of Justice for criminal prosecution, civil litigation or investigation; disclosures are made to the Veteran's Administration regarding establishments, changes and discontinuances of VA compensation to retirees and annuitants; disclosures are made to the Social Security Administration regarding wages and Federal Insurance Contributions Act Tax withholding; information is furnished the American Red Cross and the Air Force Aid Society for their use in assisting retirees and their survivors; disclosures are made pursuant to the Freedom of Information Act. Information is supplied to state and local governments for use as follow-up data in welfare cases and for tax purposes. Also, there is an automated interface with the joint uniform military pay system for data used to compute annuitant payments; checks are sent to banks for credit to the retirees and annuitants accounts including payments made under the Electronics Fund Transfer System (EFTS) transmitted through the Federal Reserve System; and allotments are mailed to other financial institutions for uses such as insurance premiums and loan repayments. Information is also supplied to the Civil Service Commission when a retiree waives his military retired pay in order to use his military service for computing his Civil Service Retirement Annuity. Records are also used for extraction or compilation of statistical data and reports for management studies and statistical analyses for use internally or externally as required by Department of Defense or by other Government agencies. Information is supplied to the courts regarding retiree pay in garnishment cases. Disclosures are also made to attorneys, law firms, and other parties acting as executors or administrators of retirees estates and information is provided to trustees of mentally incompetent members and guardians of survivors (children).

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in file folders/note books/binders/visible file binders/cabinets/card files, computer magnetic tapes and paper printouts, and on roll microfilm and micorfiche.

Retrievability:

Filed by Name, Social Security Number (SSN) or Military Service Number.

Safeguards:

Records are accessed by custodian of the record system and by person(s) responsible for servicing the record system in performance of their official duties who are properly screened and cleared for need-to-know. Records are stored in security file containers/cabinets/vaults/ locked cabinets or rooms, protected by guards, and controlled by personnel screening, visitor registers and computer system software.

Retention and disposal:

the system contains differing types of records subject to varied periods of retention up to 56 years. Final destruction of records is by shredding. Records are maintained in the retired pay division office while active, and then retired to the Denver Federal Archives and Records Center. Duplicate records are maintained at the records center annex at Neosho, Missouri for storage. Destruction is accomplished by shredding or burning.

System manager(s) and address:

Comptroller of the Air Force, Headquarters United States Air Force. Director of Accounting and Finance United States Air Force Washington DC 20330 (USAF). Assistant Deputy Chief of Staff Personnel for Military Personnel, Randolph Air Force Base, TX 78148 for Survivor Benefit Plans Briefing records and spouse notification letters.

Notification procedure:

Information as to whether the record system contains information on an individual may be obtained from AFAFC/DAD, Lowry AFB, Denver, CO 80279, telephone (303) 320-7553. The requester should be able to provide sufficient proof of identity, such as name, social security number, duty station or place of employment, military status, military grade or other information verifiable from the record itself. For Survivor Benefits Plans Briefing records and spouse notification data, contact the Systems Manager specified in the preceding category or Personal Affairs officials at the servicing Air Force installation. Official mailing addresses are in the Department of Defense directory in the appendix to the Air Force's systems notices.

Record access procedures:

Requests from individuals should be addressed to AFAFC/DAD, Lowry AFB, Denver, CO 80279, telephone (303) 320-7553. The requester should be able to provide sufficient proof of identity, such as name, social security number, duty station or place of employment, military status, military grade or other information verifiable from the record itself.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Information obtained from previous employers, financial, educational, and medical institutions, automated system interfaces, a state or local government, source documents (such as reports) prepared on behalf of the Air Force by boards, committees, panels, auditors, and so forth. Also record system sources of information include but are not limited to, the following members: survivors, trustees of mentally incompetent members, guardians of survivors (children), private law firms which are executors of estates in casualty cases, the Military Personnel Center at Randolph Air Force Base, Texas, and other government agencies such as the Veterans Administration and the Social Security Administration. Information also obtained from the individual.

F20503 DAI A

System name:

20503 DAI A Personnel Security Case Files.

System location:

Personnel Security Group, Directorate of Administration, Headquarters US Air Force, Washington, DC 20330. Decentralized segments at the Washington National Records Center.

Categories of individuals covered by the system:

Air Force civilian employees and applicants, and Air Force military members and prospective members, including Air Force Reserve and Air National Guard, whose personnel security investigations contain unfavorable information, who were previously processed or adjudicated under the Air Force Military or Civilian Security Programs, or who are assigned or nominated to offices of the Secretary of the Air Force, the Air Staff or the support agencies and offices under the security clearance authority of the Personnel Security Group.

Categories of records in the system:

Files may include (1) requests for clearance, investigation, (2) determinations of eligibility for assignment to sensitive positions, (3) medical records checks and evaluations, (4) personnel records information, (5) personnel security questionnaires, (6) correspondence between the group and the individual, office of assignment, commanders, medical facilities and installations, personnel offices, investigative agencies, Air Staff offices, or offices of the Secretary of the Air Force, (7) clearance records, and (8) summaries, evaluations, recommendations and records of adjudication.

Authority for maintenance of the system:

5 USC 7531, Definitions; 7532, suspension and removal; 7533, Effect on other statutes; 10 USC 8012, Secretary of the Air Force: powers and duties; delegation by; Executive Order 10450, Security requirements for government employment. Routine uses of records maintained in the system, including

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Files are established to evaluate the security acceptability of Air Force military and civilian personnel, applicants, enlistees and nominees for appointment, assignment or retention in sensitive positions with access to classified defense information or to restricted areas and locations. Files are used to record clearance adjudicative actions, eligibility determinations and investigative data. Investigative case file information may be reviewed by Air Force installation commanders, supervisors, personnel officers, medical, security, and investigative personnel, personnel of Air Staff offices and offices of the Secretary of the Air Force. Case files and cards are also used to answer inquiries from other Air Force offices and agencies, and from investigative, security and personnel representatives of other Federal agencies concerning the clearance status of individuals. Case records are maintained to prepare statistical accounting and to measure the effectiveness of the adjudicative programs and procedures.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records and microfiche maintained in file folders, card files, visible file binders/cabinets and notebooks/binders.

Retrievability:

Filed alphabetically by name.

Safeguards:

Records are stored in vaults, safes and security file containers/cabinets. All records are stored, processed, transmitted and protected as the equivalent of classified information. Records are accessed by the custodian of the records system, by persons responsible for servicing the system in the performance of their official duties and by authorized personnel who are properly screened and cleared for need-to-know.

Retention and disposal:

Clearance records are retained in the office files for one year after annual cut-off then are destroyed by tearing into pieces, shredding, pulping or burning. Adjudication records are retained in office files for two years after annual cut-off, then retired to the Washington National Records Center, Washington, DC 20409. Records of personnel assigned to Air Staff/OSAF and support functions are maintained in office files until reassignment or separation. Inactive files of military personnel are destroyed after two years. Inactive files of civilian personnel are transferred to the gaining agency, or are retained for two years as the Civilian Security Documents Folder.

System manager(s) and address:

Chief, Personnel Security Group, Directorate of Administration, Headquarters US Air Force, Washington, DC 20330.

Notification procedure:

Requests from individuals should be addressed to the System Manager, and should contain the full name, including any former names, grade, date of birth and social security number.

Record access procedures:

Individuals can obtain assistance in gaining access from the System Manager.

Contesting record procedures:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

Record source categories:

Information is received from investigative reports from federal investigative agencies, personnel and medical records, board reports, correspondence from offices and organizations of assignment, and from commanders, supervisors, witnesses and individuals, from security, and investigative personnel and from Air Staff offices, offices of the Secretary of the Air Force, and other offices of the Executive and legislative branches. System exempted from Executive and legislative branches.

Systems exempted from certain provisions of the act:

Parts of this system may be exempt under 5 USC 552a(j) or (k), as applicable. For additional information, contact the Systems Manager.

F20503 DAI C

System name:

20503 DAI C Presidential Support Files.

System location:

Primary System at the Personnel Security Group, Directorate of Administration, Headquarters US Air Force, Washington, DC 20330. Decentralized segments are located at security police offices for major command headquarters, and at installations and units having a Presidential Support mission and those units from which personnel are nominated or assigned to Presidential Support duties.

Categories of individuals covered by the system:

Those Air Force military and civilian personnel who are nominated or assigned to authorized designated positions involving Presidential Support duties on either a full or part-time basis.

Categories of records in the system:

Nomination Files include reports of investigation by the Defense Investigative Service and by other Federal investigative agencies; correspondence between the Personnel Security Group and units, installations and major commands, investigative agencies, security offices, air staff offices and offices of the Secretary of the Air Force, the office of the Military Assistant to the Special Assistant to the Secretary and Deputy Secretary of Defense, the Office of the Director, White House Military Office, medical evaluations, statements by nominees, summaries and evaluations of investigative information. Assignment Record Files include letters of notification of selection and quarterly rosters of all assigned personnel listed alphabetically and by unit, by major command.

Authority for maintenance of the system:

10 USC 8012, 9Secretary of the Air Force: powers and duties; delegation by. Routine uses of records maintained in the system, including categories of users and the duties; delegation by.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Nomination files are collected to evaluate the background, character, suitability and qualifications of nominees being considered for selection to positions requiring regular or frequent contact with the President or access to Presidential facilities or modes of transportation. Files are reviewed and evaluated by staff members at each level in the selection process, by medical facility staff members, by the Personnel Security Group, and other appropriate Air Staff offices, by the Office of the Administrative Assistant to the Secretary of the Air Force, and other appropriate offices of the Secretary of the Air Force, by the Office of the Military Assistant to the Special Assistant to the Secretary and Deputy Secretary of Defense and the Office of the Director, White House Military Office. Assignment Record Files are originated to locate, identify, control, manage, and administer individuals selected for assignment to Presidential Support duties, to initiate assignment actions after final selection, to notify medical facilities, and to prepare the quarterly listing of individuals assigned to the program for submission to the Office of the Military Assistant to the Special Assistant to the Secretary and Deputy Secretary of Defense, the Office of the Director, White House Military Office, to major commands, and units and Security Police offices having a Presidential Support mission. Assignment Record Files at echelons below the Personnel Security Group are merely duplicate copies of the file copy. File copies are retained at the Personnel Security Group to permit record access and to record the accountability of disclosures of the Nomination Files.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records maintained in file folders and on computer paper

within past five years except Air Force personnel assigned to Central Intelligence Agency, Office of the Secretary of Defense/Defense Agencies, Office of the Joint Chiefs of Staff, and the National Security Agency.

gon working areas or HQ United States Air Force Security Service, Kelly Air Force Base, should contact the Executive Order 10450.

Record access procedures:

F26501XHC A

System name:

26501XHC A Records on Baptisms, Marriages and Funerals by Air

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records maintained in file folders and on computer paper printouts.

Retrievability:

Filed by name.

Safeguards:

Records are accessed by custodian of the record system, by person responsible for servicing the record system in performance of their official duties, and by authorized personnel who are properly screened and cleared for need-to-know. Records are stored in security file containers/cabinets, in safes and vaults.

Retention and disposal:

Upon completion of final favorable determination of selection, Nomination Files are destroyed by tearing into pieces, shredding, pulping, or burning and are replaced by Assignment Record Files. Assignment Record Files for individuals are retained during the period of assignment or for five years, whichever is longer, as the disclosure accountability record, then are destroyed by 9tearing into pieces, shredding, pulping, or burning. Assignment Record Files in quarterly roster listing form are destroyed when superseded by the next quarterly roster by tearing into pieces, shredding, pulping, or burning. Nomination Files for personnel not selected are retained in the office of nonselection or at the Personnel Security Group, for one year after the date of nonselection, at which time they are destroyed by tearing into pieces, shredding, pulping, or burning.

System manager(s) and address:

Chief, Personnel Security Group, Directorate of Administration, Headquarters US Air Force, Washington, DC 20330.

Notification procedure:

DEFENSE NUCLEAR AGENCY

HDNA 609-02

System name:

609-02 Personnel Radiation Exposure Records

System location:

Decentralized system. Primary location: Radiological Safety Department, Bldg 42, Rooms 1420 and 1422, Armed Forces Radiobiology Research Institute (AFRRI), Defense Nuclear Agency, Bethesda, Maryland, 20014, on the grounds of the National Naval Medical Center. Other locations are rooms 3113 and 2147 of the AFRRI; and room 1418, Bldg 364, Field Command, Defense Nuclear Agency (FCDNA), Kirtland Air Force Base, Albuquerque, New Mexico 87115; and Office of the Commander, Enewetak Atoll, Marshall Islands.

Categories of individuals covered by the system:

All employees, contractors, visitors or anyone else who is known to enter the AFRRI building. At FCDNA, all DNA employees who work in a position, the duties of which might result in exposure to radiation. At Enewetak, all individuals who work or visit the Atoll other than transient air crews and air passengers who do not leave the aircraft. Uniformed Services University of the Health Sciences, all employees, students, visitors, contractors or anyone else known to enter a radiation environment at Uniform Services University of the Health Sciences (USUHS).

Categories of records in the system:

For employees at AFRRI, FCDNA, and USUHS file contains personal information consisting of name, social security number, date of birth, current and previous radiation exposure, history and places of employment and when exposures occurred. For others, at AFRRI, FCDNA and USUHS file contains name, social security number, date of birth, current employer, citizenship, and current exposure history. For all, at AFRRI, FCDNA and USUHS information on pregnancy and pacemaker. Enewetak files will contain personal information consisting of name, social security number, date of birth, current and previous radiation exposure history, areas insited or worked, dates of arrival and departure, and citizenship.

Authority for maintenance of the system:

Atomic Energy Act of 1954, 42 USC 2013, Military Construction Appropriation Act of 1977 (P.L. 94-367) and DNA OPLAN 600-77. 'Cleanup of Enewetak Atoll'.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

To document the degree of exposure to radiation experienced by an individual; to support legal or medical claims for or against the government; to measure quality of the radiation protection program; to provide exposure history to subsequent employers; to provide history to requesting individuals.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

At AFRRI: 5' by 7' cards filed at reception desk, room 3113, 8'x10-1/2' paper filed in rooms 1420 and 1422. At FCDNA, 8'x10 1/2' papers are filed in a metal file cabinet in Bldg 364. At Enewetak: 5'x7' cards filed in a metal file cabinet in the Enewetak Commander's office.

Retrievability:

Alphabetical by last name of individual.

Safeguards:

AFRRI - Kept in a controlled access building which is protected by an intrusion alarm system.

FCDNA - Controlled access building which is protected by an intrusion alarm system.

Enewetak - Locked and secured in Enewetak Commander's office.

Retention and disposal:

For employees - permanently. For visitors - retired after 2 years to record holding area for permanent retention. For foreign visitors, records are sent to State Department for retention. All Enewetak records will be maintained permanently.

System manager(s) and address:

AFRRI and USUHS - Chairman, Radiation Safety Department, Armed Forces Radiobiology Research Institute, Bethesda, MD 20014.

Field Command, DNA and Enewetak Atoll, MI - Health Physicist, Logistics Directorate, Field Command, Defense Nuclear Agency, Albuquerque, NM 87115.

Notification procedure:

Requests should be addressed to the SYSMANAGER.

Record access procedures:

Individual can obtain assistance in gaining access from the SYSMANAGER.

Contesting record procedures:

The Agency's rules for contesting contents and appealing initial determinations may be obtained from SYSMANAGER.

Record source categories:

AFRRI, FCDNA, and USUHS information voluntarily submitted by individual. Enewetak information as required to be submitted by individual. Additional information added as data is collected.

Systems exempted from certain provisions of the act:

None

HDNA 609-03

System name:

Personnel Exposed to Radiation from Atmospheric Nuclear Tests

System location:

Headquarters, Defense Nuclear Agency, Washington D.C. 20305 - main computer location.

Categories of individuals covered by the system:

All DoD and DoD affliated personnel military and civilian, who participated in the United States Government atmospheric nuclear test programs in the Pacific and at the Nevada Test Site.

Categories of records in the system:

Personal information consisting of name, rank, service number, social security number, last known or current address, dates of test participation, exposure data, and unit of assignment.

Authority for maintenance of the system:

Atomic Energy Act of 1954, 42 U.S.C. 2013 and Tasking Memorandum from Office of the Secretary of Defense to the Director, Defense Nuclear Agency dated 28 Jan 78, Subject: 'DoD Personnel Participation in Atomospheric Nuclear Weapons Testing'

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Department of Defense Components-For the purpose of preparing histories of atmospheric nuclear test participation and for use in litigation between test participants or their representatives and the Department of Defense.

Defense Nuclear Agency Contractors-For the purpose of assisting DoD components in preparation of histories of atmospheric nuclear test participation and responding to the enquries and concerns of individuals who may have participated in the test programs and/or their representatives.

National Research Council and the Center for Disease Control-For the limited purpose of conducting epidemiological studies of the effects of ionizing radiation from the atmospheric nuclear weapons tests on DoD participants in those tests.

Department of Energy-For the limited purpose of identifying AEC and AEC-contractor Personnel exposed to ionizing radiation during nuclear testing; and for conducting epidemiological studies of radiation effects of individuals so identified; and for use in litigation between the DoD and any of the individuals so identified.

Department of Transportation-For the limited purpose of identifying DOT and DOT-affiliated personnel exposed to ionizing radiation during nuclear testing and for use in litigation between the DOT and any of the individuals so identified.

Veterans Administration-For use in litigation between the VA and individuals and/or their representatives are alleging service-connected disabilities as a result of said exposure.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders; computer magnetic tape disks and printouts in secure computer facility.

Retrievability:

Paper records filed in folders and computer magnetic tape and disk retrieved by SSN and name.

Safeguards:

Paper records are filed in folders stored in locked security safes. Mag tapes stored in vault in the computer area.

Retention and disposal:

Paper records are retained until information is transferred to magnetic tapes, then destroyed. Magnetic-tapes and disks are retained indefinitly.

System manager(s) and address:

Director, Defense Nuclear Agency, ATTN: Privacy Act Officer, Washington, D.C. 20305.

Notification procedure:

Information may be obtained from the SYSMANAGER.

Record access procedures:

Requests should be addressed to the SYSMANAGER.

Contesting record procedures:

Requests from individuals should be addressed to the same address as stated in the notification section above.

Record source categories:

From DNA Form 10, searches of DoD records by other DoD components, and from individuals voluntarily contacting DNA by phone or mail.

Systems exempted from certain provisions of the act:

JOJCS002MILPERS

System name:

Military Personnel Files

System location:

Military Personnel Branch, Personnel Division, Directorate of Administrative Services, Organization for the Joint Chiefs of Staff, The Pentagon, Washington, D. C. 20301.

Categories of individuals covered by the system:

All military personnel assigned to, attached to or on temporary duty with the Organization of the Joint Chiefs of Staff.

Categories of records in the system:

Files contain personal information which has been extracted from the individual's official Military Personnel File. Files contain information pertaining to, but not limited to, name, grade, service number, service job title, expected date of arrival for duty with the Organization of the Joint Chiefs of Staff, expected date of departure from the Organization of the Joint Chiefs of Staff.

Authority for maintenance of the system:

Title 10, United States Code, Chapter 5, Sections 141-143.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The Military Personnel Branch, Directorate of Administrative Services, Organization of the Joint Chiefs of Staff-To perform administrative functions required on individuals prior to their assignment to, during their assignment to, and after their assignment to the Organization of the Joint Chiefs of Staff. Uses include, but are not limited to, knowing when an individual will arrive, what agency they will be assigned to, who they will replace and when an individual will depart.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders; paper card files; ringed binders.

Retrievability:

Filed alphabetically by last name of individual, filed by agency; filed by requisition number.

Safeguards:

Building employs security guards. Records are stored in file cabinets. The room(s) are locked when unattended.

Retention and disposal:

Files are retained in active file until individual departs the Organization of the Joint Chiefs of Staff. Upon departure, the individual's file is placed in the inactive file. The file is retained for approximately one year.

System manager(s) and address:

Chief, Military Personnel Branch, Personnel Division, Directorate of Administrative Services, Organization of the Joint Chiefs of Staff.

Notification procedure:

Information may be obtained from:
Chief, Military Personnel Branch
Personnel Division
Directorate of Administrative Services
Organization of the Joint Chiefs of Staff
The Pentagon
Washington, D. C. 20301
Telephone: 202-697-3540

Record access procedures:

Request from individuals should be addressed to: Chief, Military Personnel Branch, Organization of the Joint Chiefs of Staff, The Pentagon, Washington, D. C. 20301.

Written request for information should contain the full name of the individual, current address, and telephone number.

For personal visits, the individual should be able to provide some acceptable identification card.

Contesting record procedures:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

Record source categories:

Source of information is the individual and the individual's Official Military Personnel File.

Systems exempted from certain provisions of the act:

DEFENSE COMMUNICATIONS AGENCY

KEUR.09

System name:

NONCOMBATANT Information Card, AEZ Form 6-106.

System location:

Management Support Division, Defense Communications Agency, European Area, (DCA-EUR), APO New York 09131.

Categories of individuals covered by the system:

(1) All legal dependents of United States Forces personnel
(2) United States civilian employees of DoD Agencies and their dependents
(3) Department of Defense or a military service department sponsored United States technical representatives
(4) Bonafide members of households of United States Forces personnel and of persons in (2) and (3) above
(5) United States personnel who are special invitees possessing current Department of Defense or a military service department invitational travel orders.
(6) Dependents of United States personnel assigned to United States elements of any North Atlantic Treaty Organization military headquarters or agency when common facilities are used and that the Secretary of Defense has authorized to receive United States support
(7) Other United States nongovernmental, nonmilitary individuals and agencies in oversea military commands for whom military logistical support is authorized in joint military regulations (e.g., USO, American Red Cross).

Categories of records in the system:

AEZ Form 6-106, Noncombatant Information Card. It contains information on the following:

Sponsor. Name, grade, date arrived in theater, data of return from overseas; SSAN; organization and duty section; occupation specialty; branch of service or agency; military post or base name and city location; building number; room number; duty phone; ZIP Code; and APO or FPO.

Noncombatant. Local residence street number and name and city; area; building number; apartment number; home phone; ZIP Code; date assigned; Continental United States residence street number and name or Post Office Box number; city; state or terriroty; and ZIP Code.

Vehicle. vehicle number(s) and make(s); year(s); and capacity.

Names of all noncombatants. for each: passport number; SSAN; relationship; month and year of birth; whether or not has an identification tag; immunization record; and if or if not a driver of vehicle.

Briefings. Briefing by supervisor to sponsor; warden to noncombatant; route reconnaissance; and noncombatant Evacuation Operations rehersal. For each of the above items, dates information given; by whom given; frequency of review items; date and signature of sponsor and supervisor for each of the items to authenticate that all above items reviewed as required.

Authority for maintenance of the system:

Title 10, U.S.C., Section 3012.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Used by the Chief, Management Support Division, to verify security clearance status, initiate personnel actions such as effectiveness reports, changes in position, title or assignment; record of additional

Records are used by staff, administrative and operating officials to: prepare individual administrative transactions; make decisions on the rights, benefits, entitlements and the utilization of individuals; provide

Correspondence from requester, and documents related to the receipt, processing and final disposition of the request.

Authority for maintenance of the system:

Title 10, U.S.C., Section 3012.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Used by the Chief, Management Support Division, to determine preparedness of noncombatants for evacuation, if required.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Information is recorded on 8 x 10 1/2 cardboard cards and filed in notebook binder.

Retrievability:

Information is retrieved manually by name.

Safeguards:

Records are filed in file cabinet and maintained in a restricted area which is accessible only to authorized personnel who are required to be in the area where records are kept.

Retention and disposal:

Records are not permanent. Records are updated as changes occur and destroyed on departure of the sponsor from DCA-Europe.

System manager(s) and address:

Chief, Management Support Division, DCA-Europe, APO New York 09131.

Notification procedure:

Requests from individuals should be addressed to the Chief, Management Support Division, DCA European Area, APO New York 09131. The full name of the requesting individual will be required to determine if the system contains a record of the requester. As proof of identity, the requester, if assigned to DCA European Area, must present a current DCA identification badge or current motor vehicle operator's license. If not assigned to the DCA European Area but still in the military service the requester must provide a current motor vehicle driver's license or Social Security Account Number. If no longer affiliated with the Department of Defense must provide Social Security Account Number.

Record access procedures:

Contact the Chief, Management Support Division, DCA European Area, APO New York 09131, for assistance.

Contesting record procedures:

The DCA rules for access to records for contesting contents and appealing initial determination by the individual concerned are contained in DCAI 210-225-2 or in C.F.R. Part 287a.

Record source categories:

Information is furnished by the individual concerned; or from official records provided by personnel offices of the 1141st US Air Force Special Activities Squadron; Headquarters, European Command, Army, Navy, Air Force and Marine Corps Elements; Stuttgart Area Civilian Personnel Office; and the US Finance and Accounting Office, Europe.

Systems exempted from certain provisions of the act:

None.

KEUR.10

System name:

Personnel File.

System location:

Management Support Division, Defense Communications Agency, (DCA) European Area, APO New York 09131.

Categories of individuals covered by the system:

All military and civilian personnel assigned to Headquarters, DCA European Area.

Categories of records in the system:

Records consist of security clearance data (Air Force Form 47: Certificate of Eligibility and Record of Personnel Security Clearance, and DCA Form 548: Status of Clearance); record of requests for changes to assignment; job title and position (Air Force Form 2095: Assignment/Personnel Action, and Standard Form 52: Request for personnel action); leave data; special orders published by the DCA European Area pertaining to additional duties; and sponsorship information.

Authority for maintenance of the system:

Title 10, U.S.C. 136(b).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Used by the Chief, Management Support Division, to verify security clearance status, initiate personnel actions such as effectiveness reports, changes in position, title or assignment; record of additional duties, and related routine personnel and administrative matters.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records filed in folder.

Retrievability:

Information is retrieved by name.

Safeguards:

Records are maintained in a safe accessible only to personnel authorized in the performance of their official duties.

Retention and disposal:

Records are maintained one year after departure of the individual from the DCA-European Area and then destroyed.

System manager(s) and address:

Chief, Management Support Division, DCA European Area, APO New York 09131.

Notification procedure:

Requests from individuals should be addressed to the Chief, Management Support Division, DCA European Area, APO New York 09131. The full name of the requesting individual will be required to determine if the system contains a record of the requester. As proof of identity, the requester, if assigned to DCA European Area, must present a current DCA identification badge or current motor vehicle driver's license or Social Security Account Number. If no longer affiliated with the Department of Defense must provide Social Security Account Number.

Record access procedures:

Contact the Chief, Management Support Division, DCA European Area, APO New York 09131, for assistance.

Contesting record procedures:

The Defense Communications Agency rules for access to records for contesting contents and appealing initial determination by the individual concerned are contained in DCAI 210-225-2 or in 32 C.F.R. Part 287a.

Record source categories:

Information is furnished by the individual concerned; or from official records provided by personnel offices of the 1141st US Air Force Special Activities Squadron; Headquarters, European Command, Army, Navy, Air Force and Marine Corps Elements; Stuttgart Area Civilian Personnel Office; and the US Finance and Accounting Office, Europe.

Systems exempted from certain provisions of the act:

None.

DEFENSE INTELLIGENCE AGENCY

L DIA 0005

System name:

Personnel Management Information System (PMIS).

System location:

Defense Intelligence Agency, Washington, D.C. 20301.

Categories of individuals covered by the system:

Current and former military and civilian employees of DIA.

Categories of records in the system:

This system consists of a variety of personnel, security, education, training and financial employment related records.

Authority for maintenance of the system:

Pursuant to the authority contained in the National Security Act of 1947, 10 U.S.C. 133 d, the Secretary of Defense issued Department of Defense Directive 5105.21 of August 1, 1961, super- seded by Department of Defense Directive 5105.21 of May 19, 1977, creating the Defense Intel- ligence Agency as a separate Agency of the Department of Defense under his direction and herein charged the Agency's Director with the responsibility for the maintenance of necessary and appropriate records.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Records are used by staff, administrative and operating officials to: prepare individual administrative transactions; make decisions on the rights, benefits, entitlements and the utilization of individuals; provide a data source for the productions of reports, statistical surveys, rosters, documentation and studies required for the orderly personnel administration with DIA. Information will be disclosed to such other federal agencies, state and local governments, as may have a legitimate use for such information and which agrees to apply appropriate safeguards to protect data so provided and which is consistent with the conditions or reasonable expectations of use and disclosure under which the information was provided, collected or obtained.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Automated, maintained on magnetic tape and manual in paper files and microfilms.

Retrievability:

By name or social security account number.

Safeguards:

Records are maintained in a building protected by security guards and are stored in vaults, safes or locked cabinets and are accessible only to authorized personnel who are properly screened, cleared and trained in the protection of privacy information.

Retention and disposal:

Paper files are destroyed when employment with the Agency ceases. Microfilm records are destroyed when replaced with an updated film and magnetic tape files are retained indefi- nitely as a permanent record.

System manager(s) and address:

Assistant Deputy Director for Personnel, Defense Intelligence Agency, Washington, D.C. 20301.

Notification procedure:

To obtain information as to whether this system of records contains information pertaining to yourself, you must submit a written request to: Secretariat, Defense Intelligence Agency, Washington, D.C. 20301. You must include in your request: your full name, current address, telephone number and social security account number or date of birth. Requests can be mailed to address indicated above or personally delivered to room 3E215, Pentagon, Washington, D.C.

Record access procedures:

All requests for copies of records pertaining to yourself must be in writing. You must include in your requests: your full name, current address, telephone number and social security account number or date of birth. Also, you should state that whatever cost is involved is acceptable or acceptable up to a specified limit. Requests can be mailed to: Secretariat, Defense Intelligence Agency, Washington, D.C. 20301, or personally delivered to room 3E215, Pentagon, Washington, D.C.

Contesting record procedures:

An individual who disagrees with the Agency's initial determination, with respect to his or her request, may file a request for administrative review of that determination. Requests are to be in writing and made within 30 days of the date of notification of the initial determina- tion. The requester shall provide a statement setting forth the reasons for his or her dis- agreement with the initial determination and provide such additional material to support his or her appeal. Requests can be mailed to: Secretariat, Defense Intelligence Agency, Washing- ton, D.C. 20301, or personally delivered to room 3E215, Pentagon, Washington, D.C.

Record source categories:

Agency officials, employees, educational institutions and other government agencies.

L DIA 0330

System name:

Civilian Payroll, Leave and Travel Disbursement

System location:

Defense Intelligence Agency, Washington, D.C. 20301.

Categories of individuals covered by the system:

Current and former civilian personnel of the DIA.

Categories of records in the system:

This system consists of records which document and support employee related transactions in the area of pay compensation, claims for reimbursement, leave entitlement, statutory and administrative deductions, settlement of debts and documents designating certifying officials.

Authority for maintenance of the system:

Pursuant to the authority contained in the National Security Act of 1947, 10 U.S.C. 133 d, the Secretary of Defense issued Department of Defense Directive 5105.21 of August 1, 1961, super- seded by Department of Defense Directive 5105.21 of May 19, 1977, creating the Defense Intel- ligence Agency as a separate Agency of the Department of Defense under his direction and herein charged the Agency's Director with the responsibility for the maintenance of necessary and appropriate records.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Records are used by Agency personnel and the U.S. Army Military District of Washington Finance and Accounting Office to: compute, make and record individual employee's payment transactions; determine leave entitlements; record and remit deductions for the Civil Service Commission Retire- ment System and the Social Security Fund; determine entitlements for reimbursement of travel and other expenses for official business; report tax information to federal, state and local taxing authorities as required by statute and to remit and record such transactions; record and remit deductions for life and health insurance and such other deductions as required or authorized by the individual; be used as a basis for the settlement of pay or debt disputes; provide such verification as required by statute or administrative directive.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Manual in paper files.

Retrievability:

By name.

Safeguards:

Records are maintained in a building protected by security guards and are stored in vaults, safes or locked cabinets and are accessible only to authorized personnel who are properly screened, cleared and trained in the protection of privacy information.

Retention and disposal:

Permanent records are cut off each fiscal year and held for 2 years and then retired to the Washington National Record Center. Temporary records are destroyed in 4 years or 2 years after a General Account Office audit.

L DIA 0590

System name:

Defense Intelligence Special Career Automated System (DISCAS).

System location:

Defense Intelligence Agency, Washington, D.C. 20301.

Categories of individuals covered by the system:

DoD civilian positions and employee grades GS-05 and above in the GS-0132 intelligence series, scientific and technical series and other related professional series which are assigned to an organizational component performing an intelligence functions. Crypto- logic personnel and those enrolled in the National Security Agency (NSA) career system are excluded.

Categories of records in the system:

Data on employment history, qualification and skills and performance appraisals.

Authority for maintenance of the system:

Pursuant to the authority contained in the National Security Act of 1947, 10 U.S.C. 133 d, the Secretary of Defense issued Department of Defense Directive 5105.21 of August 1, 1961, super- seded by Department of Defense Directive 5105.21 of May 19, 1977, creating the Defense Intel- ligence Agency as a separate Agency of the Department of Defense under his direction and herein charged the Agency's Director with the responsibility for the maintenance of necessary and appropriate records.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The Defense Intelligence Special Career Automated System Activity (DISCASA) forwards inquiries to employees regarding their availability for specific position vacancies when requested by the DoD component. DISCASA furnishes referral listings of DoD eligibles to appropriate offi- cials and managers for particular vacancy selection. DISCASA periodically furnishes copies of individual employee records for review and update by employees or servicing civilian person- nel offices. DISCASA will maintain files and records for historical or user research purposes such as annual reports for DoD components or management information furnished to appropriate DoD users.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Automated, maintained on magnetic tape and manual in paper files.

Retrievability:

By name or social security account number.

Safeguards:

Records are maintained in a building protected by security guards and are stored in vaults, safes or locked cabinets and are accessible only to authorized personnel who are properly screened, cleared and trained in the protection of privacy information.

Retention and disposal:

Records are temporary. They are retained until the employee concludes his DoD intelligence career at which time they are retired to an inactive file for 1 year and then destroyed.

L DIA 0800

System name:

Operation Record System

System location:

Defense Intelligence Agency, Washington, D.C. 20301.

Categories of individuals covered by the system:

Individuals involved in foreign intelligence and/or training activities conducted by the Department of Defense; who are of interest either because of their actual, apparent, or potential use.

Categories of records in the system:

Categories of records include operational, biographic, policy, management, training, and administrative matters related to the foreign intelligence activities of the Department of Defense.

Authority for maintenance of the system:

Pursuant to the authority contained in the National Security Act of 1947, 10 U.S.C. 133 d, the Secretary of Defense issued Department of Defense Directive 5105.21 of August 1, 1961, super- seded by Department of Defense Directive 5105.21 of May 19, 1977, creating the Defense Intel- ligence Agency as a separate Agency of the Department of Defense under his direction and herein charged the Agency's Director with the responsibility for the maintenance of necessary and appropriate records. Executive Order 12036, United States Intelligence Activities, January 24, 1978.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

To provide information within the Department of Defense and other federal agencies for the conduct of foreign intelligence operations and to provide staff management over foreign intel- ligence training conducted by the Department of Defense.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Automated on magnetic tapes and discs, microfilm and operture cards and manual in paper files.

Retrievability:

By name.

Safeguards:

Records are maintained in a building protected by security guards and are stored in vaults, safes or locked cabinets and are accessible only to authorized personnel who are properly screened, cleared and trained in the protection of privacy information.

Retention and disposal:

Permanent records are retired to the Washington National Record Center upon completion of the project and temporary records are destroyed.

L DIA 0801

System name:

Defense Attache System Personnel Information File.

System location:

Defense Intelligence Agency, Washington, D.C. 20301.

Categories of individuals covered by the system:

Military and civilian personnel and their dependents, nominated for assignment to the Defense Attache System.

Categories of records in the system:

This system consists of a variety of personnel and directory data, security access, education, training, financial and health information related to the individual's assign- ment with the Defense Attache System.

Authority for maintenance of the system:

Pursuant to the authority contained in the National Security Act of 1947, 10 U.S.C. 133 d, the Secretary of Defense issued Department of Defense Directive 5105.21 of August 1, 1961, super- seded by Department of Defense Directive 5105.21 of May 19, 1977, creating the Defense Intel- ligence Agency as a separate Agency of the Department of Defense under his direction and herein charged the Agency's Director with the responsibility for the maintenance of necessary and appropriate records.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Records are used by staff, administrative and operating officials to: prepare individual administrative transactions; make decisions on the rights, benefits entitlements and the utilization of individuals; provide a data source for the production of reports, statistical surveys, rosters, documentation and studies required for the orderly personnel administration within the Defense Attache System. Information may be provided to host country, Department of State, Central Intelligence Agency, Department of Justice and the Department of Treasury.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Automated on magnetic tape and manual in paper files and cards.

Retrievability:

By name.

Safeguards:

Records are maintained in a building protected by security guards and are stored in vaults, safes or locked cabinets and are accessible only to authorized personnel who are properly screened, cleared and trained in the protection of privacy information.

Retention and disposal:

Records are maintained for 1 year beyond the individual's tour completion date and then destroyed.

System manager(s) and address:

Assistant Deputy Director for Personnel, Defense Intelligence Agency, Washington, D.C. 20301.

Notification procedure:

To obtain information as to whether this system of records contains information pertaining to yourself, you must submit a written request to: Secretariat, Defense Intelligence Agency, Washington, D.C. 20301. You must include in your request: your full name, current address, telephone number and social security account number or date of birth. Requests can be mailed to address indicated above or personally delivered to room 3E215, Pentagon, Washington, D.C.

Record access procedures:

All requests for copies of records pertaining to yourself must be in writing. You must include in your requests: your full name, current address, telephone number and social security account number or date of birth. Also, you should state that whatever cost is involved is acceptable or acceptable up to a specified limit. Requests can be mailed to: Secretariat, Defense Intelligence Agency, Washington, D.C. 20301, or personally delivered to room 3E215, Pentagon, Washington, D.C.

Contesting record procedures:

An individual who disagrees with the Agency's initial determination, with respect to his or her request, may file a request for administrative review of that determination. Requests are to be in writing and made within 30 days of the date of notification of the initial determina- tion. The requester shall provide a statement setting forth the reasons for his or her dis- agreement with the initial determination and provide such additional material to support his or her appeal. L DIA 0813

System name:

Bibliographic Data Index System

System location:

Defense Intelligence Agency, Washington, D.C. 20301.

Categories of individuals covered by the system:

Individuals who have published works of general interest to the Agency, and individuals involved in foreign intelligence activities.

Categories of records in the system:

An index of names of authors, title of published works, subject matter of writing and the location of source documents of open source literature and intelligence reports.

Authority for maintenance of the system:

Pursuant to the authority contained in the National Security Act of 1947, 10 U.S.C. 133 d, the Secretary of Defense issued Department of Defense Directive 5105.21 of August 1, 1961, super- seded by Department of Defense Directive 5105.21 of May 19, 1977, creating the Defense Intel- ligence Agency as a separate Agency of the Department of Defense under his direction and herein charged the Agency's Director with the responsibility for the maintenance of necessary and appropriate records.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Serves as a traditional library reference service for open source literature and intelligence reports. Information is used by agency officials, other federal agencies and contract person- nel to do research on intelligence subjects related to foreign intelligence activities.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Automated on magnetic tape and disc.

Retrievability:

By name

Safeguards:

Records are maintained in a building protected by security guards and are stored in vaults, safes or locked cabinets and are accessible only to authorized personnel who are properly screened, cleared and trained in the protection of privacy information.

Retention and disposal:

Open source literature is destroyed once material is out dated. Intelligence reports are retained for 2 years and retired to the Washington National Record Center for permanent retention

System manager(s) and address:

The MMS master files consist of a complete magnetic record for each Marine serving on active duty for a period in excess of 30 days. The Remote Entry Data Display Terminal (REDDT) is a subsystem of MMS. It has the capability to directly access an extract of the master file. The procedure used to establish the initial computer record and add the individual to the Marine Corps strength is the accession process. The accession of recruits is accomplished through the Recruit Accession Management Subsystem (RAMS). The Commissioning Accession Management Subsystem (CAMS) is designed to access all officer records into JUMPS/MMS. Accession/ reaccession of all nonrecruit enlisted records is accomplished through the Headquarters Accession Management Subsystem (HAMS) at Headquarters, U S Marine Corps. The Accession Transcription Form (ATF) is an OCR form which contains information extracted from the enlistment contract and transfer/assignment to active duty orders. The ATF is completed and processed to establish the computer record. The Manpower Management Information System (MMIS) consists of

models and processes within MMS These models and processes support manpower planners and programmers to optimize assignments to unaccompanied overseas tours, predict enlisted population by grade and military occupational specialty (MOS) and to test various policies related to unrestricted officer promotion planning.

Some manual files containing substantiating documents and other data relative to each member's JUMPS/MMS record are maintained. These file folders may contain any part of the JUMPS/MMS record and any one or more of the following documents: Military Pay Record, Military Payroll Money List, Military Pay Voucher, Certificate for Performance of Hazardous Duty, Application for Arrears in Pay, Cash Collection Voucher, Authorization/Designation for Emergency Pay and Allowances, Wage and Tax Statement, Employees Withholding Exemption Certificate (IRS W-4), Employees Withholding Exemption Certificate (IRS W-4E), Notice of Levy, General Accounting Office Notice of Exemption, Dependency Certificate (Wife or Child Under 21 Years), Dependency Certificate (Mother or Father), Dependency Certificate (Unmarried Child Over 21 Years), Dependency Application, Clothing Checkage, Statement to Substantiate Payment of Family Separation Allowance, Government Property Checkage, Personal Financial Records, Unit Diary, Dependent Travel Record, Allotment/Bond Authorization, Certificate for Cost of Living and/or Housing Allowance, Certificate for Temporary Lodging Allowance, Removal of Mark of Desertion, Field Rations Certificate, Liquidation of Indebtedness, Initial Uniform Allowance for Officers, Additional Uniform Allowance for Officers, Excess Weight-Household Goods Shipment, Hospital Rations Checkage, Excess Expense Involving Movement of House Trailer, Transportation Checkage, Meal Ticket Checkage, Advance Pay, Advance Pay and Allowances, Discharge Gratuity, Combat Arms Bonus, Health Care Coverage, Government Quarters Termination and Assignment. Inadequate Quarters Termination and Assignment, Lump-Sum Leave, Rations Commuted to Private Mess, Reenlistment Bonus, Variable Reenlistment Bonus, Selective Reenlistment Bonus, Sick Misconduct, Prorated Rations, Supplemental Rations, Basic Allowance for Quarters (Own Right).

Authority for maintenance of the system:

Title 10 and 37, U S Code Section 5031 and 5201

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Headquarters, U. S. Marine Corps and Marine Corps commands, activities and organizations - By officials and employees of the Marine Corps in the performance of their assigned duties in matters relating to a Marine's automated personnel and/or pay record.

Department of Defense and its components - By officials and employees of the Department in the performance of their official duties.

The Attorney General of the U S - By officials and employees of the Office of the Attorney General in connection with litigation, law enforcement or other matters under the direct jurisdiction of the Department of Justice or as carried out as the legal representative of the Executive Branch agencies.

Courts - By officials of duly established local, state and federal courts as a result of court order pertaining to matters properly within the purview of said court.

Congress of the U S - By the Senate or the House of Representatives of the U S or any committee or subcommittee thereof, any joint committee of Congress or subcommittee of joint committee on matters within their jurisdiction requiring disclosure of the files.

The Comptroller General of the U S - By the Comptroller General or any of his authorized representatives in the course of the performance of duties of the General Accounting Office relating to the Marine Corps.

By officials and employees of the American Red Cross and the Navy Relief Society in the performance of their duties. Access will be limited to those portions of the member's record required to effectively assist the member.

Federal, state and local government agencies - By officials and employees of federal, state and local government through official request for information with respect to law enforcement, investigatory procedures, criminal prosecution, civil court action and regulatory order.

To provide information to another agency or to an instrumentality of any governmental jurisdiction within or under the control of the United States which has been authorized by law to conduct law enforcement activities pursuant to a request that the agency inititate criminal or civil action against an individual on behalf of the U. S. Marine Corps, the Department of the Navy, or the Department of Defense.

To provide information to individuals pursuant to a request for assistance in a criminal or civil action against a member of the U. S. Marine Corps, by the U. S. Marine Corps, the Department of the Navy, or the Department of Defense.

Department of Health, Education and Welfare (DHEW) - Disclosure of the name, rank or grade, and social security account number of each Marine Corps active duty military member to the Inspector General of DHEW for the specific purpose of comparison with appropriate rolls reflecting recipients of Aid to Families with Dependent Children (AFDC).

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Data is recorded on magnetic records and discs, punch cards, computer printouts, microform, file folders, and other documents.

Retrievability:

The data contained in magnetic records can be displayed on cathode-ray tubes, it can be computer printed on paper, and it can be converted to microform for information retrieval; the data in the supporting file folders and other manual records is retrieved manually. Computerized and conventional indices are required to retrieve individual records from the system. Normally, all types of records are retrieved by Social Security Number and name.

Safeguards:

Building management employs security guards; building is locked nights and holidays. Authorized personnel may enter and leave the building during nonworking hours but must sign in and out. Records are maintained in areas accessible only to authorized personnel that are properly screened, cleared and trained.

Access to personal information is limited to authorized personnel with a need-to-know. Access is restricted to specific applications programs, records, and files to which personnel have a specific and recorded need-to-know. Online data sets (both tape and disc) pertaining to personal information are password protected, areas are controlled and access lists are used. The files are also protected at a level appropriate to the type of information being processed.

Retention and disposal:

Magnetic records are maintained on all Marine Corps personnel while they are in service, and for a period of 4 months after they are separated from the service. Paper and film records are maintained for a period of 10 years after the final transaction. End calendar and fiscal year 'snapshots' of the MMS data base are maintained indefinitely in magnetic form at Headquarters, U. S. Marine Corps.

System manager(s) and address:

Commandant of the Marine Corps, Headquarters U S Marine Corps, Washington, D C 20380.

Notification procedure:

Requests from individuals for information concerning pay related matters should be addressed to the Commandant of the Marine Corps (Code FD). Requests from individuals for information concerning personnel matters should be addressed to the Commandant of the Marine Corps (Code MP).

Requesting individual must supply full name and Social Security Number.

The requester may visit the Marine Corps Finance Center, 1500 East Bannister Road, Kansas City, Missouri 64197 to obtain information on whether the system contains records pertaining to him or her.

In order to personally visit the above address and obtain information, individuals must present a military identification card, a driver's license, or other suitable proof of identity.

Record access procedures:

Information on JUMPS may be obtained from the member's local disbursing officer. Information on MMS may be obtained from the member's immediate commanding officer. Requests for information from persons no longer in service should be signed by the person requesting the information. Dates of service, Social Security Number, and full name of requester should be printed or typed on the request. It should be sent to the Marine Corps Finance Center, 1500 East Bannister Road, Kansas City, Missouri 64197.

Contesting record procedures:

The agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned may be obtained from the SYSMANAGER.

Record source categories:

Recruiting offices, disbursing offices, administrative offices, and the individual Marine are the principle sources of the information contained in the JUMPS/MMS record for that person.

Systems exempted from certain provisions of the act:

None

Used for extraction or compilation of statistical data and reports for management studies and statistical analyses for use internally or externally as required by Department of Defense or by government agencies.

Authority for maintenance of the system:

Title 5, U S Code 301

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Computation of retired pay, retainer pay, and survivor annuity accounts, perform audit of accounts, reply to correspondence, etc.

Creation of printed reports, records, checks, microforms, magnetic files, etc., based on information available in the system. This output is used by various departments of the Marine Corps for pay, personnel, audit, and other purposes. Some of this information is made available to authorized local, state, and Federal agencies.

Displaying all or part of any selected record on a cathode-ray tube for research, audit, update, and similar purposes.

Used for extraction or compilation of statistical data and reports for management studies and statistical analyses for use internally or externally as required by Department of Defense or by government agencies.

By officials and employees of the American Red Cross and the Navy Relief Society in the performance of their duties. Access will be limited to those portions of the member's record required to effectively assist the member.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Data is recorded on magnetic records, punch cards, computer printouts, microform, file folders, and other documents.

Retrievability:

The data contained in magnetic records can be displayed on cathode-ray tubes, it can be computer printed on paper, and it can be converted to microform for information retrieval; the data in the supporting file folders and other manual records is retrieved manually. Normally all types of records are retrieved by SSN and name.

Safeguards:

Building management employees security guards; building is locked nights and holidays. Authorized personnel may enter and leave the building during nonworking hours, but must sign in and out.

Retention and disposal:

Magnetic records are maintained on all persons who are eligible for retired pay, retainer pay, and survivor annuities while they are alive and for a period of 6 months after that person dies or ceases to be eligible. Paper and film records are maintained for a period of 10 years after the final transaction.

System manager(s) and address:

Commandant of the Marine Corps (Code FD), Headquarters, U S Marine Corps, Washington, D C 20380.

Notification procedure:

Requests from individuals for information should be referred to the SYSMANAGER.

Requesting individual must supply full name and SSN
